Reading : Fill in the Blanks	226
Listening	260
Summarize Spoken Text	260
Fill in the Blanks	269
Write From Dictation	278

1) Heart of World #1000696 New Prediction

Located at the heart of two world famous cities, Liverpool and London, Liverpool's excellence in teaching, learning, and research, first class facilities and outstanding support places the university in the top 1% of universities worldwide. The University of Liverpool will provide you with an inspiring student experience, in a diverse international community.

2) Elephant #1000211 New Prediction

The elephant is the largest living land mammal. During evolution, its skeleton has greatly altered from the usual mammal, design for two main reasons. One is to cope with the great weight of huge grinding cheek teeth and elongated tusk teeth, making the skull particularly massive. The other is to support the enormous bulk of such a huge body.

3) Yellow Color #1000047 New Prediction

Yellow is considered the most optimistic color, yet surprisingly, people lose their tempers most often in yellow rooms, and babies cry more in them. The reason may be that yellow is the hardest color on the eye. On the other hand, it speeds metabolism and enhances concentration. Think of yellow legal pads and post it notes.

4) Spelling System #1000019 New Prediction

The problem begins with the alphabet itself. Building a spelling system for English using letters that come from Latin despite the two languages not sharing exactly the same set of sounds is like building a playroom using an IKEA office set.

5) Pluto #1000008 New Prediction

Pluto lost its official status as a planet yesterday, when the International Astronomical Union downsized the solar system from 9 to 8 planets. Although there had been passionate debate at the IAU General Assembly Meeting in Prague about the definition of a planet and whether Pluto met the specifications the audience greeted the decision to exclude it with applause.

6) Immense Disparity #1000007 New Prediction

The core of the problem was the immense disparity between the country's productive capacity and the ability of people to consume. Great innovations in productive techniques during and after the war raised the output of industry beyond the purchasing capacity of U.S. farmers and wage earners.

7) Teaching Profession #1001636 Prediction

Teaching is indeed a challenging profession, yet it continues to attract and retain individuals year after year, many of whom remain in the field for five, ten, or even more years. This enduring commitment can be attributed to a combination of intrinsic motivations and the rewarding aspects of the profession.

8) Parent Teacher Conferences #1001635 Prediction

Schools host parent teacher conferences four times a year and it is important for families to attend. This is your chance to meet with teachers and ask questions about your child's progress. It can be helpful to write down questions ahead of time.

9) Digital Data #1001454 Prediction

A team of researchers has developed a custom built 'data to music' algorithm that can transform digital data into sound, making it easier to comprehend and analyze. The use of sound to represent data has the potential to revolutionize the way we interpret and understand complex information, particularly in fields such as science, medicine, and engineering.

10) Innovative Product #1001194 Prediction

An innovative new product or service can give a firm a head start over its rivals, which can be difficult for a new entrant to overcome. If the new technology is also patented, then other firms cannot simply copy its design. It is legally protected.

11) Tutor #1001184 Prediction

Your tutor helps you make the most of your time at university by giving you guidance and support along the way. All new students are allocated a personal tutor who will encourage you to get the most out of your course, direct you to other sources of support and help you achieve your goals.

12) Rates of Depression #1001183 Prediction

At a time when stress levels are soaring, rates of depression are increasing and the gap between rich and poor is ever widening. We believe that giving can play a positive role in helping people to feel connected to those around them and generate a sense of purpose and hope. When we give, we feel valued, useful and happy.

13) William Shakespeare #1001182 Prediction

380 years after his death, William Shakespeare remains the central author of the English speaking world; he is the most quoted poet and the most regularly produced playwright and now among the most popular screenwriters as well. Why is that, and who "is" he? Why do so many people think his writing is so great? What meanings did his plays have in his own time, and how do we read, speak, or listen to his words now?

14) Volcano Behaviours #1001173 Prediction

There were various explanations for volcano behaviour before the structure of the earth's mantle as a semisolid material was developed. For decades, awareness that compression and radioactive materials may be heat sources was discounted and volcanic action was often attributed to chemical reactions and a thin layer of molten rock near the surface.

15) Making Notes #1001170 Prediction

The whole purpose of making notes is to aid your learning. It is important to go back over them within a day of making them to make sure they make sense and make them legible for future revisions. Also, going back over them should highlight the key questions of areas in which you want to do further reading.

16) Baby Hearing #1001165 Prediction

Most babies start developing their hearing while still in the womb, prompting some hopeful parents to play classical music to their pregnant bellies. Some research even suggests that infants are listening to adult speech as early as 10 weeks before birth, gathering the basic building blocks of their family's native tongue.

17) **Carbon** #1001022 Prediction

Carbon is essential to life on earth, but scientists still struggle to grasp its complexities. Most research to date has focused on major sources of the greenhouse gas carbon dioxide, and the use of fossil fuels. A new study has come to the counter intuitive conclusion that plants might accumulate more carbon in the presence of predators and herbivores.

18) **Sharing Ideas** #1000994 Prediction

Many individuals have unwittingly contributed to this book through sharing ideas with us as colleagues, students, practitioners, tourists, and residents of destination areas. They are too numerous to thank individually. And indeed, it is not possible to isolate exactly their specific contributions.

19) **Flood Control** #1000992 Prediction

We have spent a lot of money over the last 70 years on flood control, and it's protected millions of people and has saved us billions of dollars. We've built dams to hold back the waters. We've built levees to keep the water off the people, and we've raised the ones that were originally started in 1718.

20) **Brain Efficiency** #1000976 Prediction

Efficiency is not your friend when it comes to cognitive growth. In order to keep our brains making new connections and keep them active, you need to keep moving on to another challenging activity as soon as you reach the point of mastery in the one you were engaging in.

21) **Psychology** #1000974 Prediction

Psychology is the study of cognition, emotions, and behaviour. Psychologists are involved in a variety of tasks. Many spend their careers designing and performing research to understand how people behave in specific situations, how and why we think the way we do, and how emotions develop and what impact they have on our interactions with others.

22) **Industry or Workplace** #1000941 Prediction

An industry or workplace often has its own terms for certain items, places, or groups of people, and university is no different. Here we have attempted to explain some of the terms you may come across on our websites that are specific to higher education.

23) **Dictionary** #1000934 Prediction

Written by 10 eminent professors, it has been updated to reflect the shifts in sociological thought over the last five years, making it the most comprehensive, authoritative, and contemporary dictionary available. It was essential reading for all students and teachers of sociologies and other related courses, and also for the general reader.

24) **Water** #1000599 Prediction

Using an X-ray laser, a research team has investigated how water heats up under extreme conditions. In the process, the scientists were able to observe water that remained liquid even at temperatures of more than 170 degrees Celsius. The investigation revealed an anomalous dynamic behaviour of water, which is of fundamental importance for investigations of sensitive samples using X-ray lasers.

25) The Royal Institution #1000554 Prediction

The Royal Institution is an organisation that has been around for 209 years. Many of the people that have worked here have been scientists themselves, including Michael Faraday. He made the discoveries that may be generating a using electricity much easier, making it possible for us all to switch on lights, cook for dinner, play games consoles much more.

26) Telecommunication #1000546 Prediction

Today, telecommunication is widespread and devices that assist the progress are common in many parts of the world. There is also a vast array of networks that connect these devices, including a computer, telephone, and cable networks. Computer communication across the Internet, such as email and instant messaging, is just one of many examples of telecommunication.

27) Visual Perception #1000532 Prediction

The corona virus pandemic has shifted many of our interactions online, with Zoom video calls replacing in person classes, work meetings, conferences, and other events. Will all that screen time damage our vision? Maybe not. It turns out that our visual perception is highly adaptable, according to new research.

28) High Quality of Life #1000511 Prediction

In spite of the spectacularly high quality of life for the vast majority of the people who live in the European Union, its inhabitant seems obsessed by the region's relative decline in the world. Slow economic growth rates and high unemployment have reinforced the impression that Europe is unhappy with today and unsure of tomorrow.

29) Method of Learning #1000501 Prediction

There is no single method of learning that guarantees success. How we learn that depends on many different factors. What works best for you will not necessarily be the same as the approach used for the other students even if they study the same course. We are all unique as learners, although some patterns emerge from any group of students.

30) A World Without Light #1000466 Prediction

Have you ever pictured a world without light? Just think how much we rely on man made light sources in our life. Without engineers, we wouldn't be able to live the way we do. No street lights, no TV, no computer displays, no house lights engineers design and build all these things.

31) Australian English (V2) #1000464 Prediction

Australians speak English of course. But for many tourists and even some locals, Australian English has only tenuous links with the mother tongue. Our speech is peppered with words and phrases whose arcane meanings are understood only by the native speaker. It is these colorful colloquialisms that Australian slang is yet to truly explain.

32) Lincoln #1000463 Prediction

Lincoln's apparently radical change of mind about his war power to emancipate slaves was caused by the escalating scope of the war, which convinced him that any measure to weaken the Confederacy and strengthen the Union war effort was justifiable as a military necessity.

33) Black Swan #1000455 Prediction

Before the discovery of Australia, people in the old world were convinced that all swans were white, an unassailable belief as it seemed completely confirmed by empirical evidence. The sighting of the first black swan might have been an interesting surprise for a few ornithologists, but that is not where the significance of the story lies.

34) Teenage Girls #1000450 Prediction

Teenage girls are continuing to outperform boys in English while the gender gap in achievements in math and science has almost disappeared. The figures show that last year 80% of 14 year old girls reached at least the expected level 5 in English, compared with 65% of boys. But in math, the girls are just 1% ahead of boys, while in science the difference is 2%.

35) Ozone Ascents #1000438 Prediction

A total of five ozone ascents were taken at Bharati station (Indian mission) Antarctica during April to June, 2016. As the stratospheric temperatures reduced to minus 82.24 Celsius on 20th June, 2016 indicating the formation of stratospheric clouds which may lead to depletion of the ozone concentration in the stratosphere, leading scientists at Bharati station feared that Montreal Accord has not succeeded to control emission of ozone depleting gases in the atmosphere.

36) Succulent Plants #1000292 Prediction

Most succulent plants are found in regions where there is little rainfall, dry air, plenty of sunshine, porous soils and high temperatures during part of the year. These conditions have caused changes in plant structures, which have resulted in greatly increased thickness of stems, leaves and sometimes roots, enabling them to store moisture from the infrequent rains.

37) Economic Planning #1000291 Prediction

Another method governments use to try and influence the private sector is economic planning. For a long time now, socialist and communist states have used planning as an alternative to the price mechanism, organizing production and distributing their resources according to social and strategic needs, rather than based on purely economic considerations.

38) The Ritual #1000289 Prediction

The ritual of the state opening of parliament still illustrates the basis of the British constitution. The sovereignty of the Royal Family has passed to the sovereignty of parliament, leaving the monarchy with the trappings of power, while prime ministers are still denied the kind of status that is given to American and French presidents.

39) Letter Writing #1000288 Prediction

While far fewer people these days write letters and therefore have less use for stamps, there are still a few categories of stamps which attract collectors. Stamps in common use for an indefinite period until the price goes up are called "definitive" issues, while a more collectible type of stamp is the "commemorative" issue, honoring people, events, and anniversaries.

40) Alexander The Great #1000287 Prediction

Before the time of Alexander the Great, the only eastern people who could be compared with the Greeks in the fields of science and philosophy were from the Indian sub continent. However, because so little is known about Indian chronology, it is difficult to tell how much of their science was original and how much was the result of Greek influence.

41) Labour Migration #1000276 Prediction

Most countries are affected by labour migration. In many rural places, the traditional extended family has been undermined by the need for family members to migrate to towns as an economic necessity. Migration, therefore, presents a major challenge everywhere to social and economic policy.

42) Statistics Reflect #1000269 Prediction

Statistics reflect vital information about the economy, the well being of the population, and the environment. Society relies on statistics being visible, accessible and robust, and on statistically literate people making the best use of the information to determine future action. Statistical literacy, then, is the ability to accurately understand, interpret and evaluate the data that inform these issues.

43) The United States #1000256 Prediction

The United States is at a peak in the world's market for motor cars and trucks. An agent for the U.S. Bureau of Foreign and Domestic Commerce reports a prosperous condition of affairs prevailing in Japan, which is buying more automobiles, especially large cars, than ever before.

44) The Asteroid #1000249 Prediction

The asteroid that slammed into the moon 3.8 billion years ago creating the Imbrium Basin may have had a diameter of at least 150 miles, according to a new estimate. The work helps explain puzzling geological features on the moon's near side and has implications for understanding the evolution of the early solar system.

45) Fake News #1000248 Prediction

Fake news can distort people's beliefs even after being debunked. For example, repeated over and over, a story such as the one about the Pope Endorsing Trump can create a glow around a political candidate that persists long after the story is exposed as a fake. A study recently published in the journal Intelligence suggests that some people may have an especially difficult time rejecting misinformation.

46) Tourism #1000220 Prediction

Tourism is a challenging sector on which divides statistics since businesses serving tourists, also service local people. Therefore, it is not straightforward to estimate how much business sectors' revenues and how many jobs are due to tourist expenditures.

47) Business School #1000212 Prediction

Business school admissions officers said the new drive to attract younger students was in part the result of a realization that they had inadvertently limited their applicant pool by requiring several years' work experience. Talented students who might otherwise have gone to business school instead opted for a law or policy degree because they were intimidated by the expectation of work experience.

48) Companies #1000207 Prediction

Companies will want to be known not just for the financial results they generate, but equally, for the imprint they leave on society as a whole. First, ensuring that their products contribute positively. Second, operating in a way that approaches a net neutral impact on the natural environment. And third, cheerishing their people.

49) Social Media #1000198 Prediction

Social media are playing an increasingly important role as information sources for travellers. The goal of this study is to investigate the extent to which social media appear in search engine results in the context of travel related searches. It also provides evidence for challenges faced by traditional providers of travel related information.

50) Grid Based #1000197 Prediction

The grid based infrastructure enables large scale scientific applications to be run on distributed resources and coupled in innovative ways. However, in practice, grid resources are not very easy to use for the end users who have to learn how to generate security credentials. There is an imminent need to provide transparent access to these resources so that the end users are shielded from the complicated details.

51) Neighbors #1000196 Prediction

Imagine living all your life as the only family on your street. Then, one morning, you open the front door and discover houses all around you. You see neighbors tending their gardens and children walking to school. Where did all the people come from? What if the answer turned out to be that they had always been there, you just hadn't seen them?

52) Brain Hemispheres #1000191 Prediction

The brain is divided into its 'hemispheres' by a prominent groove. At the base of this lies nerve fibres which enable these two halves of the brain to communicate with each other. But the left hemisphere usually controls movement and sensation in the right side of the body, while the right hemisphere similarly controls the left side of the body.

53) Mathematics #1000190 Prediction

Competence in mathematics was another trouble spot. More than half said their real task, school's graduates are deficient in mathematics, more than 10 per cent of respondents and said college graduates are deficient in the subject, while 70 per cent said they are adequate.

54) Restaurant #1000187 Prediction

The physical location of a restaurant in the competitive landscape of the city has long been known as a major factor in its likely success or failure. Once restaurants are established in such environments, they can do little about their location. All they can do is work to improve customer access to their premises. Restaurateurs often do this by engaging in battles with local authorities about car parking.

55) Online Shopping Environments #1000185 Prediction

A unique characteristic of online shopping environments is that they allow vendors to create retail interfaces with highly interactive features. One desirable form of interactivity from a consumer perspective is the implementation of sophisticated tools to assist shoppers in their purchase decisions by customizing the electronic shopping environment to their individual preferences.

56) Domestic Work #1000184 Prediction

Traditional divisions of domestic work are understood to persist because of the strong association of the home with humanity and paid work with masculinity to challenge who does what in the home is arguably tantamount to challenge what it is to be a woman or a man.

57) Globalization #1000183 Prediction

Globalization has affected what we eat in ways we are only beginning to understand. Modern food production no longer related to our biological needs but is in direct conflict with them. The relationship between diet and our fertility, our cancer, heart diseases, and mental illness is becoming clear. Yet much of our food is nutritionally bankrupt.

58) Scientific Studies #1000181 Prediction

Scientific studies show that by age three, there is a gap in brain development between kids who are read to aloud and those who are not, and children from low income families are disproportionately impacted by this gap. Making sure all parents know the importance of reading aloud to their children is critical to closing the achievement gap.

59) Climate Change #1000178 Prediction

This is what needs to happen on climate change: the world needs to put a price on carbon emissions and let the market respond. If politicians pretend this can be done without pain, it will probably result in another five to ten years of inaction.

60) Language #1000172 Prediction

It seems that language appeared from nowhere since no other species has anything resembling human language. However, other animals do possess basic systems for perceiving and producing sounds that enable them to communicate. These systems may have been in place before the appearance of language.

61) The Free Market #1000169 Prediction

The free market is extremely competitive, and companies are constantly trying to gain an edge over their rivals. Merchandising and brand image plays a major role in attracting customers, but they often lead to over packaging. This is a serious problem since most packaging these days are made of plastics which are not biodegradable. Some people blame the manufacturers for their blatant disregard, while others point the finger at consumers.

62) Mobile Phones #1000164 Prediction

It may well change the way you live, yet again. Welcome to the mobile world commerce, where your hand held device, it's a mobile phone, personal digital assistant (PDA) or any other wireless application will soon be used for commercial transactions. Sceptical? Consider these facts In Japan, mobile phones are used for location based services where the mobile service providers tie up with a host of other players such as restaurants, car rental companies etc. When the mobile user enters that zone, messages from all these players are flashed on the mobile device. Location based services are proved in several other countries as well.

63) The Training of an Actor #1000160 Prediction

The training of an actor is an intensive process that requires curiosity, courage, and commitment. You will learn how to prepare for rehearsal, how to rehearse, and how to use independent and proactive processes that inform you to do the best work possible for both stage and screen.

64) Fast Food #1000154 Prediction

Hundreds of millions of Americans eat fast food every day without giving it too much thought, unaware of the subtle and not so subtle ramifications of their purchases. They just grab their tray off the counter, find a table, take a seat, unwrap the paper, and dig in. The whole experience is transitory and soon forgotten.

65) Russia #1000150 Prediction

Long isolated from Western Europe, Russia grew up without participating in shared developments like the Reformation. Russians took pride in their unique culture and found dubious value in foreign ideals. As a result, Russia is the most unusual member of the European family, if indeed it can be considered one at all. This question is still hotly debated, particularly amongst Russians.

66) Semiconductor #1000147 Prediction

The semiconductor industry has been able to improve the performance of electric systems for more than four decades by making ever smaller devices. However, this approach will soon encounter both scientific and technical limits, which is why the industry is exploring a number of alternative device technologies.

67) Habitat Quality #1000131 Prediction

But they did find something that had a much bigger impact on wildlife: habitat quality. The best predictor of wildlife abundance was not human activity, but factors like forest connectivity, nearby housing density, and the amount of adjacent agriculture. The results were published in the Journal of Applied Ecology.

68) University Life #1000120 Prediction

A university is a lot more than just classes and exams; the university is a concept that offers you a host of possibilities to develop both academically and personally. Find out about the different projects, clubs and societies that are in your university. You will definitely find something you are interested in.

69) Donor Countries #1000118 Prediction

In 2005, donor countries agreed on an accord to harmonize their practices. Since then, aid officials have complained that too little has changed on the ground. Conferences of donors in developing countries still tend to be dominated by a small group of north European governments, with the US often absent.

70) Parents #1000110 Prediction

Parents can communicate their personal feelings about undesirable programs both by discouraging their children from watching them and by writing to their local television station or the program's sponsors. The public does have a voice. Clearly, not all programs need please everybody. We do have a choice of programs; and we also have a choice, for ourselves and at least for our younger children, of watching or not watching. There is an "off" button on every set!

71) Shakespeare #1000043 Prediction

A young man from a small provincial town a man without independent wealth, without powerful family connections and without a university education moved to London in the late 1580s and, in a remarkably short time, became the greatest playwright not of his age alone but of all time. How did Shakespeare become Shakespeare?

72) The Strandlopers #1000026 Prediction

The speaker is a marine biologist who became interested in the Strandlopers, an ancient people who lived on the coastline, because of their connection to the sea. Their way of life intrigued him. As a child he had spent a lot of time by the sea, exploring and collecting things so he began to study them, and discovered some interesting information about their way of life, how they hunted, what tools they used, and so on.

73) Student Debt #1000022 Prediction

The numbers on US student debt, after all, are truly staggering. The average 2015 US university graduate who took out loans to help pay for tuition enters the workforce with \$35,000 in student debt. In the US, total student debt exceeds \$1.15 trillion - dwarfing, for instance, the nation's credit card debt.

74) Food #1000015 Prediction

Food is one of the most important things you will ever buy. And yet most people never bother to think about their food and where it comes from. People spend a lot more time worrying about what kind of blue jeans to wear, what kind of video games to play, and what kind of computers to buy.

- 1) We are committed to recruiting the best students, regardless of their financial circumstances. #2003362 New Prediction
- 2) Your wages will be put into your bank account on Thursday. #2003293 New Prediction
- 3) Employees go around the park at lunchtime. #2003290 New Prediction
- 4) If you like cooking, we can make supper together. #2003281 New Prediction
- 5) I make sure to prepare reports for my boss. #2003279 New Prediction
- 6) The bus for London will leave 10 minutes later than planned. #2002644 New Prediction
- 7) We want to attract the very best students regardless of their financial circumstances. #2001240 New Prediction
- 8) The date of the invention of the 1st clock was disputed among historians. #2000267 New Prediction
- 9) The campus tour will help you get familiar with the teaching facilities. #2000252 New Prediction
- 10) Downloading the calendar can help you find more activities at our university. #2003371 Prediction
- 11) Mineral resource exploration has been rising, leading to local environmental degradation. #2003370 Prediction
- 12) The bus right out front will take you to London. #2003368 Prediction
- 13) This parking space is for the employee of the month. #2003367 Prediction
- 14) Your boss requires you to finish the report before Friday. #2003361 Prediction
- 15) The best time to visit Canada is in the fall. #2003360 Prediction
- 16) We will enter the building from the right side of the library. #2003358 Prediction
- 17) Please take these to Professor Mitchell in the chemistry lab. #2003357 Prediction
- 18) Please make sure that your assignments are successfully submitted via the online portal. #2003355 Prediction
- 19) The graph shows the percentage of people who smoke according to gender. #2003354 Prediction
- 20) Students have the opportunity to share their lunch during the common lunch break around noon. #2003353 Prediction
- 21) The free workshop will be conducted this Wednesday on the fourth floor of the department. #2003352 Prediction
- 22) The deadline for the essay is tomorrow. #2003351 Prediction
- 23) This lecture will discuss three different areas of digital technology. #2003350 Prediction
- 24) Please stop writing as soon as the teacher asks you to. #2003349 Prediction
- 25) All messages should be included on the website. #2003348 Prediction
- 26) Collaboration between departments has led to groundbreaking research. #2003347 Prediction

- 27) This course will discuss reading and writing skills. #2003346 Prediction
- 28) The main library is at the heart of the campus. #2003344 Prediction
- 29) The ratio between brain and body size is the key factor in intelligence. #2003343 Prediction
- 30) There are office welcome events for both undergraduate and postgraduate students. #2003342 Prediction
- 31) Occupations in engineering are increasing rapidly. #2003341 Prediction
- 32) The students usually complete their projects in November. #2003336 Prediction
- 33) Marks will be deducted for assignments handed in after the due date. #2003335 Prediction
- 34) Different entrance to the program get the same qualification. #2003320 Prediction
- 35) Students will complete the project by the end of September. #2003307 Prediction
- 36) A public telephone is available in the shop. #2003303 Prediction
- 37) You must satisfy the listed requirements to get the qualifications. #2003302 Prediction
- 38) You should arrive at the bus stop a few minutes early. #2003298 Prediction
- 39) The library will be closed during summer vacation. #2003292 Prediction
- 40) The bus for the airport will arrive soon. #2003289 Prediction
- 41) The bus for London will leave early tomorrow morning. #2003288 Prediction
- 42) Your son has a bad cold and is in the nurse's room. #2003285 Prediction
- 43) Several people have applied for this position. #2003283 Prediction
- 44) Globalisation has been an overwhelming urbanization phenomenon. #2003271 Prediction
- 45) You must wear a hard hat on the construction site. #2003267 Prediction
- 46) You need to pass a written exam to get your driver's license. #2003259 Prediction
- 47) Evaporation is the process of turning liquid into gas #2003252 Prediction
- 48) I would like my assignment to be less than 2000 words. #2003249 Prediction
- 49) Please keep the keys with you because the front door often locks automatically. #2003248 Prediction
- 50) You need warmer clothes for winter. #2003244 Prediction
- 51) If you show your student card, you will get a discount. #2002645 Prediction
- 52) After considering all the options she decided to take the risk. #2002641 Prediction
- 53) The origin of psychology can be traced back to ancient Greece. #2002636 Prediction

- 54) The graph shows the population growth in the last century. #2002635 Prediction
- 55) Knowledge plays a vital role in young generations. #2002633 Prediction
- 56) Living in the 21st century is increasingly stressful. #2002614 Prediction
- 57) By logging in, you agree to all terms and conditions regarding your enrollment. #2002612 Prediction
- 58) Compiling a bibliography can present a major challenge for some students. #2002611 Prediction
- 59) Tomorrow's lecture has been cancelled due to the power outage. #2002508 Prediction
- 60) This will be the first art exhibition to be held by the university. #2002505 Prediction
- 61) The support and advice of lecturers within the department has been invaluable. #2002503 Prediction

1) Wind #21000194 New Prediction

Your classmate is currently away on vacation, and you're at her home. Due to strong winds, some of the balcony furniture has been damaged. You want to let her know about the situation so she can be mentally prepared before returning. What would you say to her in a thoughtful and considerate way?

2) Wrong Delivery #21000186 New Prediction

You've received a letter at your home that's actually meant for your neighbor. What would you say when you go to return the letter and explain the mistake politely?

3) Cafe Job #21000179 New Prediction

You would like to apply for a position at the school café, but you're aware that the manager prefers candidates with prior experience. Although you don't have that experience yet, you are enthusiastic, willing to learn, and ready to put in the effort. How would you express your interest and convince the manager to give you a chance?

4) Doctor's Appointment #21000031 New Prediction

You had a doctor's appointment at 10 am and you were late. Explain at the reception the reason for your delay and request the reception to know if you can see the doctor later today.

5) Studying in Cafe #21000339 Prediction

You're studying in a coffee shop, but it's about to close. Since you need to keep studying late into the evening, you ask one of the staff if there are any other coffee shops nearby that are still open. What would you say?

6) Sport and Class #21000326 Prediction

You often arrive late for class because you take part in your favorite sport every Thursday afternoon. How would you explain this to your teacher?

7) Tired Friend #21000315 Prediction

Your friend says she has been feeling very tired recently. You know she often stays up late. What would you say?

8) Noisy Friend #21000303 Prediction

Your friend is sitting next to you and keeps talking, but you want to focus on the lecture and take notes. What would you say to him?

9) Wrong Email #21000293 Prediction

Your professor says he hasn't received your assignment by email. You check your email and find that you have sent it to the wrong address. What would you say to your professor?

10) Advice for a Friend #21000288 Prediction

Your friend frequently skips classes, arrives late, leaves early, and does not submit assignments on time. What advice would you give them?

11) Fallen Tree #21000284 Prediction

You are on your way to campus to deliver a presentation when a fallen tree blocks the road, preventing you from arriving on time. You call your professor to ask if it would be possible to reschedule your presentation for later, or allow another student to present first. What would you say?

12) Borrowing Notes #21000283 Prediction

You cannot find your notes, so you need to borrow your friend's notes to write assignments. What would you say to your friend?

13) Food Preference #21000267 Prediction

Your friend wants to go to Anne's Café, which serves pizza and sandwiches, but you would like to try a different place with other dishes. How would you respond to your friend?

14) Library Etiquette #21000266 Prediction

You are studying in a library and notice that some students nearby are talking loudly. How would you approach them and politely let them know that they are disturbing others?

15) Forgotten Keys #21000262 Prediction

You forgot to bring the keys to your dorm and the door is locked so you can't get in. You need to call the school management team and ask them to solve this problem. What should you say?

16) Injured Classmate #21000261 Prediction

Your classmate's leg is injured, but he needs to return books to the library. You are planning to help him by returning the books. What would you say to him?

17) Difficult Course #21000259 Prediction

You have taken a course for one semester. Now your friend tells you they also want to take this course and asks for your advice. Since the course is too difficult, you do not recommend it. What should you say?

18) Roommate #21000257 Prediction

You're sharing a flat with a few other students, but you've noticed they often use your desk and your stationery. You are very concerned about losing your things.

What would you say?

19) Book to Return #21000255 Prediction

You lent an English book to a friend three weeks ago, and he hasn't returned it yet. Now, you need the book very much.

What would you say to him?

20) **Feedback of Assignment** #21000254 **Prediction**

You wrote an assignment, consulted your tutor, and asked them for some feedback on your work.

What would you say to him?

21) **Subject Change** #21000243 **Prediction**

After choosing Subject A, you're thinking about changing it and consult your tutor about Subject B. What would you say?

22) **Broken Printer** #21000242 **Prediction**

You want to copy some documents, but you notice the printer is broken and the red light is flashing.

What would you say to the administrator?

23) **Forgotten Book** #21000241 **Prediction**

You have to return a book to your friend, but when you get to school you realize you have forgotten to bring it. Your friend really needs it today.

What will you say to your friend?

24) **Delay of Loan** #21000240 **Prediction**

Your loan has been delayed, so you can't pay the full amount of the accommodation fee at once. You have a part-time job, but it's not enough. You are going to ask the university accommodation officer for advice.

What will you say?

25) **Disappearing Food** #21000239 **Prediction**

Your flatmate's visitors don't follow the rules, and your food in the fridge keeps disappearing. You need to talk to your flatmate about it.

What will you say?

26) **Absence of Online Class** #21000238 **Prediction**

Your computer is broken and you can't attend the online class. How should you tell your professor?

27) **Cafe Advertisement** #21000237 **Prediction**

You see a job advertisement for a café, but you're not sure if it's still valid, so you go and ask the manager and inquire about the tasks of the position being advertised.

What would you say?

28) **Housework** #21000236 **Prediction**

Your flatmate doesn't follow the schedule to complete housework. What would you say to him or her?

29) Noisy Flatmates #21000234 **Prediction**

Your flatmates are holding a party in their room at night, which is too noisy for you to sleep, but you have an important exam early tomorrow morning.

What should you say to them?

30) Deadline Request #21000231 **Prediction**

The deadline for your assignment is approaching, but your computer is broken, and you want to ask your teacher for an extension. What would you say?

31) Assignment Extension Request #21000230 **Prediction**

You are in your second year of university and have been working on a big assignment for your psychology class. Unfortunately, you've had the flu for the past week and couldn't concentrate or get much work done. You have a doctor's note and feel a little better now. You go to your lecturer's office to talk. What would you say?

32) Asking for Lecture Help #21000228 **Prediction**

You are walking out of a lecture and realize that you didn't fully understand some of the main points your professor discussed. You notice a classmate who seemed to take good notes and was paying close attention during class. You want to ask them for help in understanding what was covered. What would you say?

33) Writing Guidance #21000200 **Prediction**

You are working on an essay for your course and you are having difficulty organizing your ideas. You approach your professor after class and ask her if you could come to her office to discuss your essay. What do you say to her?

34) Chip Discount #21000199 **Prediction**

You purchased chips at a supermarket where there was a discount offer of 2 for 3 dollars. However, at the checkout, you noticed that you were charged 3 dollars for each bag instead. How would you politely point out the pricing error to the cashier and ask for a correction?

35) Restaurant Order #21000197 **Prediction**

You're dining at a restaurant and ordered a hamburger, but the waiter brings you fish and chips by mistake. How would you politely point out the error and ask for the correct order?

36) Cat #21000195 **Prediction**

You're going to be away from home for three days and need someone to look after your cat. You'd like to ask your friend Monica if she can help by feeding your cat during that time. How would you explain your situation to Monica and politely ask for her help?

37) Borrowed Book #21000192 **Prediction**

You borrowed a book from your friend Anit, and she has asked for it back. You want to politely arrange its return and find a time that works for her to pick it up. What would you say to Anit to make the return easy and convenient for both of you?

38) Garden Care #21000191 **Prediction**

You're getting ready to leave for a vacation and are concerned about your garden plants. One morning, you notice your neighbor at her door. You'd like to ask if she could kindly water your plants twice a week while you're away. What would you say to her?

39) Noisy Library #21000189 **Prediction**

You are trying to work on an important assignment that is due next week. While studying in the library, the person sitting next to you starts watching a video without using headphones. It's making it hard for you to concentrate. You decide to politely speak to the person to maintain the quiet environment. What do you say to them?

40) Missing Pages #21000188 **Prediction**

You borrowed a book from the university library. But while reading it, you notice that two pages have been torn out, but you didn't do it. What do you say to the librarian when you return the book?

41) Flight Canceled #21000185 **Prediction**

Your flight has been canceled, so instead of going to the airport, you now need to go home. You had already told the taxi driver to head to the airport. What would you say to the driver to explain the change and give directions to your home?

42) Late to School #21000184 **Prediction**

You are late to school today and need to explain the situation to your teacher. How would you apologize for being late and provide a reasonable explanation for your delay?

43) Italian Food #21000183 **Prediction**

You are going to eat outside with your friends and they want to eat Italian food. You don't like Italian food, but you want to dine out with them. What would you say to your friends?

44) New Classroom #21000182 **Prediction**

You're running late to class, and the professor has moved it to a different room because the classroom computer broke down. You're not sure where the new room is. What would you say when you call a classmate to ask for help?

45) Lazy Roommate #21000181 **Prediction**

You have a roommate, but he usually does not clean the common areas. You cannot stand dirty common areas. You're going to talk to him. What are you going to say?

46) Project Extension #21000178 **Prediction**

You are enrolled in evening business classes, and your project deadline is approaching. You feel you need more time and would like to request an extension through the weekend. You decide to visit your professor during office hours. How would you politely ask for an extension?

47) Countryside Walk #21000176 Prediction

How would you respond to your friend Susan's suggestion to go for a countryside walk tomorrow, letting her know you'd love to join but prefer to wait until the morning to decide, since the weather forecast predicts rain?

48) Farewell Gift #21000175 Prediction

How would you start a conversation with your colleagues to discuss ideas for a farewell gift for your manager, Joe, who is retiring and planning to travel abroad?

49) Waiter's Complaint #21000174 Prediction

How would you politely give feedback to the restaurant manager, mentioning that you enjoyed the food but were disappointed with the waiter's service and the missing coffee order?

50) Sam's Cafe #21000171 Prediction

During your dinner date, how would you politely tell your friend that you'd prefer to eat at a restaurant with a full menu rather than going to Sam's Cafe, which mainly offers drinks?

51) Competition Conflict #21000169 Prediction

You have a tutorial scheduled for 3 P.M. on Monday, but you've been selected to participate in an important competition at the same time. You need to inform your teacher and request a solution. What would you say?

52) Request for Extra Time #21000167 Prediction

You've been given a deadline for an assignment, but due to a personal emergency, you need more time to finish it. How would you approach your professor to request an extension and ensure the situation is handled appropriately? What would you say?

53) Slippery Stairs Safety #21000166 Prediction

You notice that the stairs at your workplace are wet and slippery, which could pose a safety hazard. What would you say to your colleagues or supervisor to address the situation and ensure the area is made safe for everyone?

54) Declining Dinner Invitation #21000165 Prediction

A colleague has invited you to dinner, but you are unable to attend due to prior commitments. How would you politely turn down the invitation while expressing your appreciation? What key points would you mention to maintain a positive relationship?

55) Dinner Invitation Preferences #21000164 Prediction

You've invited a friend to dinner at your place. However, you're unsure about their food preferences or dietary restrictions. You decide to call them, but they don't answer. How would you leave a message asking about their food preferences to ensure you prepare something they would enjoy?

56) Suggesting Train Route #21000163 Prediction

Your friend is planning to visit a location far from their home and is considering driving. However, you believe taking the train could be a more convenient option. Your friend is undecided between driving and taking the train. How would you recommend the train as the better choice, and what key points would you emphasize to convince them of its advantages?

57) Gift for Manager #21000158 Prediction

Your manager is retiring soon, and you want to buy a thoughtful gift. How would you approach a friend or colleague for advice on selecting and purchasing the gift, including choosing something that reflects their interests, setting a budget, coordinating with others for a group gift, and ensuring a meaningful presentation?

58) Dining Out #21000157 Prediction

You and your friends have different restaurant preferences for a night out. How should you approach the conversation to express your preference for a different restaurant, and what points should you cover to reach a compromise that considers everyone's opinions?

59) Late for Meeting #21000156 Prediction

You are late by 10 minutes for a meeting due to a broken car and heavy traffic. How do you approach your colleagues or boss to explain your delay? What key points should you mention?

60) Relative's Appointment #21000155 Prediction

You have an appointment and need to leave work early to accompany a relative. How do you request permission from your employer for early departure? What key points should you address to ensure your request is understood and approved?

61) Family Member #21000153 Prediction

You need to leave work early to drive a family member to see the doctor. How do you approach your boss to explain the situation? What specific points do you include to ensure understanding and approval of your request?

62) Car Breakdown #21000152 Prediction

Your car has broken down, and you know a girl is waiting for you. How do you approach this situation to inform her of the delay and ask for assistance or suggest alternative arrangements? What specific details do you include to ensure clear communication and to propose a solution that accommodates both of your needs?

63) Borrowing an Umbrella #21000151 Prediction

You've just arrived at the office and realized that it's pouring rain outside. You didn't bring an umbrella and know that one of your colleagues, who sits near you, often has a spare. How do you approach your colleague to ask for an umbrella, and what specific points do you include to ensure a positive response?

64) Carpool #21000150 Prediction

You have noticed that one of your colleagues lives in the same building as you and you are planning to approach them to travel together to work to avoid parking fees. Try to cover the following details:

- Welcoming the idea of carpooling
- Benefits of traveling together
- Logistics such as meeting time and location
- Any other relevant information to coordinate the carpool

65) Movie Invitation #21000146 Prediction

You are sick so you can't attend the invitation for the movie. Your friend in the lunchroom is having coffee, inform him about the situation.

66) Inquiring About Bike Rentals #21000136 Prediction

You overheard your colleagues discussing about renting bikes, which sounds really fun and you are interested in it. Speak to your colleagues and inquire about the details, such as the cost of renting and how and where you can rent a bike.

67) Lost Bag at Cafe #21000135 Prediction

Yesterday, you went to a cafe and forgot your bag, which contained your college materials. You were sitting by the window at lunchtime. Now, you need to call the cafe and discuss your forgotten bag. How would you respond to that?

68) Feedback for Restaurant Manager #21000134 Prediction

You and your friends went to a local restaurant where you encountered several issues with the quality and service. The long wait times, small meal portions, and the coffee you ordered never arrived. Now, the manager is asking for your feedback after the meal. How would you respond to that?

69) Busy with dinner #21000133 Prediction

A friend called you to discuss a problem with one of her children. Let her know that you are busy preparing dinner and that you will call her later to help with the issue. How do you handle such situations?

70) Late Book Return Apology #21000130 Prediction

You borrowed a book from the library and forgot to return it on time. Now, there's a late fee, and you need to explain the delay to the librarian and possibly request a waiver or reduction of the fee. What is your conversation like?

71) A Spa Day #21000124 Prediction

You book a spa day based on glowing reviews and a wide range of services listed online. When you arrive, half the services are unavailable, and the facilities are not as advertised. How do you address this with the spa manager?

72) Noise Control #21000109 Prediction

You've organized a group study session with your classmates at your apartment. However, when they arrive, you notice some of them are not following the agreed-upon noise level and are causing disturbances to your neighbors. You need to remind them to be considerate of others. What would you say to your classmates?

73) Flawed Project #21000089 Prediction

You're a project manager who has just reviewed a team's project draft due next week. You notice several critical sections are incomplete, and the overall quality is below expectations. You need to address these issues promptly while motivating the team to improve their work before the deadline. What would you say to your team?

74) Loud Music #21000081 Prediction

Your neighbor has been playing loud music late at night, making it difficult for you to sleep. You want to address the situation diplomatically to maintain a good relationship with your neighbor while ensuring the noise is reduced during late hours. What would you say to your neighbor?

75) Forgot Wallet #21000059 Prediction

You're at a salon and you want to get a haircut, but you realize that you left your wallet in your taxi. You don't have the taxi number and you don't have any other payment methods with you. What will you tell the stylist in order to get this situation sorted?

76) Request Professor #21000054 Prediction

You are supposed to submit an essay by tomorrow, but you have been unwell for a fortnight. You have a medical certificate from the clinic. You have recovered now, but you need more time to finish your essay. You visit your professor's office. How do you request him for an extension over the weekend?

77) Presentation #21000034 Prediction

You have a presentation at 9 am and your laptop crashed. Call your professor and ask for an extension or an alternative way to submit your work.

78) Group Project #21000012 Prediction

You're working on a group project with three other classmates and you have a deadline coming up soon. One of your group members has not contributed anything so far and is not responding to your messages. What would you say to your group member and your other teammates?

79) Roommate #21000001 Prediction

As a university student sharing a dorm with a consistently messy and inconsiderate roommate, you've attempted discussions without success. Frustrated and unsure of what to do, you plan to consult your resident advisor. What do you say to your Roommate?

- 1) What do you usually read before ordering food in a restaurant? #5001981 New Prediction

Answer : Cloud
- 30) A professional offering expert advice in a particular field is known as? #5001845 Prediction
Answer : Consultant
- 31) What is a large, luxurious apartment located on the top floor of a building called? #5001722 Prediction
Answer : Penthouse
- 32) What word means to purposely refuse to buy a certain product or from a certain company as a way of protesting? #5001694 Prediction
Answer : Boycott
- 33) What is the term used for the study of the Earth's weather and climate forecast? #5001579 Prediction
Answer : Meteorology
- 34) What is the water flowing steeply down a cliff called? #5001565 Prediction
Answer : Waterfall
- 35) What is a 3D version of a circle called? #5001561 Prediction
Answer : Sphere
- 36) What is the opposite of a minus sign? #5001557 Prediction
Answer : Plus Sign

- 37) What geometric shape are circumference, diameter, and radius related to? #5001537 Prediction
Answer : Circle
- 38) How many legs do quadruped animals have? #5001521 Prediction
Answer : Four / 4
- 39) What is the art of producing beautiful handwriting using a brush or a special pen? #5001456 Prediction
Answer : Calligraphy / Penmanship
- 40) Which organ of our body is related to the word "gastric"? #5001455 Prediction
Answer : Stomach
- 41) Which industry is connected with the extraction of valuable minerals from the ground? #5001442 Prediction
Answer : Mining
- 42) A portable frame or a stand that has three legs and can support a camera is called? #5001438 Prediction
Answer : Tripod
- 43) What is a way in which animals conserve energy to survive adverse weather conditions or lack of food? #5001437 Prediction
Answer : Hibernation
- 44) A movie that is played in the afternoon is called? #5001425 Prediction
Answer : Matinee
- 45) A small handheld light that usually gets its power from batteries is called? #5001423 Prediction
Answer : Torch / Flashlight
- 46) What is the term used for an amount that is regularly received by a retiree? #5001398 Prediction
Answer : Pension
- 47) A person who tells lies is called? #5001394 Prediction
Answer : Liar
- 48) In a marriage, what is the male partner known as? #5001383 Prediction
Answer : Husband
- 49) The various forms of money used by any country is known as? #5001372 Prediction
Answer : Currency
- 50) What part of a bird's body helps them propel in the air? #5001338 Prediction
Answer : Wings
- 51) What is a brief summary for an academic paper or research article giving the readers an understanding of the article? #5001315 Prediction
Answer : Abstract
- 52) A person who shares the same room with you is called? #5001307 Prediction
Answer : Roommate
- 53) Where do marine animals live? #5001266 Prediction
Answer : Sea / Ocean
- 54) What do you call your cousin's father? #5001265 Prediction
Answer : Uncle
- 55) The country where a person is born is called? #5001241 Prediction
Answer : Country of Origin / Motherland

- 56) Who is the person who writes a piece of music, especially classical music? #5001187 Prediction
Answer : Composer
- 57) What is the connecting part between two bones called? #5001178 Prediction
Answer : Joint
- 58) What is the loud noise that you hear during a storm? #5001168 Prediction
Answer : Thunder
- 59) Which season comes after winter and before summer? #5001029 Prediction
Answer : Spring
- 60) What is the space that includes the sun and all the planets called? #5001015 Prediction
Answer : Solar System
- 61) What is the term used to specifically describe either a brother or a sister? #5000994 Prediction
Answer : Sibling
- 62) What subject studies the life and structure of humans, animals, and plants? #5000989 Prediction
Answer : Biology
- 63) What is the mountain that is filled with melting rocks in hot gases? #5000986 Prediction
Answer : Volcano
- 64) What is the name of a male sheep? #5000984 Prediction
Answer : Ram
- 65) Which day of the week comes after Wednesday? #5000982 Prediction
Answer : Thursday
- 66) How many sides does an octagon have? #5000981 Prediction
Answer : 8 / Eight
- 67) An event that happens once every year is called? #5000975 Prediction
Answer : Annual
- 68) What is the opposite of 'forward'? #5000974 Prediction
Answer : Backward
- 69) A scientist who studies the universe and its objects like planets & stars is called? #5000965 Prediction
Answer : Astronomer
- 70) What is a strip of hard ground on which an aircraft takes off and lands? #5000964 Prediction
Answer : Runway
- 71) Name the season of the year when the weather becomes warmer and plants start to grow again. #5000941 Prediction
Answer : Spring
- 72) What is a mythical, horse-like creature with a horn on its head known as? #5000921 Prediction
Answer : Unicorn
- 73) A professional who prescribes medicines to patients is called? #5000918 Prediction
Answer : Doctor
- 74) What is the opposite of horizontal? #5000905 Prediction
Answer : Vertical

- 75) What do we call a punctuation mark that is used to indicate either possession or the omission of letters or numbers? #5000895 Prediction
Answer : Apostrophe
- 76) What do you call your uncle's son? #5000884 Prediction
Answer : Cousin Brother
- 77) What do you call the phenomenon when the snow at the top of a snow mountain collapses all at once? #5000879 Prediction
Answer : Avalanche
- 78) What are the people living in Switzerland called? #5000876 Prediction
Answer : Swiss
- 79) What is the opposite of maximum? #5000873 Prediction
Answer : Minimum
- 80) What is the process of breaking down any substance and re-using it again called? #5000864 Prediction
Answer : Recycling / Recycle
- 81) What is a group of mountains such as the Himalayas called? #5000856 Prediction
Answer : Range
- 82) What do we call the document in which a political party announces their plans before elections? #5000850 Prediction
Answer : Manifesto
- 83) Soup is frequently eaten with what utensil? #5000843 Prediction
Answer : Spoon
- 84) If a company requires its employees to wear identical clothes, what is the clothing called? #5000839 Prediction
Answer : Uniform
- 85) What is the opposite of the word "dangerous"? #5000835 Prediction
Answer : Safe
- 86) What is a person who uses left hand for most of the activities called? #5000833 Prediction
Answer : Left hander
- 87) What is the picture of a person's side face called? #5000831 Prediction
Answer : Profile shot
- 88) What is the action of a ball that immediately moves upwards after hitting the ground called? #5000826 Prediction
Answer : Bounce / Bouncing
- 89) What is a design, made on one's skin using a needle and ink called? #5000822 Prediction
Answer : Tattoo
- 90) What is a disturbing or frightening dream called? #5000819 Prediction
Answer : Nightmare
- 91) When you mix black and white, what color would you get? #5000818 Prediction
Answer : Grey / Gray
- 92) What is the second month of the year? #5000806 Prediction
Answer : February
- 93) What do we call the selling and transporting of goods to another country? #5000803 Prediction
Answer : Export

- 94) What is the term used for the money borrowed from banks? #5000801 Prediction
Answer : Loans
- 95) What do we call an experienced person who advises and helps less experienced people? #5000798 Prediction
Answer : Mentor
- 96) If Monday is the first day, what day is the fourth day? #5000791 Prediction
Answer : Thursday
- 97) What is the opposite meaning of objective? #5000789 Prediction
Answer : Subjective
- 98) What is the study of religion called? #5000788 Prediction
Answer : Theology
- 99) What is the term used for a professional who practices law? #5000781 Prediction
Answer : Lawyer / Attorney
- 100) What do people usually use to cut food? #5000780 Prediction
Answer : Knife
- 101) How many years are celebrated in a bicentennial? #5000779 Prediction
Answer : 200
- 102) How many sides does a hexagon have? #5000774 Prediction
Answer : 6
- 103) If someone tells something funny to you, what is your reaction? #5000766 Prediction
Answer : Laugh / laughing
- 104) Which of the following is not a means of transportation: plane, train, or car model? #5000757 Prediction
Answer : Car model
- 105) What is the official survey of a country's population, especially including demographic details of individuals? #5000752 Prediction
Answer : Census
- 106) What do we call a machine that carries people from one floor to another in a multistory building? #5000746 Prediction
Answer : Lift / Elevator
- 107) What are the people who study religions? #5000735 Prediction
Answer : Theologian
- 108) What is the boat that carries people from one side of a river to the other? #5000730 Prediction
Answer : Ferry
- 109) What is the line where the sky meets the land? #5000724 Prediction
Answer : Horizon / Skyline
- 110) What clothing do people wear, such as students or nurses, to show that they belong to the same organization? #5000720 Prediction
Answer : Uniform
- 111) What do we call the legal document that states how people's property should be allocated after their deaths? #5000717 Prediction
Answer : Will

- 112) Which document does a student get when he completes his study at university? #5000707 Prediction
Answer : Graduation certificate
- 113) What is the ceremony where two people get married? #5000706 Prediction
Answer : Wedding
- 114) What is the most important part of the human respiratory system? #5000704 Prediction
Answer : Lungs
- 115) What does sub-Mediterranean mean? #5000702 Prediction
Answer : Climate
- 116) What do we call the animals that live in the sea? #5000701 Prediction
Answer : Marine animals
- 117) What is the short sleep in the afternoon? #5000689 Prediction
Answer : Nap
- 118) What is the process of moving information from a computer to the Internet? #5000686 Prediction
Answer : Uploading
- 119) Which part of the body do we use the nasal spray in? #5000667 Prediction
Answer : Nose
- 120) What does a poisonous animal carry? #5000666 Prediction
Answer : Venom
- 121) In the solar system, which heavenly body produces sunshine? #5000664 Prediction
Answer : Sun
- 122) Which part of the hand do we use to pick up objects? #5000656 Prediction
Answer : Fingers
- 123) Which part of our bodies do we use the nasal spray in? #5000648 Prediction
Answer : Nose
- 124) If a magazine is published quarterly, how many times a year is it published? #5000632 Prediction
Answer : Four times a year
- 125) What do forks, spoons, and knives belong to? #5000630 Prediction
Answer : Cutlery
- 126) What is the occupation that transfers one language to another language? #5000629 Prediction
Answer : Translator
- 127) What do you throw underwater to keep ships staying on rivers or oceans without drifting away? #5000628 Prediction
Answer : Anchor
- 128) What is the opposite of division in mathematics? #5000627 Prediction
Answer : Multiplication
- 129) What is the job title of someone who works at the beach and save people's lives when they are in danger in the sea? #5000626 Prediction
Answer : Lifesavers
- 130) Which part of the body do mammals use to feed their next generations? #5000625 Prediction
Answer : Breast

- 131) What is the music that is recorded for a movie or a film? #5000620 Prediction
Answer : Soundtrack
- 132) What is the activity of inhalation of tobacco substance that is harmful to our health? #5000618 Prediction
Answer : Smoking
- 133) What order is a bibliography usually listed in? #5000617 Prediction
Answer : Alphabetical order
- 134) What do meter and millimeter measure: weight or length? #5000616 Prediction
Answer : Length
- 135) When something is given in a pair, how many of them are there? #5000615 Prediction
Answer : 2
- 136) What is the device that shows the time of the day according to the shadow of sunlight? #5000613 Prediction
Answer : Sundial
- 137) What device is used to measure a 200-meter sprint? #5000611 Prediction
Answer : Stopwatch
- 138) What is the hardest part of your hand? #5000610 Prediction
Answer : Nails
- 139) When you use Microsoft Word, which category does "Times New Roman" belong to? #5000608 Prediction
Answer : Fonts
- 140) What is the term used to describe a period of seven days? #5000607 Prediction
Answer : Week
- 141) How often does February have one extra day? #5000606 Prediction
Answer : Every four years
- 142) What's the process of people paying money to governments for public services? #5000605 Prediction
Answer : Taxation
- 143) What is the first paragraph of an essay? #5000603 Prediction
Answer : Introduction
- 144) What are the people who study history and historical evidence? #5000602 Prediction
Answer : Historian
- 145) What shines at night in the sky and uses its own brightness? #5000600 Prediction
Answer : Star / Stars
- 146) Does a scapegoat receive or give a crime? #5000597 Prediction
Answer : Receive
- 147) Where do people watch plays? #5000588 Prediction
Answer : Theatre
- 148) What rises from the east in the morning and sets to the west in the evening every day? #5000585 Prediction
Answer : The Sun
- 149) Where can you normally find the index in a book? #5000583 Prediction
Answer : At the end

- 150) What movement can babies do before they can sit and walk? #5000582 Prediction
Answer : Crawling
- 151) A newspaper is published every day, and a journal is published every month. What do you call the publication that is published four times a year? #5000581 Prediction
Answer : Quarterly
- 152) Who takes care of people who are sick and stay in the hospital? #5000579 Prediction
Answer : Nurse
- 153) What would you call a doctor who treat sick animals? #5000578 Prediction
Answer : Vet/ Veterinarian
- 154) When you have the primary and the secondary, what do you have next? #5000574 Prediction
Answer : Tertiary
- 155) What do we call a car that uses two types of fuels? #5000573 Prediction
Answer : A hybrid car
- 156) When a person's Blood Alcohol Content is higher than the standard range, what activity are they not allowed to do? #5000572 Prediction
Answer : Driving
- 157) If a meeting is scheduled on Wednesday, and today is Tuesday, then will the meeting be held, tomorrow? the day after tomorrow? or next week? #5000569 Prediction
Answer : Tomorrow
- 158) How many wheels does a tricycle have? #5000567 Prediction
Answer : 3
- 159) How many years does a centennial celebrate? #5000562 Prediction
Answer : 100 years
- 160) Which Animal has white ivory and long trunk? #5000561 Prediction
Answer : Elephant
- 161) What does a Sundial measure according to the shadow in the sunlight? #5000559 Prediction
Answer : Time
- 162) Who is the person who works in a hospital and can do operations? #5000557 Prediction
Answer : Surgeon
- 163) What's the force that pushes everything to the earth? #5000552 Prediction
Answer : Gravity
- 164) If someone has a couple of kids, how many kids does he have? #5000550 Prediction
Answer : Two
- 165) How many years does it take to finish an undergraduate study? #5000529 Prediction
Answer : 4 years / 3 years
- 166) If a figure is hexagonal, how many sides does it have? #5000526 Prediction
Answer : Six
- 167) In which direction does the sun come up? #5000511 Prediction
Answer : East

- 168) In which room of their home would someone usually wash their clothes? #5000510 Prediction
Answer : In the laundry room
- 169) Some calendars begin the week on Sunday, what is the other day which commonly starts a week? #5000502 Prediction
Answer : Monday
- 170) To improve their health and fitness, most people either try to improve their diet or? #5000498 Prediction
Answer : Do more physical exercise
- 171) To which of our senses do all of the following words relate, opaque, vivid, brilliant, and shiny? #5000497 Prediction
Answer : Vision
- 172) Tons, kg, and stones measure what property? #5000496 Prediction
Answer : Weight
- 173) What are winter, spring, summer, and autumn? #5000495 Prediction
Answer : Seasons
- 174) What crime has someone stealing items from a shop committed: shop fitting or shoplifting? #5000493 Prediction
Answer : Shoplifting / Shop lifting
- 175) What desk should you go to when you first arrive to stay at a hotel? #5000492 Prediction
Answer : Reception
- 176) What do we call a company or organization that gives money to a sports or arts event in exchange for advertising? #5000489 Prediction
Answer : Sponsor
- 177) What do we call a period of 10 years? #5000488 Prediction
Answer : A decade
- 178) What do we call it when the moon completely blocks out the light from the Sun? #5000486 Prediction
Answer : A solar eclipse
- 179) What do we call the date that a piece of work must be finished by? #5000485 Prediction
Answer : Due Date
- 180) What do we call the meeting where an employer asks a potential employee question about their work experience? #5000481 Prediction
Answer : Interview
- 181) What do we call the study of living things? #5000478 Prediction
Answer : Biology
- 182) What do you call an apartment that is below ground level, a basement apartment or a penthouse apartment? #5000476 Prediction
Answer : A basement apartment
- 183) What do you call the document that gives you details about your qualifications and work experience? #5000474 Prediction
Answer : Resume
- 184) What do you call the very long essay that students have to write for a doctoral degree? #5000473 Prediction
Answer : Thesis / Dissertation
- 185) What device do you use to type when you use a computer? #5000467 Prediction
Answer : Keyboard

- 186) What is 3 quarters of 100%? #5000465 Prediction
Answer : 75%
- 187) What is a painting of a person's head usually called? #5000463 Prediction
Answer : A portrait
- 188) What is more fuel-efficient, car or truck? #5000462 Prediction
Answer : A car
- 189) What is the antonym of vertical? #5000461 Prediction
Answer : Horizontal
- 190) What is the job title of someone who designs buildings? #5000456 Prediction
Answer : Architect
- 191) What is the last thing to do when baking a cake? #5000455 Prediction
Answer : Cook it in the oven
- 192) What is the month between January and March? #5000454 Prediction
Answer : February
- 193) What is the most important document you have to show when you want to hire a car? #5000453 Prediction
Answer : A Driver's license
- 194) What is the name for a huge natural body that orbits the sun? #5000452 Prediction
Answer : A planet
- 195) What is the name of the field of study that studies the human mind and behaviour? #5000451 Prediction
Answer : Psychology
- 196) Where in the universe do we get solar energy from? #5000444 Prediction
Answer : Sun
- 197) What is the study of the stars and planets called? #5000443 Prediction
Answer : Astronomy
- 198) What is the word for a period of one hundred years? #5000440 Prediction
Answer : Century
- 199) What is the word for the place where a river starts? #5000439 Prediction
Answer : Source / Headwaters / Origin
- 200) What is the word in geometry for a shape that has three sides? #5000438 Prediction
Answer : Triangle
- 201) What key mineral makes seawater different from fresh water? #5000436 Prediction
Answer : Salt
- 202) What kind of equipment is used to protect motorbike rider's brain from injury? #5000435 Prediction
Answer : A helmet
- 203) What kind of liquid do mammals feed their babies? #5000434 Prediction
Answer : Milk
- 204) What object would you use to climb up to the roof of a house? #5000433 Prediction
Answer : Ladder

- 205) What special document do most people traveling between one country to another need to carry? #5000428 Prediction
Answer : A passport
- 206) What word is used to describe frozen water? #5000422 Prediction
Answer : Ice
- 207) What's the joint called where your hand is connected to your arm? #5000421 Prediction
Answer : Wrist
- 208) When the writer of a book is unknown, what word is used for the author? #5000418 Prediction
Answer : Anonymous
- 209) Where can people go to borrow books? #5000416 Prediction
Answer : Library
- 210) Where would you expect to find equipment like a microscope, bunsen burner, beaker, and petri dish? #5000414 Prediction
Answer : Laboratory
- 211) Where would you go to see an exhibition of sculpture or painting? #5000412 Prediction
Answer : An art gallery / A museum
- 212) Which country is in the southern hemisphere Australia or Canada? #5000408 Prediction
Answer : Australia
- 213) Which department in the hospital would you go for an X-ray, radiology, or cardiology? #5000406 Prediction
Answer : Radiology
- 214) Which instrument is used to measure variations in temperature? #5000405 Prediction
Answer : Thermometer
- 215) Which kind of punishment for a crime is the less severe, imprisonment or community service? #5000402 Prediction
Answer : Community service
- 216) Who is the main journalist responsible for producing a newspaper or magazine? #5000390 Prediction
Answer : Editor
- 217) Who serves food in a restaurant? #5000388 Prediction
Answer : Waiter / Waitress

Answer : Island
- 232) If a button has come off a shirt, what would someone most likely use to put it back on? #5000341 Prediction
Answer : Needle and thread
- 233) What do we call a period of 1000 years? #5000340 Prediction
Answer : Millennium
- 234) How do butterflies fly? #5000336 Prediction
Answer : Flutter
- 235) What do ophthalmologists specialize in? #5000333 Prediction
Answer : Eye operations
- 236) How many days are there in a week? #5000329 Prediction
Answer : 7
- 237) For killing bacteria drugs used are called? #5000305 Prediction
Answer : Antibiotics
- 238) Which one is quicker? Running, walking or jogging? #5000304 Prediction
Answer : Running
- 239) One who tests eyesight and sells spectacles #5000279 Prediction
Answer : Optician
- 240) How many years are there in a millennium? #5000261 Prediction
Answer : A thousand years
- 241) Which natural material is used to make car tyers? #5000258 Prediction
Answer : Rubber
- 242) How many days in a fortnight? #5000254 Prediction
Answer : 14

- 243) If a figure in pentagon how many sides does it have? #5000253 Prediction
Answer : 5
- 244) If something such as fabric or medicine is artificially made what do we say it is? #5000252 Prediction
Answer : Synthetic
- 245) What do you call a student that has finished his first year? #5000248 Prediction
Answer : Sophomore
- 246) If one's response is simultaneous, is it quick or slow? #5000245 Prediction
Answer : Quick
- 247) What can we call a doctor who can sell prescribed medicines? #5000243 Prediction
Answer : Chemist
- 248) How do you describe the desert? Humid or dry ? #5000239 Prediction
Answer : Dry
- 249) How many days are added in February during a leap year? #5000238 Prediction
Answer : One day / 1
- 250) What would you call people who study ancient bones, rocks, and plants? #5000236 Prediction
Answer : Archaeologist
- 251) If there are 8 black balls and 1 white ball, and I randomly pick one, which color is most likely to be picked? #5000235 Prediction
Answer : Black
- 252) What do we call the instructions that tell you how to cook food? #5000232 Prediction
Answer : Recipe
- 253) What is the antonym of "predecessor"? #5000224 Prediction
Answer : Successor
- 254) What are the strings on shoes? #5000223 Prediction
Answer : Shoelace
- 255) What type of resources does an electric device use? #5000220 Prediction
Answer : Electricity
- 256) What's the place of areas for colleges or universities? #5000218 Prediction
Answer : Campus
- 257) Which kind of mountain can erupt? #5000215 Prediction
Answer : Volcanic
- 258) How many months does a calendar year have? #5000207 Prediction
Answer : 12
- 259) What do we call the sounds produced by singers or musical instruments? #5000194 Prediction
Answer : Music
- 260) What is the political system where the country is ruled by a king or a queen? #5000176 Prediction
Answer : Monarchy
- 261) What is the word used to describe that through which light cannot pass? #5000155 Prediction
Answer : Opaque

- 262) How do we describe that through which light can pass? #5000153 Prediction
Answer : Transparent
- 263) What do we call the movement of a knife to separate or divide? #5000103 Prediction
Answer : Cut
- 264) What is the book with maps called? #5000094 Prediction
Answer : Atlas
- 265) In the word 'postgraduate', what does 'post' mean? #5000091 Prediction
Answer : After
- 266) What is the opposite of positive? #5000090 Prediction
Answer : Negative
- 267) What do we call the thread in the center of a candle? #5000088 Prediction
Answer : Wick
- 268) What natural resource is used by a carpenter? #5000083 Prediction
Answer : Wood
- 269) Into how many hemispheres does the Equator split the earth? #5000081 Prediction
Answer : 2
- 270) What is the title of a newspaper column called? #5000076 Prediction
Answer : Headline
- 271) What is the adjective to describe the creatures that no longer exist? #5000075 Prediction
Answer : Extinct
- 272) What can we call a person who studies teeth? #5000068 Prediction
Answer : Dentist
- 273) What do we call the person who works in a company? #5000067 Prediction
Answer : An employee
- 274) What do we call the festival that is held every four years, which gathers several nation's people for sporting events? #5000065 Prediction
Answer : Olympics
- 275) Which part of the body do optometrists examine? #5000059 Prediction
Answer : Eyes
- 276) What can bring astronauts to space? #5000058 Prediction
Answer : Spacecraft
- 277) What is paper made from? #5000056 Prediction
Answer : Tree / Trees / wood
- 278) What attitude would you have when you are in a job interview: enthusiastic or passive? #5000051 Prediction
Answer : Enthusiastic

1) Opening Day #24000434 New Prediction

Opening a new business is an exciting yet challenging endeavor that requires meticulous planning and strategic execution. One crucial part of launching a new business is making a memorable impression on your big day, also known as the grand opening. This event not only officially introduces your business to the public but also sets the tone for your brand identity and customer experience. To ensure a successful grand opening, offer enticing incentives and activities that attract potential customers and create buzz around your business.

Consider offering exclusive discounts or special promotions to attendees to encourage purchases and help them spread the word about your business. Additionally, providing free samples or demonstrations of your products or services can give guests a firsthand experience of what your business has to offer. Hosting engaging activities, such as live music, games, or interactive workshops, can also enhance the overall atmosphere and make the event more enjoyable for guests.

Another effective strategy is to offer giveaways or raffles with attractive prizes, which can incentivize attendees to participate and stay longer at your event. Collaborating with local influencers or community leaders can further amplify your reach and attract a larger crowd. Ensuring that your event is well-organized and staffed will contribute to a positive experience for your guests, leaving a lasting impression that encourages them to return. Ultimately, a successful grand opening is about creating a welcoming, memorable experience for your guests, showcasing your business's unique value, and building a foundation for long-term customer relationships. By offering appealing incentives and engaging activities, you can generate excitement and establish a strong presence in your community.

2) The City of London #24000411 New Prediction

Who would have thought back in 1698, as they downed their espressos, that the little band of stockbrokers from Jonathan's Coffee House in Change Alley EC3 would be the founder members of what would become the world's mighty money capital?

Progress was not entirely smooth. The South Sea Bubble burst in 1720 and the coffee house exchange burned down in 1748. As late as Big Bang in 1986, when bowler hats were finally hung up, you wouldn't have bet the farm on London surpassing New York, Frankfurt, and Tokyo as Mammon's international nexus.

Yet the 325,000 souls who operate in the UK capital's financial hub have now overtaken their New York rivals in size of the funds managed (including offshore business); they hold 70% of the global secondary bond market and the city dominates foreign exchange trading. And its institutions paid out £9 billion in bonuses in December. The Square Mile has now spread both eastwards from EC3 to Canary Wharf and westwards into Mayfair, where many of the private equity 'locusts' and their hedge fund pals now hang out.

3) Challenges Faced by Humanity #24000401 New Prediction

Plants serve as the conduit of energy into the biosphere, provide food and materials used by humans, and they shape our environment. According to Ehrhardt and Frommer, the three major challenges facing humanity in our time are food, energy, and environmental degradation. All three are plant related. All of our food is produced by plants, either directly or indirectly via animals that eat them. Plants are a source of energy production. And they have intimately involved in climate change and a major factor in a variety of environmental concerns, including agricultural expansion and its impact on habitat destruction and waterway pollution. What's more, none of these issues are independent of each other. Climate change places additional stresses on the food supply and on various habitats. So plant research is instrumental in addressing all of these problems and moving into the future. For plant research to move significantly forward, Ehrhardt and Frommer say technological development is critical, both to test existing hypotheses and to gain new information and generate fresh hypotheses.

4) **Ecology and Climatology** #24000285 New Prediction

Ecology is the study of interactions of organisms among themselves and with their environment. It seeks to understand patterns in nature (e.g., the spatial and temporal distribution of organisms) and the processes governing those patterns. Climatology is the study of the physical state of the atmosphere - its instantaneous state or weather, its seasonal-to-interannual variability, its long-term average condition or climate, and how climate changes over time. These two fields of scientific study are distinctly different. Ecology is a discipline within the biological sciences and has as its core the principle of natural selection. Climatology is a discipline within the geophysical sciences based on applied physics and fluid dynamics. Both, however, share a common history.

The origin of these sciences is attributed to Aristotle and Theophrastus and their books Meteorological and Enquiry into Plants, respectively, but their modern beginnings trace back to natural history and plant geography. Seventeenth, eighteenth, and nineteenth-century naturalists and geographers saw changes in vegetation as they explored new regions and laid the foundation for the development of ecology and climatology as they sought explanations for these geographic patterns.

5) **Coffee Shop** #24000435 Prediction

Most successful coffeehouses have heavy foot traffic and high-volume sales. Most will serve up to 500 customers per day and manage up to five customer turnovers during the lunch hour, despite limited floor space and modest seating capacity. Profit margins for coffee and espresso drinks are extremely high. After all, you're dealing with a product that's more than 95 percent water. At the same time, your average ticket amount is around \$3, so you need volume to reach and maintain profitability. Besides specialty roasted coffee by the cup, most coffeehouses also have espresso-based drinks (cappuccinos, lattes, etc.), assorted teas, bottled water and fruit juices, along with an inviting assortment of baked goods, a selection of desserts and coffee beans by the pound.

6) **Card Safety** #24000433 Prediction

If someone used your card to buy a car without your permission, you should contact your bank.

Online shopping has become increasingly popular due to its convenience, allowing consumers to purchase a wide range of products from the comfort of their homes. However, unauthorized transactions can occur, such as when someone uses your credit card to buy a car without your permission. Report such incidents promptly to your bank to initiate an investigation and potentially recover the lost funds.

If a family member makes the unauthorized transaction, do not contact the bank immediately. Involving the bank could lead to police intervention, as unauthorized use of a credit card is legally considered theft, even among family members. Therefore, if possible, it is recommended to resolve the matter privately before escalating it officially. Another situation arises when a friend or acquaintance uses your card with or without your explicit consent. Depending on the circumstances, you may need to evaluate whether to pursue legal action or seek an informal resolution. Each scenario requires careful consideration of the relationship and the potential legal implications.

7) Outdoor Games #24000428 Prediction

Playing outdoor games is essential for children's physical and mental development. Engaging in activities such as soccer, tag, and hide-and-seek helps children improve their motor skills, coordination, and overall fitness. Outdoor play also provides opportunities for kids to socialize, develop teamwork and communication skills, and learn about cooperation and fair play. Additionally, being outside allows children to explore their environment, stimulate their imagination, and experience the benefits of fresh air and sunlight. Regular outdoor play can also reduce the risk of obesity and related health issues, while promoting a healthy and active lifestyle. In today's digital age, encouraging kids to participate in outdoor games is more important than ever to counteract the sedentary habits associated with screen time.

8) City Life #24000427 Prediction

Urbanization has been a defining trend of the modern era, with more than half of the world's population now living in cities. Cities offer numerous advantages, including access to better job opportunities, healthcare, education, and cultural amenities. The concentration of people and resources in urban areas drives economic growth and innovation, making cities engines of development. Additionally, cities often serve as melting pots of diverse cultures, fostering social integration and the exchange of ideas.

However, living in cities also presents several challenges. Urban areas are frequently plagued by issues such as traffic congestion, pollution, and high living costs. The dense population can strain infrastructure and public services, leading to problems like inadequate housing and healthcare facilities. Furthermore, cities are often characterized by stark inequalities, with significant disparities in wealth and access to resources between different neighborhoods. The rapid pace of urbanization can exacerbate these issues, as cities struggle to accommodate the growing population.

Sustainability is another critical concern for urban living. The high energy consumption and waste generation associated with city life contribute to environmental degradation and climate change. To address these challenges, urban planners and policymakers are increasingly focusing on creating sustainable, livable cities. This involves promoting public transportation, green spaces, renewable energy sources, and efficient waste management systems. By adopting such measures, cities can enhance the quality of life for their residents while minimizing their environmental impact.

Ultimately, while cities offer numerous benefits, they also require careful planning and management to ensure that they remain vibrant, inclusive, and sustainable places to live.

9) **New Business** #24000426 **Prediction**

Opening a new business is an exciting yet challenging endeavor that requires meticulous planning and strategic execution. One of the crucial aspects of launching a new business is making a memorable impression on your big day, also known as the grand opening. This event not only serves as the official introduction of your business to the public but also sets the tone for your brand's identity and customer experience. To ensure a successful grand opening, it is essential to offer enticing incentives and activities that will attract potential customers and create a buzz around your business.

Consider offering exclusive discounts or special promotions to attendees, which can encourage them to make purchases and spread the word about your business. Additionally, providing free samples or demonstrations of your products or services can give guests a firsthand experience of what your business has to offer. Hosting engaging activities, such as live music, games, or interactive workshops, can also enhance the overall atmosphere and make the event more enjoyable for guests.

Another effective strategy is to offer giveaways or raffles with attractive prizes, which can incentivize attendees to participate and stay longer at your event. Collaborating with local influencers or community leaders can further amplify your reach and attract a larger crowd. Ensuring that your event is well-organized and staffed will contribute to a positive experience for your guests, leaving a lasting impression that encourages them to return.

Ultimately, a successful grand opening is about creating a welcoming and memorable experience for your guests, showcasing the unique value of your business, and building a foundation for long-term customer relationships. By offering appealing incentives and engaging activities, you can generate excitement and establish a strong presence in your community.

10) **LED Bulbs** #24000425 **Prediction**

LED bulbs, or light-emitting diode bulbs, have gained widespread popularity in recent years due to their energy efficiency and longevity. Unlike traditional incandescent bulbs, which produce light by heating a filament, LED bulbs generate light through the movement of electrons in a semiconductor material. This process not only consumes less energy but also produces less heat, making LED bulbs more environmentally friendly. Additionally, LED bulbs have a longer lifespan, often lasting up to 25,000 hours or more, compared to the 1,000-hour lifespan of incandescent bulbs. This extended lifespan reduces the frequency of bulb replacements, contributing to lower maintenance costs and less waste.

Moreover, LED bulbs are available in a variety of colors and brightness levels, providing consumers with more options for their lighting needs. They can be used in a wide range of applications, from residential lighting to commercial and industrial settings. The versatility of LED bulbs has also led to their adoption in innovative technologies, such as smart lighting systems that can be controlled remotely via smartphone apps.

Despite their many advantages, LED bulbs have some limitations. The initial cost of LED bulbs is higher than that of traditional incandescent bulbs, which can be a barrier for some consumers. However, the long-term energy savings and reduced replacement costs often offset this initial investment. Furthermore, some early models of LED bulbs experienced issues with color quality and light distribution, although advancements in technology have largely addressed these concerns.

Overall, the transition to LED bulbs represents a significant step toward more sustainable and efficient lighting solutions, offering numerous benefits for both consumers and the environment.

11) Business Microloans #24000424 Prediction

Business microloans have emerged as a powerful tool for supporting small enterprises and fostering economic growth, particularly in developing countries. These small, short-term loans are designed to provide entrepreneurs with the necessary capital to start or expand their businesses. Microloans often have lower interest rates compared to traditional loans, making them more accessible to individuals who might not qualify for conventional financing. The impact of microloans can be profound, as they enable entrepreneurs to purchase equipment, hire employees, and increase production, ultimately contributing to the overall economy.

One of the key benefits of business microloans is their ability to empower marginalized groups, including women and minorities, by providing them with the financial resources to achieve economic independence. Many microloan programs specifically target these groups, recognizing that they often face greater barriers to accessing traditional financial services. By supporting these entrepreneurs, microloans can help reduce poverty and promote social inclusion.

However, there are also challenges associated with microloans. Some critics argue that the small loan amounts and short repayment periods can place undue pressure on borrowers, potentially leading to financial strain and default. Additionally, the success of microloan programs often depends on the availability of complementary services, such as financial literacy training and business development support, to ensure that borrowers can effectively manage their loans and grow their businesses.

Despite these challenges, business microloans remain a vital tool for promoting entrepreneurship and economic development. As more financial institutions and non-profit organizations recognize the value of microloans, it is essential to continue refining and expanding these programs to maximize their impact on communities around the world.

12) Online Shopping and Bank Cards #24000423 Prediction

In recent years, online shopping has become increasingly popular, thanks to its convenience and the vast array of products available at consumers' fingertips. The rise of e-commerce platforms has transformed the retail landscape, allowing people to shop from the comfort of their homes. A crucial aspect of this shift has been the use of bank cards for transactions. Credit and debit cards have become the preferred method of payment for online shoppers due to their ease of use and the security features they offer. However, this widespread adoption has also raised concerns about the potential risks associated with online transactions. Cybersecurity threats, such as hacking and phishing, have put consumers' financial information at risk, leading to increased efforts by banks and e-commerce platforms to enhance security measures.

Moreover, the use of bank cards for online shopping has implications for consumer behavior. Studies have shown that people are more likely to make impulsive purchases when using credit cards compared to cash. The ease of online transactions, coupled with targeted advertising and personalized recommendations, can lead to overspending and financial strain for some consumers. On the other hand, online shopping with bank cards can offer benefits such as reward points, cashback, and fraud protection, which can enhance the overall shopping experience.

As online shopping continues to grow, it is essential for consumers to remain vigilant about their financial security and to make informed decisions about their purchases. Both consumers and financial institutions must work together to ensure a safe and enjoyable online shopping experience.

13) Preschool Funding #24000422 Prediction

A recent policy proposal suggests reducing funding for preschool education programs. Proponents of the proposal argue that reallocating these funds to other educational sectors, such as primary and secondary education, could yield better long-term benefits. They believe that addressing issues like classroom overcrowding and teacher shortages in these sectors is more pressing. Additionally, some proponents argue that parents should take more responsibility for early childhood education, rather than relying on government-funded programs.

On the other hand, critics of the proposal emphasize the crucial role of early childhood education in laying the foundation for future academic and social success. Numerous studies have shown that children who attend high-quality preschool programs are more likely to perform better in school, graduate from high school, and have higher earning potential as adults. Critics also point out that cutting funding for preschool programs could disproportionately affect low-income families who rely on these services for affordable early childhood education. This reduction in funding could exacerbate existing inequalities in the education system.

Furthermore, early childhood education programs provide essential support for working parents, enabling them to maintain stable employment while ensuring their children receive proper care and learning opportunities. The debate continues, with strong opinions on both sides regarding the best allocation of limited educational resources. Ultimately, the question remains whether the benefits of reallocating funds outweigh the potential long-term consequences of reducing support for early childhood education.

14) Human Remains #24000419 Prediction

In April 2008 the British government announced that, henceforth, all human remains archaeologically excavated in England and Wales should be reburied after a two-year period of scientific analysis. Not only would internationally important prehistoric remains have to be returned to the ground, removing them from public view but also there would no longer be any possibility of long term scientific investigation as new techniques and methods emerged and developed in the future. Thus, while faunal remains, potsherds, artifacts, and environmental samples could be analyzed and re-analyzed in future years, human remains were to be effectively removed from the curation process. Archaeologists and other scientists were also concerned that this might be the first step towards a policy of reburying all human remains held in museum collections in England and Wales including prehistoric, Roman, Saxon, Viking and Medieval as well as more recent remains.

15) Geothermal Energy #24000405 Prediction

What is the solution for nations with increasing energy demands, hindered by frequent power cuts and an inability to compete in the international oil market? For East Africa, at least, experts think geothermal energy is the answer. More promising still, the Kenyan government and international investors seem to be listening. This is just in time, according to many, as claims of an acute energy crisis are afoot due to high oil prices, population spikes, and droughts. Geothermal energy works by pumping water into bedrock, where it is heated and returns to the surface as steam which is used directly as a heat source or to drive electricity production. Source: Energy Information Administration, Geothermal Energy in the Western United States and Hawaii.

Currently, over 60% of Kenya's power comes from hydroelectric sources, but these are proving increasingly unreliable as the issue of seasonal variation is intensified by erratic rain patterns. Alternative energy sources are needed; and the leading energy supplier in Kenya, Kenya Electricity Generating Company (KenGen), hopes to expand its geothermal energy supply from 13% to 25 % of its total usage by 2020.

16) Office Space #24000403 Prediction

The notion that office space has a role in promoting or inhibiting performance is backed up by solid research. A recent study conducted by Harvard University and Massachusetts General Hospital showed that improvements to the physical surroundings of workers impacted productivity not just because the working environment was more attractive, but because the changes made employees feel cared for. A Swedish research paper revealed a strong link between the type of office an employee worked in and their overall job satisfaction and health. Various findings have emerged as a result of studies such as this. Pot plants and greenery can apparently have a real impact on psychological well-being. Those who work in a private room tend to be in better health than workers based in open-plan offices. Sufficient light can reduce sickness among workers and increase productivity, and an attractive office can make workers feel more cared for and therefore more loyal to their company. Most of these points make a good rational sense. But some companies aren't content simply to increase the health, productivity, and contentment of their employees.

17) Australian Indigenous Food #24000402 Prediction

In its periodic quest for culinary identity, Australia automatically looks to its indigenous ingredients, the foods that are native to this country. 'There can be little doubt that using an indigenous product must qualify a dish as Australian', notes Stephanie Alexander. Similarly, and without qualification, Cherikoff states that 'A uniquely Australian food culture can only be based upon foods indigenous to this country, although, as Craw remarks, proposing Australian native foods as national symbols rely more upon their association with 'nature' and geographic origin than on common usage. Notwithstanding the lack of justification for the premise that national dishes are, of necessity, founded on ingredients native to the country - after all, Italy's gastronomic identity is tied to the non-indigenous tomato, Thailand's to the non-indigenous chili the reality is that Australians do not eat indigenous foods in significant quantities. The exceptions are fish, crustaceans, and shellfish from oceans, rivers, and lakes, most of which are unarguably unique to this country. Despite valiant and well-intentioned efforts today at promoting and encouraging the consumption of native resources, bush foods are not harvested or produced in sufficient quantities for them to be a standard component of Australian diets, nor are they generally accessible. Indigenous foods are less relevant to Australian identity today than lamb and passionfruit, both initially imported and now naturalized.

18) Upper Palaeolithic People #24000400 Prediction

The ways of life of Upper Palaeolithic people are known through the remains of meals scattered around their hearths, together with many tools and weapons and the debris left over from their making. The people were hunter-gatherers who lived exclusively from what they could find in nature without practicing either agriculture or herding. They hunted the bigger herbivores, while berries, leaves, roots, wild fruit and mushrooms probably played a major role in their diet. Their hunting was indiscriminate, perhaps because so many animals were about that they did not need to spare pregnant females or the young. In the cave of Enlène, for example, many bones of reindeer and bison fetuses were found. Apparently, Upper Palaeolithic people hunted like other predators and killed the weakest prey first. They did, however, sometimes concentrate on salmon runs and migrating herds of reindeer. Contrary to popular beliefs about cavemen, Upper Palaeolithic people did not live deep inside caves. They rather chose the foot of cliffs, especially when an overhang provided good shelter. On the plains and in the valleys, they used tents made from hides of the animals they killed. At times, on the great Russian plains, they built huts with huge bones and tusks collected from the skeletons of mammoths.

19) Sports Events #24000398 Prediction

11 February 2009 – Major athletic events around the globe, from the 2014 Sochi Olympics to an annual powerboat race in Norwegian fjords, are striving to neutralise their carbon footprint as part of a worldwide climate network, the United Nations Environment Programme (UNEP) said today. The sporting events are the latest participants to join the network, and are particularly important for inspiring further global action on the environment, said Achim Steiner, UNEP Executive Director. Organisers of the 2014 Sochi Olympic and Paralympic Winter Games – to be held in a unique natural setting between the shores of the Black Sea and the soaring snow-capped Caucasus Mountains say they will put an estimated \$1.75 billion into energy conservation and renewable energy. That investment will be dedicated to improving transport infrastructure and offsetting greenhouse gas emissions from the use of electricity, air travel and ground transportation, the reforestation of Sochi National Park and the development of green belts in the city.

20) Paying Children #24000390 Prediction

Many people who have written on the subject of allowances say it is not a good idea to pay your child for work around the home. These jobs are a normal part of family life. Paying children to do extra work around the house, however, can be useful. It can even provide an understanding of how a business works. Allowances give children a chance to experience the things they can do with money. They can share it in the form of gifts or giving to a good cause.

They can spend it by buying things they want. Or they can save and maybe even invest it. Saving helps children understand that costly goals require sacrifice: you have to cut costs and plan for the future. Requiring children to save part of their allowance can also open the door to future savings and investing. Many banks offer services to help children and teenagers learn about personal finance.

21) Electric Vehicles #24000387 Prediction

Although we tend to think of electric cars as being something completely modern, they were in fact some of the earliest types of motorised vehicle. At the beginning of the twentieth-century electric cars were actually more popular than cars with an internal combustion engine as they were more comfortable to ride in. However, as cars fueled by petrol increased in importance. Electric cars declined. The situation became such that electric vehicles were only used for certain specific purposes – as fork-lift trucks, ambulances and urban delivery vehicles, for example.

Although electricity declined in use in road vehicles, it steadily grew in importance as a means of powering trains. Switzerland, for example, was quick to develop an electrified train system, encouraged in this no doubt by the fact that it had no coal or oil resources of its own.

Nowadays there is renewed interest in electricity as a means of powering road vehicles. Why is this case? Well, undoubtedly economic reasons are of considerable importance. The cost of oil has risen so sharply that there is a strong financial imperative to look for an alternative. However, there are also environmental motivations.

22) Soil Protection #24000375 Prediction

It's very easy to forget about what's in the ground beneath our feet and why it's so important to protect it. One tablespoon of soil contains more organisms than there are people on Earth; billions of bacteria, fungi, and other microorganisms combine with minerals, water, air, and organic matter to create a living system that supports plants and, in turn, all life. Healthy soil can store as much as 3,750 tonnes of water per hectare, reducing the risk of flooding, and the International Panel on Climate Change (IPCC) has said that 89% of all agricultural emissions could be mitigated if we improved the health of our soil.

Good soil management also increases disease resistance in livestock and ultimately drives profits for farmers - yet soil and its impact on the health of our animals has, over recent decades, been one of the most neglected links in UK agriculture. Over the last 50 years agriculture has become increasingly dependent on chemical fertilisers, with applications today around 10 times higher than in the 1950s.

Farmers often think the chemical fertilizer NPK (nitrogen, phosphorous and potassium) provides all the nutrition a plant requires, but it also has a detrimental effect on the long-term health of the land: research suggests there are fewer than 100 harvests left in many of the world's soils.

23) Malaysian Tourism #24000369 Prediction

Malaysia is one of the most pleasant, hassle-free countries to visit in Southeast Asia. Aside from its gleaming 21st-century glass towers, it boasts some of the most superb beaches, mountains and national parks in the region. Malaysia is also launching its biggest-ever tourism campaign in an effort to lure 20 million visitors here this year. Any tourist itinerary would have to begin in the capital, Kuala Lumpur, where you will find the Petronas Twin Towers, which once comprised the world tallest buildings and now hold the title of second tallest. Both the 88-story towers soar 1,480 feet high and are connected by a skybridge on the 41st floor.

The limestone temple Batu Caves, located 9 miles north of the city, have a 328-foot-high ceiling and feature ornate Hindu shrines, including a 141-foot-tall gold-painted statue of a Hindu deity. To reach the caves, visitors have to climb a steep flight of 272 steps. In Sabah state on Borneo island, not to be confused with Indonesia's Borneo, you'll find the small mushroom-shaped Sip Adan island, off the coast of Sabah, rated as one of the top five diving sites in the world. Sipadan is the only oceanic island in Malaysia, rising from a 2,300-foot abyss in the Celebes Sea.

24) Negotiation #24000367 Prediction

Negotiation is a common process in business to mainly solve business conflicts between both parties. Compromise is a basic negotiation state in which both parties give up something that they want in order to get something else they want more. Compromise usually occurs in unfair parties when there is a fixed pie to be divided up, and whatever on one side gets, the other side loses.

In compromise situations, neither side gets all of what they really want, but they each make concessions in order to reach an agreement that is acceptable to both. Both parties usually can reach a win-win concept through compromise. However, negotiation cannot resolve all the conflicts if one party is unwilling to resolve the problem.

25) Evolution of RAS #24000364 **Prediction**

The evolution of the RAS (Royal Agricultural Society) fits into the wider Western trend of promoting nationalism, progress, and technology through exhibitory venues, which first became popular in the 1850s. Various types of fairs, from local agricultural shows to Worlds Fairs, were used as instruments of hegemony to support imperialism, to promote burgeoning capitalist endeavours, and to shape class identities, social spaces and public spaces. Visual culture and the art of display became essential in defining aspects of national distinction. Colonial nations in particular, such as Canada and Australia, were attempting to develop distinct national identities to differentiate themselves from British imperial power. Agricultural fairs in North America originated at the beginning of the nineteenth century and were devoted to educating practising farmers in ways of improving their cultivation of livestock and crops through the use of various technologies.

26) Hookham #24000362 **Prediction**

The booksellers of Hookham and Carpenter (hereafter referred to only as Hookham) were located on New Bond Street in London, and their records span the most politically turbulent decade of the eighteenth-century the 1790s. Clients who frequented Hookham were primarily from the aristocratic or gentry classes. In fact, of Hookhams total buyers, 22% were the aristocracy, and 35% of the aristocracy purchased novels. We can also confidently assume that untitled female customers were of gentry income because their addresses were primarily in London's fashionable West End.

Hookhams ledgers not only reveal a dramatic increase in the proportion of female purchasers of novels by comparison to earlier studies of provincial women, but they also reveal a remarkable increase in the proportion of female purchases of novels authored by females. Such a marked increase illustrates that Hookham's leisurely female customers were able to buy more novels. Furthermore, the fact that these female aristocrats and gentry have accounts under their own name, not their husbands, demonstrates the greater degree of agency and independence that these urban, moneyed women had relative to provincial women.

27) Drone Delivery #24000353 **Prediction**

Delivering packages with drones can reduce carbon dioxide emissions in certain circumstances as compared to truck deliveries, a new study from the University of Washington transportation engineers finds.

In a paper to be published in an upcoming issue of Transportation Research Part D, researchers found that drones tend to have carbon dioxide emissions advantages over trucks when the drones don't have to fly very far to their destinations or when a delivery route has few recipients.

Trucks that can offer environmental benefits by carrying everything from clothes to appliances to furniture in a single trip become a more climate-friendly alternative when a delivery route has many stops or is farther away from a central warehouse.

For small, light-weight packages a bottle of drugs or a kid's bathing costume drones perform particularly well. However, the carbon benefits erode because the weight of a package increases since these unmanned aerial vehicles have to be compelled to use extra energy to remain aloft with a significant load.

28) Plug-in Vehicle #24000346 Prediction

Here's a term you're going to hear much more often: plug-in vehicle, and the acronym PEV. It's what you and many other people will drive to work in ten years and more from now. At that time, before you drive off in the morning, you will first unplug your car - your plugin vehicle. Its big onboard batteries will have been fully charged overnight, with enough power for you to drive 50-100 kilometres through city traffic.

When you arrive at work you'll plug in your car once again, this time into a socket that allows power to flow from your car's batteries to the electricity grid. One of the things you did when you bought your car was to sign a contract with your favourite electricity supplier, allowing them to draw a limited amount of power from your car's batteries should they need to, perhaps because of a blackout, or very high wholesale spot power prices. The price you get for the power the distributor buys from your car would not only be most attractive to you, but it would also be a good deal for them too, their alternative being very expensive power from peaking stations.

29) Oral Storytelling Skills #24000344 Prediction

The oral storytelling skills of African American preschoolers make a difference in how quickly their reading skills develop, according to a new study from the Frank Porter Graham Child Development Institute (FPG) at the University of North Carolina at Chapel Hill. Researchers say the effect is much different for girls and boys.

"Knowing how to tell a clear and coherent story is an important skill for helping young children to develop strong reading skills, which, in turn, can help them to be successful across a number of different subjects in school," said FPG advanced research scientist Nicole Gardner-Neblett. "Prior research suggests that historical and cultural factors foster strong storytelling skills among African American children, which has implications for their development as readers."

Two years ago, Gardner-Neblett's own research was the first to demonstrate the connection between African American preschoolers' storytelling abilities and their early reading skills in kindergarten. That study found a link between storytelling and reading only for the African American children, from households across income levels, but not for any other demographic group.

30) Increasing Physical Activities #24000339 Prediction

Promoting active lifestyles can help us address some of the important challenges facing the UK today. Increasing physical activity has the potential to improve the physical and mental health of the nation, reduce all-cause mortality and improve life expectancy. It can also save money by significantly easing the burden of chronic disease on the health and social care services. Increasing cycling and walking will reduce transport costs, save money and help the environment. Fewer car journeys can reduce traffic, congestion and pollution, improving the health of communities.

Other potential benefits linked to physical activity in children and young people include the acquisition of social skills through active play (leadership, teamwork, and co-operation), better concentration in school and displacement of anti-social and criminal behaviour. The importance of physical activity for health was identified over 50 years ago. During the 1950s, comparisons of bus drivers with more physically active bus conductors and office-based telephonists with more physically active postmen demonstrated lower rates of coronary heart disease and smaller uniform sizes in the more physically active occupations. This research led the way for further investigation, and evidence now clearly shows the importance of physical activity in preventing ill health.

31) Plastic Particles #24000326 Prediction

Fish are being killed and prevented from reaching maturity by the litter of plastic particles finding their way into the world's oceans, new research has proved. Some young fish have been found to prefer tiny particles of plastic to their natural food sources, effectively starving them before they can reproduce. The growing problem of microplastics - tiny particles of polymer-type materials from modern industry - has been thought for several years to be a peril for fish, but the study published on Thursday is the first to prove the damage in trials. Microplastics are near-indestructible in natural environments. They enter the oceans through litter, when waste such as plastic bags, packaging and other convenience materials are discarded. Vast amounts of these end up in the sea, through inadequate waste disposal systems and sewage outfalls. Another growing source is microbeads, tiny particles of hard plastics that are used in cosmetics, for instance as an abrasive in modern skin cleaners. These easily enter waterways as they are washed off as they are used, flushed down drains and forgotten, but can last for decades in our oceans.

The impact of these materials has been hard to measure, despite being a growing source of concern. Small particles of plastics have been found in seabirds, fish and whales, which swallow the materials but cannot digest them, leading to a build-up in their digestive tracts. For the first time, scientists have demonstrated that fish exposed to such materials during their development show stunted growth and increased mortality rates, as well as changed behavior that could endanger their survival.

32) Independent Work #24000324 Prediction

Working nine to five for a single employer bears little resemblance to the way a substantial share of the workforce makes a living today. Millions of people assemble various income streams and work independently, rather than in structured payroll jobs. This is hardly a new phenomenon, yet it has never been well measured in official statistics and the resulting data gaps prevent a clear view of a large share of labor-market activity. To better understand the independent workforce and what motivates the people who participate in it, the McKinsey Global Institute surveyed some 8,000 respondents across Europe and the United States. We asked about their income in the past 12 months-encompassing primary work, as well as any other income-generating activities, and about their professional satisfaction and aspirations for work in the future. The resulting report, *Independent Work: Choice, Necessity, and the gig economy*, finds that up to 162 million people in Europe and the United States-or 20 to 30 percent of the working-age population - engage in some form of independent work. While demographically diverse, independent workers largely fit into four segments (exhibit): free agents, who actively choose independent work and derive their primary income from it; casual earners, who use independent work for supplemental income and do so by choice; reluctants, who make their primary living from independent work but would prefer traditional jobs; and the financially strapped, who do supplemental independent work out of necessity.

33) Bertrand Russell #24000319 Prediction

Bertrand Russell was arguably the greatest philosopher of the 20th century and the greatest logician since Aristotle. Analytic philosophy, the dominant philosophy of the twentieth century, owes its existence more to Russell than to any other philosopher. And the system of logic developed by Russell and A N Whitehead, based on earlier work by Dedekind, Cantor, Frege, and Peano, broke logic out of its Aristotelian straitjacket. He was also one of the century's leading public intellectuals and won the Nobel Prize for Literature in 1950 "in recognition of his varied and significant writings in which he champions humanitarian ideals and freedom of thought."

Russell was involved, often passionately, in numerous social and political controversies of his time. For example, he supported suffragists, free thought in religion and morals, and world government; he opposed World War I and the Vietnam War, nationalism, and political persecution. He was jailed in 1918 for anti-war views and in 1961 for his anti-nuclear weapons stance. He was married 4 times and had 3 children.

34) Khoikhoi's Domination #24000317 Prediction

The area that is now South Africa has been inhabited by humans for millennia. The San, the original inhabitants of this land, were migratory people who lived in small groups of about 15 to 20 people. They survived by fishing and hunting and by gathering roots and other wild foods. They did not build permanent dwellings but used rock shelters as temporary dwellings. Around 2,000 years ago, Khoikhoi pastoralists migrated to the coast. In the eastern part of present-day South Africa, iron-working societies date from about 300 AD. The SothoTswana and Nguni peoples arrived in this region around 1,200 AD. They lived by agriculture and stock farming, mined gold, copper and tin and hunted for ivory and built stone-walled towns. Over the centuries, these societies had diverse contacts with the Khoisan. Strife between the San and the Khoikhoi developed over competition for the game; eventually, the Khoikhoi became dominant. These people lived in the western part of present-day South Africa and are known collectively as the Khoisan.

35) Ethics #24000314 Prediction

Ethics is a set of moral obligations that define right and wrong in our practises and decisions. Many professions have a formalised system of ethical practises that help guide professionals in the field. For example, doctors commonly take the Hippocratic Oath, which, among other things, states that doctors "do no harm" to their patients. Engineers follow an ethical guide that states that they "hold paramount the safety, health, and welfare of the public." Within these professions, as well as within science, the principles become so ingrained that practitioners rarely have to think about adhering to the ethic it's part of the way they practice. And a breach of ethics is considered very serious, punishable at least within the profession (by revocation of a licence, for example) and sometimes by the law as well. Scientific ethics calls for honesty and integrity in all stages of scientific practice, from reporting results regardless to properly attributing collaborators. This system of ethics guides the practice of science, from data collection to publication and beyond.

36) Teaching machine #24000313 Prediction

IN 1953 B F Skinner visited his daughter's math class. The Harvard psychologist found every pupil learning the same topic in the same way at the same speed. A few days later he built his first "teaching machine", which lets children tackle questions at their own pace. By the mid-1960s similar gizmos were being flogged by door-to-door salesmen. Within a few years, though, enthusiasm for them had fizzled out. Since then education technology (Edtech) has repeated the cycle of hype and flop, even as computers have reshaped almost every other part of life. One reason is the conservatism of teachers and their unions. But another is that the brain-stretching potential of Edtech has remained unproven. Today, however, Skinner's heirs are forcing the sceptics to think again (see article). Backed by billionaire techies such as Mark Zuckerberg and Bill Gates, schools around the world are using new software to "personalize" learning. This could help hundreds of millions of children stuck in dismal classes, but only if Edtech boosters can resist the temptation to revive harmful ideas about how children learn. To succeed, Edtech must be at the service of teaching, not the other way around. The conventional model of schooling emerged in Prussia in the 18th century. Alternatives have so far failed to teach as many children as efficiently. Classrooms, hierarchical year-groups, standardized curriculums and fixed timetables are still the norm for most of the world's nearly 1.5bn schoolchildren.

37) Deep-sea Mineral Resources #24000312 Prediction

The National Oceanography Centre (NOC) is engaged in research into the potential risks and benefits of exploiting deep-sea mineral resources, some of which are essential for low-carbon technology, as well as using ocean robots to estimate the environmental impact of these potential deep-sea mining activities. Late last year the NOC led an expedition on the RRS James Cook that found enough of the scarce element Tellurium present in the crust of a submerged volcano that, if it were all to be used in the production of solar PV panels, could provide two-thirds of the UK's annual electricity supply. Recently, the NOC also led an international study demonstrating deep-sea nodule mining will cause long-lasting damage to deep-sea life, lasting at least for decades.

These nodules are potato-sized rocks containing high levels of metals, including copper, manganese, and nickel. They grow very slowly on the sea-bed, over millions of years. Although no commercial operations exist to extract these resources, many are planned. Professor Edward Hill, Executive Director at the NOC commented, "By 2050 there will be nine billion people on earth and attention is increasingly turning to the ocean, particularly the deep ocean, for food, clean supplies of energy, and strategic minerals.

38) American English #24000310 Prediction

American English is, without a doubt, the most influential and powerful variety of English in the world today. There are many reasons for this. First, the United States is, at present, the most powerful nation on earth and such power always brings with it influence. Indeed, the distinction between a dialect and a language has frequently been made by reference to power. As has been said, a language is a dialect with an army. Second, America's political influence is extended through American popular culture, in particular through the international reach of American films (movies, of course) and music. As Kahane has pointed out, the internationally dominant position of culture results in a forceful expansion of its language, the expansion of language contributes to the prestige of the culture behind it. Third, the international prominence of American English is closely associated with the extraordinarily quick development of communications technology. Microsoft is owned by an American, Bill Gates. This means a computer's default setting for language is American English, although of course this can be changed to suit one's own circumstances.

39) Online Teaching & Learning #24000309 Prediction

What makes teaching online unique is that it uses the internet, especially the World Wide Web, as the primary means of communication. Thus, when you teach online, you don't have to be someplace to teach. You don't have to lug your briefcase full of paper or your laptop to a classroom, stand at a lectern, scribble on a chalkboard (or even use your high-tech, interactive classroom "smart" whiteboard), or grade papers in a stuffy room while your students take a test. You don't even have to sit in your office waiting for students to show up for conferences. You can hold "office hours" on weekends or at night after dinner. You can do all this while living in a small town in Wyoming or a big city like Bangkok, even if you are working for a college whose administrative office is located in Florida or Dubai. You can attend an important conference in Hawaii on the same day you teach your class in New Jersey, logging on from your laptop via the local café's wireless hotspot or your hotel room's high-speed network. Or you may simply pull out your smartphone to quickly check on the latest postings, emails, or text messages from students.

40) Silent Movies #24000296 Prediction

The 1920's moviegoers' experience was largely dominated by silent movies but saw the introduction of synchronised sound. In the 1920s movie stars were really stars - with huge salaries, the fashions and activities of the Hollywood greats echoed around the world and 100,000 people would gather in cities all over the world, including such diverse cities as London and Moscow, to greet Mary Pickford and Douglas Fairbanks when they toured of Europe. Early silent movies were often accompanied by live piano or organ music and provided enormous entertainment value to audiences captivated by the experience of watching moving pictures on the silver screen. Although there had been previous attempts to introduce sound, it wasn't until 1923 that a synchronised soundtrack was photographically recorded and printed on to the side of the strip of motion picture film and made it on to a commercially distributed movie. It would still be seven long years before talking pictures gained total supremacy and finally replaced the silent film era.

41) Human Food #24000286 Prediction

A day would come, Percy Shelley predicted in 1813, when "the monopolizing eater of animal flesh would no longer destroy his constitution by eating an acre at a meal". He explained: "The quantity of nutritious vegetable matter consumed in fattening the carcass of an ox would afford 10 times the sustenance if gathered immediately from the bosom of the earth." Two hundred years later, mainstream agronomists and dietitians have caught up with the poet. A growing scientific consensus agrees that feeding cereals and beans to animals is an inefficient and extravagant way to produce human food, that there is a limited amount of grazing land, that the world will be hard-pressed to supply a predicted population of 9 billion people with a diet as rich in meat as the industrialised world currently enjoys, and that it's not a very healthy diet anyway. On top of this, livestock contributes significantly towards global warming, generating 14.5% of all manmade greenhouse gas emissions, according to one much-quoted estimate from the United Nations. Now that the problem has been identified, the challenge is to persuade people in wealthy countries to eat less meat. That might seem a tall order, but governments have successfully persuaded people to quit smoking through a combination of public information, regulation and taxation.

42) Tea and Coffee Drinkers #24000268 Prediction

The English have the reputation of being a nation of tea drinkers, but this wasn't always the case. By the end of the 17th century, the English were the biggest coffee drinkers in the Western world, and coffee houses became the places to be seen. As well as gossip, you could pick up talk of the latest intellectual developments in science, politics, and so on, in this age of scientific discovery and progress. At first coffee houses were very basic; a room with a bar at one end and a few plain tables and chairs. Customers paid a penny for a bowl, not a cup of coffee. A polite young woman was usually in charge of the bar because it was thought her presence would ensure that the customers didn't use bad language or cause any trouble. An added attraction was that coffee houses provided free newspapers and journals.

43) Solar Energy #24000257 **Prediction**

The advantages and disadvantages of solar power compared to other forms of renewable energy have been greatly debated. While obviously superior to some forms of energy, solar power's high cost and efficiency dependent on geography have limited its appeal. However, a large number of advantages also merit further development and even possible adaptation for residences.

Advantages of Solar Power

Solar energy remains popular because it is both a renewable and clean source of energy. These advantages along with the hope that eventually nations can use solar power to decrease global warming ensure its popularity

Solar energy is a truly renewable resource. All areas of the world have the ability to collect some amount of solar power and solar power is available for collection each day.

Clean

Solar energy is non-polluting. It does not create greenhouse gases, such as oil-based energy does, nor does it create waste that must be stored, such as nuclear energy. It is also far quieter to create and harness, drastically reducing the noise pollution required to convert energy into a useful form. Residential size solar energy systems also have very little impact on the surrounding environment, in contrast with other renewable energy sources such as wind and hydroelectric power.

Low Maintenance

Solar panels have no moving parts and require very little maintenance beyond regular cleaning. Without moving parts to break and replace, after the initial costs of installing the panels, maintenance and repair costs are very reasonable.

44) House Mice #24000246 **Prediction**

According to new research, house mice (*Mus musculus*) are ideal biomarkers of human settlement as they tend to stow away in crates or on ships that end up going where people go.

Using mice as a proxy for human movement can add to what is already known through archaeological data and answer important questions in areas where there is a lack of artifacts, Searle said.

Where people go, so do mice, often stowing away in carts of hay or on ships. Despite a natural range of just 100 meters (109 yards) and an evolutionary base near Pakistan, the house mouse has managed to colonize every continent, which makes it a useful tool for researchers like Searle.

Previous research conducted by Searle at the University of York supported the theory that Australian mice originated in the British Isles and probably came over with convicts shipped there to colonize the continent in the late 18th and 19th centuries.

45) Human Complaints #24000238 Prediction

Humans love to complain to each other. It helps us feel less alone. Think about what happens when a family member or friend is going through a tough time; they call up someone who will listen to their tale of woe. Unfortunately, negative bonding is the default for many groups.

In some families complaining is the only way to get attention. When one person says, I had a bad day; the other person has to top it. "You think you had a tough day, I had to do three TPS reports!" The same thing happens at work and social settings. "Your child didn't sleep through the night until 6 months? Mine was a full year old before she went over six hours." It's a race to the bottom, the worst situation wins.

In "Bitching is Bonding: A Guide To Mutual Complaint," Irene S. Levine, Ph D, a professor of psychiatry at the NYU Langone School of Medicine says, "the reason these conversations feel good is because we feel understood."

46) Museology #24000236 Prediction

What is museology? A simple definition might be that it is the study of museums, their history and underlying philosophy, the various ways in which they have, in the course of time, been established and developed, their avowed or unspoken aims and policies, their educative or political or social role. More broadly conceived, such a study might also embrace the bewildering variety of audiences – visitors, scholars, art lovers, children – at whom the efforts of the museum staff are supposedly directed, as well as related topics such as the legal duties and responsibilities placed upon (or incurred by) museums, perhaps even some thought as to their future. Seen in this light, museology might appear at first sight a subject so specialized as to concern only museum professionals, who by virtue of their occupation are more or less obliged to take an interest in it. In reality, since museums are almost, if not quite as old as civilization itself, and since the plethora of present-day museums embraces virtually every field of human endeavour – not just art, or craft, or science, but entertainment, agriculture, rural life, childhood, fisheries, antiquities, automobiles: the list is endless.

47) Paleolithic People #24000234 Prediction

The ways of life Upper Palaeolithic people are known through the remains of meals scattered around their hearths, together with many tools and weapons and the debris leftover from their making. The people were hunter-gathers who lived exclusively from what they could find in nature without practicing either agriculture or herding. They hunted the bigger herbivores, while berries, leaves, roots, wild fruit, and mushrooms probably played a major role in their diet. Their hunting was indiscriminate; perhaps because so many animals were about they did not need to spare pregnant females or the young. In the cave of Enlène, for example, many bones of reindeer and bison foetuses were found. Apparently, Upper Palaeolithic people hunted like other predators and killed the weakest prey first. They did, however, sometimes concentrate on salmon runs and migrating herds of reindeer. Contrary to popular beliefs about a caveman, upper Palaeolithic people did not live deep inside caves. They rather chose the foot of cliffs, especially when an overhang provided good shelter. On the plains and in the valleys, they used tents made from hides of the animals they killed. At times, on the great Russian plains, they built huts with huge bones and tusks collected from skeletons of mammals.

48) The History of Khoikhoi #24000232 Prediction

In around 2300 BP (Before Present) hunter-gatherers called the San acquired domestic stock in what is now modern-day Botswana. Their population grew and spread throughout the Western half of South Africa. They were the first pastoralists in southern Africa, and called themselves Khoikhoi (or Khoe), which means 'men of men' or 'the real people'. This name was chosen to show pride in their past and culture. The Khoikhoi brought a new way of life to South Africa and to the San, who were hunter-gatherers as opposed to herders. This led to misunderstandings and subsequent conflict between the two groups.

The Khoikhoi were the first native people to come into contact with the Dutch settlers in the mid-17th century. As the Dutch took over land for farms, the Khoikhoi were dispossessed, exterminated, or enslaved and therefore their numbers dwindled. The Khoikhoi were called the 'Hottentots' by European settlers because the sound of their language was so different from any European language, and they could not pronounce many of the words and sounds.

49) The Brundtland Report #24000228 Prediction

The Brundtland Report, Our Common Future (1987), defines sustainable development as "development which meets the needs of the present without compromising the ability of future generations to meet their own needs". Implicit in this definition is the idea that the old pattern of development could not be sustained. Is this true? Development in the past was driven by growth and innovation. It led to new technologies and huge improvements in living standards. To assume that we know what the circumstances or needs of future generations will be is mistaken and inevitably leads to the debilitating sense that we are living on borrowed time.

Only if we assume that society will remain static can we understand the needs of the future? The way we live today could not have been predicted twenty years ago. The sustainability paradigm fails to recognize this. It is a static view and thus places limits on human ingenuity. Similarly, a whole host of false assumptions dominate environmental thought; the scale of problems is exaggerated, the number of resources is underestimated and spurious links are made between areas such as green policies and profit, poverty, and environmental degradation. Those of us who want a better future need to question these assumptions.

50) Carbon Dioxide #24000227 Prediction

Carbon dioxide, mostly produced by human activities, is the most significant one of greenhouse gases and has caused the rise of the global temperature and the sea level, so businesses should take responsibilities to tackle the problems inherited in the business models, and World Wildlife Fund partners with companies should ensure the sustainability of the entire market.

51) Leadership #24000226 Prediction

A leader can define or clarify goals by issuing a memo or an executive order, an edict or a fatwa or a tweet, by passing a law, barking a command, or presenting an interesting idea in a meeting of colleagues. Leaders can mobilize people's energies in ways that range from subtle, quiet persuasion to the coercive threat or the use of deadly force. Sometimes a charismatic leader such as Martin Luther King Jr can define goals and mobilize energies through rhetoric and the power of example. We can think of leadership as a spectrum, in terms of both visibility and the power the leader wields. On one end of the spectrum, we have the most visible: authoritative leaders like the president of the United States or the prime minister of the United Kingdom, or a dictator such as Hitler or Qaddafi. At the opposite end of the spectrum is casual, low-key leadership found in countless situations every day around the world, leadership that can make a significant difference to the individuals whose lives are touched by it. Over the centuries, the first kind-the out-in-front, authoritative leadership - has generally been exhibited by men.

52) New Women #24000225 Prediction

New Women in Britain and North America: This was a concept brought forward by a writer named Sarah, who wrote a book that triggered a dispute between two kinds of commentators. The book mainly talks about women's position in the middle class, including a few aspects, such as finance, employment, marriage, etc. The writer advocated protecting women's position. Although the idea did not go well, it was still commemorated as a women's movement.

53) Bank Overdraft #24000223 Prediction

Banks provide short-term finance to companies in the form of an overdraft on a current account. The advantage of an overdraft is its flexibility. When the cash needs of the company increase with seasonal factors, the company can continue to write cheques and watch the overdraft increase. When the goods and services are sold and cash begins to flow in, the company should be able to watch the overdraft decrease again. The most obvious example of a business which operates in this pattern is farming. The farmer uses the overdraft to finance the acquisition of seed for arable farming, or feed through the winter for stock farming and to cover the period when the crops or animals are growing and maturing. The overdraft is reduced when the crops or the animals are sold.

The main disadvantage of an overdraft is that it is repayable on demand. The farmer whose crop fails because of bad weather knows the problem of being unable to repay the overdraft. Having overdraft financing increases the worries of those who manage the company. The other disadvantage is that the interest payable on overdrafts is variable. When interest rates increase, the cost of the overdraft increases.

54) Product Life Cycle #24000218 Prediction

His product life cycle has 4 very clearly defined stages, each with its characteristics that mean different things for businesses that are trying to manage the life cycle of their particular products.

Introduction Stage - This stage of the cycle could be the most expensive for a company launching a new product. The size of the market for the product is small, which means sales are low, although they will be increasing. On the other hand, the cost of things like research and development, consumer testing, and the marketing needed to launch the product can be very high, especially if it's a competitive sector.

Growth Stage - The growth stage is typically characterised by strong growth in sales and profits, and because the company can start to benefit from economies of scale in production, the profit margins, as well as the overall amount of profit, will increase. This makes it possible for businesses to invest more money in promotional activity to maximize the potential of this growth stage.

55) Is Language Natural to Humans? #24000215 Prediction

When people start thinking about language, the first question which often occurs to them is this: is language natural to humans? - in the same way that grunting is natural to pigs, and barking comes naturally to dogs. Or is it just something we happen to have learned? - in the same way that dogs may learn to beg, or elephants may learn to waltz, or humans may learn to play the guitar.

Clearly, in one sense, children 'learn' whatever language they are exposed to, be it Chinese, Nootka or English. So no one would deny that 'learning' is very important. But the crucial question is whether children are born with 'blank sheets' in their head as far as language is concerned - or whether humans are 'programmed' with an outline knowledge of the structure of languages in general. This question of whether language is partly due to nature or wholly due to learning or nurture is often referred to as the nature-nurture controversy and has been discussed for centuries. For example, it was the topic of one of Plato's dialogues, the Cratylus.

56) Prior Knowledge #24000188 **Prediction**

What is known (prior knowledge or pre-existing knowledge) is the knowledge, skill or ability that a learner brings to a new learning encounter. This includes all knowledge that is available before the learning event, and which has been gathered or developed by any means, and in any situation, including both formal and, quite often, informal learning situations. Learners need enough previous knowledge and understanding to enable them to learn new things; they also need help making links with new and previous knowledge explicit.

It is considered to be valuable to go through a process of what has been called 'activating prior knowledge'. Teachers often go through this process at the beginning of a new topic. They also use introductory strategies at the beginning of lessons which are continuations from previous lessons. In terms of the practicalities of teaching, this is a process of making children think about the topic or remember what has been covered already. In terms of theory, it is to do with activating particular schemas.

57) PTSD Diagnosis #24000141 **Prediction**

Trauma affects even the most resilient among us and can include anything from isolated incidents, such as surviving an active shooter in a public location or narcissistic abuse in an intimate relationship, to severe and prolonged abuse or neglect occurring in childhood. Statistics suggest a lifetime estimate of approximately 6.8% for PTSD diagnosis, which is a small portion relative to those who experience trauma. Thus, on average, approximately 7 out of 100 people will go on to develop symptoms associated with PTSD after experiencing a significant traumatic event, with an average estimate of 7.5 million to 8 million people per year developing the disorder.

The effects of post-traumatic stress can be lifelong, chronic, and highly variable. Children who are abused or neglected may develop symptoms of PTSD, compromising their ability to function as independent adults; others may not develop any symptoms or milder symptoms. Issues with self-worth, self-love, feelings of uselessness, and suicidal ideation are commonly reported in those with PTSD. Those who experience abuse in childhood are more susceptible to being re-traumatized later in life with unhealthy adult relationships. PTSD often includes both short-term effects immediately following a traumatic event and more chronic, long-term effects.

58) Moon's Oxygen #24000140 **Prediction**

Oxygen can be found in many of the minerals in the ground around us, and the Moon is mostly made of the same rocks you'll find on Earth (although with a slightly greater amount of material that came from meteors). Minerals such as silica, aluminium, and iron and magnesium oxides dominate the Moon's landscape. All of these minerals contain oxygen, but not in a form our lungs can access.

The Moon's regolith is made up of approximately 45% oxygen. But that oxygen is tightly bound into the minerals mentioned above. In order to break apart those strong bonds, we need to put in energy. You might be familiar with this if you know about electrolysis. On Earth this process is commonly used in manufacturing, such as to produce aluminium. An electrical current is passed through a liquid form of aluminium oxide (commonly called alumina) via electrodes, to separate the aluminium from the oxygen. In this case, the oxygen is produced as a by-product. On the Moon, the oxygen would be the main product and the aluminium (or other metal) extracted would be a potentially useful by-product.

59) Astronaut #24000139 Prediction

If you ever dreamed of being an astronaut as a kid, then you know that it's no easy feat. The US space agency has revealed on its website all of the requirements that need to be met by someone before they have a shot at going to space. The requirements to be a NASA astronaut have changed over the years to better align with the agency's mission and values.

First, a potential candidate must be a US citizen. They also have to have a master's degree in a STEM field from an accredited institution acceptable degrees include engineering, biological science, physical science, computer science, or mathematics.

On top of that, a potential candidate has to have at least two years of related professional experience after completing their degree, or at least 1,000 hours pilot-in-command time on jet aircraft,' the agency noted. NASA also emphasised the types of characteristics it's looking for in its astronauts, including a skilled leader, a good communicator, and a good collaborator.

60) Compulsory Reburial #24000138 Prediction

Human remains are a fundamental part of the archaeological record, offering unique insights into the lives of individuals and populations in the past. Recently, a new set of challenges to the study of human remains has emerged from a rather unexpected direction: the British government revised its interpretation of nineteenth-century burial legislation to drastically curtail the ability of archaeologists to study human remains of any age excavated in England and Wales. This paper examines these extraordinary events and the legal, political, and ethical questions that they raise.

In April 2008 the British government announced that, henceforth, all human remains archaeologically excavated in England and Wales should be reburied after a two-year period of scientific analysis. Not only would internationally important prehistoric remains have to be returned to the ground, removing them from public view but there would no longer be any possibility of long-term scientific investigation as new techniques and methods emerged and developed in the future. Thus, while faunal remains, potsherds, artifacts, and environmental samples could be analysed and re-analyzed in future years, human remains were to be effectively removed from the curation process.

61) Human Traits #24000053 Prediction

The age-old question of whether human traits are determined by nature or nurture has been answered, a team of researchers says. Their conclusion? It's a draw. By collating almost every twin study across the world from the past 50 years, researchers determined that the average variation for human traits and disease is 49 percent due to genetic factors and 51 percent due to environmental factors. University of Queensland researcher Beben Benyamin from the Queensland Brain Institute collaborated with researchers at VU University of Amsterdam to collate 2,748 studies involving more than 14.5 million pairs of twins. "Twin studies have been conducted for more than 50 years but there is still some debate in terms of how much the variation is due to genetic or environmental factors," Benyamin said.

He said the study showed the conversation should move away from nature versus nature, instead looking at how the two work together. "Both are important sources of variation between individuals," he said. While the study averaged an almost even split between nature and nurture, there was wide variation within the 17,800 separate traits and diseases examined by the study.

62) Jonas Salk #24000002 Prediction

Jonas Salk's legacy as a developer of the polio vaccine marks a monumental milestone in medical history. Born in 1914 in New York City, Salk's journey in medicine was driven by a deep-seated desire to alleviate human suffering. His work revolutionized the field of virology and transformed public health.

Salk's early career was marked by his interest in influenza, leading him to develop techniques for vaccine creation. However, his focus shifted to the poliovirus in the 1940s, a time when polio epidemics were a source of widespread fear, primarily affecting children. Salk embarked on a mission to develop a vaccine, working tirelessly at the University of Pittsburgh.

In 1955, after years of research and clinical trials, Salk's polio vaccine was declared safe and effective. It was a moment of global celebration. The vaccine not only offered protection against the crippling disease but also represented hope and progress in medical science. Salk's refusal to patent the vaccine, making it freely available, demonstrated his commitment to humanity over personal gain.

1) Neighbor Complaint #22000160 New Prediction

Write an email to your landlord, Mr. Jones, complaining about a new neighbor.

In your email, include:

- Issues related to parking.
- Concerns about garbage disposal.
- Complaints about excessive noise.

2) Sports Club #22000137 New Prediction

You are a member of the sports club, which is having a party. Write an email to Mrs Singh, the president of the sports club discussing about the following three suggestions:

- Music
- Food
- Games

3) Birthday Celebration #22000135 New Prediction

You are planning a group dinner for your friend's birthday. Write an email to Oscar's Kitchen to make a group booking for 20 people as they do not allow group bookings for more than 6 people online. Include the following information.

- Booking for 20 people on Friday at a specific time.
- Details of the birthday
- Information on parking

4) Birthday Reservation #22000181 Prediction

You are writing to ask the restaurant manager if you can reserve a table in Oscar's kitchen for a friend to hold a birthday party for twenty people next Friday, because you can only book a table for six people online.

- You will tell the manager the situation and the exact time;
- Birthday details and what you will do in the party;
- Ask if there is a parking space in the building.

5) Company of Friend #22000180 Prediction

You are going to give a presentation at your friend Jim's company, but you are not familiar with the venue, so you are writing to ask about some basic information. You should write between 80 and 120 words. Your ideas must come from the following three themes:

- Describe your situation, including the exact time.
- Ask about the availability of technology equipment, such as computers and projectors.
- Ask about the number of participants.

6) Company Energy #22000178 Prediction

Your company is trying to save energy, and you want to write an email to make some suggestions to the manager Mrs Smith about energy reduction. You should write between 80 and 120 words. Your ideas must come from the following three themes:

- Turning off the lights;
- Shutting down computers;
- Heating and air-conditioning.

7) Noise and Hot Water #22000177 Prediction

You are renting an apartment, but there are some problems with it. You are writing an email to the building manager/owner to complain that the neighbors are noisy and the hot water system is not well. And it's not the first time that the hot water system is not well. You are writing an email to Marvin, the owner of the building, to solve this problem. You should write between 80 and 120 words. You should include:

- What problems you have encountered;
- How you are affected;
- How to fix the problems.

8) Stairs Light #22000173 Prediction

You live on the second floor of an apartment building with no elevator. There is only one weak light bulb at the entrance of the building and there is no light by the stairs. Your ideas must come from the following three themes:

- Install more lights;
- Brighter lights;
- Motion sensing lighting.

9) Watching a Movie #22000163 Prediction

Your friend invites you to see a movie, but you cannot go.

Your email must focus on the following three themes:

- Thanking him/her for inviting you.
- Explain why you cannot go with him/her.
- Proposing to see a movie some other day.

10) Movie Invite #22000025 Prediction

Your friend has invited you for a movie on Tuesday evening. Write an email to your friend with the following information:

- Thank her for the invitation
- Reason for not being able to join
- Make an alternate arrangement

11) Movie Invitation #22000152 Prediction

Write an email to Ms. Susan regarding her invitation to go out for a movie, expressing your gratitude for the invitation, and apologizing for your inability to attend. Your response must include the following points:

- Thank her for the invitation.
- Express appreciation for the gesture.
- Apologize for not being able to attend.
- Offer an explanation for your unavailability.

12) Volunteer Project #22000168 Prediction

Write an email to your friend inviting them to participate in a volunteer project. In your email, you should:

- Describe the volunteer project and its purpose.
- Explain why you think they would be a great fit for the project.
- Provide details on how they can get involved.

13) Urgent Repairs #22000167 Prediction

Write an email to your building landlord requesting urgent repairs in your apartment. In your email, you should:

- Describe the issues that need to be repaired.
- Explain the impact these issues are having on your living conditions.
- Request a timeline for the repairs to be completed.

14) Forgot Phone #22000166 Prediction

Write an email to the restaurant manager informing them that you found their phone at the restaurant. In your email, you should:

- Explain where and when you found the phone.
- Describe the phone to help identify it.
- Suggest a way for the manager to retrieve their phone.

15) Food and Service #22000165 Prediction

Write an email to the restaurant manager complaining about the food and service you experienced during your recent visit. In your email, you should:

- Explain what happened during your visit.
- Describe the issues with the food and service.
- Request appropriate action or compensation.

16) Installing AC #22000164 Prediction

Write an email to the building manager requesting the installation of an air conditioner in your apartment. In your email, you should:

- Explain why you need the air conditioner.
- Describe any issues you are currently facing without it.
- Request the next steps for installation.

17) Birthday Party #22000162 Prediction

As a parent, you write an email to other parents and invite their children to take part in your child's birthday party.

Your email should include the following three themes:

- When and where will the party be held
- What food will be served
- What activities will be arranged?

18) Online Reservation #22000161 Prediction

Write an email to the manager of a restaurant inquiring about the process for making online reservations.

In your email, include:

- Ask for information on how the online reservation system works.
- Clarify if special requests (e.g., dietary preferences or seating arrangements) can be made online.
- Inquire about confirmation details and how far reservations should be made in advance.

19) Paint Apartment #22000159 Prediction

Write an email to your landlord requesting permission to paint your apartment, highlighting the benefits such as cost savings and improved appearance. How should you assure them of using high-quality materials and offer to restore the apartment to its original condition if needed?

20) Gardening Expertise #22000158 Prediction

You are known for your gardening expertise and have been asked to give some tips to your friends. Write an email providing advice on gardening, focusing on soils, water, and methods.

- Recommend the best types of soil for different plants
- Share tips on proper watering techniques
- Describe effective gardening methods to ensure healthy plant growth

21) Alex's Birthday #22000157 Prediction

You have been given the task of inviting Alex's friends to his birthday party. Write an email welcoming his friends to the party and include the following details:

- Date, time and location of the party
- Food that will be served
- Activities planned for the party

22) Issues in Apartment #22000156 Prediction

You have been facing several issues in your apartment. Compose an email to your landlord addressing a hot water issue and noise from neighbors. Include the following details:

- Describe the hot water problem.
- Explain the disturbance caused by noise from neighbors.
- Request assistance or action to resolve both issues.

23) Lighting in the Lobby #22000155 Prediction

Write an email to the building manager regarding poor lighting in the lobby and suggest improvements. Include the following points:

- Describe the issue with the current lighting.
- Suggest installing bright light bulbs.
- Recommend incorporating motion sensor lights for energy efficiency.

24) Water Problem #22000154 Prediction

Write an email to Marvin, the owner of the apartment, regarding a water problem. Include the following details:

- Describe the water problem.
- Specify when the issue was noticed.
- Request assistance or action to resolve the problem.

25) Moving Furniture #22000153 Prediction

You have been asked by your friend for a help in moving the furniture, but you are unable to go. Compose an email to your friend politely declining their request by including the following points:

- Express gratitude for the invitation to help.
- Apologize for not being able to assist.
- Provide reasons such as work commitments, transportation limitations, and family responsibilities.
- Offer alternative ways to help or support, if possible.

26) Lost bag #22000151 Prediction

Write an email to the restaurant manager regarding a bag you left at the restaurant:

- Description of the bag
- Time of the incident.
- Contents of your bag

27) Presentation #22000150 Prediction

Write an email to your office colleague. You will be joining a new company and want to do an introductory presentation. Ask your best colleague, who is working at that company, for some suggestions regarding the presentation.

28) Energy Usage #22000149 Prediction

Your company is looking for ways to reduce energy usage in the office building. Write an email to Mrs. Kristy to offer some suggestions. Your email should include the following themes:

- Turning off lights
- Shutting down computers
- Air conditioners/heaters

29) Vacation #22000136 Prediction

You need to take a vacation for 2 weeks and your manager Dani wants you to send her an email with all the details. Write about:

- Exact dates of the vacation
- Reason for the leave
- Who will cover for you during that time and where can they reach you, if they have to

30) Expanding Our Product Portfolio #22000085 Prediction

Your organization is exploring opportunities to diversify its product portfolio to meet changing market demands and drive growth. Write an email to your supervisor suggesting three innovative product ideas or categories the company could consider developing to expand its offerings and reach new customers.

31) Community Engagement in Physical Fitness #22000082 Prediction

The local community center is looking to increase engagement in physical fitness activities among the residents of your town. You are a personal trainer at the local gym and you would like to make suggestions to the community center. Write an email to Ms. Taylor, a coordinator at the community center, giving three suggestions for ways to encourage more residents to participate in physical fitness activities. You should write at least 100 words.

Your suggestions should focus on the following three themes:

- A community fitness challenge
- Partnerships with local businesses
- Flexible scheduling for fitness classes

You should include all three themes. Provide supporting ideas for your suggestions

32) Homeless Shelter #22000056 Prediction

You wish to enhance the resources available to the needy in your community and volunteer at a homeless shelter. Send an email with three recommendations for improving the community's support for the homeless to Mr. James, the director of the shelter.

- Programs for job training and employment support
- Services for mental health counseling
- Programs for transitional housing with assistance from case managers

33) Energy Reduction #22000026 Prediction

Your company has decided to reduce the energy costs. Write an email to your supervisor suggesting three ways to reduce the energy costs at your workplace.

1) Edible Insects #23000963 New Prediction

Fancy locusts for lunch? Probably not, if you live in the west, but elsewhere it's a different story. Edible insects - termites, stick insects, dragonflies, grasshoppers, and giant water bugs are on the menu for an estimated 80 percent of the world's population.

More than 1000 species of insects are served up around the world. For example, "kungfu cakes" made from midges are a delicacy in parts of Africa. Mexico is an insect-eating and entomophagous hotspot where more than 200 insect species are consumed. Demand is so high that 40 species are now under threat, including white agave worms. These caterpillars of the tequila giant-skipper butterfly fetch around \$250 a kilogram.

Eating insects makes nutritional sense. Some contain more protein than meat or fish. Female gypsy moths, for instance, is about 80 percent protein. Insects can be a good source of vitamins and minerals too: a type of caterpillar (Usta Terpsichore) eaten in Angola is rich in iron, zinc, and thiamine.

What do they taste like? Ants have a lemon tang, apparently, whereas giant water bugs taste of mint and fire ant pupae of watermelon. You have probably, inadvertently, already tasted some of these things, as insects are often accidental tourists in other types of food. The US Food and Drug Administration even issues guidelines for the number of insect parts allowed in certain foods. For example, it is acceptable for 225 grams of macaroni to contain up to 225 insect fragments.

Options :

- 1) estimated average amount estimation
- 2) caught served piled taken
- 3) delicious food desert delicacy
- 4) Usage Reputation Supply Demand
- 5) threat operation stress regulation
- 6) nutritional no many valuable
- 7) fat protein vitamins minerals
- 8) source resource cause cause
- 9) acceptable ignored weighed purposed

2) Burger King #23000737 New Prediction

Drive down any highway, and you'll see a proliferation of chain restaurants -- most likely if you travel long and far enough, you'll see McDonald's golden arches as well as signs for Burger King, Hardee's and Wendy's, the "big four" of burgers. Despite its name, though, Burger King has fallen short of claiming the burger crown, unable to surpass market leader McDonald's No. 1 sales status. Always the bridesmaid and never the bride, Burger King remains No. 2. worse yet, Burger King has experienced a six-year 22 percent decline in customer traffic, with its overall quality rating dropping while ratings for the other three contenders have increased. The decline has been attributed to inconsistent product quality and poor customer service. Although the chain tends to throw advertising dollars at the problem, an understanding of Integrated Marketing Communication theory would suggest that internal management problems (nineteen CEOs in fifty years) need to be rectified before a unified, long-term strategy can be put in place. The importance of consistency in brand image and messages, at all levels of communication, has become a basic tenet of IMC theory and practice. The person who takes the customer's order must communicate the same message as Burger King's famous tagline, "Have it your way," or the customer will just buzz up the highway to a chain restaurant that seems more consistent and, therefore, more reliable .

Options :

- 1) filing claiming winning getting
- 2) for with in that
- 3) dedicated contributed due attributed
- 4) rectified ratified realized recognized
- 5) importance principal significant result
- 6) quality service consistency management
- 7) available reliable quality reputable

3) Photographer Sandra Louisiana #23000526 New Prediction

London's National Portrait Gallery is currently celebrating the fifty-year career of the photographer Sandra Louisiana. Twenty-one portraits on display depict key figures in literature, film, and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Louisiana, the display at the National Portrait Gallery highlights shots taken between 1960 and 1964, many of which feature in Louisiana's book Public faces private places (2008). Formal commissioned portraits are shown alongside behind-the-scenes photographs taken on film sets and unguarded portraits of sitters captured at home.

Options :

- 1) elements symbols figures features
- 2) Consequent Further Mention Subsequent
- 3) have taken taken took take
- 4) faces emerges features illustrates

4) Durham University Sailing Boat Club #23001007 Prediction

Durham University Sailing club was founded by Malcolm Dodds in 1966. We have grown a lot since then and now our members take part in team racing, fleet racing, match racing and yachting events around the country. We have a jet flight of eleven Fireflies and sail at Derwent Reservoir, which is about a 30-minute drive from Durham. Any Durham University students can join the sailing club, and while most of the sailing that we currently do is racing, there are other opportunities too, for example, enjoying the sunshine (hopefully!) in one of our summer sailing sessions. It is always possible to come along to one of our sailing socials whether you are part of the team or not and if you would like to do some sailing while at Durham then it couldn't be easier.

Options :

- 1) found founded was founded has founded
- 2) grow growing have grown grown
- 3) passage lag delay flight
- 4) enjoy enjoyed are enjoying enjoying

5) Job Application #23001001 Prediction

Dear Mike,

I hope you are doing well. I am writing to apply for the position at Nexus Finance. I came across this opportunity and feel comfortable applying, as my skills and experience align well with the role. This position considers candidates with my key skills set, qualifications and experience. With my background in finance,

I am confident that I can contribute to your team and take on challenges in this role. I have attached my resume for your review. If you are well and available, please let me know if you need any further information. I will be happy to look forward to hearing from you and discussing how I can be a good fit for this position.

Thank you for your time and consideration.

Best regards,

Options :

- 1) intention position proposal document
- 2) hesitant unaware comfortable doubtful
- 3) considers reduces excludes overlooks
- 4) uncertain distracted confident unwilling
- 5) turn away hold back step aside look forward

6) Power Hamburge #23001000 Prediction

Regarding the burger shop, the owner was talking about the strong smell of the grilled onions, asking if you like it or not, because the aroma can travel nearly two blocks. He also mentioned that since we stay nearby, it is easy to drop in before you answer. Customers usually decide what to order before they start eating, as the place accepts cash only. If you are a fan of onions, you will be happy during your visit to Power Hamburger, a small shop located in the downtown area with a simple but popular menu.

Options :

- 1) distant strong mild shallow
- 2) gesture feature warning aroma
- 3) pause skip start deny
- 4) located growing arranging declaring

7) Apartment Renting #23000993 Prediction

My name is Tonia. My roommate and I are looking for a nice apartment near my college's campus. We are very quiet and study a lot. I study history, and my roommate studies French. We are very interested in renting your apartment. We can pay the rent on time because we do a part-time work, too. Some of our friends live in the same building and have recommended your place to us. They mentioned that you are a kind and responsible landlord, and we hope to have the same positive experience. I would like to make an appointment to view the apartment in person. Our application form is ready, and we are prepared to proceed with the process quickly. We look forward to hearing from you soon.

Best regards,

Tonia

Options :

- 1) of in to by
- 2) pay borrow get afford
- 3) has was have decide
- 4) recall own throw make
- 5) around upward forward onto

8) Driver's License #23000991 Prediction

New B.C. Residents will only be required to provide their driver's licence history - proof of insurance is no longer required. However, their premiums will be adjusted for the first three years of driving in B.C. due to the increased risks associated with driving in a new area. Each year you remain crash-free, your discount increases. ICBC will credit you with up to 15 years of driving experience (up from eight years) upon receipt of a driver's abstract showing the original date that you received your licence. When obtaining your B.C. licence, you can provide your original driver's abstract in person at a driver licensing office.

Options :

- 1) provide adjusted determined provoked
- 2) thanks to for to on to due to
- 3) crediting credit credited will credit
- 4) throwing knowing showing give

9) Lightning Strike Incident #23000990 Prediction

A drop in the incidence of lightning strikes could impact on the frequency of wildfires, especially in tropical regions. It could also lower the incidence of lightning strikes to infrastructure and affect how greenhouse gases in the atmosphere contribute to climate change. Scientists from the Universities of Edinburgh and Leeds and Lancaster University used a newly devised method to calculate the likely incidence of lightning flashes from storm clouds. Unlike traditional calculations of lightning flashes at the global scale, which are based on the height of clouds, their approach takes into account the movement of tiny ice particles that form and move within clouds. Electrical charges build up in these ice particles, and in cold water droplets and soft hail formed inside clouds. These are discharged during storms, giving rise to lightning flashes and thunder.

Options :

- 1) focus impact dwell depend
- 2) Unlike Unless Except Beside
- 3) make up fade up mess up build up
- 4) collected diverted discharged rounded

10) Challenges #23000989 Prediction

I feel safe about the opportunity to take on new challenges and contribute to the team. While I was working at my previous job, I gained valuable experience that I believe will be beneficial in this role.

I am eager to take a position at your esteemed company and I am confident that my skills and experience make me a strong candidate. Please let me know if there are any additional steps I need to take or information I need to provide. I am looking forward to your response.

Options :

- 1) problem safe worry angry
- 2) However If Why While
- 3) acquisition nomination position hardwork
- 4) know show provide advice
- 5) forward backward never ever

11) Driving Licenses in BC #23000988 Prediction

Getting a driver's license in British Columbia involves a graduated licensing program. It starts with the Learner's (L) stage, where new drivers must pass a knowledge test and follow restrictions like having a supervisor while driving. After a year, they can take a road test to advance to the Novice (N) stage, allowing them to drive independently with some restrictions, such as a zero-alcohol limit. After two years of safe driving, they are eligible for a final road test to obtain a full Class 5 license. This system helps new drivers gain experience gradually, improving road safety. To apply, residents must provide identification, proof of residency, and pass vision and knowledge tests. Staying informed about licensing requirements ensures legal and responsible driving.

Options :

- 1) rapid automatic probiotic graduated
- 2) knowledge vision road board
- 3) passenger teacher supervisor preacher
- 4) road vision written writing
- 5) speed accident alcohol grooming
- 6) traffic rules safety rage
- 7) income employment residency partner
- 8) hearing knowledge fitness strength

12) Insurance in BC #23000987 Prediction

In British Columbia (BC), vehicle insurance is mandatory for all drivers. The Insurance Corporation of British Columbia (ICBC) is the province's public auto insurer, providing basic coverage known as Autoplan. This mandatory insurance includes third-party liability, accident benefits, and protection against underinsured drivers. Drivers can also purchase optional coverage, such as collision and comprehensive insurance, to protect their vehicles further. To obtain insurance, vehicle owners must visit an authorized broker, where they provide vehicle details and driving history to determine their premium. The cost of insurance depends on factors like driving experience, claim history, and vehicle type. Ensuring proper insurance coverage is essential for road safety and financial security in case of accidents.

Options :

- 1) unrequired optional mandatory unnecessary
- 2) security protection duty liability
- 3) unlicensed underinsured unregistered pro
- 4) health home collision house
- 5) broker inspector mechanic parent
- 6) risk security danger range

13) Well-being #23000983 Prediction

Life in the UK 2012 provides a unique overview of well-being in the UK today. The report is the first snapshot of life in the UK to be delivered by the Measuring National Well-being program and will be updated and published annually. Well-being is discussed in terms of the economy, people and the environment. Information such as the unemployment rate or number of crimes against the person are presented alongside data on people's thoughts and feelings, for example, satisfaction with our jobs or leisure time and fear of crime. Together, a richer picture on 'how society is doing' is provided.

Options :

- 1) protected delivered demand overviewed
- 2) distorted chartered arranged updated
- 3) span weight number velocity
- 4) pressure leisure plea fancy

14) Good Sense #23000972 Prediction

Good sense appears to have prevailed at last. With a fresh set of draught rules to replace last year's poorly conceived ones, the center has sought to withdraw the ban on the sale of cattle for slaughter in animal markets. The draught rules are now open for comments and suggestions. When the Union Ministry for Environment, Forests and Climate Change notified the rules under the Prevention of Cruelty to Animals Act on May 23, 2017, there was concern that in the name of preventing cruelty to animals and regulating livestock markets, the government was surreptitiously throttling the cattle trade and furthering the BJP's cow protection agenda. The rules were criticized for restricting legitimate animal trade and interfering with dietary habits.

Options :

- 1) retained prevailed come created
- 2) advertisement circumstance campaign concern
- 3) dairy healthy dietary vegetarian

15) Avid Readers #23000969 Prediction

Victorians were avid readers. Just as we bury our faces in our mobile devices on the morning commute, so too did Victorians with the latest penny fiction. Perhaps the best know serialized novels were the "Penny Dreadfuls". Costing just one old penny, they focused on the exploits of detectives, criminals, or supernatural entities. The price of new books—often only available as a set of three—was out of reach for most working-class people, so they borrowed from circulating libraries such as Mudie's (founded 1842), which dispatched books all over Britain for a modest subscription fee. For the wealthier classes who could afford first editions, reading from their own collection would be an everyday occurrence.

Options :

- 1) so much so too so little so many
- 2) costs cost can costs Costing
- 3) such as such was such is such a
- 4) couldn't afford could not afford could afford must have been

16) Herbal #23000948 Prediction

An herbal is a book of plants, describing their appearance, their properties, and how they may be used for preparing ointments and medicines. The medical use of plants is recorded on fragments of papyrus and clay tablets from ancient Egypt, Samaria, and China that date back 5,000 years but document traditions far older still. Over 700 herbal remedies were detailed in the Papyrus Ebers, an Egyptian text written in 1500 BC.

Around 65 BC, a Greek physician called Dioscorides wrote an herbal that was translated into Latin and Arabic. Known as "De material medica", it became the most influential work on medicinal plants in both Christian and Islamic worlds until the late 17th century. An illustrated manuscript copy of the text made in Constantinople (modern-day Istanbul) survives from the sixth century. The first printed herbals date from the dawn of European printing in the 1480s. They provided valuable information for apothecaries, whose job it was to take the pills and potions prescribed by physicians. In the next century, landmark herbals were produced in England by William Turner, considered to be the father of British botany, and John Gerard, whose illustrations would inspire the floral fabric, wallpaper, and tile designs of William Morris four centuries later.

Options :

- 1) recorded registered kept memorized
- 2) moved translated interpreted removed
- 3) remains survives leaves suffers
- 4) determined instructed prescribed pointed
- 5) stimulate stimulate wake inspire

17) Tomb of Tutankhamen #23000947 Prediction

The last tourists may have been leaving the Valley of the Kings on the West Bank in Luxor but the area in front of the tomb of Tutankhamen remained far from deserted. Instead of the tranquility that usually descends on the area in the evening, it was a hive of activity. The TV crew trailed masses of equipment, journalists milled and photographers held their cameras at the ready. The reason? For the first time since Howard Carter discovered the tomb in 1922, the mummy of Tutankhamen was being prepared for public display.

Inside the subterranean burial chamber Egypt's archaeology supreme Zahi Hawass, accompanied by four Egyptologists, two restorers, and three workmen, were slowly lifting the mummy from the golden sarcophagus where it has been rested -- mostly undisturbed -- for more than 3,000 years. The body was then placed on a wooden stretcher and transported to its new home, a high-tech, climate-controlled plexiglass showcase located in the outer chamber of the tomb where, covered in linen, with only the face and feet exposed, it now greets visitors.

Options :

- 1) remain remained remains remaining
- 2) founded discovered invented showed
- 3) accompanied complimented accomplished affected
- 4) commuted moved transported convey

18) Edo-Tokyo Tatemono En #23000946 Prediction

The Edo-Tokyo Tatemono En is an open-air architectural museum but could be better thought of as a park. Thirty buildings from the 19th and early 20th centuries from all around Tokyo were restored and relocated to space, where they can be explored by future generations to come. The buildings are a collection of houses and businesses, shops, and bathhouses, all of which would have been present on a typical middle-class street from Edoera to Showa-era Tokyo. The west section is residential, with traditional thatched roof bungalows of the 19th century. Meiji-era houses are also on view, constructed in a more Western-style after Japan opened its borders in 1868. The Musashino Sabo Café occupies the ground floor of one such house, where visitors can enjoy a cup of tea. Grand residences like that of Korekiyo Takahashi, an early 20th-century politician assassinated over his controversial policies, demonstrate how the upper class lived during that time period. The eastern section is primarily businesses from the 1920s and '30s, preserved with their wares on display. Visitors are free to wander through a kitchenware shop, a florist's, an umbrella store, a bar, a soy sauce shop, a tailor's, a cosmetics shop, and an inn complete with an operational noodle shop.

Options :

- 1) part all whole entire
- 2) resident residence residential residing
- 3) base ground foundation basis
- 4) to wander wandering wander wandered

19) Two Sentiments #23000929 Prediction

Over the last ten thousand years, there seem to have been two separate and conflicting building sentiments throughout the history of towns and cities. One is the desire to start again, for a variety of reasons: an earthquake or a tidal wave may have demolished the settlement, or fire destroyed it, or the new city marks a new political beginning. The other can be likened to the effect of a magnet: established settlements attract people, who tend to come whether or not there is any planning for their arrival. The clash between these two sentiments is evident in every established city unless its development has been almost completely accidental or is lost in history. Incidentally, many settlements have been planned from the beginning but, for a variety of reasons, no settlement followed the plan. A good example is Currowan, on the Clyde River in New South Wales, which was surveyed in the second half of the 19th century, in the expectation that people would come to establish agriculture and a small port. But no one came. Most country towns in New South Wales started with an original survey whose grid lines are still there today in the pattern of the original streets.

Options :

- 2) is marks shows indicates
- 3) used to tend to had to like to
- 4) whenever until unless wherever
- 5) had been surveyed is surveyed was surveyed had surveye

20) Paris #23000928 Prediction

Paris is very old, there has been a settlement there for at least 6000 years and its shape has been determined in part by the River Seine, and in part by the edicts of France's rulers. But the great boulevards we admire today are relatively new, and were constructed to prevent any more barricades being created by the rebellious population; that work was carried out in the middle 19th century. The earlier Paris had been in part a maze of narrow streets and alleyways. But you can imagine that the work was not only highly expensive, but caused great distress among the half a million or so residents whose houses were simply razed, and whose neighborhoods disappeared. What is done cannot usually be undone, especially when buildings are torn down .

Options :

- 1) being created that created creating was created
- 2) as if in part even though as
- 3) merely largely simply equally
- 4) up from on down

21) Engineers' passion #23000924 Prediction

Great engineers have a passion to improve life; a burning conviction that they can make life better for everyone. Engineers need to have a talent for invention and innovation, but what drives them is the conviction that they can find a better way to do things; a cheaper and more efficient solution to the problems of human existence on this planet of limited resources that we call Earth.

Many of us spend a lot of time complaining about the difficulties and problems of life. It is easy to find fault with things that make daily life arduous. For an engineer, these difficulties can be opportunities. How can this be made to work better? How can that process be made more efficient? How can components be made more cheaply, more accurately, and more fit-for-purpose? Great engineers are convinced that everything can be improved. Instead of complaining, they think of ways to make things better

Options :

- 1) drives carries takes makes
- 2) limited unlimited useful numerous
- 3) take spend cost save
- 4) parts elements contents components
- 5) improved created performed enlightened

22) Mammoth project #23000921 Prediction

The recipe for making any creature is written in its DNA. So last November, when geneticists published the near-complete DNA sequence of the long-extinct woolly mammoth, there was much speculation about whether we could bring this behemoth back to life. Creating a living, breathing creature from a genome sequence that exists only in a computer's memory is not possible right now. But someone someday is sure to try it, predicts Stephan Schuster, a molecular biologist at Pennsylvania State University, University Park, and a driving force behind the mammoth genome project.

Options :

- 1) most such much thus
- 2) tells predicts speaks supports
- 3) human molecular animal air
- 4) driving army moving carrying

23) Ballet-pantomime #23000919 Prediction

Most important of all is the fact that for each new ballet-pantomime created at the Paris Opera during the July Monarchy, a new score was produced. The reason for this is simple: this ballet -pantomimes told stories -elaborate ones -and the music was considered an indispensable tool in getting them across to the audience. Therefore, music had to be newly created to fit each story Music tailor-made for each new ballet-pantomime, however, was only one weapon in the Opera's explanatory arsenal. Another was the ballet-pantomime libretto, a printed booklet of fifteen to forty pages in length, which was sold in the Operas lobby (like the opera libretto), and which laid out the plot in painstaking detail, scene by scene. Critics also took it upon themselves to recount the plots (of both ballet-pantomimes and operas) in their reviews of premieres. So did the publishers of souvenir albums, which also featured pictures of famous performers and of scenes from favorite ballet-pantomimes and operas.

Options :

- 1) However Nevertheless In fact Therefore
- 2) Another Others It Also
- 3) views reviews overviews supervisions
- 4) teachers students performers drivers

24) Types of genes #23000918 Prediction

Recently, research into embryonic development has given us an even better insight into how major structural changes might occur in a given population of organisms. We now understand that there are two major types of genes: developmental and "housekeeping" genes. Developmental genes are those that are expressed during embryonic development, and their proteins control the symmetry, skeletal development, organ placement, and the overall form of the developing animal. In contrast, "housekeeping" genes are expressed during the animal's daily life to generate proteins that keep the cells, tissues, and organs in the body functioning properly. as you might suspect, mutations in developmental genes can have radical consequences for body form and function, whereas mutations in "housekeeping" genes tend to affect the health and reproductive success of the post-embryonic animal.

Options :

- 1) on of for into
- 2) push control hold elevate
- 3) Correspondingly Inclusively Conversely In contrast
- 4) affect effect Interrupt defect

25) Leadership #23000917 Prediction

Leadership is all about being granted permission by others to lead their thinking. It is a bestowed moral authority that gives the right to organize and direct the efforts of others. But moral authority does not come from simply managing people effectively or communicating better or being able to motivate. It comes from many sources, including being authentic and genuine, having integrity and showing a real and deep understanding of the business in question. All these factors build confidence.

Leaders lose moral authority for three reasons: they behave unethically; they become plagued by self-doubt and lose their conviction, or they are blinded by power, lose self-awareness and thus lose connection with those they lead as the context around them changes. Having said all this, it has to be assumed that if someone becomes a leader, at some point they understood the difference between right and wrong it is up to them to abide by a moral code and up to us to ensure that the moment we suspect they do not, we fire them or vote them out.

Options :

- 1) takes gives puts makes
- 2) sources items stamps supports
- 3) faith answers factors parts
- 4) usually unethically falsely unexpected
- 5) connect connected disconnect connection
- 6) sure frame realise ensure

26) Dark Universe #23000916 Prediction

The rest of the universe appears to be made of a mysterious, invisible substance called dark matter (25 percent) and a force that repels gravity known as dark energy (70 percent). Scientists have not yet observed dark matter directly. It doesn't interact with baryonic matter and it's completely invisible to light and other forms of electromagnetic radiation, making dark matter impossible to detect with current instruments. But scientists are confident it exists because of the gravitational effects it appears to have on galaxies and galaxy clusters.

The visible universe, including Earth, the sun, other stars, and galaxies, is made of protons, neutrons, and electrons bundled together into atoms. Perhaps one of the most surprising discoveries of the 20th century was that this ordinary, or baryonic, matter makes up less than 5 percent of the mass of the universe revelation...This lecture will summarize .

Options :

- 1) substance molecules particulars items
- 2) investigated observed proceeded excepted
- 3) appears to appears for appears in involved in
- 4) foundations materials materials discoveries
- 5) summarize list proved offer

27) Importance of Timing #23000915 Prediction

Timing is important for revision. Have you noticed that during the school day you get times when you just don't care any longer? I don't mean the lessons you don't like, but the ones you find usually find OK, but on some occasions, you just can't be bothered with it. You may have other things on your mind, be tired, restless, or looking forward to what comes next. Whatever the reason, that particular lesson doesn't get 100 percent effort from you.

The same is true of revision. Your mental and physical attitude is important . If you try to revise when you are tired or totally occupied with something else, your revision will be inefficient and just about worthless. If you approach it feeling fresh, alert, and happy, it will be so much easier, and you will learn more, faster. However, if you make no plans and just slip in a little bit of revision when you feel like it, you probably won't do much revision! You need a revision timetable, so you don't keep putting it off .

Options :

- 1) Has It Have So
- 2) may can will must
- 3) effort afford affect effect
- 4) viable important negotiable lame
- 5) stopping it from putting it off giving it out getting it wrong

28) The speech of Alchemy #23000913 Prediction

To learn the speech of alchemy, an early form of chemistry in which people attempted to turn metals into gold, it helps to think back to a time when there was no science: no atomic number or weight, no periodic chart, no list of elements. To the alchemists, the universe was not made of leptons, bosons, gluons, and quarks. Instead, it was made of substances, and one substance—say, walnut oil—could be just as pure as another—say, silver—even though modern scientists would say one is heterogeneous and the other homogeneous. Without knowledge of atomic structure how would it be possible to tell elements from compounds?

Options :

- 1) area world universe way
- 2) pure absolute mature same
- 3) laws scientists affidavits medicines
- 4) possible difficult easy reliable

29) Interior Design #23000912 Prediction

Interior design is a professionally conducted, practice-based process of planning and realization of interior spaces and the elements within. Interior design is concerned with the function and operation of the aesthetics and its sustainability. The work of an interior designer draws upon many other disciplines, such as environmental psychology, architecture, product design and aesthetics, in relation to a wide range of building spaces including hotels corporate and public spaces, schools, hospitals, private residences, shopping malls, restaurants, theatres, and airport terminals.

Options :

- 1) concerned correlated concentrated corresponded
- 2) disciplines course principals functions
- 3) and but as off

30) The Narrative of Law #23000910 Prediction

The narrative of law and order is located fundamentally at the level of individual guilt and responsibility. Criminal acts are seen as individual issues of personal responsibility and culpability, to which the state responds by way of policing, prosecution, adjudication, and punishment. This is but one level at which crime and criminal justice can be analyzed. The problem is that so often analysis ends there, at the level of individual action, characterized in terms of responsibility, guilt, evil. In few other areas of social life does individualism have this hold. To take but one instance, it would be absurd to restrict the analysis of obesity, to individual greed. It should similarly be widely seen as absurd to restrict analysis of criminal justice issues to the culpability of individuals.

Options :

- 1) level stage phase pair
- 2) where what which when
- 3) character characterized characteristics characterization
- 4) instance exemplify reason method
- 5) in at as to

31) Foreign Policy of a State #23000909 Prediction

The foreign policy of a state, it is often argued, begins, and ends with the border. No doubt an exaggeration, this aphorism nevertheless has an element of truth. A state's relationship with its neighbors, at least in the formative years, are greatly influenced by its frontier policy, especially when there are no settled borders. Empire builders in the past sought to extend imperial frontiers for a variety of reasons; the subjugation of kings and princes to gain their allegiance (as well as handsome tributes or the coffers of the state), and, the security of the 'core' of the empire from external attacks by establishing a string of buffer states in areas adjoining the frontiers. The history of the British Empire in India was no different. It is important to note in this connection that the concept of international boundaries (between two sovereign states), demarcated and delineated, was yet to emerge in India under the Mughal rule.

Options :

- 1) component element constitute ingredient
- 2) formative following developmental determinative
- 3) settled arranged certain gentle
- 4) that there their its
- 5) divide connect connection part

32) Sales activities integration #23000907 Prediction

Organizations need to integrate their sales activities more both internally and with customers' needs according to a new book co-authored by an academic at the University of East Anglia. The book addresses how sales can help organizations to become more customer-oriented and considers how they are responding to challenges such as increasing competition, more demanding customers and a more complex selling environment. Many organizations are facing escalating costs and a growth in customer power, which makes it necessary to allocate resources more strategically. The sales function can provide critical customer and market knowledge to help inform both innovation and marketing. However, the authors say that within the industry there is still uncertainty about the shape a future sales team should take, how it should be managed, and how it fits into their organization's business model.

Options :

- 1) does addresses discusses adds
- 2) demanding attractive nice loyal
- 3) so that which but
- 4) there here that it
- 5) taps flows fits rolls

33) Ancient Farming #23000899 Prediction

When humans began farming some 12,000 years ago, they altered the future of our species forever. Our ancestors were ecological pioneers, discovering and cultivating the most valuable crops, scaling them up to feed entire communities, and transforming wild crops so fundamentally that they became dependent on humans for their survival. Farming, in the words of National Geographic's Genographic Project, "sowed the seeds for the modern age."

Options :

- 1) species society class community
- 2) leaders innovators pioneers founders
- 3) age generation span time

34) Platypus #23000897 Prediction

The platypus looks like no other creature on Earth. Physically, it appears to be a hybrid blend of a bird, beaver, reptile, and otter, with additional characteristics not contained in any of these four. On cursory examination, the platypus has a bill that most resembles that of a waterfowl, not the mouth of any known mammal. Yet it is not an ordinary bill. It is actually a well-designed sensory organ. Not a nose, but a highly sensitive electro-location sensor, detecting minuscule electrical impulses generated by its food source of small crustaceans and worms. No other mammal has a sensor so highly developed -- in fact; only one other mammal has this ability at all. Then there are the webbed feet, similar to those found on otters. Unlike an otter, however, the webbing is far more pronounced on the front feet of the platypus, which it uses like paddles for swimming. While in the water, the back feet are tucked into its body and hardly used at all.

Options :

- 1) duplicates resembles parallel similar with
- 2) developed spread blossomed flourishing
- 3) there those which here
- 4) Where While If During

35) Cardona Salt Mountain #23000894 Prediction

Formed two million years ago when low-density salt was pushed up through the much harder materials surrounding it, the Cardona Salt Mountain is one of the largest domes of its kind in the world, and unique in Europe. While small amounts of other minerals pervade the savory hill, the salt pile would have a near translucent quality if not for the thin layer of reddish clay coating the exterior. The significance of the mountain was recognized as early as the middle ages when Romans began exploiting the mountain for its salt, which began to bolster the young Cardonian economy. With the invention of industrial mining techniques, a mine was built into the side of the mountain and a thriving facility formed at its base as excavators dragged enormous amounts of potash (water-soluble) salt from the innards of the hill. In addition to the mineral export, the locals of Cardona began making salt sculptures to sell and invented a number of hard, salty pastries unique to the area.

Options :

- 1) can have should have had have would have
- 2) significance maintenance vibration significant
- 3) economy corresponding accordance trend
- 4) In fact In addition In contrast to this On contrary

36) Common links between Australia and New Zealand #23000889 Prediction

Australia and New Zealand have many common links. Both countries were recently settled by Europeans, are predominantly English speaking and in that sense, share a common cultural heritage. Although in close proximity to one another, both countries are geographically isolated and have small populations by world standards. They have similar histories and enjoy close relations on many fronts. In terms of population characteristics, Australia and New Zealand have much in common. Both countries have minority indigenous populations, and during the latter half of the 20th century have seen a steady stream of migrants from a variety of regions throughout the world. Both countries have experienced similar declines in fertility since the high levels recorded during the baby boom, and alongside this have enjoyed the benefits of continually improving life expectancy. One consequence of these trends is that both countries are faced with an aging population and the associated challenge of providing appropriate care and support for this growing group within the community.

Options :

- 1) network heritage history experience
- 2) prices standards class methods
- 3) characteristics features diversity defects
- 4) experienced launched connected reached
- 5) associated association past coming

37) Retirement Savings #23000885 Prediction

Men and women are making different choices about their retirement savings, which could lead to very different investment outcomes, according to Dr. Claire Matthews, Director of Financial Planning at Massey University's Centre for Banking Studies. Speaking at the 2012 New Zealand Finance Colloquium, held at Massey University's Albany campus last week, Dr. Matthews said demographic characteristics had a substantial impact on the choices people made about KiwiSaver funds and retirement savings more generally. When it came to fund selection, she found there were significant differences based on gender. Men are more likely to invest in aggressive and growth funds, while women are more likely to choose conservative funds.

"Males are risk-takers, whether it's in their choice of car or their investment fund," she says. "But when it comes to long-term savings, risk-taking can actually be an advantage." Dr. Matthews also found that men are more likely than women to have prior savings when joining KiwiSaver. Just over half of male respondents said they had savings already, while only 38% of women did. "These figures reflect and confirm, quite disappointingly, the difference between males and females and the level of interest they take in financial planning," Dr. Matthews says. "It's important for all New Zealanders to be better educated about their personal finances, but this is particularly so for women." Other demographic factors, including age, ethnicity, education, and income, can also influence the choices being made about retirement savings. Dr. Matthews found that those with bachelor and higher degrees, and those in households with a pre-tax income of \$100,000 or more, were more likely to choose aggressive and growth funds. On the other hand, both the youngest and oldest age groups were more likely to be invested in conservative funds. While this might be appropriate for the life-cycle stage of older investors, it might not be so appropriate for younger, longer-term investors.

Options :

- 1) choices abilities regulations forms
- 2) At the same time Meanwhile Whereas When it came to
- 3) when while how whether
- 4) and between so from
- 5) is was are being
- 6) In fact On the other hand Actually Thus

38) Tribute to Amelia Earhart #23000883 Prediction

Over sixty years after Amelia Earhart vanished mysteriously in the Pacific during her attempt to become the first person to circumnavigate the world along the equator, Linda Finch, a San Antonio businesswoman, accomplished pilot, and aviation historian, recreated and completed her idol's last flight as a tribute to the aviation pioneer's spirit and vision. On March 17, 1997, Ms. Finch and a navigator took off from Oakland International Airport, California, in a restored Lockheed Electra 10E, the same make and model aircraft that Earhart used on her last journey. The mission to fulfill Amelia Earhart's dream was called "World Flight 1997." Although Ms. Finch was not the first to attempt Earhart's around-the-world journey, she was the first to do it in a historic aeroplane. Linda Finch closely followed the same route that Earhart flew, stopping in 18 countries before finishing the trip two and a half months later when she landed back at the Oakland Airport on May 28. Over a million school children and others were able to follow the flight daily through an interactive web site part of a free multimedia educational program called "You Can Soar," provided by the project's sponsor.

Options :

- 1) pleasure agreement tribute delight
- 2) attempt make try lie
- 3) swum landed walked took
- 4) experimental interactive educational traditional

39) Showmanship #23000882 Prediction

Part of the fun of experimenting with granular materials, says Stephen W. Morris, is the showmanship. In one stunt that he has demonstrated in settings ranging from high school classrooms to television studios, the University of Toronto physicist load clear plastic tubes with white table salt and black sand and start them rotating. What transpires in the tubes usually knocks the socks off of any unsuspecting bystander. Instead of mixing into a drab grey sameness, the sand particles slowly separate into crisp black bands, cutting across a long, narrow field of salt. As the spinning continues, some bands disappear and new ones arise. "It's a parlor trick," Morris says. Not to deny its entertainment value, this demonstration of how strangely granular materials can behave is also an authentic experiment in a field both rich in fundamental physics and major practical consequences.

Options :

- 1) demonstrated conducted illustrated performed
- 2) unprecedented uncomfortable unusual unsuspecting
- 3) discussion demonstration theory exhibition

40) Hong Kong Marine Life #23000878 Prediction

Understanding the number of species we have in our marine environment is a basic need if we are to protect and conserve our biodiversity. This is vital in today's rapidly changing world, not just here in Hong Kong, but especially in Southeast Asia which holds the world's most diverse marine habitats. SWIMS is playing a major role in trying to measure and conserve these important resources, both within Hong Kong but also, together with its regional collaborators, in Southeast Asia." said Professor Grey A. Williams, the leader of this study and the Director of HKU SWIMS.

The enormous array of marine life in Hong Kong, however, has yet to receive its desired level of conservation as currently only less than 2% of Hong Kong's marine area is protected as marine parks or reserve as compared with approximately 40 % of our terrestrial area. The Government has committed to designate more new marine parks in the coming years. The Brothers Marine Park in the northern Lantau waters will be launched soon, which will bring Hong Kong's total protected marine area to more than 2%. The research team welcomed the initiative of the new marine park while also urging the Hong Kong government to move towards the global target of at least 10% marine protected area by the year 2020 under the United Nations Convention on Biological Diversity (CBD).

Options :

- 2) exuberant attractive vital cheap
- 3) apparently especially usually definitely
- 4) major important significant subordinate
- 5) line array width length
- 6) has been launched had been launched was launched will be launched
- 7) whereas as while when

41) Group discussion advantages #23000876 Prediction

The writer-or, for that matter, the speaker conceives his thought whole, as a unity, but must express it in a line of words; the reader- or listener-must take this line of symbols and from it reconstruct the original wholeness of thought. There is little difficulty in conversation because the listener receives innumerable cues from the physical expressions of the speaker; there is a dialogue, and the listener can cut in at any time. The advantage of group discussion is that people can overcome linear sequence of words by converging on ideas from different directions; which makes for the wholeness of thought. But the reader is confronted by line upon line of printed symbols, without b

Options :

- 1) respect reduce recover reconstruct
- 2) little many few no
- 3) get learn cut intrude
- 4) converging spending inventing conceiving

42) Population Change #23000868 Prediction

Populations can change through three processes: fertility, mortality, and migration. Fertility involves the number of children that women have and differs from fecundity (a woman's childbearing potential). Mortality is the study of the causes, consequences, and measurements of processes affecting death in a population. Demographers most commonly study mortality using the Life Table, a statistical device which provides information about the mortality conditions (most notably the life expectancy) in the population. Migration refers to the movement of persons from an origin place to a destination place across some pre-defined political boundary. Migration researchers do not designate movements as migrations' unless they are somewhat permanent. Thus demographers do not consider tourists and travellers to be migrating. While demographers who study migration typically do so through census data on place of residence, indirect sources of data include tax forms and labor force surveys.

Options :

- 1) rotates involves indicates is
- 2) ingredient room factor device
- 3) but though unless however
- 4) commute residence health life

43) Progressive Enhancement #23000863 Prediction

Progressive enhancement is a design practice based on the idea that instead of designing for the least capable browser, or mangling our code to make a site look the same in every browser, we should provide a core set of functionality and information to all users, and then progressively enhance the appearance and behavior of the site for users of more capable browsers. It's a very productive development practice. Instead of spending hours working out how to add drop shadows to the borders of an element in every browser, we simply use the standard-based approach for browsers that support it and don't even attempt to implement it in browsers that don't. After all, the users of older and less capable browsers won't know what they are missing. The biggest challenge to progressive enhancement is the belief among developers and clients that websites should look the same in every browser. As a developer, you can simplify your life and dedicate your time to more interesting challenges if you let go of this outdated notion and embrace progressive enhancement.

Options :

- 1) building creating designing establishing
- 2) moderately progressively gently gradual
- 3) taking take spending spend
- 4) challenge opportunity issue risk

44) Mayan Civilisation's End #23000862 Prediction

The Classic era of Mayan civilisation came to an end around 900 AD. Why this happened is unclear; the cities were probably over-farming the land so that a period of drought led to famine. Recent geological research supports this, as there appears to have been a 200-year drought around this time.

Options :

- 1) community society civilisation class
- 2) time period span phase
- 3) research test examination exploration

45) Snail's brain #23000861 Prediction

Snails are not traditionally known for quick thinking, but new research shows they can make complex decisions using just two brain cells in findings that could help engineers design more efficient robots. Scientists at the University of Sussex attached electrodes to the heads of freshwater snails as they searched for lettuce. They found that just one cell was used by the mollusk to tell if it was hungry or not, while another let it know when food was present. Food searching is an example of goal-directed behavior, during which an animal must integrate information about both its external environment and internal state while using as little energy as possible. Lead researcher Professor George Kemenes, said: "This will eventually help us design the 'brain' of robots based on the principle of using the fewest possible components necessary to perform complex tasks." What goes on in our brains when we make complex behavioral decisions and carry them out is poorly understood." Our study reveals for the first time how just two neurons can create a mechanism in an animal's brain which drives and optimizes complex decision-making tasks.

Options :

- 1) findings results recommendations decisions
- 2) brains top skulls heads
- 3) satisfied hungry empty full
- 4) which what from while
- 5) where when which who

46) SpaceX #23000859 Prediction

SpaceX's Falcon 9 rocket lifted off from Cape Canaveral, Florida, on Friday at 1845 GMT (1445 EDT), reaching orbit 9 minutes later. The rocket lofted an unscrewed mockup of SpaceX's Dragon capsule, which is designed to one day carry both crew and cargo to orbit. 'This has been a good day for SpaceX and a promising development for the US human space flight program,' said Robyn Ringuette of SpaceX in a webcast of the launch. In a teleconference with the media on Thursday, SpaceX's CEO, Paypal co-founder Elon Musk, said he would consider the flight 100 percent successful if it reached orbit . ' Even if we just proved out that the first stage functions correctly, I'd still say that's a good day for a test,' he said. ' It's a great day if both stages work correctly.' SpaceX hopes to win a NASA contract to launch astronauts to the International Space Station using the Falcon 9. US government space shuttles, which currently make these trips, are scheduled to retire for safety reasons at the end of 2010.

Options :

- 1) setup mockup setting base
- 2) promising hopefully rapid encouraging
- 3) track orbit path trajectory
- 4) trust contract support arrangement
- 5) accelerate launch launch retire

47) History Curriculum #23000854 Prediction

What history books tell us about the past is not everything that happened, but what historians have selected . They cannot put in everything: choices have to be made. Choices must similarly be made about which aspects of the past should be formally taught to the next generation in the shape of school history lessons. So, for example , when a national school curriculum for England and Wales was first discussed at the end of the 1980s, the history curriculum was the subject of considerable public and media interest . Politicians argued about it; people wrote letters to the press about it; the Prime Minister of the time, Margaret Thatcher, intervened in the debate. Let us think first about the question of content. There were two main camps on this issue those who thought the history of Britain should take pride in place , and those who favored what was referred to as 'world history'.

Options :

- 1) be selected select have selected takes
- 2) as a result in respect to for example for instance
- 3) preference tracks interest tastes
- 4) had intervened intervened was intervened was intervening
- 5) location place culture opportunity

48) United Nations (Version 2) #23000849 Prediction

The United Nations is an international organization founded in 1945. Due to its unique international character, and the powers vested in its founding Charter, the organization can take action on a wide range of issues and provide a forum for its 193 Member States to express their views, through the General Assembly, the Security Council, the Economic and Social Council and other bodies and committees. The work of the United Nations reaches every corner of the globe. Although best known for peacekeeping, peacebuilding, conflict prevention , and humanitarian assistance, there are many other ways the United Nations and its system (specialized agencies, funds and programmes) affect our lives and make the world a better place.

Options :

- 1) advantage recognition action promotion
- 2) reveal release contradict express
- 3) war corner meeting time
- 4) prediction renovation invention prevention

49) Sleeping Pattern #23000848 Prediction

Children have sound sleep patterns. They can successfully sleep for 8-9 hours and get up at a fixed time. But teenagers don't. Their need for an early start to schools or other schedules can influence . their sleep patterns. Despite of these factors, they actually need longer sleep. So, parents should try and speak to their children, who are suitable to help them understand that night of sound sleep is always helpful.

Options :

- 1) sound loud erratic poor
- 2) periodically successfully hardly barely
- 3) affect influence gained diverge
- 4) Despite Meanwhile Since Otherwise
- 5) suitable throwing depending influencing

50) Australian Women Novelist #23000846 Prediction

In the literary world, it was an accepted assumption that the 1970s was a time of unprecedented growth in homegrown Australian fiction. And everybody was reading and talking about books by young Australian women. But it was not until recently that a researcher was able to measure just how many novels were published in that decade, and she found that there had been a decline in novels by Australian writers overall, but confirmed an increase in women's novels. It is this sort of research - testing ideas about literary history - that is becoming possible with the spread of 'Digital Humanities.' The intersection of humanities and digital technologies is opening up opportunities in the fields of literature, linguistics, history, and language that were not possible without computational methods and digitized resources to bring information together in an accessible way. Transcription software is being developed for turning scans of books and documents into text, as the field of digital humanities really takes off .

Options :

- 1) not until until impossible till
- 2) should become must become is becoming will become
- 3) is opened to is opening up is opened up is opening to
- 4) were not possible was not possible could be possible can be possible
- 5) in off on over

51) Economic Character #23000840 Prediction

One distinguishing feature of the business is its economic character. In the world of business, we interact with each other not as family members, friends, or neighbors, but as buyers and sellers , employers and employees, and the like. Trading, for example, is often accompanied by hard bargaining, in which both sides conceal their full hand and perhaps engage in some bluffing. And a skilled salesperson is well-versed in the art of arousing a customer's attention (sometimes by a bit of puffery) to clinch the sale. Still, there is an "ethics of trading" that prohibits the use of false or deceptive claims and tricks such as "bait-and-switch" advertising.

Options :

- 1) retailers vagrants partners buyers
- 2) sellers solicitors tellers traders
- 3) accompanied customized complimented accomplished
- 4) engage thrive flourish conduct
- 5) bounteous developed vagarious skilled
- 6) much more such most

52) Distance Learning #23000837 Prediction

Distance learning can be highly beneficial to a large variety of people from young students wanting to expand their horizons to adults looking for more job security, with programs that allow learners of all ages to take courses for fun, personal advancement, and degrees, distance learning can meet the needs of a diverse population. Perhaps one of the most notable and often talked about advantages of distance learning is the flexibility the majority of programs allow students to learn when and where it's convenient for them. For those who are struggling to balance their distance learning goals with working a fulltime job and taking care of a family, this kind of flexibility can allow many people to pursue education who would not otherwise be able to do so. Since there are no on-campus courses to attend, students can learn from their own homes, at work on their lunch breaks, and from virtually anywhere with internet access. For some, it can even be a big source of savings on the fuel costs and time required to commute to classes.

Options :

- 1) claim achieve devise meet
- 2) definitions factors advantages defaults
- 3) employers them those teachers
- 4) Although Thus Nevertheless Since

53) Language Comes Naturally #23000836 Prediction

Language comes so naturally to us that it is easy to forget what a strange and miraculous gift it is. All over the world members of our species fashion their breath into hisses and hums and squeaks and pops and listen to others do the same. We do this, of course, not only because we like the sounds but because details of the sounds contain information about the intentions of the person making them. We humans are fitted with a means of sharing our ideas, in all their unfathomable vastness. When we listen to the speech, we can be led to think thoughts that have never been thought of before, and that never would have occurred to us on our own.

Options :

- 1) genre category group species
- 2) same so liking correspondence
- 3) intentions interventions determinations attempts
- 4) rendering loading turning sharing
- 5) appeared occurred risen opened

54) Film #23000835 Prediction

The film is where art meets commerce. As Orson Welles said: "A painter just needs a brush and the writer just needs a pen, but the producer needs an army." And an army needs money. A producer is just like an entrepreneur, we raise money to make films. First, we need to find an original idea or a book or a play and purchase the rights, then we need money to develop that idea often a reasonably small sum. Besides, to commission a writer for the screenplay isn't something you would want to gamble your own money on, so you find a partner. We are lucky here in the UK, as we have Film 4, BBC Films, and the UK Film Council, all of which are good places to develop an idea. Producing in Britain is very different from producing in America or even Europe because the economic dynamic is different.

Options :

- 1) raise arise rise raze
- 2) Nevertheless Or Besides Thus
- 3) by but as instead
- 4) them which those they
- 5) until even unless ever

55) Allergies #23000833 Prediction

What are allergies? Allergies are abnormal immune system reactions to things that are typically harmless to most people. When you're allergic to something, your immune system mistakenly believes that this substance is harmful to your body. Substances that cause allergic reactions - such as certain foods, dust, plant pollen, or medicines - are known as allergens. In an attempt to protect the body, the immune system produces IgE antibodies to that allergen. Those antibodies then cause certain cells in the body to release chemicals into the bloodstream, one of which is histamine (pronounced: HIS-tuh-meen). The histamine then acts on the eyes, nose, throat, lungs, skin, or gastrointestinal tract and causes the symptoms of allergic reactions. Future exposure to that same allergen will trigger this antibody response again. This means that every time you come into contact with that allergen, you'll have some form of allergy symptoms.

Options :

- 1) mistakenly misleadingly involuntarily unprovokedly
- 2) protect strengthen equip hedge
- 3) dissolve thicken release crystallize
- 4) stings offends reacts acts
- 5) antigen counter antibody physiological

56) Classic Literature #23000832 Prediction

One of the most important things to remember is that "classic" does not necessarily translate to "favorite" or "bestselling". Literature is instead considered classic when it has stood the test of time and it stands the test of time when the artistic quality it expresses - be it an expression of life, truth, beauty, or anything about the universal human condition - continues to be relevant and continues to inspire emotional responses, no matter the period in which the work was written. Indeed, classic literature is considered as such regardless of book sales or public popularity. That said, classic literature usually merits lasting recognition - from critics and other people in a position to influence such decisions - and has a universal appeal. And, while effective use of language as well as technical excellence - is a must, not everything that is well-written or is characterized by technical achievement or critical acclaim will automatically be considered a classic. Conversely, works that have not been acknowledged or received positively by the writer's contemporaries or critics can still be considered as classics.

Options :

- 1) expression iconization imagination exaggeration
- 2) regardless lacking devoid careless
- 3) exclusively usually merely consequently
- 4) imposingly positively efficiently favourably

57) Taylor's Restaurant #23000826 Prediction

The rest of Taylor's restaurant is student-run. Students in quantity food production and service management classes make the articulate and detailed dishes. "We teach students to understand where a product comes from and to respect that product," Garmy said. Skeptics might doubt the quality of a student-run restaurant, but one visit to Taylor's will immediately change their outlook. Dishes such as orecchiette, butternut squash, pappardelle with duck, and bistro chicken will please any appetite while imparting the need to return for a second taste. Students are taught to use ratios and proportions rather than recipes when creating dishes. "Understanding ratios and proportions when creating dishes instead of recipes makes students think and actually teaches them how to cook, rather than just reading a recipe and not learning from it," Garmy said. Garmy said he believes in using all aspects of a product, which Taylor's menu reflects.

Options :

- 1) tradition classes correctness comprehension
- 2) expenditure qualification quality plenty
- 3) where what when which
- 4) appetite cuisine menu utensil

58) Austria's Heating System #23000824 Prediction

Since Austria sits at a high elevation and spends a quarter of the year under snow , it should come as no surprise that heating is a matter of considerable importance in the country. What may be surprising, however, is that Vienna, a grand imperial city of music, art, and history actually boasts a museum dedicated specifically to heating systems.

Options :

- 1) rain dust lava snow
- 2) importance utmost preference favoritism
- 3) repellent dedicated prior attributed

59) The Ironbridge Gorge #23000821 Prediction

The Ironbridge Gorge World Heritage property covers an area of 5.5 km² (550ha) and is located in Telford, Shropshire, approximately 50km north-west of Birmingham. The Industrial Revolution had its 18th-century roots in the Ironbridge Gorge before spreading across the world, bringing with it some of the most far-reaching changes in human history. The site incorporates a 5km length of the steep-sided, mineral-rich Severn Valley from a point immediately west of Ironbridge downstream to Coalport, together with two smaller river valleys extending northwards to Coalbrookdale and Madeley. The Ironbridge Gorge offers a powerful insight of the origins of the Industrial Revolution and also contains extensive remains of that period when the area was the focus of international attention from artists, engineers, and writers. The site contains substantial remains of mines, foundries, factories, workshops, warehouses, ironmasters' and workers' housing, public buildings, infrastructure, and transport systems, together with the traditional landscape and forests of the Severn Gorge. In addition, there also remain extensive collections of artefacts and archives relating to the individuals, processes, and products that made the area so important. Today, the site is a living working community with a population of approximately 4000 people. It is also a historic landscape that is interpreted and made accessible through the work of a number of organizations, in particular, the Ironbridge Gorge Museum Trust established in 1967 to preserve and interpret the remains of the Industrial Revolution within the Ironbridge Gorge) and the Severn Gorge Countryside Trust established in 1991 to manage the woodland and grassland in the Gorge.

Options :

- 1) tradition version roots appearance
- 2) explanation insight fathom prospect
- 3) with for in from
- 4) inclusive extensive subordinate prior
- 5) contemporary modern historic presentable

60) Chemistry #23000816 Prediction

Chemistry is an extremely important topic in physiology. Most physiological processes occur as the result of chemical changes that occur within the body. These changes include the influx/efflux of ions across a neuron's membrane, causing a signal to pass from one end to the other. Other examples include the storage of oxygen in the blood by a protein as it passes through the lungs for usage throughout the body.

Options :

- 1) result rule background cause
- 2) circuit change shortcut signal
- 3) dissolution creation storage consumption
- 4) passes rushes breaks crosses
- 5) share coverage transmission usage

61) Penguin World #23000812 Prediction

The emperor is the giant of the penguin world and the most iconic of the birds of Antarctica. Gold patches on their ears and on the top of their chest brighten up their blackheads. Emperors and their closest relative, the king penguin, have unique breeding cycles, with very long chick-rearing periods. The emperor penguins breed the furthest south of any penguin species, forming large colonies on the sea-ice surrounding the Antarctic continent. They are true Antarctic birds, rarely seen in the subantarctic waters. So that the chicks can fledge in the late summer season, emperors breed during the cold, dark winter, with temperatures as low at - 50°C and winds up to 200 km per hour. They trek 50-120 km (30-75 MLS) over the ice to breeding colonies which may include thousands of individuals. The female lays a single egg in May then passes it over to her mate to incubate whilst she goes to the sea to feed. For nine weeks the male fasts, losing 45% of his body weight. The male balances the egg on his feet, which are covered in a thick roll of skin and feathers. The egg can be 70°C warmer than the outside temperature.

Options :

- 1) more much most such
- 2) have seen seen see seeing
- 3) up on out off
- 4) covering protected covered protecting

62) Descendants of the Maya #23000806 Prediction

Descendants of the Maya living in Mexico still sometimes refer to themselves as "the corn people." The phrase is not intended as a metaphor. Rather, it's meant to acknowledge their abiding dependence on this miraculous grass, the staple of their diet for almost 9,000 years. Forty percent of the calories a Mexican eats in a day comes directly from corn, most of it in the form of tortillas. So when a Mexican says I am maize or corn walking, it is simply a statement of fact: The very substance of the Mexican body is to a considerable extent a manifestation of this plant.

Options :

- 1) remember renown acknowledge knowledge
- 2) staple fix range variety
- 3) manifestation display show exhibition

63) DNA on a Crime Scene #23000803 Prediction

Fingerprints can prove that a suspect was actually at the scene of a crime. As long as a human entered a crime scene, there will be traces of DNA. DNA can help the police to identify an individual to crack a case. An institute in London can help reserve DNA and be used to match with the samples taken from the crime scenes.

Options :

- 1) present prove show illustrate
- 2) know figure realise identify
- 3) reserve install protect save
- 4) specimen results samples data

64) A Book of Plants #23000799 Prediction

A herbal is a book of plants, describing their appearance, their properties, and how they may be used for preparing ointments and medicines. The medical use of plants is recorded on fragments of papyrus and clay tablets from ancient Egypt, Samaria, and China that date back 5,000 years but document traditions far older still. Over 700 herbal remedies were detailed in the Papyrus Ebers, an Egyptian text written in 1500 BC. Around 65 BC, a Greek physician called Dioscorides wrote a herbal that was translated into Latin and Arabic. Known as 'De materia medica', it became the most influential work on medicinal plants in both Christian and Islamic worlds until the late 17th century. An illustrated manuscript copy of the text made in Constantinople (modern-day Istanbul) survives from the sixth century. The first printed herbals date from the dawn of European printing in the 1480s. They provided valuable information for apothecaries, whose job it was to take the pills and potions prescribed by physicians. In the next century, landmark herbals were produced in England by William Turner, considered to be the father of British botany, and John Gerard, whose illustrations would inspire the floral fabric, wallpaper and tile designs of William Morris four centuries later.

Options :

- 1) registered recorded memorised kept
- 2) moved interpreted translated removed
- 3) leaves remains suffers survives
- 4) instructed pointed prescribed determined
- 5) simulate wake inspire stimulate

65) Behavior of Liquids #23000798 Prediction

If you see a movie, or a TV advertisement, that involves a fluid behaving in an unusual way, it was probably made using technology based on the work of a Monash researcher. Professor Joseph Monaghan, who pioneered an influential method for interpreting the behavior of liquids that underlies most special effects involving water, has been honored with election to the Australian Academy of Sciences.

Professor Monaghan, one of only 17 members elected in 2011, was recognized for developing the method of Smoothed Particle Hydrodynamics (SPH) which has applications in the fields of astrophysics, engineering, and physiology, as well as movie special effects. His research started in 1977 when he tried to use computer simulation to describe the formation of stars and stellar systems. The algorithms available at the time were incapable of describing the complicated systems that evolve out of chaotic clouds of gas in the galaxy. Professor Monaghan and his colleague Bob Gingold took the novel and effective approach of replacing the fluid or gas in the simulation with large numbers of particles with properties that mimicked those of the fluid. SPH has become a central tool in astrophysics, where it is currently used to simulate the evolution of the universe after the Big Bang, the formation of stars, and the processes of planet building.

Options :

- 1) make much making made
- 2) system method platform medium
- 3) gifted credited presented honored
- 4) of in at on
- 5) impossible incapable capable inapplicable
- 6) who when where which

66) Arctic Sovereignty #23000794 Prediction

This summer, 41 UBC alumni and friends participated in expeditions to the Canadian Arctic and the legendary Northwest Passage. Presentations, conversations, and learning accompanied their exploration of the great outdoors aboard the Russian-flagged Akademik Ioffe, designed and built in Finland as a scientific research vessel in 1989. Her bridge was open to passengers virtually 24 hours a day. Experts on board presented on topics including climate change, wildlife, Inuit culture and history, and early European explorers. UBC professor Michael Byers presented on the issue of Arctic sovereignty, a growing cause of debate as the ice melts, new shipping routes open, and natural resources become accessible. Recommended pre-trip reading was late UBC alumnus Pierre Briton's book, The Arctic Grail.

Options :

- 1) outdoors indoors outside inside
- 2) board broad list aboard
- 3) slight growing disappearing tiny
- 4) cease turn become come

67) Zero-gravity #23000790 Prediction

Researchers already know that spending long periods of time in a zero-gravity environment -- such as that inside the International Space Station (ISS) -- results in loss of bone density and damage to the body's muscles. That's partly why stays aboard the ISS are limited at six months. Now, a number of NASA astronauts are reporting that their 20/30 vision faded after spending time in space, with many needing glasses once they returned to Earth.

Options :

- 1) planet weather climate environment
- 2) enhancement damage gain recovery
- 3) flexibility development muscles action
- 4) allowed excessive limited exceeded
- 5) disappeared fatigued faded strengthened

68) William Shakespeare #23000788 Prediction

For all his fame and celebration, William Shakespeare remains a mysterious figure with regards to personal history. There are just two primary sources for information on the Bard: his work, and various legal and church documents that have survived from Elizabethan times. Naturally, there are many gaps in this body of information, which tells us little about Shakespeare the man.

Options :

- 1) curious serious ridiculous mysterious
- 2) types resources sources forms
- 3) college university private church
- 4) grabs achievements gaps merits

69) Estee Lauder #23000783 Prediction

She transformed beauty into big business by cultivating classy sales methods and giving away samples. Leonard Lauder, chief executive of the company his mother founded, said she always thought she "was growing a nice little business." And that is it. A little business that controls 45% of the cosmetics market in U.S. department stores. A little business that sells in 118 countries and last year grew to be \$3.6 billion big in sales. The Lauder family's shares are worth more than \$6 billion. But early on, there wasn't a burgeoning business; there weren't houses in New York, Palm Beach, Fla., or the south of France. It is said that at one point there was one person to answer the telephones who changed her voice to become the shipping or billing department as needed. You more or less know the Estée Lauder story because it's a chapter from the book of American business folklore. In short, Josephine Esther Mentzer, daughter of immigrants, lived above her father's hardware store in Corona, a section of Queens in New York City. She started her enterprise by selling skin creams concocted by her uncle, a chemist, in beauty shops, beach clubs, and resorts. No doubt the portions were good Estée Lauder was a quality fanatic but the saleslady was better. Much better. And she simply outworked everyone else in the cosmetics industry. She stalked the bosses of New York City department stores until she got some counter space at Saks Fifth Avenue in 1948. And once in that space, she utilized a personal selling approach that proved as potent as the promise of her skin regimens and perfumes.

Options :

- 1) makes has contains controls
- 2) changed heard influenced deep
- 3) family shop career enterprise
- 4) from till until to

70) Complementary Therapies #23000778 Prediction

Complementary therapies - such as those practiced by naturopaths, chiropractors, and acupuncturists - have become increasingly popular in Australia over the last few decades. Interest initially coincided with enthusiasm for alternative lifestyles, while immigration and increased contact and trade with China have also had an influence. The status of complementary therapies is being revisited in a number of areas: legal regulation; the stances of doctors' associations; their inclusion in medical education; and scientific research into their efficacy.

Options :

- 1) practiced conducted expected recommended
- 2) years decades months centuries
- 3) enthusiasm confidence interest occupation
- 4) earning idea effect influence
- 5) efficacy practice efficiency experiment

71) Katakana #23000777 Prediction

An eccentric mix of English, German and French has entered Japanese usage with grand abandon. A "Kariya" woman is a career woman, and a "mansion" is an apartment. This increasing use of katakana, or unique Japanese versions of Western words, and the younger generation's more casual use of the Japanese language have prompted Prime Minister Junichiro Koizumi to worry that these new words may not be understood by a wider audience. As a result, a government panel is proposing to publish a manual on how to speak proper Japanese. Foreign words became katakana Japanese because no existing Japanese words could quite capture a specific meaning or feeling. When the word "cool" travelled east, all of its English connotations did not make the journey. A kuru person in Japan is someone who is calm and never gets upset. On the other hand, someone who is kakkoi is hip, or in translation, "cool." Similarly, a hotto person is one who is easily excitable, perhaps passionate, but not necessarily a popular person or personality of the moment.

Options :

- 1) approached prompted promoted asked
- 2) As agreed As against As a rule As a result
- 3) so because thus while
- 4) On the other hand On the contrary In addition Moreover
- 5) Similarly Fortunately Clearly Firmly

72) A Dog #23000776 Prediction

A dog may be man's best friend. But man is not always a dog's. Over the centuries selective breeding has pulled at the canine body shape to produce what is often a grotesque distortion of the underlying wolf. Indeed, some of these distortions are, when found in people, regarded as pathologies. Dog breeding does, though, offer a chance to those who would like to understand how body shape is controlled. The ancestry of pedigree pooches is well recorded, their generation time is short and their litter size reasonably large, so there is plenty of material to work with. Moreover, breeds are, by definition, inbred, and this simplifies genetic analysis. Those such as Elaine Ostrander, of America's National Human Genome Research Institute, who wish to identify the genetic basis of the features of particular pedigrees thus have an ideal experimental animal.

Options :

- 1) selected excessive selective excellent
- 2) epidemics pathologies medications diseases
- 3) lit littering litters litter
- 4) Reprehensive Moreover Generally Representational
- 5) ideal unnatural featured best

73) Modern Technology #23000773 Prediction

One thing is certain. Most people do not get enough exercise in their daily routines. All of the advances of modern technology - from electric can openers to power steering have made life easier, more comfortable, and much less physically demanding. Yet our bodies need activity, especially if they are carrying around too much fat. Satisfying this need requires a sustainable plan and a commitment.

Options :

- 1) daily simple common usual
- 2) vibrational electronic synthetic electric
- 3) need demanding pushing supplying
- 4) few many much several

74) Teen Writing #23000772 Prediction

Teens write for a variety of reasons as part of a school assignment, to get a good grade, to stay in touch with friends, to share their artistic creations with others, or simply to put their thoughts to paper (whether virtual or otherwise). In our focus groups, teens said they are motivated to write when they can select topics that are relevant to their lives and interests, and report greater enjoyment of school writing when they have the opportunity to write creatively. Having teachers or other adults who challenge them, present them with interesting curricula and give them detailed feedback also serves as a motivator for teens. Teens also report writing for an audience motivates them to write and write well.

Options :

- 1) get skip maintain avoid
- 2) debate communicate use select
- 3) meet educate present blame
- 4) regard learn report provide

75) Natural Capital #23000771 Prediction

Capital has often been thought of narrowly as physical capital the machines, tools, and equipment used in the production of other goods, but our wealth and wellbeing also relies on natural capital. If we forget this, we risk degrading the services that natural ecosystems provide, which support our economies and sustain our lives. These services include purifying our water, regulating our climate, reducing flood risk, and pollinating our crops. The Natural Capital Project, a partnership between WWF, the Nature Conservancy, University of Minnesota, and Stanford University, works to provide decision-makers with reliable ways to assess the true value of the services that ecosystems provide. An essential element of the Natural Capital Project is developing tools that help decision-makers protect biodiversity and ecosystem services.

Options :

- 1) compensates relies reduces spurs
- 2) reducing lowering improving degrading
- 3) controlling diminishing denying regulating
- 4) feasible strong powerful reliable

76) Video-Conferencing Technology #23000770 Prediction

Never has the carbon footprint of multi-national corporations been under such intense scrutiny. Inter-city train journeys and long-haul flights to conduct face-to-face business meetings contribute significantly to greenhouse gases and the resulting strain on the environment. The Anglo-US company Teliris has introduced new video-conferencing technology and partnered with the Carbon Neutral Company, enabling corporate outfits to become more environmentally responsible. The innovation allows simulated face-to-face meetings to be held across continents without the time pressure or environmental burden of international travel. Previous designs have enabled video-conferencing on a point-to-point, dual-location basis. The firm's Virtualive technology, however, can bring people together from up to five separate locations anywhere in the world - with unrivaled transmission quality.

Options :

- 1) create conduct produce generate
- 2) gases strain affect steam
- 3) along with beyond from
- 4) pressure limit stress press
- 5) separate each single respectively

77) Egg Eating Snakes #23000769 Prediction

Egg eating snakes are a small group of snakes whose diet consists only of eggs. Some eat only small eggs, which they have to swallow whole , as the snake has no teeth. Instead, some other snakes eat bigger eggs, but it requires special treatment . These snakes have spines that stick out from the backbone. The spines crack the egg open as it passes through the throat.

Options :

- 1) food consists dietitian diet
- 2) slow fast whole all
- 3) thinking treatment food supplement
- 4) break buy crack beat
- 5) down up close open

78) Peter Garrett #23000767 Prediction

No one in Parliament would know better than Peter Garrett what largesse copyright can confer so it may seem right that he should announce a royalty for artists, amounting to 5 percent of all sales after the original one, which can go on giving to their families for as much as 150 years. But that ignores the truth that copyright law is a scandal , recently exacerbated by the Free Trade Agreement with the US which required extension of copyright to 70 years after death. Is it scandalous that really valuable copyrights end up in the ownership of corporations (although Agatha Christie's no-doubt worthy great-grandchildren are still reaping the benefits of West End success for her whodunnits and members of the Garrick Club enjoy the continuing fruits of A.A. Milne's Christopher Robin books)? No. The scandal is that being peasant politicians have attempted to appear cultured by creating private assets that depend on an act of Parliament for their existence and by giving away much more in value than any public benefit could justify. In doing so they have betrayed our trust.

Options :

- 1) floaty loyalty bravery royalty
- 2) insult scandal slander humiliation
- 3) reaping garnishing gaining reaching
- 4) such much most least

79) Alaska's Aleutian islands #23000766 Prediction

Alaska's the Aleutian Islands have long been accustomed to shipwrecks. They have been part of local consciousness since a Japanese whaling ship ran aground near the western end of the 1,100-mile (1,800-km) volcanic archipelago in 1780, inadvertently naming what is now Rat Island when the ship's infestation, scurried ashore and made itself at home. Since then, there have been at least 190 shipwrecks in the islands.

Options :

- 1) on at to with
- 2) aside around aground along
- 3) islet archeology archipelago island
- 4) what when where which
- 5) shipwrecks ships accidents boosts

The invasion of non-indigenous plants is considered a primary threat to the integrity and function of ecosystems. However, there is little quantitative or experimental evidence for ecosystem impacts of invasive species. Justifications for control are often based on potential, but not presently realized, recognized, or quantified negative impacts. Should a lack of scientific certainty about the impacts of non-indigenous species result in postponing measures to prevent degradation? Recently, management of purple loosestrife (*Lythrum salicaria*) has been criticized for lack of evidence demonstrating the negative impacts of *L. salicaria*, and management using biocontrol for lack of evidence documenting the failure of conventional control methods. Although little quantitative evidence on negative impacts on native wetland biota and wetland function was available at the onset of the control program in 1985, recent work has demonstrated that the invasion of purple loosestrife into North American freshwater wetlands alters decomposing rates and nutrient cycling, leads to reductions in wetland plant diversity, reduces pollination and seed output of the native *Lythrum alatum*, and reduces habitat suitability for specialized wetland bird species such as black terns, least bitterns, pied-billed grebes, and marsh wrens. Conventional methods (physical, mechanical, or chemical) have continuously failed to curb the spread of purple loosestrife or to provide satisfactory control. Although a number of generalist insect and bird species utilize purple loosestrife, wetland habitat specialists are excluded by encroachment of *L. salicaria*. We conclude that the negative ecosystem impacts of purple loosestrife in North America justify control of the species and that the detrimental effects of purple loosestrife on wetland systems and biota and the potential benefits of control outweigh potential risks associated with the introduction of biocontrol agents. Long-term experiments and monitoring programs that are in place will evaluate the impact of these insects on purple loosestrife, on wetland plant succession, and other wetland biotas.

Options :

- 1) experiencing experience experimental experiments
- 2) prevent forget decline support
- 3) decomposing composition composing decomposition
- 4) fixability stability friability suitability
- 5) stop curb prevent reduce
- 6) continue conclude sustain prevent
- 7) as off along with

81) United Nations (V1) #23000763 Prediction

Founded after World War II by 51 "peace-loving states" combined to oppose future aggression, the United Nations now counts 192 member nations, including its newest members, Nauru, Kiribati, and Tonga in 1999, Tuvalu and Yugoslavia in 2000, Switzerland and East Timor in 2002, and Montenegro in 2006. United Nations Day has been observed on October 24 since 1948 and celebrates the objectives and accomplishments of the organization, which was established on October 24, 1945. The UN engages in peacekeeping and humanitarian missions across the globe. Though some say its influence has declined in recent decades, the United Nations still plays a tremendous role in world politics. In 2001 the United Nations and Kofi Annan, then Secretary-General of the UN, won the Nobel Peace Prize "for their work for a better organized and more peaceful world." Since 1948 there have been 63 UN peacekeeping operations, 16 are currently underway. Thus far, close to 130 nations have contributed personnel at various times; 119 are currently providing peacekeepers. As of August 31, 2008, there were 16 peacekeeping operations underway with a total of 88,230 personnel. The small island nation of Fiji has taken part in virtually every UN peacekeeping operation, as has Canada.

Options :

- 2) selected selecting observed observing
- 3) engages picks observes maintains
- 4) influence importance affect effect
- 5) contributed contribute contributes contributing

82) Definition of a Country #23000762 Prediction

What is a country, and how is a country defined? When people ask how many countries there are in the world, they expect a simple answer. After all, we've explored the whole planet, we have international travel, satellite navigation and plenty of global organizations like the United Nations, so we should really know how many countries there are. However, the answer to the question varies according to whom you ask. Most people say there are 192 countries, but others point out that there could be more like 260 of them. So why isn't there a straightforward answer? The problem arises because there isn't a universally agreed definition of 'country' and because, for political reasons, some countries find it convenient to recognize or not recognize other countries.

Options :

- 1) very whole only total
- 2) Few Most More No
- 3) For While But So
- 4) those many other these

83) Poverty #23000759 Prediction

Measuring poverty on a global scale requires establishing a uniform poverty level across extremely divergent economies, which can result in only rough comparisons. The World Bank has defined the international poverty line as U.S. \$1 and \$2 per day in 1993 Purchasing Power Parity (PPP), which adjusts for differences in the prices of goods and services between countries. The \$1 per day level is generally used for the least developed countries, primarily African; the \$2-per-day level is used for middle-income economies such as those of East Asia and Latin America.

Options :

- 1) requires relates asks expects
- 2) quality prices expenses quantity
- 3) limited more most least
- 4) developed lowest-income high-income middle-income

84) Impressionism #23000757 **Prediction**

Impressionism was a nineteenth-century art movement that began as a loose association of Paris-based artists who started publicly exhibiting their art in the 1860s. Characteristics of Impressionist paintings include visible brush strokes, light colours, open composition, emphasis on the light in its changing qualities (often accentuating the effects of the passage of time), ordinary subject matter, and unusual visual angles. The name of the movement is derived from Claude Monet's *Impression, Sunrise* (*Impression, Soleil Levant*). Critic Louis Leroy inadvertently coined the term in a satiric review published in *Le Charivari*. Radicals in their time, early Impressionists broke the rules of academic painting. They began by giving colours, freely brushed, primacy over the line, drawing inspiration from the work of painters such as Eugene Delacroix. They also took the act of painting out of the studio and into the world. Previously, not only still-lives and portraits, but also landscapes had been painted indoors, but the Impressionists found that they could capture the momentary and transient effects of sunlight by painting air (in plain air).

Options :

- 1) start started starting starts
- 2) change changing changed changes
- 3) the there them their
- 4) act notion thoutht fact

85) Pinker #23000756 **Prediction**

In a sequence of bestsellers, including *The Language Instinct* and *How the Mind Works*, Pinker has argued the swathes of our mental, social and emotional lives may have originated as evolutionary adaptations, well suited to the lives our ancestors eked out on the Pleistocene savannah. Sometimes it seems as if nothing is immune from being explained this way. Road rage, adultery, marriage, altruism, our tendency to reward senior executives with corner offices on the top floor, and the smaller number of women who become mechanical engineers all may have their roots in natural selection, Pinker claims. The controversial implications are obvious: that men and women might differ in their inborn abilities at performing certain tasks, for example, or that parenting may have little influence on personality.

Options :

- 1) originating originate origin originated
- 2) from for in with
- 3) needs roots demands values
- 4) differ complicate indulge interested
- 5) few many a few little

86) International students' english proficiency #23000751 **Prediction**

Federal Education Minister Julie Bishop says she has seen no evidence that international students are graduating from Australian universities with poor English skills. Research by Monash University academic Bob Birrell has found a third of international students are graduating without a competent level of English. But Ms. Bishop says Australian universities only enroll international students once they have achieved international standards of language proficiency. "This has been an extraordinary attack by Professor Birrell on our universities," she said. "International students must meet international benchmarks in the English language in order to get a place at a university in Australia, and they can't get into university without reaching that international standard." University of Canberra vice-chancellor Roger Dean also says international students are required to sit an English test before being admitted to nearly all Australian universities. "There are, of course, intercultural difficulties as well as language difficulties," he said. "There are, of course, also many Australian students who don't speak such fantastically good English either." "So we're trying to push the standard even higher than a present, but it's a very useful one already." Ms. Bishop says of Australia's university system, which has high standards. "I've seen no evidence to suggest that students are not able to complete their courses because they're failing in English yet they're being passed by the universities," she said. "I've not seen any evidence to back that up." "International education is one of our largest exports, it's our fourth-largest export, and it's in the interest of our universities to maintain very high standards because their standard fame recognition achievement is at stake."

Options :

- 2) of in without at
- 3) by off at on
- 4) without through beyond within
- 5) whose where who what
- 6) excuse support reason evidence

87) Reason for Moving #23000750 **Prediction**

People move to a new region for many different reasons. The motivation for moving can come from a combination of what researchers sometimes call 'push and pull factors' - those that encourage people to leave a region, and those that attract people to a region. Some of the factors that motivate people to move include seeking a better climate, finding more affordable housing, looking for work or retiring from work, leaving the congestion of city living, wanting a more pleasant environment, and wanting to be near to family and friends. In reality, many complex factors and personal reasons may interact to motivate a person or family to move.

Options :

- 1) accommodation combination abbreviation motivation
- 2) include as enclose about
- 3) factors reasons features messages
- 4) interlock able interact attract

88) Intelligence of Animals #23000749 **Prediction**

Comparing the intelligence of animals of different species is difficult, how do you compare a dolphin and a horse? Psychologists have a technique for looking at intelligence that does not require the cooperation of the animals involved. The relative size of an individual's brain is a reasonable indication of intelligence. Comparing across species is not as simple as an elephant will have a larger brain than a human simply because it is a large beast, instead we use the Cephalization index, which compares the size of an animal's brain to the size of its body. Based on the Cephalization index, the brightest animals on the planet are humans, followed by great apes, porpoises, and elephants. As a general rule, animals that hunt for a living (like canines) are smarter than strict vegetarians (you don't need much intelligence to outsmart a leaf of lettuce). Animals that live in social groups are always smarter and have larger EQs than solitary animals.

Options :

- 1) done do did does
- 2) across to through over
- 3) then instead because otherwise
- 4) followed follows follow following
- 5) theory principal rule principle

89) Australian Higher Education #23000748 **Prediction**

The financing of Australian higher education has undergone dramatic changes since the early 1970s. Although the Australian Government provided regular funding for universities from the late 1950s, in 1974 it assumed full responsibility for funding higher education - abolishing tuition fees with the intention of making university accessible to all Australians who had the ability and who wished to participate in higher education.

Since the late 1980s, there has been a move towards greater private contributions, particularly student fees. In 1989, the Australian Government introduced the Higher Education Contribution Scheme (HECS) which included a loan scheme to help students finance their contributions. This enabled university to remain accessible to students by delaying their payments until they could afford to pay off their loans. In 2002, the Australian Government introduced a scheme similar to HECS for postgraduate students - the Postgraduate Education Loan Scheme (PELS). Funding for higher education comes from various sources. This article examines the three main sources - Australian Government funding, student fees and charges, and HECS. While the proportion of total revenue raised through HECS is relatively small, HECS payments are a significant component of student university costs, with many students carrying a HECS debt for several years after leaving university. This article also focuses on the characteristics of university students based on their HECS liability status, and the level of accumulated HECS debt.

Options :

- 1) assumed clarified paid represented
- 2) accomplishing combining including abolishing
- 3) reliable achievable accessible accepted
- 4) liability reality responsibility ability
- 5) without specially with particularly
- 6) produced carried remembered introduced
- 7) expenses expenditure profit revenue

90) Importance of Hard Work #23000747 Prediction

It is important to emphasize the need for hard work as an essential part of studying law, because far too many students are tempted to think that they can succeed by relying on what they imagine to be their natural ability, without bothering to add the expenditure of effort. To take an analogy, some people prefer the more or less instant gratification which comes from watching television adaptation of a classic novel to the rather more laborious process of reading the novel itself. Those who prefer watching television to read the book are less likely to study law successfully unless they rapidly acquire a taste for text-based materials.

Options :

- 1) in to it that
- 2) expenditure engagement explanation employment
- 3) whose where which when
- 4) simple complex effortless laborious
- 5) prefer enjoy interest like
- 6) knowledge idea motivation taste

91) Olympic Medalists #23000744 Prediction

In an often-cited study about counterfactuals, Medvec, Madey, and Gilovich (1995) found that bronze medalists appeared happier than silver medalists in television coverage of the 1992 Summer Olympics. Medvec et al. argued that bronze medalists compared themselves to 4th place finishers, whereas silver medalists compared themselves to gold medalists. These counterfactuals were the most salient because they were either qualitatively different (gold vs. silver) or categorically different (medal vs. no medal) from what actually occurred. Drawing on archival data and experimental studies, we show that Olympic athletes (among others) are more likely to make counterfactual comparisons based on their prior expectations, consistent with decision affect theory. Silver medalists are more likely to be disappointed because their personal expectations are higher than those of bronze medalists.

Options :

- 1) argued thought fought flighted
- 2) whereabouts wherever whatsoever whereas
- 3) playfully finally actually totally
- 4) after last before prior
- 5) that these those this

92) Cloth stinking reason #23000729 Prediction

You've probably noticed that synthetic t-shirts stink more after a workout, compared to cotton. But hey, it's not the fabric's fault. It's the microbes that hang out on synthetics that create that characteristic stench. That's according to a study in the journal Applied and Environmental Microbiology.

Twenty-six volunteers-half men, half women worked out on spinning bikes for an hour. They did so outfitted with shirts of cotton, polyester, or a cotton/synthetic blend. The researchers then stuffed the sweaty shirts into plastic bags. The next day, a trained panel sniffed them, rating their funk. Unlucky job. Because yes, the polyester shirts were indeed more musty, sour, and ammonia-like than the cotton. DNA analysis revealed that Micrococcus bacteria was to blame. They aren't actually all that common in the armpit itself. And they don't flock to cotton. But researchers say they thrive on the open-air lattice of synthetic fibres where they sit chomping on the long-chain fatty acids in our sweat, turning them into shorter, stinkier molecules. These findings might just explain one of the most vexing questions of adolescence: why do stinky shirts smell so unpleasantly different from the body odour in the armpits themselves? It could be because your favourite shirt has a microbiome of its own.

Options :

- 1) polemic oligopolistic hydrophilic synthetic
- 2) alphabetic physic paramedic characteristic
- 3) expositor critter polyester architecture
- 4) bacteria siltier compendia comelier
- 5) in if of at
- 6) quartets nets themselves kings

93) Professor Warrick Couch #23000728 Prediction

Victoria University of Wellington has conferred an honorary degree on a distinguished astrophysicist in a recent graduation ceremony. Professor Warrick Couch received the honorary degree of Doctor of Science for his remarkable contribution to our knowledge of galaxies and dark energy. Professor Couch is a distinguished astrophysicist who has played a crucial role in the discovery that the Universe is expanding at an accelerating rate, a finding which led to the lead scientists being awarded a Nobel Prize in Physics in 2011, which he attended in recognition of his contribution. In his research, Professor Couch uses large ground-based and space-based telescopes to observe galaxy clusters, which are the Largest Structures in the Universe. He is also involved in a number of national and international committees overseeing the management of these telescopes. In addition to his own research activities, Professor Couch has worked to support young researchers and provide public comment on astronomy internationally.

Options :

- 1) was receiving received had received is received
- 2) led played done found
- 3) who they those which
- 4) As a result of Instead of In addition to Regarding

94) Language extinction #23000721 Prediction

At the moment, there are between six and seven thousand languages in the world. According to linguists, fifty percent of these are in danger of becoming extinct. The speed of language loss has accelerated over the past few decades because businesses that need to communicate with a range of people from other cultures prefer to employ more widely used languages, such as English, Chinese, or Spanish. This attitude is understandable, but it means that many local languages are dying out before anyone has had the opportunity to study them. According to linguists, some of these languages could reveal a great deal of useful information about language learning and cognitive development. In addition, a local language that has been built on the local culture contains words and phrases that express that culture; lose the language and you arguably may lose the culture, too. And finally, historians will argue that a language contains evidence of a region's history and should, for that reason alone, be preserved.

Options :

- 1) to become became of becoming have become
- 2) select fancy must prefer
- 3) would have has had have having had
- 4) size deal load capacity
- 5) speak argue explore tell

95) Cloth Making Process #23000720 Prediction

About 10,000 years ago, people learned how to make cloth. Wool, cotton, flax, or hemp was first spun into a thin thread using a spindle. The thread was then woven into a fabric. The earliest weaving machines probably consisted of little more than a per of sticks that held a set of parallel threads, called the wrap, while the cross-thread, called the weft, was inserted. Later machines called looms had roads that separated the threads to allow the west to be inserted more easily . A piece of wood, called the shuttle, holding a spool of thread, was passed between the separated threads. The basic principles of spinning and weaving have stayed the same until the present day, though during the industrial revolution of the 18th century many ways were found of automating the processes. With new machines such as the spinning mule, many threads could be spun at the same time, and, with the help of devices like the flying shuttle, broad pieces of cloth could be woven at great speed.

Options :

- 1) doubtless probably possible possibility
- 2) precise accuracy easily accurate
- 3) role principles foundation criteria
- 4) automating slower faster existing

96) Definition of climate #23000718 Prediction

Climate is the word we use for weather over a long period of time. The desert has a dry climate because there is very little rain. The UK has a 'temperate climate', which means winters are, overall, mild and, summers generally, don't get too hot.

Options :

- 1) estimates predict cares use
- 2) torrential often little heavy
- 3) what these that which
- 4) summers winter desert dessert

97) EE & AVG #23000714 Prediction

There has been increased research interest in the use of active video games (in which players physically interact with images on the screen) as a means to promote physical activity in children. The aim of this review was to assess active video games as a means of increasing energy expenditure and physical activity behavior in children. Studies were obtained from computerized searches of multiple electronic bibliographic databases. The last search was conducted in December 2008. Eleven studies focused on the quantification of the energy cost associated with playing active video games, and eight studies focused on the utility of active video games as an intervention to increase physical activity in children. Compared with traditional non-active video games, active video games elicited greater energy expenditure, which was similar in intensity to mild to moderate-intensity physical activity. The intervention studies indicate that active video games may have the potential to increase free-living physical activity and improve body composition in children; however, methodological limitations prevent definitive conclusions. Future research should focus on larger, methodologically sound intervention trials to provide definitive answers as to whether this technology is effective in promoting long-term physical activity in children.

Options :

- 1) promote advance encourage advance
- 2) obtained loose get hold
- 3) play played work playing
- 4) for on with from
- 5) worsen help improve raise
- 6) conclusive ultimate final definitive
- 7) facing promoting advance forwarding

98) Good Looks Win Votes #23000712 Prediction

It is tempting to try to prove that good looks win votes, and many academics have tried. The difficulty is that beauty is in the eye of the beholder, and you cannot behold a politician's face without a veil of extraneous prejudice getting in the way. Does George Bush possess a disarming grin or a facetious smirk? It's hard to find anyone who can look at the president without assessing him politically as well as physically.

Options :

- 1) difficulty starin simplicity struggle
- 2) observer beholder spectator eyewitness
- 3) physically abstract intangible bodily

99) Conservancy #23000711 Prediction

To qualify as a conservancy, a committee must define the conservancy's boundaries, elect a representative conservancy committee, negotiate a legal constitution, prove the committee's ability to manage funds and produce an acceptable plan for equitable distribution of wildlife-related benefits. Once approved, registered conservancies acquire the rights to a sustainable wildlife quota, set by the ministry.

Options :

- 1) representative spokesperson specimen exemplar
- 2) allocate use spend manage
- 3) equitable together usable fair
- 4) required registered preregistered entered
- 5) rightness ability rights advantage

100) Job of a Doctor #23000705 **Prediction**

In the fast-changing world of modern healthcare, the job of a doctor is more and more like the job of a chief executive. The people who run hospitals and physicians' practices don't just need to know medicine. They must also be able to balance budgets, motivate a large and diverse staff, and make difficult marketing and legal decisions.

Options :

- 1) makes practices exercise use
- 2) purpose medicine sweet criteria
- 3) movements principles able surreal
- 4) patients clients proponents staff
- 5) proposals patents decisions copyrights

101) Bones are Extremely Strong #23000702 **Prediction**

Bones are extremely strong. One of their main functions is to protect organs. For example, the skull protects the brain; ribs protect the heart and lungs. There are three types of joints, including fixed joints, slightly moveable joints, and freely moving joints.

Options :

- 1) main important principal frame
- 2) in a the on
- 3) moving rejoining flexible bring

102) Enigma #23000697 **Prediction**

Nature is no longer an alien enigma but something immediately beautiful, and exuberant opus with space for us to join in. Bird melodies have always been called songs for a reason. As long as we have been listening, people have presumed there is music coming out of those scissoring beaks.

Options :

- 1) and of but if
- 2) of at with on
- 3) had will have has

103) Global Textile Industry #23000696 Prediction

The environmental impact of the global textile industry is hard to overstate. One-third of the water used worldwide is spent fashioning fabrics. For every ton of cloth produced 200 tons of water is polluted with chemicals and heavy metals. An estimated 1 trillion kilowatt-hours of electricity powers the factories that card and comb, spin and weave, and cut and stitch materials into everything from T-shirts to towels, leaving behind mountains of solid waste and a massive carbon footprint.

"Where the industry is today is not really sustainable for the long term," says Shreyaskar Chaudhary, chief executive of Pratibha Syntex, a textile manufacturer based outside Indore, India.

With something of an "if you build it, they will come" attitude, Mr Chaudhary has steered Pratibha toward the leading edge of eco-friendly textile production. Under his direction, Pratibha began making clothes with organic cotton in 1999. Initially, the company couldn't find enough organic farms growing cotton in central India to supply its factories. To meet production demands, Chaudhary's team had to convince conventional cotton farmers to change their growing methods. Pratibha provided seeds, cultivation instruction, and a guarantee of fair-trade prices for their crops. Today, Pratibha has a network of 28,000 organic cotton growers across the central states of Madhya Pradesh, Maharashtra, and Orissa.

Options :

104) Women's participation in labour force #23000671 Prediction

With the increase in women's participation in the labour force, many mothers have less time available to undertake domestic activities. At the same time, there has been increasing recognition that the father's role and relationship with a child is important. A father can have many roles in the family, ranging from income provider to teacher, carer, playmate and role model. Therefore, balancing paid work and family responsibilities can be an important issue for both fathers and mothers in families.

Options :

- 1) participation movement work celebration
- 2) accepting recognition layout demand
- 3) shapes segments roles sizes

105) The growth of the Internet #23000670 Prediction

The exponential growth of the internet was heralded, in the 1990s, as revolutionizing the production and dissemination of information. Some people saw the internet as a means of democratizing access to knowledge. For people concerned with African development, it seemed to offer the possibility of leapfrogging over the technology gap that separates Africa from advanced industrialized countries.

Options :

- 1) is are was so
- 2) at in of on
- 3) democratizing recapitulating rendering revitalizing
- 4) concerned supposed predicted resulting

106) Roman and Water #23000623 Prediction

Clean water was very important to the Romans. Cities, towns and forts were built near springs. However, as Roman cities and towns grew, they needed to bring in water from further afield . As the population grew, so did the need for clean water. Trying to shift large volumes of water underground in pipes was not possible as lead pipes would be too weak and bronze pipes would be too expensive. The Romans could not make cast iron pipes as the techniques for doing this were not known to them. If water could not be brought via pipes, the Romans decided to bring it overland in what were conduits. When the water got to the city, it was fed off into smaller bronze or ceramic pipes. To get the water to flow at an even (and slow) pace, conduits were built on a slight slope. Valleys were crossed by using aqueducts. One of the most famous of these is the Pont du Gard aqueduct at Nimes in southern France. Where possible, the Romans did take water through tunnels but the hills needed to be relatively small for this to be successful.

Options :

- 1) different parts further afield these origins specific sources
- 2) as well how so thus
- 3) few loads improper intakes large volumes relative levels
- 4) techniques spans proportions scales
- 5) heavily agreed awefully relatively

107) Dark-silvery Rock #23000620 Prediction

People in parts of western Africa and southwestern Asia were the first to realize that the dark-silvery rocks poking out of the earth could be worked into tools and weapons, sometime around 1500 B.C., evidence shows. The metal was probably discovered there by accident when some ore was dropped into a fire and cooled into wrought iron, historians think. The eureka moment didn't reach Europe for another 500 years, traveling slowly north and west through Greece, Italy, central Europe and finally to the British Isles with the spread of the famous Celtic tribes. The Celts diffused iron technology over much of the continent through warfare, where their victory was assured due to the strength of iron weapons. Perhaps not the most peaceful of cultural exchanges, but where the technology did travel, it caught on fast. Iron made life a lot easier in those days, when just living to the age of 45 was a feat. By that time, much of Europe had settled into small village life, toiling the soil with bronze and stone tools. Iron farming tools, such as sickles and plough tips, made the process more efficient and allowed farmers to exploit tougher soils, try new crops and have more time for other activities.

Options :

- 1) for of can by
- 2) only previous another just
- 3) into with moreover of
- 4) became sedated came made
- 5) spoiling toiling eroding disturbing
- 6) exploit explore discover circulate

108) Mass Extinction #23000618 Prediction

Scientists have discovered the cause of a mass extinction of sea-floor marine organisms 800,000 years ago - which also provides insight into how climate change can impact on deep ocean biota. In a new study published in the journal Nature Communications, scientists from the universities of Nottingham and Durham and the British Geological Survey (BGS), have discovered the cause of a mass extinction within marine organisms called foraminifera. Foraminifera are an important group in relation to biomass in the deep ocean and the cause of their extinction was previously unknown. Scientists tested various possible causes for the mass extinction and were able to discount others such as ocean cooling. Instead, they discovered that the extinction was caused by a global change in plankton at the surface of the ocean.

Options :

- 2) write publishing writing published
- 3) currently never previously sometimes
- 4) effects actions causes reactions
- 5) So Thus Instead Reactions

109) Noble Gas #23000617 Prediction

The six gases: helium, neon, argon, krypton, xenon and radon have a myriad of modern uses. When they were first discovered, their strangely stand-offish properties were a mystery. Uniquely stable, they seemed to participate in no chemical reactions. But by understanding the stability of the noble gases, physicists discovered the key to chemical bonding itself. Dmitri Mendeleev added the noble gases to his periodic table in 1902, where he arranged the elements in rows and columns according to their atomic weight. Mendeleev was able to see repeating (or periodic) patterns in their properties. The noble gases appeared regularly in the periodic table, occurring in every eighth position, at least amongst the lighter elements.

Options :

- 1) must should have never seemed
- 2) himself itself herself themselves
- 3) recording boasting playing according
- 4) regularly occasionally sometimes hardly

110) Wrist Watch #23000616 Prediction

The wrist watch works by tracking information such as a person's pulse or movement. When it detects a change in a person's health, the watch sends information to a touchscreen hub located in the home. The hub then alerts pre-determined Contacts and calls for help immediately.

Options :

- 1) communication communicating tracking training
- 2) hides makes uses detects
- 3) located managed operation maintenance
- 4) provides keeps records alerts

111) Day to Day Transportation #23000610 Prediction

Before the 20th century, the horse provided day to day transportation in the United States. Trains were used only for long-distance transportation. Today the car is the most popular means of transportation in all of the United States. It has completely replaced the horse as a means of everyday transportation. Americans use their car for nearly 90 percent of all personal trip . Most Americans are able to buy cars. The average price of a recently made car was \$2500 in 1950, \$2740 in 1960, and up to \$4750 in 1975. During this period American car manufacturers set about improving their products and work efficiency. As a result, the yearly income of the average family increased from 1950 to 1975 faster than the price of cars. For this reason, purchasing a new car takes a smaller part of a family's total earnings today. In 1951 proportionally it took 8.1 months of an average family's income to buy a new car. In 1962 a new car cost 8.3 of a family's annual earnings. By 1975 it only took 4.75 months' income. In addition, the 1975 cars were technically superior to models from previous years. The influence of the automobile extends throughout the economy as the car is so important to Americans. Americans spend more money to keep their cars running than on any other item.

Options :

- 1) kinds means mean types
- 2) denied reproduced replaced ridiculed
- 3) hardly nearly certainly somehow
- 4) trip works business travel
- 5) quickly regularly rapidly recently
- 6) on in behind about
- 7) raising making reducing improving
- 8) slowest equal faster less than
- 9) clearly proportionally percentage suddenly
- 10) famous superior fastest purchasing
- 11) running notice influence discussion

112) The Civil Society #23000606 Prediction

For too long we have held preconceived notions of 'the' market and 'the' state that was seemingly independent of local societies and cultures_ The debate about civil society ultimately is about how culture, market, and state relate to each other. Concern about civil society, however, is not only relevant to central and eastern Europe and the developing world. It is very much of interest to the European Union as well. The Civil Dialogue initiated by the Commission in the 1990s was a first attempt by the EU to give the institutions of society and not only governments and businesses-a voice at the policy-making tables in Brussels. The EU, like other international institutions, has a long way to go in trying to accommodate the frequently divergent interests of non-governmental organizations and citizen groups. There is increasing recognition that international and national governments have to open up to civil society institutions.

Options :

- 1) interest enthusiasm enthusiastic disparity
- 2) go recognition attempt aspiration
- 3) accommodate acclaim aspire acknowledge
- 4) recognition sense restriction pointer

113) Technology and Education #23000603 Prediction

While workers worry about whether robots will take their jobs, teachers are wondering how to use education to insulate the next generation from such a fate. This has worked before. When the last wave of automation swept the developed world at the start of the 20th century, policymakers decided education was the answer. If machines were going to substitute for brawn, they reasoned, more people would need to use their brains. The US invested heavily in education, with good results. Workers reaped the benefits through better jobs and higher wages. Economists Andrew McAfee and Erik Brynjolfsson summed it up like this: "The industrial revolution started a race between technology and education and, for most of the 20th century, humans won that race."

Options :

- 1) work working has worked would work
- 2) reasoned imagined promised conveyed
- 3) happily actually always heavily
- 4) starting started starts start

114) Mothers' Employment #23000602 Prediction

Affordable early year's education and childcare potentially enable parents, particularly mothers, to be in paid employment. International studies have found that countries with greater enrolment rates in publicly funded or provided childcare also have higher maternal employment rates, although untangling causal relationships are complex. From the point of view of the household, additional income, especially for the less well-off, is itself associated with better outcomes for children, as child poverty has been shown to be a key independent determinant of children's outcomes. From the point of view of the public purse, as mothers enter employment they are likely to claim fewer benefits and to generate extra revenues through income tax.

- 4) among through amongst along

115) Decision Making #23000597 Prediction

Decision making is central to the management of an enterprise. The manager of a profit-making business has to decide on the manner of implementation of the objectives of the business, at least one of which may well relate to allocating resources so as to maximize profit. A non-profit-making enterprise (such as a department of central or local government) will be making decisions on resource allocation so as to be economical, efficient, and effective in its use of finance. All organizations, whether in the private sector or the public sector, take decisions that have financial implications. Decisions will be about resources, which may be people, products, services, or longterm and short-term investment. Decisions will also be about activities, including whether and how to undertake them. Most decisions will at some stage involve consideration of financial matters, particularly cost.

Options :

- 1) might may well so
- 2) use form fatigue program

- 4) particularly solely fondly just

116) Melting Ice #23000593 Prediction

At the end of the last ice age, the melting ice disrupted the ocean currents in the North Atlantic and caused a drop in temperature of almost 5 degrees. Even though the rest of the planet was warming up, the North Atlantic region remained in a cold period for 1300 years. The same thing happened around 8000 years ago, when the cooling lasted about a hundred years, and it could happen again today. Even a short period of cooling in the North Atlantic could have a dramatic effect on the wildlife, and the human populations, living there.

- 5) can could could have should

117) Home Appliances #23000591 Prediction

In the developed world, home appliances have greatly reduced the need for physical labor. Fewer people need to be involved in tasks that once left them little time to do much else. For example, the word processor and email have, to a great extent, replaced the dedicated secretarial staff that briefly flourished with the rise of the typewriter. At one time all copies were made with manual scribes, carefully duplicating what they read. Then we had carbon paper. Then photocopiers. Then printers. Then the requirement for a physical copy reduced. An entire stream of labor appeared and disappeared as technology advanced. We freed ourselves from one kind of work; we just replaced it with another.

Options :

- 1) measure possibility range extent
- 2) once some ever one
- 3) with as to for

118) Managing Performance #23000584 Prediction

Managing performance is about getting people into action so that they achieve planned and agreed results. It focuses on what has to be done, how it should be done, and what is to be achieved. But it is equally concerned with developing people helping them to learn - and providing them with the support they need to do well, now and in the future. The framework for performance management, provided by the performance agreement, which is the outcome of performance planning. The agreement provides the basis for managing performance throughout the year and for guiding improvement and development activities. It is used as a reference point when reviewing performance and the achievement of improvement and development plans.

Options :

- 2) when which this what
- 3) guiding assessing projecting value

119) The Study of Culture #23000583 Prediction

Cultural studies is a new way of engaging in the study of culture . In the past, many academic subjects - including anthropology, history, literary studies, human geography, and sociology - have brought their own disciplinary concerns to the study of culture. However, in recent decades there has been a renewed interest in the study of culture that has crossed disciplinary boundaries . The resulting activity, cultural studies, has emerged as an intriguing and exciting area of intellectual inquiry that has already shed important new life on the character of human cultures and which promises to continue to do so. While there is little doubt that cultural studies is coming to be widely recognized as an important and distinctive field of study, it does seem to encompass a potentially enormous area. This is because the term 'culture' has a complex history and range of usages, which have provided a legitimate focus of inquiry for several academic disciplines.

Options :

- 1) past culture memories text
- 2) renewed refreshing afresh augmented
- 3) paces queries boundaries LOC
- 4) less much little mostly
- 5) false fervor legitimate disguised

120) Biological Systems #23000582 Prediction

Since biological systems with signs of complex engineering are unlikely to have arisen from accidents or coincidences, their organization must come from natural selection and hence should have functions useful for survival and reproduction in the environments in which humans evolved.

Options :

- 1) complex scientific pure vast
- 2) plan organization structure idea
- 3) functionality functions possibilities probabilities

121) Children's Musical Cultures #23000581 Prediction

The general perception is that children are surrounded by a variety of musical experiences. There are often fewer and fewer opportunities for children to actively engage in music-making themselves. They are inundated with music emitting from a wide array of electronic devices, toys, and computers offering a limitless number of musical selections. However, much of the music in children's lives are "unchosen," in other words they are passive recipients in much of the music in their lives, and not actively engaged in its selection. They experience background music in computer games, cartoons, TV shows, films, on iPads, radios, and ringtones. They listen to music choices of their parents or siblings, and even the schools they attend often play music before the school day begins or in classrooms while students are working. Studies are being conducted on the effects of the ubiquitous pre-recorded music they encounter and whether or not it is intruding on their desire to make their own music or interact with each other on the playground.

Options :

- 2) array point feature range
- 3) communicative passive active certain
- 4) submitted provided conducted fermented
- 5) take make fake made

122) Constitutional Interpretation #23000580 Prediction

One of the Supreme Court's most important responsibilities is to decide cases that raise questions of constitutional interpretation. The Court decides if a law or government action violates the Constitution. This is known as judicial review and enables the Court to invalidate both federal and state laws when they conflict with the Constitution. Since the Supreme Court stands as the ultimate authority in constitutional interpretation, its decisions can be changed only by another Supreme Court decision or by a constitutional amendment.

Options :

- 1) responsibilities legislations law order
- 2) approach rule action speculation action
- 3) overlap tally conflict accord
- 4) changed followed underestimate altered

123) Pop Mega-stars #23000575 Prediction

A music student at the University of Salford who wrote a song in two weeks is celebrating after being featured on a compilation album produced by Metropolis Studios. Pop mega-stars including Adele, Michael Jackson, and Sir Elton John have all recorded music at the world-famous Metropolis Studios. Last year, the recording studios set about compiling an album called 'Lost Songs', which features songs from relatively unknown musicians. First-year student Zak Taylor Fray decided to submit his song demo to be included in Volume Two of the Lost Songs album which was released this year after he saw how successful Volume One had been. Zak, 24, said: 'I found this competition when simply searching the internet for songwriting competitions one day, and was lucky that there was still time to enter . It amazes me that people who have worked with huge pop stars thought my song was good and worth something.

Options :

- 3) why what how when
- 4) have searched searched searching search
- 5) quit enter enlist entitle

124) Mechanical Engineering #23000573 Prediction

Mechanical engineering was at the heart of Taylor's theorizing, providing the context for its development, the world view by which it was sustained, and, finally, the justification for its widespread application. Scientific management aimed to analyze and control the activities of people in the same way that engineers analyzed and controlled machines. Central to Taylor's system was the desire to rationalize and standardize production techniques in the interests of economy, efficiency, and mutual prosperity. His primary point of interest was the individual worker pursuing individual goals and motivated by incentive payments. Undoubtedly Taylor's view of human motivation was somewhat simplistic and his apprehension of the significance of groups was limited and generally negative.

Options :

- 1) providing making moving taking
- 2) same identical complex different
- 3) gain rationalize marginalize formulate
- 4) Predominantly Undoubtedly Allegorically Surely

125) Open Copyright #23000569 Prediction

The presentation will cover copyright's position as one of the intellectual property rights and how it differs from other intellectual property rights. It will give an overview of what copyright protects as well as what may be done with copyright protected works without permission under permitted acts (sometimes or so-called exceptions). It is by manipulating the restricted acts through licensing arrangements that rights owners establish and exploit commercial markets. In contrast to commercial markets, the growth of open source and open content licensing models has challenged established business models. The presentation gives a brief commentary on two of the more prominent open licensing frameworks: the GNU Creative Commons licences.

Options :

- 1) mark emphasis cover open
- 2) differs emerges wails similars
- 3) exploit in-debt ordinate neglect
- 4) open prominent faceted unknown

126) Buying a House #23000568 Prediction

Buying a house can seem like a daunting process -- first you need to work out how much you can borrow. This is where our services will really help you. Make sure you have an accurate and detailed budget that takes into account all associated with purchasing a property, including stamp duty, council rates, and other fees. We can help you identify these extra costs. Ask us for our budget planner if you don't already have one. Interest rates move constantly, so you will need to allow room in your budget for interest rate increases and for other unforeseen events. All purchase funds are paid at settlement. In the ordinary course of events, settlement takes place, the purchase price is paid in full and the deposit bond simply lapses group certificates for the past two years.

Options :

- 1) what when where who
- 2) happens people company events
- 3) ordinary ordinal subordinate surrounding
- 4) certifies certified certificates certifications

127) Low-cost Housing #23000566 Prediction

When it comes to low-cost housing, architects are hardly ever involved. About 98% of the market is built without architects and the result is usually rows of clones of a building, regardless of whether they are practical for an area or not. Developers alone, without the input of an architect, do not see the big picture needed to make housing part of a safe, vibrant community. A little more thought could instantly improve community safety as well as lead to building houses that are both comfortable and cheap.

Options :

- 1) by with without outwards
- 2) applied practical real partial
- 3) organization society union community

128) Department of Fine Arts #23000565 Prediction

The Department of Fine Arts is a vibrant department comprising active art professionals housed in a modern, well-equipped facility. The faculty enjoys collaborative relationships with local museums, numerous galleries and a variety of other art organizations. Fine Arts students benefit from studying with artistically active mentors who exhibit and research regionally, nationally and internationally. The department provides students with many opportunities for artistic and personal growth through daily contact with full-time faculty members who are noted artists and researchers. Classes are small to allow for personalised feedback and guidance. Well-appointed studios on campus facilitate the daily practice of art in combination with the study of liberal arts. During their studies, students gain exposure to world -class visiting artists and exhibitions, and also have local and international travel opportunities.

Options :

- 1) supportive active individual particular
- 2) development opportunity growth enhancement
- 3) facilitate comfort simplify promote
- 4) gestures opportunities occasions periods

129) The Discovery #23000564 Prediction

The discovery of a set of what look like ancient hominin footprints on the island of Crete could throw our understanding of human evolution into disarray. Received wisdom is that after splitting from the chimp lineage, our hominin ancestors were confined to Africa until around 1.5 million years ago. The prints found in Crete, however, belonged to a creature that appears to have lived 5.7 million years ago - suggesting a more complex story. More research is needed to confirm what kind of animal made them. However, the prints seem to have been made by a creature that walked upright, on the soles of clawless feet (rather than on its toes), with a big toe positioned like our own, rather than sticking out sideways like an ape's. It may yet turn out to have been a previously unknown non-hominin that had evolved with a human-like foot; but the explanatory paper, in the Proceedings of the Geologists' Association, is not the first to suggest that hominins could have originated in Europe. A few months ago, a team put forward evidence, gleaned from fossils found in Greece and Bulgaria, that a 7.2 million-year old ape known as Graecopithecus was in fact a hominin.

Options :

- 1) moving splitting fermenting dividing
- 2) belonged survived passed established
- 3) positioned made groomed framed
- 4) early previously when mainly
- 5) side relation fact cast

130) Study Habits #23000555 Prediction

Some students say that they need complete quiet to read and study. Others study best in a crowded, noisy room because the noise actually helps them concentrate. Some students like quiet music playing; others do not. The point is, you should know the level of noise that is optimal for your own studying. However, one general rule for all students is that the television seems to be more of a distraction than music or other background noise, so leave the TV off when you are reading or studying. Also, don't let yourself become distracted by computer games, email, or Internet surfing.

Options :

- 1) make helps points gains
- 2) put leave mark freeze
- 3) Also Because However So

131) The Noble Gases #23000554 Prediction

Uniquely stable, they seemed to participate in no chemical reactions. But by understanding the stability of the noble gases, physicists discovered the key to chemical bonding itself. Dmitri Mendeleev added the noble gases to his periodic table in 1902, where he arranged the elements in rows and columns according to their atomic weight.

Mendeleev was able to see repeating (or periodic) patterns in their properties. The noble gases appeared regularly in the periodic table, occurring in every eighth position, at least amongst the lighter elements. Physicists struggled to find a model that would explain this curious observation.

Options :

- 1) In But At Off
- 2) bonding submerging reaction attraction
- 3) mass height atomic compound
- 4) periodic alchemy medicinal hierarchy

132) Sun and Moon #23000551 Prediction

In these distant times, the sun was seen to make its daily journey across the sky. At night the moon appeared. Every new night the moon waxed or waned a little and on a few nights, it did not appear at all. At night the great dome of the heavens was dotted with tiny specks of light. They became known as the stars. It was thought that every star in the heavens had its own purpose and that the secrets of the universe could be discovered by making a study of them. It was well known that there were wandering stars, they appeared in different nightly positions against their neighbors and they became known as planets. It took centuries, in fact, it took millennia, for man to determine the true nature of these wandering stars and to evolve a model of the world to accommodate them and to predict their positions in the sky.

Options :

- 1) route journey trip passage
- 2) become believe became were
- 3) knowledge secrets views myth
- 4) determine produce procure prevent
- 5) gauge highlight vilify predict

133) Co-evolution and Pollination #23000543 Prediction

Bees and flowers have evolved together for millions of years. It is a mutual relationship where the bee is provided with food (nectar or pollen) and the stationary plant gets to disperse its pollen (sperm cells) to other plants of the same species. For the plant, this is much more efficient than using wind to disperse its pollen. Consequently, over millions of years plants have developed flowers with increasingly specialized features to attract visiting bees who, in turn, would distribute pollen grains and optimize the plant's reproductive capabilities. Simultaneously, bees underwent physiological, behavioral, and structural adaptations to take advantage of the nutritional benefits offered by flowering plants. This is an example of a co-evolutionary relationship. Honey bees are considered generalist pollinators which means they will collect nectar and pollen from a variety of different plant species. However, this does not mean they pollinate all plants. Honey bees are considered the most important pollinators and animals on Earth.

- 1) has have it will
- 2) rural ritual microbial mutual
- 3) scare pass build distribute
- 4) toll produce advantage pace
- 5) as at from with

134) Physical Recreation #23000539 Prediction

Participating regularly in physical activity has been shown to benefit an individual's health and wellbeing . Regular physical activity is important in reducing the risk of chronic diseases, such as heart disease and stroke, obesity, diabetes, and some forms of cancer. The National Physical Activity Guidelines for Adults recommend at least 30 minutes of moderate-intensity physical activity, preferably every day of the week, to obtain health benefits. The national guidelines do not prescribe what kinds of physical activities may be most beneficial for improving health. Health-related campaigns tend to focus on promoting activities such as walking, as this is likely to be of benefit across all age groups, and has minimal risk of injury. People participate in a wide range of sports and physical recreation, all of which may be important for general fitness. Participation in sports and physical recreation also provides important leisure and social activities for many people.

Options :

- 1) fit wellbeing labor playing
- 2) leisure gale chronic good
- 3) modes methods forms types
- 4) might will tend mend
- 5) stigma activities respect reforms

135) Law Studies #23000538 Prediction

It is important to emphasize the need for hard work as an essential part of studying law, because far too many students are tempted to think that they can succeed by relying on what they imagine to be their natural ability, without bothering to add the expenditure of effort. To take an analogy, some people prefer the more or less instant gratification which comes from watching a television adaption of a classic novel to the rather more laborious process of reading the novel itself. Those who prefer watching television to reading a book are less likely to study law successfully unless they rapidly acquire a taste for text-based materials.

Options :

- 1) care option need lack
- 2) absence rich inside without
- 3) which who when where
- 4) prefer like intend wish
- 5) think thinking topic taste

136) Language Learning #23000533 Prediction

The teaching of languages could be revolutionised following ground-breaking research by Victoria University, New Zealand, PhD graduate Paul Sulzberger. Dr Sulzberger has found that the best way to learn a language is through frequent exposure to its sound patterns--even if you haven't a clue what it all means. "However crazy it might sound, just listening to the language, even though you don't understand it, is critical. A lot of language teachers may not accept that," he says. "Our ability to learn new words is directly related to how often we have been exposed to the particular combinations of the sounds which make up the words. If you want to learn Spanish, for example, frequently listening to a Spanish language radio station on the internet will dramatically boost your ability to pick up the language and learn new words." Dr Sulzberger's research challenges existing language learning theory. His main hypothesis is that simply listening to a new language sets up the structures in the brain required to learn the words. "Neural tissue required to learn and understand a new language will develop automatically from simple exposure to the language which is how babies learn their first language," Dr Sulzberger says.

Options :

- 1) found made mapped learned
- 2) pill clue cue glue
- 3) understand realise reminisce rely
- 4) who which when where
- 5) make learn play burn

137) Mayan Superhighway System #23000532 Prediction

Even after thousands of years of exploring Earth, we're still uncovering new things like an ancient "superhighway" in the Guatemalan rain forest. Hidden beneath a thick layer of vegetation, the network of roads stretches over 150 miles and was most likely built by the Mayan empire some 2,000 years ago.

The newly mapped roads are connected to the ruins of El Mirador (sometimes called the Kan Kingdom) in northern Guatemala. Archaeologists believe El Mirador was founded around the 6th century BCE and was at its most powerful around the early first century CE. At that time, it had a population of as many as a quarter of a million, a quarter the size of Rome itself at the time. It also has some of the largest pyramids in the world. It was the heart of the Mayan civilization and naturally needed some major roadways.

The roads of El Mirador have been known about since 1967, but scientists had no idea how extensive they were until now. The thick jungle obscured the remnants of the road, making it difficult to see from the air. Researchers got around that using plane-mounted lidar, which can penetrate the forest canopy. It bounces laser pulses off the Earth, then the reflections are received by the plane and the distance readings are interpreted as a topographical map. The system is capable of how mapping 560,000 dots per second, providing an accurate topographical map of the land surrounding El Mirador.

Options :

- 1) network map prompt area
- 2) discovered founded cremated propelled
- 3) why what how when
- 4) producing mapping prompting pilling

138) Mimicry #23000528 Prediction

We now know through the work of neuroscientists that the human brain is wired to mimic other people, and this mimicry involves actual involuntary, physiological experience in the observer. Human beings tend to imitate actions that they see. Physiologically, our brains include mirror neurons, which react to actions that are seen as if we are doing the action ourselves. It is largely an unconscious and automatic experience. When we hear people speak, observe their vocal nuances, watch their posture, gestures, and facial expressions, etc., neural networks in our brains are stimulated by the "shared representations," generating feelings within us that reflect the experience of those we are observing.

Options :

- 1) physiological virtual major prompt
- 2) make imitate mold mask
- 3) speak talk communicate react
- 4) reflect rouse propel profuse

139) Behaviorist Approach #23000527 Prediction

Another way to looking at personality is the behaviorist approach according to the behaviorists, the inner facts of the consciousness are not important. Instead, they believed that our behaviors, and therefore our personalities are learned primarily through our experiences. The theories of behaviorism arose through experiments largely on animals in which behaviors were learned through carefully controlled stimuli.

Options :

- 1) facts mind gut goals
- 2) mood behaviors truth mind
- 3) through with by in

140) Renewed Interests #23000525 Prediction

A renewed interest in well-being, especially among baby boomers, as well as rising personal incomes, led to more spending on health and fitness in 2005. This prompted an expansion in the number of fitness and recreation centers across the country. Golf courses also enjoyed renewed success, as the sport increased in popularity, possibly the result of retiring baby boomers heading to the links. In 2005, households spent an average of \$3,918 on recreation, up slightly from \$3,678 in 2004. Items included in the 2005 figure are: an average of \$166 on sports and athletic equipment; \$665 to buy and operate recreational vehicles such as snowmobiles, bicycles, and trailers; and \$299 for the use of sports and recreation facilities.

Options :

- 1) well good smooth bright
- 2) expansion movement modelling decline
- 3) enjoyed lacked played destroyed
- 4) on of for in

141) Online Learning #23000523 Prediction

If you are interested in studying but have other commitments, our online and distance learning courses offer an alternative flexible mode of study. Teaching is conducted through a mixture of audio-visual, written, and interactive materials. There are also opportunities for an online discussion and collaborative projects with tutors and other students. Some programs include residential modules taught on campus, giving you the chance to meet and work alongside your tutors and fellow students face-to-face. Our Graduate School provides comprehensive support for distance and part-time researchers, many of whom study for up to six years or more.

Options :

- 1) values commitments features faults
- 2) different another alternative unimportant
- 3) which whom when they

142) Proto-Indo-European #23000522 Prediction

No matter whether you speak English or Urdu, Walloon or Waziri, Portuguese or Persian, the roots of your language are the same. Proto-Indo-European (PIE) is the mother tongue - shared by several hundred contemporary languages, as well as many now extinct, and spoken by people who lived from about 6,000 to 3,500 BC on the steppes to the north of the Caspian Sea. They left no written texts and although historical linguists have, since the 19th century, painstakingly reconstructed the language from daughter languages, the question of how it actually sounded was assumed to be permanently out of reach. Now, researchers at the Universities of Cambridge and Oxford have developed a sound-based method to move back through the family tree of languages that stem from PIE. They can simulate how certain words would have sounded when they have spoken 8,000 years ago. Remarkably, at the heart of the technology is the statistics of shape. "Sounds have shape," explains Professor John Aston, from Cambridge's Statistical Laboratory. "As a word is uttered it vibrates the air, and the shape of this soundwave can be measured and turned into a series of numbers. Once we have these stats, and the stats of another spoken word, we can start asking how similar they are and what it would take to shift from one to another."

Options :

- 1) much more many less
- 2) however although despite therefore
- 3) would sound sounded would have sounded were sounded
- 4) middle heart centre mid-point
- 5) where how when what

143) Stressors #23000499 **Prediction**

Research has suggested that major stressors in our lives are life changes , for example, moving house, marriage, or relationship breakdown. Work-related factors, including unemployment, and boredom, are also common causes of stress. Differences in personality may also play a part. A stress reaction is a response to a perceived threat. Different people perceive things in different ways, so a situation that one person finds very stressful might not be to someone else.

Options :

- 1) saving patterns changes threatening
- 2) excluding including relating forwarding
- 3) causes outcomes procedures effect
- 4) give send play work
- 5) finds grows living hide

144) Learning from History #23000477 **Prediction**

The prospect of learning something from history is what makes sociologists tick. It is through developing a systematic understanding of the forces which shape our lives that we can exercise control over them. The founding thinkers of sociology, who came to prominence during the development of what we are pleased to call modernity, thought so. It is the intimate relationship between the development of sociology and the development of modernity that the course begins with.

This relationship is an intimate one because it is only with the social change instituted in the development of the modern world that a discipline such as sociology and social science, in general, could either exist or have anything to study.

Options :

- 1) developing guarding presenting help
- 2) may must can should
- 3) been came walks paves
- 4) not some so only

145) Early Humans #23000436 **Prediction**

Early humans were hunter-gatherers, roaming from place to place, but their movements were controlled by the need for water. When humans started to grow food and established permanent settlements, water was needed for crops and animals as well as for people, so settlements have always grown up near reliable sources of water. Most major towns lie on the banks of rivers, or, where there are no streams or rivers, settlements exist where underground water can be reached by digging wells. The management of water resources has a long history . The oldest known dam in the world was constructed in Egypt about 5000 years ago, and was used for storing drinking and irrigation water. Farmers in Arabia at this time used the craters of extinct volcanoes as storage tanks for irrigation water and dug deep wells for their drinking water. Excavated ruins in India of similar antiquity retain the remains of water supply and drainage systems, which included baths and swimming pools.

Options :

- 1) built maintained delivered started
- 2) when why so how
- 3) gone trend long history give both sides people's lives
- 4) who while which what

146) Green Spaces #23000432 Prediction

Green spaces contribute significantly to a reduction in soil and aerial temperatures during spells of hot weather, so contributing to human wellbeing. In the garden context , there is, however, little information as to what extent various types of plants differ in their cooling potential and how certain planting combinations may maximize cooling under a scenario of low rainfall and minimal water inputs.

Options :

- 1) increment reduction malnutrition spell
- 2) context bed area soil
- 3) appear look show differ
- 4) high excessive low spiked

147) European Culture #23000420 Prediction

Many people today think of culture in the way that it was thought of in Europe during the 18th and early 19th centuries. This concept of culture reflected inequalities within European societies and their colonies around the world. This understanding of culture equates culture with civilization and contrasts both with nature or non-civilization. According to this understanding of culture, some countries are more civilised than others, and some people are more cultured than others. Anything that doesn't fit into this category is labelled as chaos or anarchy. From this perspective, culture is closely tied to cultivation, which is the progressive refinement of human behaviour .

In practice, culture referred to elite goods and activities such as haute cuisine, high fashion or haute couture, museum-caliber art and classical music. The word cultured referred to people who knew about and took part in these activities. For example, someone who used culture in this sense might argue that classical music is more refined than music by working-class people, such as jazz or the indigenous music traditions of aboriginal peoples.

Options :

- 2) match fit define collaborate
- 3) behaviour adventure evolution cast
- 4) know mean inform argue

148) Hot Jupiters #23000416 Prediction

Giant exoplanets, like the so-called 'hot Jupiters' that are similar in characteristics to the solar system's biggest planet and orbit very close to their host stars, are excellent targets for astronomers in their search for their extrasolar worlds. The size and proximity of these planets is easy to detect as they create a large decrease in brightness when passing in front of their parent stars.

Options :

- 1) looks characteristics bravery accordance
- 2) body area circle planet
- 3) archeologists astronomers professors departments
- 4) create control figure detect

149) Shrimp Farms #23000413 Prediction

Over the past two decades, around a third of the world's mangrove swamps have been converted for human use, with many turned into valuable shrimp farms. In 2007 an economic study of such shrimp farms in Thailand showed that the commercial profits per hectare were \$9,632. If that were the only factor, conversion would seem an excellent idea.

However, proper accounting shows that for each hectare government subsidies formed \$8,412 of this figure and there were costs, too :\$1,000 for pollution and \$12,392 for losses to ecosystem services. These comprised damage to the supply of food and medicine that people had taken from the forest, the loss of habitats for fish, and less buffering against storms. And because a given shrimp farm only stays productive for three or four years, there was the additional cost of restoring them afterwards.

Options :

- 5) makes provides stays observes

150) Tokyo Skytree #23000411 Prediction

Team Lab's digital mural at the entrance to Tokyo's Skytree, one of the world's monster skyscrapers, is 40 metres long and immensely detailed. But however massive this form of digital art becomes - and it's a form subject to rampant inflation - Inoko's theories about seeing are based on more modest and often pre-digital sources. An early devotee of comic books and cartoons (no surprises there), then computer games, he recognised when he started to look at traditional Japanese art that all those forms had something in common : something about the way they captured space. In his discipline of physics, Inoko had been taught that photographic lenses, along with the conventions of western art, were the logical way of transforming three dimensions into two, conveying the real world onto a flat surface. But Japanese traditions employed 'a different spatial logic', as he said in an interview last year with j-collabo.org, that is 'uniquely Japanese'.

Options :

- 1) thus however nevertheless while
- 2) rare rude new common
- 3) also due to moreover along with
- 4) So But And When

151) Birds #23000408 Prediction

Some birds of prey have learned to control fire, a skill previously thought to be unique to humans. The birds appear to deliberately spread wildfires in order to flush out prey. The findings suggest that birds may have beaten us to the use of fire.

Options :

- 1) training education preparing skill
- 2) flush make move rumble
- 3) hit beaten thrashed fooled

152) Left-handed #23000404 Prediction

In any given population, about ten percent of the people are left-handed and this figure remains relatively stable over time. So-called "handedness" runs in families, but what causes it and why the proportion of left-handed to right-handed people is a constant are still a mystery. One thing we do know is that hand dominance is related to brain asymmetry; and it seems to be generally agreed that the human brain is profoundly asymmetric, and that understanding how this works will tell us much about who we are and how our brains work. Brain (function) is distributed into the left and right hemispheres, and this is crucial for understanding language, thought, memory, and perhaps even creativity. For right-handed people, language activity is mainly on the left side. Many left-handers also have left-side language dominance, but a significant number may have language either more evenly distributed in both hemispheres or else predominantly on the right side of the brain. Because left-handedness is seen as a key to the complex anatomy of the brain, scientists are searching for links to other conditions, including immune disorders, learning disabilities, and reduced life expectancy.

Options :

- 1) relatively meagrely poorly well
- 2) injustice repair providence dominance
- 3) paved distributed made bulked
- 4) oddly probably evenly more
- 5) preparations violations superior conditions

153) Early Childhood #23000400 Prediction

Disadvantages in early childhood pose multiple risks to children's development. Factors such as low socioeconomic status, long-term unemployment of parents, and social isolation may have lasting impacts on a child's chance of reaching their full potential. Whilst not eliminating disadvantage, preschool education can help to lessen the effects of these risk factors and can provide children with a better start to school. However, some of these factors may also be barriers to preschool attendance for groups that would benefit most from preschool education. In Australia, the early years of children's education is the responsibility of many government and non-government agencies and it occurs in a range of settings. Preschool is aimed at children around four years of age to prepare them for compulsory schooling from the age of six years. In most states and territories, children can start full-time schooling at five years of age, when they enrol in a kindergarten or preparatory year. In 2001, just over half of five-year-olds aged (57%) were at school, with about a third of those aged (34%) attending preschool. While in some states and territories children can commence preschool before they turn four, participation rates for three-year olds are much lower than four-year olds in (24% compared with 56% for four-year olds in 2001). The preschool participation rate of four-year olds in 2001 (56%) was similar to the rate in 1991 (58%).

Options :

- 1) moves motivate impacts structure
- 2) burden lessen enhance provolone
- 3) bridge path ways barriers
- 4) prepare lose miss mark
- 5) end still subtle commence

154) Sound Speed #23000373 Prediction

The speed of sound (otherwise known as Mach 1) varies with temperature. At sea level on a 'standard day', the temperature is 59°F, and Mach 1 is approximately 761 mph. As the altitude increases, the temperature and speed of sound both decrease until about 36,000 feet, after which the temperature remains steady until about 60,000 feet. Within that 36,000 - 60,000 foot range, Mach 1 is about 661 mph. Because of the variation, it is possible for an aeroplane flying supersonic at high altitude to be slower than a subsonic flight at sea level. The transonic band (the 'sound barrier') extends from around Mach 0.8 - when the first supersonic shock waves form on the wing - to Mach 1.2, when the entire wing has gone supersonic.

Options :

- 1) some one uno both
- 2) difference measures variation measurements
- 3) with by for from
- 4) in on to from

155) Conclusion #23000328 Prediction

A satisfying conclusion allows a reader to finish your paper with a clear understanding of the points you made and hopefully even a new perspective on the topic. Any one paper might have a number of conclusions, but as the writer, you must consider who the readers are and the conclusions you want them to reach. For example, is your reader relatively new to your topic? If so, you may want to restate your main points for emphasis as a way of starting the conclusion. Don't literally use the same sentence(s) as in your introduction, but come up with a comparable way of restating your thesis. You'll want to smoothly conclude by showing that the judgement you have reached is, in fact, reasonable.

Options :

- 1) allows prevent deny suffer
- 2) ignore consider reject dismiss
- 3) harshly roughly loosley smoothly

156) Teenage Daughter #23000314 Prediction

Your teenage daughter gets top marks in school, captains the debate team, and volunteers at a shelter for homeless people. But while driving the family car, she text-messages her best friend and rear-ends another vehicle. How can teens be so clever, accomplished, and responsible-and reckless at the same time? Easily, according to two physicians at Children's Hospital Boston and Harvard Medical School (HMS), who have been exploring the unique structure and chemistry of the adolescent brain. "The teenage brain is not just an adult brain with fewer miles on it," says Frances E. Jensen, a professor of neurology. "It's a paradoxical time of development. These are people with very sharp brains, but they're not quite sure what to do with them." Research during the past 10 years, powered by technology such as functional magnetic resonance imaging, has revealed that young brains have both fast-growing synapses and sections that remain unconnected.

Options :

- 1) within never while with
- 2) exploring leaving adopting gaining
- 3) innocent ignorant decent adolescent
- 4) function development react interact
- 5) small sharp limited unwise
- 6) with them they both

157) High IQ #23000291 Prediction

A smart brain might help you do well in tests, but there are many other ways it can affect your life, both positively and negatively. Exams are not the only route to success, as billionaire businessmen Richard Branson and Alan Sugar - who left school aged 15 and 16 - will attest. Nevertheless, good grades can open doors, and intelligence certainly helps when it comes to educational attainment. IQ test performance accounts for roughly two-thirds of the variance in people's school exam scores - other factors including motivation and mental and physical health also influence how well children do. But intelligence isn't just useful in school. IQ predicts how people will respond to workplace training and how well they will do their job, even in non-academic professions such as being a car mechanic or carpenter. This is, perhaps, because general intelligence reflects people's ability to handle complexity in everyday affairs. Many tasks, from supermarket shopping to juggling our diaries, require us to deal with unexpected situations, to reason and make judgements and to identify and solve problems. This is true of our social interactions too.

Options :

- 1) freedom trail disregard route
- 2) where if what when
- 3) fun professions hobbies entertainments
- 4) reason disbelief mistake end

158) Language #23000290 Prediction

Language is used in our everyday lives. If psychology is a science of behavior, scientific investigation of language use must be one of the most central topics - this is because language use is ubiquitous. Every human group has a language; human infants (except those who have disabilities) learn at least one language without being taught explicitly. Even when children, who don't have many languages to begin with, are brought together, they can begin to develop and use their own language. There is at least one known instance where children, who had had little language, were brought together and developed their own language spontaneously with minimum input from adults. In Nicaragua in 1980s, deaf children who were separately raised in various locations were brought together to schools for the first time. Teachers tried to teach them Spanish with little success. However, they began to notice that the children were using their hands and gestures, apparently to communicate with each other. Linguists were brought in to find out what was happening - it turned out the children had developed their own sign language by themselves.

Options :

- 1) since despite because among
- 2) much many rare most
- 3) separately apart together along
- 4) from with at along
- 5) happened happening happen happens

159) Dance #23000288 Prediction

Dance has played an important role in many musicals. In some cases, dance numbers are included as an excuse to add to the color and spectacle of the show, but dance is more effective when it forms an integral part of the plot. An early example is Richard Rodgers On Your Toes(1936) in which the story of classical ballet meeting the world of jazz enables dance to be introduced in a way that enhances, rather than interrupts the drama.

Options :

- 1) parts drams plays cases
- 2) program value value plot
- 3) break moves enhances keeps

160) Subjective Age #23000286 Prediction

"Age is an issue of mind over matter. If you don't mind, it doesn't matter." This nugget of wisdom, often attributed to Mark Twain, has been turned into many an inspirational internet meme over the years. As a 51-year-old who is starting to feel the gathering momentum of the inevitable slide, it strikes me as little more than a platitude that makes people feel better about getting old. But according to a growing body of research, there is more to it than that. Subjective age - how old we feel - has a very real impact on health and longevity. People who feel younger than their years often actually are, in terms of how long they have left to live. The question of what controls our subjective age, and whether we can change it, has always been tricky to address scientifically.

Options :

- 1) at of on in
- 2) unemotional unimpressive unaffecting inspirational
- 3) much more most least
- 4) longevity youngness status minority
- 5) defeat whisper address specify

161) UK Drivers #23000270 Prediction

In the UK, it is recommended that drivers should turn off their car engines when they expect to be stationary for more than 1 minute. To encourage drivers to turn off their engines while waiting at rail crossings, Kent City Council placed a permanent sign at the crossing asking drivers to "please switch off your engine when barriers are down to help improve air quality." On average, drivers had to wait between 2 and 3 minutes to cross after the barrier had gone down. However, the sign didn't seem to convince the majority of drivers to switch off their engines. "Although some research suggests that signs alone can change behaviour, the message on this sign was designed simply to be an informational request and was not guided by any particular behavioural theory," the researchers explain. So the research team, led by Rose Mellady of the University of East Anglia, designed an intervention study.

Options :

- 1) turn on deserted deactivate turn off
- 2) With average will average On average never average
- 3) minority majority complete only
- 4) alone together so many unlike

162) Bhutan #23000229 Prediction

Bhutan is the last standing Buddhist Kingdom in the World and, until recently, has preserved much of their culture since the 17th century by avoiding globalization and staying isolated from the world. Internet, television, and western dress were banned from the country up until ten years ago. But over the past ten years globalization has begun to change in Bhutan, but things remain perfectly balanced.

Bhutan is the only country in the world that has a 'GNH.' You may think GNH is just another statistically based term with no real-life application, but it refers to "Gross National Happiness." The process of measuring GNH began when Bhutan opened to globalization. It measures people's quality of life, and makes sure that "material and spiritual development happen together." Bhutan has done an amazing Job of finding this balance. Bhutan has continually been (ranked) as the happiest country in all of Asia, and the eighth Happiest Country in the world according to Business Week. In 2007 Bhutan had the second fastest growing GDP in the world, at the same time as maintaining their environment and cultural identity.

Bhutan is the only Buddhist Kingdom in the world; Mahayana Buddhism is the official religion of Bhutan. Over two thirds of the people are Buddhist, and Buddhism is supported by the government both politically and economically. The government gives subsidies to Buddhist monasteries, shrines, monks and other Buddhist programs.

Options :

- 1) least much rare none
- 2) in as from on
- 3) as from in it
- 4) but of on as
- 5) in if as at
- 6) of in at is
- 7) in as to of

163) Important Corollary #23000182 Prediction

An important corollary of this focus on language as the window to legal epistemology is the central role of discourse to law and other sociocultural processes. In particular, the ideas that people hold about how language works combine with linguistic structuring to create powerful, often unconscious effects. In recent years, linguistic anthropologists have made much progress in developing more precisely analytic tools for tracking those effects.

Options :

- 1) which when this were
- 2) On In At If
- 3) along of as about
- 4) shall was were have

164) World Map of Happiness #23000178 Prediction

Bhutan used to be one of the most isolated nations in the world. Developments including direct international flights, the Internet, mobile phone networks, and cable television have increasingly modernized the urban areas of the country. Bhutan has balanced modernisation with its ancient culture and traditions under the guiding philosophy of Gross National Happiness (GNH). Rampant destruction of the environment has been avoided. The government takes great measures to preserve the nation's traditional culture, identity, and the environment. In 2006, Business Week magazine rated Bhutan the happiest country in Asia and the eighth-happiest in the world, citing a global survey conducted by the University of Leicester in 2006 called the "World Map of Happiness".

Options :

- 3) at so of to
- 4) in at under by

165) Spanish #23000177 Prediction

Spanish is spoken by more than 300 million people in over 20 countries and is rapidly becoming one of the most popular choices for language learners around the world. A popular course for beginners, Suenos World Spanish is designed to meet the varied needs of adult learners, whether learning at home or in a class. From the very beginning it encourages you to develop your listening and speaking skills with confidence and provides many opportunities to practice reading in Spanish. Using the extensive range of media available, from the course book to the audio CDs or cassettes, to the popular accompanying television series and free online activities, Suenos World Spanish can help you reach the equivalent level of a first qualification, such as GCSE.

- 3) of with in at
- 4) in at of on

166) Bonus of Dendrochronology #23000168 Prediction

A bonus of dendrochronology is that the width and substructure of each ring reflect the amount of rain and the season at which the rain fell during that particular year. Thus, tree ring studies also allow one to reconstruct past climate; e.g., a series of wide rings means a wet period, and a series of narrow rings means a drought.

Options :

- 1) for these that then
- 2) over onto at into
- 3) present past future current
- 4) in on as of

167) Hippopotamus #23000167 Prediction

Hippopotamus is Greek for "river horse," and the animal has been known since ancient times . Hippopotamuses are often seen basking on the banks or sleeping in the waters of rivers, lakes, and swamps next to grasslands. Hippos are well adapted to aquatic life. The ears, eyes, and nostrils are located high on the head so that the rest of the body may remain submerged. The ears and nostrils can be folded shut to keep out water. The body is so dense that they can walk underwater, where they can hold their breath for five minutes. Although often seen basking in the sun, hippos lose water rapidly through the skin and become dehydrated without periodic dips . They must also retreat to the water to keep cool, for they do not sweat.

Options :

- 1) outerspace area times generation
- 2) unadjustable well regardless vague
- 3) in at out on
- 4) dips table opportunity finesse

168) Tutankhamun #23000103 Prediction

In 1922, the world witnessed one of the most significant archaeological discoveries of the 20th century - the unearthing of King Tutankhamun's tomb in the Valley of the Kings, Egypt. This event marked a pivotal moment in our understanding of ancient Egyptian civilization. The young pharaoh, Tutankhamun, who reigned during the 18th dynasty, had been somewhat obscure until British archaeologist Howard Carter's remarkable discovery. Carter's quest for Tutankhamun's tomb was fueled by years of meticulous research and exploration. When he finally came upon the nearly intact tomb, it was a historical triumph. The tomb's contents, preserved for over 3,000 years, were astonishing. They included the iconic gold mask of Tutankhamun, a plethora of gold artefacts, and beautifully preserved wall paintings depicting the young king's life and journey to the afterlife. This discovery offered unprecedented insights into the art, culture, and daily life of ancient Egypt.

- 5) in on or into

169) Crime Prevention #23000078 Prediction

The landscape of crime prevention is constantly adapting, reflecting a nuanced understanding of the social factors contributing to criminal behavior. Modern approaches emphasize the importance of social and community interventions, acknowledging that factors such as low education levels and family discord can significantly increase the likelihood of criminal activity. Programs like the Perry School Project in the USA and the Troubled Families Initiative in the UK have shown promise in addressing these root causes. By focusing on early intervention and community engagement, these programs aim to not only curb immediate criminal activity but also to foster long-term societal change, transforming potential offenders into contributing members of society. However , critics argue that while these programs address certain social factors, they may overlook deeper systemic issues like inequality inherent in the capitalist system, pointing to a need for a more holistic approach to crime prevention.

- 4) undergo show overlook expose

The aim of this book is to give the reader an overview of study and practice in the field of public archaeology. It offers a series of snapshots of important ideas and areas of work brought together as an introduction, albeit an inevitably brief and incomplete one, to one of the most challenging and rewarding parts of the wider archaeological discipline. Read the book from cover to cover and you will have a good working understanding of public archaeology as a complicated, rich and diverse field, as well as knowledge of some of the most significant and iconic examples of public archaeology in action. Dip into a specific chapter and you will find a concise and insightful introduction to one aspect of public archaeology with case studies and a list of readings to develop your understanding. However , you use this book I am confident that you will emerge with a better understanding of what public archaeology is, why it matters and what you can do about it. First, it is necessary and useful, drawing on the quotes above, to ask what we mean by public archaeology, and to examine some of the different ways it has been defined.

Note: The re-orders provided in this file are in the correct order.

1) Studying Abroad #10000707 **New Prediction**

- A. Studying abroad is one of those invaluable student experiences.
- B. If you're only at the beginning of your journey, you should first consider which country you would like to go to.
- C. Foreign places have a magic to them, and if you feel it calling you, maybe you should answer.
- D. But if you're not particularly specific about where you want to go, you can start by doing some basic research on places of interest.

2) School Seivces #10001072 **Prediction**

- A. Working parents can drop of their kids to school early.
- B. Some schools also have after-school services.
- C. This allows these parents to leave their kids at school until late.
- D. These schools conduct activities such as music, games, etc.
- E. And they will charge fees for such programs.

3) Loan #10001062 **Prediction**

- A. There are many kinds of loans available, but people should be careful not to over-borrow.
- B. If loans are not managed properly, they can create long-term financial pressure and limit future financial freedom.
- C. Some people have student loans that require them to spend a large portion of their earnings during their twenties and thirties.
- D. In their early life, many people are constantly repaying loans and spending most of their income every month.

4) The fibers #10001051 **Prediction**

- A. Fibers suitable for clothing have been made for the first time from the wheat protein gluten.
- B. The fibers are as strong and soft as wool or silk.
- C. However, they are 30 times cheaper.
- D. Reddy and Yang, who produced the fibers, say that in In addition, because they are biodegradable they might be used in biomedical applications.

5) Velcro #10001045 **Prediction**

- A. Swiss engineer George de Mestral once returned from a hike with his dog and found many burrs clinging tightly to his trousers and the dog's fur.
- B. He noticed the burrs were covered with tiny hooks that could latch onto fabric loops and fur firmly.
- C. This natural mechanism inspired him to create Velcro, a fastener with hooks on one side and soft loops on the other.
- D. He named the invention Velcro, combining the French words 'velours' (velvet) and 'crochet' (hook) to reflect its structure.
- E. However, their performance turned out to be outstanding years later!

6) Bank Account #10001040 **Prediction**

- A. An ID is required to open a bank account.
- B. You can deposit money into a new account.
- C. If you want to withdraw money, you can use an ATM.
- D. Withdrawing money means removing funds from a bank account.

7) Leave Policy #10001039 Prediction

- A. You need to give four weeks' notice before you intend to ask for a leave.
- B. Upon returning, you will be assigned to the previous position if you leave for 60 days or less than 60 days.
- C. If you leave for more than 60 days, you will be put in a comparable position.
- D. Employee should have same wage and benefits.

8) Locomotion #10000737 Prediction

- A. Researchers need to understand why different forms of locomotion evolved.
- B. Long-held assumptions, such as the need for energy efficiency, have already been overturned.
- C. But variation of movement is important, too: such an ankle brace holds you back if you try to skip, gallop or skitter.
- D. Similarly, legged robots struggle to deploy different gaits, just as roboticists struggle to enumerate them.

9) Plato #10000601 Prediction

- A. Although usually remembered today as a philosopher, Plato was also one of ancient Greece's most important patrons of mathematics.
- B. Inspired by Pythagoras, he founded his academy in Athens in 387 BC, where he stressed mathematics as a way of understanding more about reality.
- C. In particular, he was convinced that geometry was the key to unlocking the secrets of the universe.
- D. The sign above the academy entrance read: "Let no one ignorant of geometry enter here."

10) Big Five #10000574 Prediction

- A. Some psychologists believe that independent, peer-reviewed research in the decades since the MBTI was devised has provided something better than Myers-Briggs.
- B. They champion the notion of the "Big Five" personality traits - openness, conscientiousness, extroversion, agreeableness and neuroticism.
- C. Of these, only one trait is closely shared with the MBTI - extroversion.
- D. Myers-Briggs does not focus on "neuroticism" or, indeed, any similarly negative trait, which may point to one of the reasons why the criticisms lobbed at the test by modern science have yet to undermine its popularity.
- E. As Adam Grant says, "Going around telling people that they're neurotic and disagreeable will not win you any friends."

11) Understanding History #10000569 Prediction

- A. The people and events of the past can only be understood when viewed within the larger context in which they existed.
- B. That is not possible when historical events or topics are isolated and extracted from the web of historic time to serve some other curricular purpose.
- C. The value of history also depends upon the chronological presentation of events through time.
- D. It is only through a chronological survey that students can begin to understand the process of social and cultural change, which is one of the principal purposes of history.

12) Research Report #10000562 Prediction

- A. So now that you've completed the research project, what do you do?
- B. I know you won't want to hear this, but your work is still far from done.
- C. In fact, this final stage - writing up your research - may be one of the most difficult.
- D. Developing a good, effective and concise report is an art form in itself.
- E. And, in many research projects you will need to write multiple reports that present the results at different levels of detail for different audiences.

13) History #10000515 **Prediction**

- A.** Ideas about history have changed over time. It might seem that writing history should be straightforward it's all based on facts, isn't it?
- B.** In theory, yes, but the evidence surviving from the past is vast, fragmentary, and messy.
- C.** Historians must make decisions about what to include and exclude, how to organize the material, and what to say about it.
- D.** In doing so, they create narratives that explain the past in ways that make sense in the present. Inevitably, as the present changes, these narratives are updated, rewritten, or discarded altogether and replaced with new ones.

14) Currency #10000514 **Prediction**

- A.** Currency is a medium of exchange for goods and services.
- B.** In short, it's money, in the form of paper or coins, usually issued by a government and generally accepted at its face value as a method of payment.
- C.** In the 21st century, a new form of currency has entered the vocabulary, the virtual currency.
- D.** Virtual currencies such as bitcoins have no physical existence or government backing and are traded and stored in electronic form.

15) Totalitarianism #10000504 **Prediction**

- A.** Totalitarianism is a political and social concept that explains a form of government where the state has all control over the civilians.
- B.** Such government assumes full power, without any limitations.
- C.** As put by Juan Linz, a totalitarian scholar, the three main factors of a totalitarianism government are "a monistic center of power; an ideology developed, justified and pursued by the leadership; and mass participation in political and social goals encouraged and even demanded by that same leadership."
- D.** Throughout the 20th century, the manifestation of totalitarianism was an extreme measure of harsh political occurrences.

16) First Draft #10000495 **Prediction**

- A.** Your first draft is complete, but your paper is far from finished.
- B.** The next step is to revise your paper: strengthen the content.
- C.** Start this at least a week before your paper is due.
- D.** In fact, you don't need to wait until you have a complete first draft to start revising.
- E.** You can revise individual paragraphs as you finish them as well.

17) Snakes #10000491 **Prediction**

- A.** Big Country Snake Removal responded to a home in Albany, Texas, after a man who was trying to restore his cable, climbed under the house and saw some snakes.
- B.** He saw a 'few' snakes and quickly crawled out, said a post on Big Country Snake Removal's Facebook page.
- C.** "We arrived around lunchtime and as soon as I crawled under I could immediately see that there was far more than a few,- the post said.
- D.** The company ended up removing 45 rattlesnakes from beneath the house.

18) Book Writing #10000487 **Prediction**

- A.** For many years, I had been thinking of writing a book.
- B.** Not an ordinary book, but a literature book.
- C.** I would do extensive literature reading and think about how I could do as well as they had done.
- D.** What I did is what you need to do.

19) Open Day in School #10000485 Prediction

- A. School has different ways to let parents know how they provide education services.
- B. One of the common ways is open days.
- C. Open days are good chances for parents to ask what they want to know.
- D. These are times when parents can know what works for their children will be doing at school.

20) Healthy School Setting #10000483 Prediction

- A. A healthy school setting gives all students the best chance to learn and grow.
- B. Vaccines are very important to this effort.
- C. They protect children from getting and spreading diseases that can make them very sick.
- D. For this reason, we require children aged 2-months to 18-years old who are entering or attending child care, public school, or private school be vaccinated against certain diseases.

21) Henry Hudson #10000481 Prediction

- A. Aboard the ship Discovery, Hudson left England in April 1610.
- B. He and his crew, which again included his son John and Robert Juet, made their way across the Atlantic Ocean.
- C. After skirting the southern tip of Greenland, they entered what became known as the Hudson Strait.
- D. The exploration then reached another of his namesakes, the Hudson Bay.
- E. Traveling south, Hudson ventured into James Bay and discovered that he'd come to a dead end.

22) Georgia O'Keeffe #10000480 Prediction

- A. Georgia O'Keeffe never formally recorded her theories about art.
- B. She did, however, leave a long trail of interviews and letters that reveal how she approached her painting practice--and the rituals, experiences, and environments that inspired her.
- C. Correspondence with her husband, photographer Alfred Stieglitz, in particular, offers a raw, honest glimpse into O'Keeffe's creative mind.
- D. The two exchanged 25,000 pages of letters between 1915 and 1946, during which time she found her voice as an artist: first, through her flower paintings, and later, through landscapes and surrealistic still lifes inspired by her mountainous, skull-studded surroundings in New Mexico.

23) Street Signs #10000477 Prediction

- A. Cameras help autonomous vehicles read street signs and the color of traffic lights.
- B. But LiDARs, aka light detection and ranging systems, do the important work of sensing and helping cars avoid obstacles, whether that's a fallen tree, drunk driver, or a child running out into the road.
- C. Now, a startup called Luminar Technologies Inc. is unveiling a high-resolution LiDAR sensor that was five years in the making.
- D. The startup, which has raised \$36 million in seed-stage funding so far, built its LiDAR systems from scratch.

24) Water Resources #10000474 Prediction

- A. Around 1 billion people depend on water resources originating from the Hindu-Kush Karakoram Himalayan region, attributable to both rainfall and melting of snow and ice.
- B. The wind in the valleys in the region plays an important role in transporting clouds and moisture and redistributing snow in the valleys, and so understanding what drives this wind is crucial.
- C. Around the world, wind in valleys generally travels up the valley, and up the sides of mountains, during the day.
- D. This is often driven by differences in pressure caused by the slopes of the mountains and the shape of the valleys.

25) Gender-typed Toys #10000472 Prediction

- A.** Gender-typed toy play leads to the promotion of different skills in boys and girls, with girls practicing communal roles and boys practicing agentic roles.
- B.** This guides children's activities in accordance with gender stereotypes and thus restricts their individual development potential.
- C.** Whereas play with stereotypically masculine toys, such as blocks and toy soldiers, is generally associated with the development of spatial skills and more aggressive behavior, playing with stereotypically feminine toys, such as baby dolls and stuffed animals, is associated with more nurturing behavior.
- D.** Play with sexualized dolls, such as Fashion Barbies, is even associated with a narrowing of perceived career options in girls.
- E.** In general, strongly gender-typed toys are less supportive of the development of children's physical, cognitive, and artistic skills than are gender-neutral or moderately gender-typed toys.
- F.** Therefore, playing predominantly with same-gender-typed toys limits the development of children's action repertoires in accordance with gender stereotypes and thus contributes to the perpetuation of gender stereotypes.

26) Gender Stereotype #10000468 Prediction

- A.** The research by Will and colleagues dressed 6-month-old babies in different colored outfits that did not necessarily match their gender, so the participants had no way of knowing if the baby was in fact a boy or a girl.
- B.** Sometimes, the infant was dressed in blue and was called Adam and sometimes it was dressed in pink and was called Beth.
- C.** There were three toys in the room: a train (boy stereotype), a doll (girl stereotype), and a fish (neutral).
- D.** This study found that babies dressed in blue and thought to be boys were more likely to be given the train. Babies in pink or "girls" were more likely to be given the doll and more people smiled at "Beth" than at "Adam".

27) The Fibres #10000459 Prediction

- A.** Fibres suitable for clothing has been made for the first time from the wheat protein gluten.
- B.** The fibres are as strong and soft as wool and silk.
- C.** However, they are 30 times cheaper.
- D.** Narendra Reddy and Yiqi Yang, who produced the fibres at the University of Nebraska in Lincoln.
- E.** He says that because they are biodegradable, they might be used in biomedical applications such as surgical sutures.

28) Arcelor-Mittal Takeover (Version 2) #10000454 Prediction

- A.** It was taken over by Mittal, a Dutch-registered company run from London by its biggest single shareholder, Lakshmi Mittal, an Indian who started his first business in Indonesia.
- B.** The takeover battle raged for six months before Arcelor's bosses finally listened to shareholders who wanted the board to accept Mittal's third offer.
- C.** The story tells us two things about European business, both positive.
- D.** First, shareholder activism is increasing in a continent where until recently it was depressingly rare.
- E.** Second, and more importantly, the Arcelor Mittal deal demonstrates Europe's deepening integration into the global economy.

29) Pidgins #10000444 Prediction

- A. In some areas, the standard chosen may be a variety that originally had no native speakers in the country.
- B. For example, in Papua New Guinea, a lot of official business is conducted in Tok Pisin.
- C. This language is now used by over a million people, but it began many years earlier as a kind of 'contact' language called a pidgin.
- D. A pidgin is a variety of a language (e.g. English) that developed for some practical purpose, such as trading, among groups of people who had a lot of contact, but who did not know each other's languages

30) Greener Technologies #10000438 Prediction

- A. The energy sector has a fantastic skills shortage at all levels, both now and looming over it for the next 10 years.
- B. Engineers, in particular, are much needed to develop greener technologies.
- C. Not only are there some good career opportunities, but there's a lot of money going into the research side, too.
- D. With the pressures of climate change and the energy gap, in the last few years funding from the research councils has probably doubled.

31) Voice higher than 5mhz #10000435 Prediction

- A. A study showed man cannot hear voice higher than 5 hertz.... / kHz...
- B. It was thought that, at frequencies this high, the rapidly cycling sound wave was too fast for the auditory nerve to cope with.
- C. To test this theory, Andrew Oxenham and his colleagues at the University of Minnesota gathered a group of six students...
- D. As in the previous study, the volunteers could not recognise/hear sounds with fundamental tones above 5 kHz.

32) Scientific Dishonesty #10000425 Prediction

- A. I think we should be wary of the reporting of science - it is often over-dramatized in order to secure an audience - but not of science itself.
- B. Of course, there may be the extremely rare example of scientific dishonesty, which will be seized upon by the news organisations, but the role of science within modern society remains valuable.
- C. Mobile phones, for example, can cause incidents if drivers insist on talking on the phone instead of looking at roads.
- D. But no one would deny that mobile phones can help us to make a phone call when we are under a crisis.
- E. In other words, I firmly believe that the development of science and the extension of understanding is a public good.

33) Heart Attack (Version 2) #10000423 Prediction

- A. A heart attack is caused by the sudden blockage of a coronary artery by a blood clot.
- B. When the clot is formed, it will stay in the blood vessels.
- C. The clot in blood vessels will block blood flow.
- D. Without the normal blood flow, it will cause muscle contraction.

34) The Job of a Manager (Version 2) #10000422 Prediction

- A. The job of a manager in the workplace is to get things done through employees.
- B. In order to accomplish this, the manager should be able to motivate employees.
- C. That is, however, easier said than done.
- D. Motivation practice and theory are difficult subjects, encompassing various disciplines.

35) Sherbet Powder (Version 2) #10000420 Prediction

- A. Sherbet powder is a mix of baking soda and citric acid.
- B. When it is mixed with water in your mouth, an endothermic reaction occurs, taking heat energy from your mouth and making it feel cooler.
- C. Another example of an endothermic reaction is the cold packs used by athletes to treat injuries.
- D. This process is endothermic-taking heat energy from the surroundings and cooling the injured part of your body. In this way, the cold pack acts as an ice pack.

36) How to answer questions in exams? #10000417 Prediction

- A. Students may don't know how to achieve high marks in exams.
- B. Actually, you don't have to write down everything you know.
- C. Before writing, you should figure out what the question is after, and what is not relevant.
- D. And then you will have an idea of what you should write.

37) Great Western Railway #10000414 Prediction

- A. Ever since the completion of the Great Western Railway, in the 1840s, intrigue has swirled around the Box Tunnel, a long, steep bypass near Bath, England.
- B. Unlike many tunnel rumors, these were sweet rather than sordid. The question was this: did the railway's creator, Isambard Kingdom Brunel, really have the tunnel carved in such a way that when the sun rose on his birthday-April 9th-it would be flooded with light?
- C. This past Sunday, April 9th, the railway's current engineers decided to test the rumor once and for all. They weren't disappointed.
- D. "When you look from the east portal, the cutting provides a lovely V-shape," communications manager Paul Gentleman told the Guardian. "The sun rose from the left and was shining directly down the tunnel. We couldn't see how far."
- E. While the west side's view wasn't quite so impressive, the engineers generously chalked that up to centuries of dirt and grime.

38) Choose a School #10000401 Prediction

- A. There are more than 100 schools in the country.
- B. Do not ever choose a school without going to the place and having a look. You should go and see once you have a chance.
- C. You can see the facilities and accommodations around the school.
- D. Because you might be living there. And they can be helpful to your study as well.

39) International Economics #10000394 Prediction

- A. International Economics: Theory and Policy is a proven approach in which each half of the book leads with an intuitive introduction to theory and follows with self-contained chapters to cover key policy applications.
- B. The Eighth Edition integrates the latest research, data, and policy in hot topics such as outsourcing, economic geography, trade and environment, financial derivatives, the subprime crisis, and China's exchange rate policies.
- C. New for the Eighth Edition, all end-of-chapter problems are integrated into MyEconLab, the online assessment and tutorial a system that accompanies the text.
- D. Students get instant, targeted feedback, and instructors can encourage practice without needing to grade work by hand. For more information visit MyEconLab.

40) Most Selective Universities #10000393 Prediction

- A.** England's most selective universities must do more to attract teenagers from disadvantaged backgrounds if they want to charge higher tuition fees, the country's fair access watchdog has warned.
- B.** Professor Les Ebdon, director of Fair Access to Higher Education, has said universities can no longer make excuses about the number of poorer students they take on.
- C.** In a statement issued yesterday, Prof Ebdon dismissed the argument from the country's most selective universities, which claim that young people from poorer backgrounds generally secure worse grades.
- D.** Such defences from the country's most elite universities "do not hold water", Prof Ebdon said, as he urged the institutions to do more to widen their intakes.

41) Vision and Echolocation #10000388 Prediction

- A.** Vision and echolocation have many features in common.
- B.** One narrow range of radiation light in the case of vision, ultrasounds in the case of echolocation-provides information relevant to a wide variety of cognitive and practical goals.
- C.** Why, then, is vision so common and echolocation so rare?
- D.** Because, in most environments, vision is much more effective.
- E.** Echolocation is adaptive only in an ecological niche where vision is impossible or badly impaired for instance when dwelling in caves and hunting at night, as bats do.

42) Bankruptcy #10000387 Prediction

- A.** In Montana as elsewhere, companies that have acquired older mines respond to demands to pay for cleanup in either of two ways.
- B.** Especially if the company is small, its owners may declare the company bankrupt, in some cases conceal its assets, and transfer their business efforts to other companies or to new companies that do not bear responsibility for cleanup at the old mine.
- C.** If the company is so large that it cannot claim that it would be bankrupted by cleanup costs, the company instead denies its responsibility or else seeks to minimize the costs.
- D.** In either case, either the mine site and areas downstream of it remain toxic, thereby endangering people, or else the U.S federal government and the Montana state government pay for the cleanup through the federal Superfund and a corresponding Montana state fund.

43) Gender Inequalities #10000385 Prediction

- A.** Most European countries are concerned about gender inequalities in education.
- B.** However, the comprehensiveness of legislative and policy frameworks differs widely.
- C.** On the one hand, they differ concerning the degree to which gender equality concepts are embedded in various legislative acts.
- D.** On the other hand, they can frame gender equality in different ways, focusing on one or more of the various concepts that are associated with this term.

44) Monash Student Ne Tan #10000383 Prediction

- A.** Mechanical engineering student Ne Tan is spending the first semester of this year studying at the University of California, Berkeley as part of the Monash Abroad program.
- B.** Ne (Tan), an international student from Shanghai, China, began her Monash journey at Monash College in October 2006.
- C.** There she completed a diploma that enabled her to enter Monash University as a second-year student.
- D.** Now in her third year of study, the Monash Abroad program will see her complete four units of study in the US before returning to Australia in May 2009.

45) Restaurant #10000382 Prediction

- A. The physical location of a restaurant in the competitive landscape of the city has long been known as a major factor in its likely success or failure.
- B. Once restaurants are established in such environments they can do little about their location.
- C. All they can do is work to improve customer access to their premises.
- D. Restaurateurs often do this by engaging in battles with local authorities about car parking.

46) Sense of Sounds #10000381 Prediction

- A. Humans are able to make sense of sounds at a much higher pitch than previously thought.
- B. A note has a fundamental tone- the pitch we hear- and a series of overtones that occur at higher frequencies. Overtones are what gives a sound its timbre, and enable us to distinguish an oboe from a trumpet from its sound alone.
- C. Previous studies have shown that humans are unable to recognise melodies whose notes have a fundamental tone above 5 kilohertz.
- D. It was thought that, at frequencies this high, the rapidly cycling soundwave was too fast for the auditory nerve to cope with. To test this theory, Andrew Oxenham and his colleagues at the University of Minnesota in Minneapolis asked a group of six students whether two four-note melodies were identical or not. As in previous studies, the volunteers could not recognise melodies with fundamental tones above 5 kHz.
- E. The team then took a fundamental tone pitched below 5 kHz and digitally filtered it to leave just the overtones above 6 kHz. Surprisingly, the volunteers were able to distinguish these melodies.

47) Reading #10000377 Prediction

- A. Humans appear to be the only species which is able to translate their communication into another medium and in this case the medium provides a semi-durable record of the elements of the communication.
- B. So reading is a very special ability that we have.
- C. Reading also is special because, unlike language, most children have to be taught to read, write and spell.
- D. So though we may be predisposed to being able to read and usually have the abilities necessary to master reading, it is something that most of us only accomplish through the direct help of others.

48) Arcelor-Mittal Takeover (Version 1) #10000366 Prediction

- A. Arcelor, established in Dutch, had been the largest European steelmaker by 2006.
- B. It was taken over by Mittal, a Dutch-registered company run from London by its biggest single shareholder, Lakshmi Mittal, an Indian who started his first business in Indonesia.
- C. The takeover battle raged for six months before Arcelor's bosses finally listened to shareholders who wanted the board to accept Mittal's third offer.
- D. The Arcelor-Mittal deal demonstrates Europe's deepening integration into the global economy.

49) New Ventures #10000364 Prediction

- A. New Ventures is a program that helps entrepreneurs in some of the world's most dynamic, emerging economies-- Brazil, China, Colombia, India, Indonesia and Mexico.
- B. We have facilitated more than \$203 million in investment, and worked with 250 innovative businesses whose goods and services produce clear, measurable environmental benefits, such as clean energy, efficient water use, and sustainable agriculture.
- C. Often they also address the challenges experienced by the world's poor.
- D. For example, one of the companies we work within China, called Ecostar, refurbished copy machines from the United States and re-sells or leases them for 20 per cent less than a branded photocopier.

50) E-Waste #10000361 **Prediction**

- A.** The global market for electrical and electronic equipment continues to expand, while the lifespan of many products becomes shorter.
- B.** The current global production of E-waste is estimated to be 20025 million tonnes per year, with most E-waste being produced in Europe, the United States, and Australasia.
- C.** In Europe, e-waste is increasing at three to five percent a year, almost three times faster than the total waste stream.
- D.** Consequently, large amounts of "e-waste" are constantly generated worldwide, posing an increasing global challenge for their disposal.

51) A Tutorial Week #10000331 **Prediction**

- A.** Many students sit in a tutorial week after week without saying anything.
- B.** Why is that?
- C.** Maybe they do not know the purpose of a tutorial.
- D.** They think it is like a small lecture where the tutor gives them information.
- E.** Even if students do know what a tutorial is for, there can be other reasons why they keep quiet.

52) Healthy Lifestyle #10000324 **Prediction**

- A.** Many of us know what we should be doing to live healthily, yet many of us struggle to actually actively manage our health.
- B.** In 'Easier Said Than Done', we set out some of the reasons why we might find it hard to live in a healthy way, exercising, eating well, getting adequate sleep, and checking for early warning symptoms.
- C.** Perhaps most importantly, we look to the field of behavioural science for strategies that people can use to overcome those hurdles and to initiate lifestyle changes.
- D.** Changing existing behaviour can be a difficult task, but with the help of these strategies, new behaviours can become habitual, facilitating a long-term sustained healthy lifestyle.

53) The University of Otago #10000269 **Prediction**

- A.** The University of Otago Centre for International Health co-directors Professor Philip Hill and Professor John Crump share a view that global health is a multidisciplinary activity.
- B.** In their work from Tanzania to the Gambia, from Myanmar to Indonesia and beyond - they tap into a wide range of expertise from across the University, including clinicians, microbiologists, and molecular microbiologists, public health experts, economists and mathematicians.
- C.** They have also forged relationships and collaborations with research and aid agencies around the world.
- D.** For the past seven years, Professor Philip Hill has been part of a collaborative tuberculosis research project in Indonesia, with the University of Padjadjaran in Bandung, West Java.

54) Historical Records #10000260 **Prediction**

- A.** The series of strata in an archaeological dig enables an excavator to date recovered objects relatively, if not absolutely.
- B.** However, when archaeologists want to know the absolute date of a site, they can often go beyond simple stratigraphy.
- C.** Historical records, coins, and other data-bearing objects can help - if they exist. But even prehistoric sites contain records - written in nature's hand.
- D.** For example, tree rings, Dendrochronology (literally, ?tree time?) dates wooden artefacts by matching their ring patterns to known records, which, in some areas of the world, span several thousand years.

55) Karl Marx #10000257 Prediction

- A.** Karl Marx is arguably the most famous political philosopher of all time, but he was also one of the great foreign correspondents of the nineteenth century.
- B.** During his eleven years of writing for the New York Tribune (their collaboration began in 1852), Marx tackled an abundance of topics, from issues of class and the state to world affairs.
- C.** Particularly moving pieces highlight social inequality and starvation in Britain, while others explore his groundbreaking views on the slave and opium trades – Marx believed Western powers relied on these and would stop at nothing to protect their interests.
- D.** Above all, Marx's fresh perspective on nineteenth-century events encouraged his readers to think, and his writing is surprisingly relevant today.

56) Native English Speaker #10000253 Prediction

- A.** Anyone wanting to get to the top of international business, medicine or academia (but possibly not sport) needs to be able to speak English to a pretty high level.
- B.** Equally, any native English speaker wanting to deal with these new high achievers needs to know how to talk without baffling them.
- C.** Because so many English-speakers today are monoglots, they have little idea how difficult it is to master another language.
- D.** Many think the best way to make foreigners understand is to be chatty and informal.
- E.** This may seem friendly but, as it probably involves using colloquial expressions ("shall we crack on then?"), it makes comprehension harder.

57) German Writers #10000252 Prediction

- A.** This site contains a comprehensive listing of the works of Norbert Elias, a German sociologist.
- B.** The site lists not only his published books and articles but also manuscripts and oral communications, in a variety of media and including reprints and translations.
- C.** The material has been catalogued, cross-referenced and organized by date.
- D.** There is, however, no search facility.

58) Foreign Aid #10000241 Prediction

- A.** Beginning in the 1990s, foreign aid had begun to slowly improve.
- B.** Scrutiny by the news media shamed many developed countries into curbing their bad practices.
- C.** Today, the projects of organisations like the World Bank are meticulously inspected by watchdog groups.
- D.** Although the system is far from perfect, it is certainly more transparent than it was when foreign aid routinely helped ruthless dictators stay in power.

59) Piano Keys #10000240 Prediction

- A.** Piano keys are generally made of spruce or basswood.
- B.** Spruce is normally used in high-quality pianos.
- C.** Traditionally, the sharps (black keys) were made from ebony and the flats (white keys) were covered with strips of ivory.
- D.** But since ivory-yielding species are now endangered and protected by treaty, plastics are now almost exclusively used.

60) Rosa Parks's Arrest #10000229 Prediction

- A. It was there that Rosa Parks, an African American woman, refused to vacate her seat in the middle of the bus so that a white man could sit in her place.
- B. She was arrested for her civil disobedience.
- C. Parks' arrest, a coordinated tactic meant to spark a grassroots movement, succeeded in catalyzing the Montgomery bus boycott.
- D. Parks was chosen by King as the face for his campaign because of Parks' good standing with the community, her employment and her marital status.
- E. Earlier in 1955, Claudette Colvin, a 15-year old African American girl, had been arrested for the same crime; however, King and his civil rights compatriots did not feel that she would serve as an effective face for their civil rights campaign.

61) A Review is a Survey #10000227 Prediction

- A. A review is a survey of what you have covered.
- B. It is a review of what you are supposed to accomplish not what you are going to do.
- C. Rereading is an important part of the review process.
- D. Reread with the idea that you are measuring what you have gained from the process.

62) Map #10000226 Prediction

- A. For as long as I can remember, there has been a map in the ticket hall of Piccadilly Circus tube station supposedly showing night and day across the time zones of the world.
- B. This is somewhat surprising given the London Underground's historic difficulty in grasping the concept of punctuality.
- C. But this map has always fascinated me, and still does, even though it now seems very primitive.
- D. This is because it chops the world up equally by longitude, without regard to the reality of either political divisions or the changing seasons.

63) Competence and Performance #10000224 Prediction

- A. In language learning, there is a distinction between competence and performance. Competence is a state of the speaker's mind. What he or she knows?
- B. Separate from actual performance - what he or she does while producing or comprehending language. In other words, competence is put to use through performance.
- C. An analogy can be made to the Highway Code for driving. Drivers know the Code and have indeed been tested on it to obtain a driving license.
- D. In actual driving, however, the driver has to relate the Code to a continuous flow of changing circumstances, and may even break it from time to time.
- E. Knowing the Highway Code is not the same as driving.

64) Feeding Birds #10000218 Prediction

- A. According to experts, feeding birds is probably the most common way in which people interact with wild animals today. More than 50 million Americans engage in the practice, collectively undertaking an unwitting experiment on a vast scale.
- B. Is what we're doing good or bad for birds? Recently, researchers at the Cornell Lab of Ornithology sought to answer this question, analyzing nearly three decades' worth of data from a winter-long survey called Project FeederWatch.
- C. Preliminary results suggest the species visiting our feeders the most are faring exceptionally well in an age when one-third of the continent's birds need urgent conservation.
- D. Still, what are the consequences of skewing the odds in favour of the small subset of species inclined to eat at feeders? What about when the bird we're aiding is invasive, like our house finch?

65) Experiment Involving 22 Calves #10000215 **Prediction**

- A.** To gauge optimism and pessimism, the researchers set up an experiment involving 22 calves.
- B.** Before they started the experiment, they trained the calves to understand which of their choices would lead to a reward.
- C.** In the training, each calf entered a small pen and found a wall with five holes arranged in a horizontal line, two-and-a-half feet apart.
- D.** The hole at one end contained milk from a bottle, while the hole at the opposite end contained only an empty bottle and delivered a puff of air in calves' faces.
- E.** The calves learned quickly which side of the pen held the milk reward.

1) Renting #11001022 New Prediction

Dear Sir or Madam,

My name is Tonia. My roommate and I are looking for a nice apartment near my college's campus. We are very quiet and study a lot. I study history, and my roommate studies French. We are very interested in renting your apartment. We can pay the rent on time because we do a part-time work, too. Some of our friends live in the same building and have recommended your place to us. They mentioned that you are a kind and responsible landlord, and we hope to have the same positive experience. I would like to make an appointment to view the apartment in person. Our application form is ready, and we are prepared to proceed with the process quickly. We look forward to hearing from you soon.

Best regards, Tonia

Options : 1) forward 2) borrow 3) pay 4) make 5) do 6) have 7) in 8) throw

2) Music #11000174 New Prediction

Music is an important part of our lives. We connect and interact with it daily and use it as a way of projecting our self-identities to the people around us. The music we enjoy - whether it's country or classical, rock n' roll or rap - reflects who we are.

But where did music, at its core, first come from? It's a puzzling question that may not have a definitive answer. One leading researcher, however, has proposed that the key to understanding the origin of music is nestled snugly in the loving bond between mother and child. In a lecture at the University of Melbourne, Richard Parncutt, an Australian-born professor of systematic musicology, endorsed the idea that music originally spawned from 'motherese' - the playful voices mothers adopt when speaking to infants and toddlers.

As the theory goes, and increased human brain size caused by evolutionary changes occurring between one and 2,000,000 years ago resulted in earlier births, more fragile infants, and a critical need for stronger relationships between mothers and their newborn babies. According to Parncutt, who is based at the University of Graz in Austria, 'motherese' arose as a way to strengthen this maternal bond and to help ensure an infant's survival.

Options : 1) reflects 2) adopt 3) convey 4) people 5) necessary 6) critical 7) means 8) shows 9) children 10) ensure 11) infants 12) leading 13) protect 14) individual

3) Recycling Notice #11001116 Prediction

Today, many companies emphasize sustainability in their operations. For example, packaging should be made from recyclable materials to ensure proper disposal. In households, using energy-efficient kitchen appliances helps reduce environmental impact.

Options : 1) sustainability 2) maintenance 3) gauge 4) appliances 5) bargain 6) disposal

4) The Petrified Forest #11001111 Prediction

The Petrified Forest is home to some of the most impressive fossils ever found, and more are being discovered each year as continuing erosion is exposing new evidence. Fossils found here show the Forest was once a tropical region, filled with towering trees and extraordinary creatures. More than 150 different species of fossilized plants have been discovered by paleontologists, and evidence indicating ancient native people who inhabited this region about 10,000 years ago has been confirmed by archeologists.

Options : 1) appearing 2) confirmed 3) demonstrating 4) exposing 5) filled 6) found 7) indicating 8) provided

5) Cognitive Abilities #11001098 Prediction

Studies of the cognitive abilities of bilingual children have primarily been concerned with identifying developmental differences between monolinguals and bilinguals. The present studies examine the ability of monolingual and bilingual children to solve a cognitive problem with the intention of understanding both the impact of bilingualism on children's solutions and the function of specific cognitive processes in development for both groups of children.

Options : 1) ability 2) arguments 3) confirmation 4) differences 5) equality 6) function 7) intention

6) Music Education #11001084 Prediction

Since the dawn of civilization, music has always been an indispensable part of children's education. Today, in most countries around the world, music courses are still offered in schools as part of the basic curriculum. The ancient Greeks believed that they should be performed alongside mathematics and physics, as these subjects complement and enhance one another. Researchers at The Ohio State University conducted a retrospective study on the behavior of children mainly high school students who had been exposed to music courses in their early years or throughout their school life. The presence of music in adolescent education has a significant impact on their ability to understand complex concepts such as mathematics or physics.

Options : 1) exposed 2) mandated 3) offered 4) mainly 5) exchange 6) performed 7) increasingly 8) understand

7) Abraham Lincoln #11001083 Prediction

US President - Abraham Lincoln winning in the elections was unexpected because he was from a very poor family, without any stronger ties unlike his counterparts, but he still won due to United States supporters. His victory became a powerful reminder that true leadership is not defined by wealth or social standing. Lincoln's rise demonstrated how determination, integrity, and a clear vision for the nation can inspire ordinary citizens.

Options : 1) insignificant 2) vague 3) unexpected 4) counterparts 5) supporters 6) ordinary 7) historical

8) Mural Projects #11001081 Prediction

Mural projects are an increasingly popular form of public art that transforms outdoor spaces into public art galleries. Our research explored this intersection of public space, public art and public memory through The Big Wash Up. Using a technique called reverse graffiti, the project created dozens of outdoor murals. Their focus on local themes and characters celebrated community identity, heritage and memory. The process simultaneously honored community memories while creating new shared memories.

Options : 1) makes 2) technique 3) transforms 4) law 5) created 6) identity 7) relationship

9) Emotional Intelligence #11001080 Prediction

The ability to control emotions is crucial to success. In 1990, two scholars coined the term "emotional intelligence." Years later, Daniel Goleman, in the 'Harvard Business Review', was telling why leaders must cultivate this ability. Since then, the concept has influenced the community's emphasis on integrity and cooperation.

Options : 1) journey 2) telling 3) concept 4) ability 5) coined 6) painted 7) Review 8) floating

10) Oakham #11001079 Prediction

The Oakham Area Career Program offers on-site, in-house teaching: the course is taught by experienced instructors, rather than outsourcing it. Our teachers understand each student's individual learning needs, meaning learners receive personalized feedback and support. This way, you'll never miss a class for any reason

Options : 1) was teaching 2) imparting 3) meaning 4) feedback 5) because 6) such as 7) teachers 8) offers

11) Hancock Building #11001078 **Prediction**

Hancock Building certainly lives up to its name. The title is derived from the Latin word "lucere", meaning "to shine", and the artwork's 3,115 lights depict a scale map of the stars that shine in the night sky. The 13-foot artwork contains thousands of glass bulbs, all fed light through blue illuminating fibre-optic lines. The sculpture, created by English artist Wolfgang Buttress with the help of astrophysicist Dr. Daniel Bayliss, represents a 3D map of all the stars in the Northern Hemisphere that are able to be visible with the naked eye.

Options : 1) basket 2) pushes 3) contains 4) lives 5) sweep 6) depict 7) paints 8) title

12) Settlements #11001076 **Prediction**

Over the last ten thousand years there seem to have been two separate and conflicting building sentiments throughout the history of towns and cities. Specifically, one is the desire to start again, for a variety of reasons: an earthquake or a tidal wave may have demolished the settlement, or fire destroyed it, or the new city marks a new political beginning. The other can be likened to the effect of a magnet: established settlements attract people, who tend to come whether or not there is any planning for their arrival. The clash between these two sentiments is evident in every established city unless its development has been almost completely accidental or is lost in history. Incidentally, many settlements have been planned from the beginning but, for a variety of reasons, no settlement followed the plan. A good example is Currowan, on the Clyde River in New South Wales, which was surveyed in the second half of the 19th century, in expectation that people would come to establish agriculture and a small port. But no one came.

Options : 1) tend 2) one 3) unless 4) dances 5) marks 6) paint 7) shadow

13) Newest Hotel #11001075 **Prediction**

Is it a glimpse of a dystopian future or just a commonsense approach to technology? Either way, Gatwick Airport's newest hotel offers something different: a vision of a post-employment economy where tasks are automated by computers. At Bloc, a hotel of 245 rooms, there are just two members of staff on duty. Despite its unglamorous location in a renovated office block above the airport's South Terminal, Bloc has grand plans to shake up the hotel industry. Thanks to a partnership with Korean technology giant Samsung, almost everything here can be controlled by smartphone. Once guests have made a reservation online, they are given a code that can be used to log into an app, enabling them to check in without standing at a reception desk. In the room, the phone can operate the air-conditioning, switch on lights, turn on TVs, and open blackout blinds. Even keys have been rendered obsolete – guests can unlock the door to their room using their phone (with something called "near-field communication" technology). At the end of their stay, checkout is also done via the app, meaning that guests can complete their entire stay without speaking a single word to a member of staff.

Options : 1) shake 2) reliable 3) build 4) reception 5) essential 6) rendered 7) automated

14) Chimpanzee Behavior #11001071 **Prediction**

In studies of chimpanzee behavior, researchers seek to answer how they learn to use tools, with finds applied to understanding primate cognition. In an experiment, signals were sent to test communication skills, and responses occurred without prior training.

Options : 1) forgotten 2) answer 3) training 4) without 5) sent 6) applied

15) Wrist Watch #11001032 **Prediction**

The wrist watch works by tracking information such as a person's pulse or movement. When it detects a change in a person's health, the watch sends information to a touchscreen hub located in the home. The hub then alerts pre-determined contacts and calls for help immediately.

Options : 1) decided 2) alerts 3) located 4) healthy 5) detects 6) hoisted 7) administer 8) tracking

16) Healthy Workplace #11001030 **Prediction**

Employees should adhere to regulations that define conditions of the working environment to ensure a safe and healthy workplace. These measures are intended to minimize hazards in the workplace. In some countries, companies are required to purchase insurance to protect employees' rights and interests.

Options: 1) eliminating 2) describe 3) define 4) required 5) permitted 6) minimize

17) Robotic Surgery #11001029 **Prediction**

Robotic surgery allows the entire procedure to be recorded, helping to preserve detailed surgical information. This creates a valuable tool for training, giving students and professionals the chance to learn from real operations. It also enables doctors to operate remotely, a technique known as telesurgery.

Options: 1) operate remotely 2) negotiate 3) preserve 4) abandon 5) painting 6) training

18) Family Commitment #11001028 **Prediction**

The older you get, the more your responsibilities increase. Your commitment to your family and work grows, leaving you with less time for play and recreation. Neglecting recreation is a disservice to yourself, as it is essential for well-being. This can lead to burnout and fatigue. Remember, playing isn't just for kids - it's for adults too.

Options: 1) burnout 2) success 3) responsibilities 4) leaving 5) transfer 6) possession

19) Parent Invitation #11001027 **Prediction**

We invite parents to participate in a program held three times a year. The details of the program will be posted on our website. We expect parents to attend so that their children can succeed.

Options: 1) expect 2) strict 3) posted 4) attend 5) hold 6) deny 7) succeed 8) held

20) Museum Restaurant #11001025 **Prediction**

This museum restaurant is a perfect place to have a party. You can have a party of 20-25 people. More people are possible and prices start at \$45.

Options: 1) on 2) have 3) perfect 4) up 5) possible 6) start 7) suppose

21) Paper Label #11001024 **Prediction**

Make sure your shipping envelopes are clean and dry, and remember to remove any paper shipping labels prior to dropping off. Paper labels are detrimental to the Store Drop-off recycling process. If the labels don't peel off easily, you can cut them off with scissors.

Options: 1) labels 2) brushes 3) scissors 4) process 5) cabels 6) prices

22) License Change #11001020 **Prediction**

New B.C. Residents will only be required to provide their driver's licence history - proof of insurance is no longer required. However, their premiums will be adjusted for the first three years of driving in B.C. due to the increased risks associated with driving in a new area. Each year you remain crash-free, your discount increases. ICBC will credit you with up to 15 years of driving experience (up from eight years) upon receipt of a driver's abstract showing the original date that you received your license. When obtaining your B.C. license, you can provide your original driver's abstract in person at a driver licensing office.

Options: 1) credit 2) of 3) deduct 4) due to 5) showing 6) in 7) shown

23) Children's Breakfast #11001019 Prediction

Children who eat breakfast regularly consume more nutrients that are essential for healthy development. As a result, they are more likely to thrive both physically and mentally. Studies also show that such children tend to behave better in school and maintain higher levels of concentration.

Options : 1) thrive 2) loose 3) consume 4) tend 5) prefer 6) absorb 7) sacrifice

24) A Job Application #11001016 Prediction

Subject: Application for the Position of Software Developer

Dear [Hiring Manager's Name],

I am writing to apply for the role of Software Developer at [Company Name], as advertised on your website. With a strong background in computer science and a passion for problem-solving, I believe I would be a valuable asset to your team.

In my previous role at [Previous Company Name], I successfully managed multiple software projects, demonstrating my ability to work effectively under deadlines. My technical skills in programming languages such as Python and Java, along with my experience in team collaboration, enable me to contribute positively to your organization.

I am excited about the opportunity to bring my expertise to [Company Name] and contribute to its success. I have attached my resume for your review and would welcome the opportunity to discuss my qualifications further.

Thank you for your time and consideration.

Best regards,

[Your Full Name]

Options : 1) apply 2) asset 3) resume 4) demand 5) managed 6) Proposal 7) enable 8) invoice 9) Application

25) Driving in British Columbia #11001015 Prediction

Driving in British Columbia offers a unique experience due to its diverse landscapes and varying weather conditions. Motorists are required to follow traffic rules and regulations to ensure safety for all road users. During winter months, it is mandatory to use winter tyres carry chains, as road conditions can become icy and treacherous. Additionally, drivers must be aware of wildlife crossings, particularly in rural or mountainous areas, to avoid unexpected accidents. Regular vehicle maintenance is highly recommended to reduce the risk of breakdowns during long journeys.

Options : 1) winter 2) predictable 3) follow 4) dry 5) flat 6) treacherous 7) breakdowns 8) blockages 9) accidents

26) Modern Technology #11001014 Prediction

Modern technology has brought about significant changes in our daily lives, transforming the way we live, work, and communicate. The advent of the internet and smart devices has made information accessible at our fingertips, empowering individuals with unprecedented access to knowledge. However, this rapid technological progress is not without its challenges. Privacy concerns and the potential for technology to weaken social interactions are issues that require careful consideration. Despite these concerns, innovations in technology continue to provide solutions to global challenges, such as climate change and healthcare. As a result, modern technology remains a transformative force shaping our future.

Options : 1) accessible 2) transformative 3) ignore 4) weaken 5) amusements 6) challenges 7) negative 8) live

27) Peaceful Environment for Education #11001013 **Prediction**

A peaceful environment plays a critical role in fostering a positive and productive atmosphere for education. When learners are surrounded by a supportive environment, they feel safe and secure, which enhances their ability to concentrate on their studies. A lack of distractions and disturbances also ensures that both teachers and students can engage meaningfully in the learning process. Furthermore, a calm and respectful atmosphere among classmates promotes cooperation and mutual support, which are vital for personal development. Thus, achieving a peaceful setting is essential for attaining educational excellence.

Options : 1) growth 2) personal 3) security 4) atmosphere 5) supportive 6) excellence 7) concentrate 8) fruitful 9) disturbances

28) Ancient Paintings #11001012 **Prediction**

Ancient paintings offer a fascinating glimpse into the lives, beliefs, and artistic skills of early civilizations. Many of these paintings were created on cave walls or pottery and have survived for thousands of years due to their preservation. The subjects of ancient paintings often include animals, humans, and scenes from daily life. These artworks were not only meant for decoration but also had religious significance. For instance, some cave paintings are believed to have been created for ritualistic purposes or to convey stories and folklore. The use of natural pigments and traditional techniques highlights the resourcefulness and creativity of ancient artists. Despite the passage of time, the beauty and intricacy of ancient paintings continue to captivate and inspire modern audiences.

Options : 1) elaborate 2) folklore 3) preservation 4) mysteries 5) religious 6) fragility 7) traditional

29) Drugs #11001011 **Prediction**

When that happens, staff will help the person - strung out and now a little stressed - fish their drugs out of the rubbish. On their way out, they might have a blood test, their first dental check-up in years, or just a hot cup of Milo. 'We enable people to inject in the center because that's what they do,' the medical director, Nico Clark, tells Guardian Australia during a recent visit to the North Richmond Community Health Centre. 'The majority are dependent on their substances. The purpose is not to be a place that facilitates injection per se, the purpose is to keep people alive.' The centre is a response to a coroner's report that noted the heroin-related deaths in the area in 2016.

Options : 1) resort 2) substances 3) mental 4) strung 5) gymnastics 6) dental 7) purpose

30) Brain Bus #11001009 **Prediction**

These fascinating questions and more will be revealed by University of Manchester scientists when they take to the road on their 'Brain Bus'. The bus is taking hands on activities to test the senses to the suburbs, to show young and old alike how the brain works and how science can answer some of life's most captivating questions. Organiser Dr Stuart Allan, lecturer at the Faculty of Life Sciences, explains: "Three-year-olds and upwards can understand the senses and it's an area that is intriguing to all ages. "It takes effort to get out of bed on a Saturday morning and go to the Museum. We are bringing science to your doorstep and going further afield this year in the hope of finding new and different audiences. "We want people to see that science is interesting as well as important in our lives, and to encourage people who may not consider it possible to go to University."

Options : 1) groups 2) audiences 3) activities 4) intriguing 5) categorize 6) challenging 7) schemes 8) encourage

31) Mercury #11001006 **Prediction**

Mercury is not found in many common products that we buy because it can be very dangerous. The most common products that contain mercury are batteries, powerful outdoor lights, disinfectants and thermometers, which are used to measure our body's temperature. It can also be found in barometers, which are used to measure air pressure and show changes in weather, and thermostats, which regulate the temperature of buildings. Mercury can also be found in printer and photocopy toners.

Options : 1) concentrate 2) regulate 3) contain 4) show 5) measure 6) hide

32) Distance Learning #11000998 **Prediction**

If you are interested in studying but have other commitments, our online and distance learning courses offer an alternative flexible mode of study. Teaching is conducted through a mixture of audio-visual, written and interactive materials. There are also opportunities for online discussion and collaborative projects with tutors and other students. Some programmes include residential modules taught on campus, giving you the chance to meet and work alongside your tutors and fellow students face-to-face. Our Graduate School provides comprehensive support for distance and part-time researchers, many of whom study for up to six years or more.

Options : 1) mode 2) resolutions 3) commitments 4) type 5) opportunities 6) creations 7) modules 8) value 9) approach 10) chance

33) A Herbal #11000996 **Prediction**

A herbal is a book of plants, describing their appearance, their properties and how they may be used for preparing ointments and medicines. The medical use of plants is recorded on fragments of papyrus and clay tablets from ancient Egypt, Samaria and China that date back 5,000 years but document traditions far older still. Over 700 herbal remedies were detailed in the Papyrus Ebers, an Egyptian text written in 1500 BC. Around 65 BC, a Greek physician called Dioscorides wrote a herbal that was translated into Latin and Arabic. Known as 'De materia medica', it became the most influential work on medicinal plants in both Christian and Islamic worlds until the late 17th century. An illustrated manuscript copy of the text made in Constantinople (modern-day Istanbul) survives from the sixth century. The first printed herbals date from the dawn of European printing in the 1480s. They provided valuable information for apothecaries, whose job was to make the pills and potions prescribed by physicians. In the next century, landmark herbals were produced in England by William Turner, considered to be the father of British botany, and John Gerard, whose illustrations would inspire the floral fabric, wallpaper and tile designs of William Morris four centuries later.

Options : 1) obligated 2) translated 3) recorded 4) subscribed 5) moves 6) prescribed 7) survives

34) Climate Change #11000928 **Prediction**

Climate change poses significant challenges to agriculture, affecting crop yields and farming practices worldwide. The agricultural sector must adapt to shifting weather patterns and increased extreme events, which requires an understanding of both climatology and plant science. Researchers in this field are at the forefront of developing resilient agricultural systems that can withstand the impacts of a changing climate.

Options : 1) yields 2) farmers 3) adapt 4) adopting 5) withstand 6) forefront 7) yard

35) Coral Reefs #11000866 **Prediction**

Coral reefs, the rainforests of the sea are biodiversity hotspots critical to marine life. They provide habitat, food, and breeding grounds for countless species. Yet, they face threats from overfishing, pollution, and climate change. Conservationists are employing innovative methods, like coral gardening and genetic research, to protect and restore these underwater worlds. Their survival is imperative for maintaining the ocean's health and the livelihoods that depend on it.

Options : 1) employing 2) maintaining 3) deploying 4) life 5) loom 6) threats 7) restore 8) delete

36) Maya #11000791 **Prediction**

The Classic Era of Mayan civilization came to an end around 900 AD. Why this happened is unclear; the cities were probably over-farming the land, so that a period of drought led to famine. Recent geological research supports this, as there appears to have been a 200-year drought around this time.

Options : 1) appears 2) civilization 3) features 4) vanish 5) research

37) Performance Appraisals #11000788 **Prediction**

Performance appraisals have traditionally been considered the best way to evaluate an employee's performance, but increasingly organizations are finding them of little value. Employees find them stressful and unhelpful. Importantly, they also take up a lot of time. When Deloitte analyzed their own process, they found managers and employees spent around 2 million hours a year on performance reviews. A growing number of companies have decided to abolish performance reviews altogether, instead introducing more regular catch ups.

Options : 1) value 2) evaluate 3) add 4) reciprocate 5) abolish 6) process

38) Counselling #11000735 **Prediction**

Counselling is an essential service that colleges and universities invariably provide. Services can range from life-saving care to assistance with minor concerns. Life stressors, such as deaths and divorces in the family, issues with friends, substance abuse, and suicide are just a few of the many issues that college students may experience or witness others struggling with.

Options : 1) source 2) essential 3) stressors 4) assistance 5) witness 6) cost

39) Fat and Sugar #11000725 **Prediction**

Much of our food is increasingly manufactured to be irresistible to us. Experts say this trend has long-term health consequences. Indulgent dishes enticing us with fat and sugar can feel impossible to avoid, especially during the holidays. Experts confirm it's more than a feeling: Half a century of food trends have created an environment where more than half the food consumed by American adults is ultra-processed.

Options : 1) consumed 2) grown 3) wasted 4) enticing 5) manufactured

40) Paris #11000676 **Prediction**

Paris is very old - there has been a settlement there for at least 6,000 years and its shape has been determined in part by the River Seine, and in part by the edicts of France's rulers. But the great boulevards we admire today are relatively new, and were constructed to prevent any more barricades from being created by the rebellious population; that work was carried out in the middle 19th century. Earlier, Paris had been in part a maze of narrow streets and alleyways. But you can imagine that the work was not only highly expensive, but caused great distress among the half a million or so whose houses were simply razed, and whose neighbourhoods disappeared. What is done cannot usually be undone, especially when buildings are torn down.

Options : 1) lost 2) part 3) common 4) simply 5) created 6) depreciated 7) down

41) Bioenergy Hub #11000634 **Prediction**

The graphic introduction was put together by northern artists, who have interpreted discussions with scientists from the Supergen Bioenergy Hub in a series of striking images which imagine alternative futures and explain some of the technology involved and how it might be put into practice.

Options : 1) interpreted 2) evolved 3) seasons 4) series 5) involved

42) Marshmallow Test #11000618 **Prediction**

Mischel is the creator of the marshmallow test, one of the most famous experiments in the history of psychology, which is often cited as evidence of the importance of self-control. In the original test, which was administered at the Bing Nursery School, at Stanford, in the nineteen-sixties, Mischel's team would present a child with a treat (marshmallows were just one option) and tell her that she could either eat one treat immediately or wait alone in the room for several minutes until the researcher returned, at which point she could have two treats. The promised treats were always visible and the child knew that all she had to do to stop the agonizing wait was ring a bell to call the experimenter back - although in that case, she wouldn't get the second treat. The longer a child delayed gratification, Mischel found - that is, the longer she was able to wait - the better she would fare later in life at numerous measures of what we now call executive function. She would perform better academically, earn more money, and be healthier and happier. She would also be more likely to avoid a number of negative outcomes, including jail time, obesity, and drug use.

Options : 1) needed 2) immediately 3) often 4) offered 5) perform 6) understand 7) case

43) Sound Speed #11000614 **Prediction**

The speed of sound (otherwise known as Mach 1) varies with temperature. At sea level on a standard day, the temperature is 59°F, and Mach 1 is approximately 761 mph. As the altitude increases, the temperature and speed of sound both decrease until about 36,000 feet, after which the temperature remains steady until about 60,000 feet. Within that 36,000 - 60,000 foot range, Mach 1 is about 661 mph. Because of the variation, it is possible for an aeroplane flying supersonic at high altitude to be slower than a subsonic flight at sea level. The transonic band (the 'sound barrier') extends from around Mach 0.8 - when the first supersonic shock waves form on the wing - to Mach 1.2, when the entire wing has gone supersonic.

Options : 1) perception 2) to 3) variation 4) both 5) from 6) approximately

44) Artificial Intelligence #11000612 **Prediction**

After years in the wilderness, the term "artificial intelligence" (AI) seems poised to make a comeback. AI was big in the 1980s but vanished in the 1990s. It re-entered public consciousness with the release of AI, a movie about a robot boy. This has ignited public debate about AI, but the term is also being used once more within the computer industry. Researchers, executives and marketing people are now using the expression without irony or inverted commas. And it's not always hype. The term is being applied, with some justification, to products that depend on technology that was originally developed by AI researchers. Admittedly, the rehabilitation of the term has a long way to go, and some firms still prefer to avoid using it. But the fact that others are starting to use it again suggests that AI has moved on from being seen as an over-ambitious and under-achieving field of research.

Options : 1) poised 2) inverted 3) reverend 4) consciousness 5) rehabilitation 6) ignited 7) reversed 8) named

45) Entrepreneur Philosophy #11000611 **Prediction**

The majority of British officials in the 1840s adopted the entrepreneur philosophy, which supported a policy of non-intervention in the Irish plight. Prime Minister Sir Robert Peel was different. He showed compassion toward the Irish by making a move to repeal the Corn Laws, which had been put in place to protect British grain producers from the competition of foreign markets. Because of this hasty decision, Peel quickly lost the support of the British people and was forced to resign. The new Prime Minister, Lord John Russell, allowed assistant Charles Trevelyan to take complete control over all of the relief efforts in Ireland. Trevelyan believed that the Irish situation should be left to Providence. Claiming that it would be dangerous to let the Irish become dependent on other countries, he even took steps to close food consumers that were selling corn and to redirect shipments of corn that were already on their way to Ireland. A few relief programs were eventually implemented, such as soup kitchens and workhouses; however, these were poorly.

Options : 1) repeal 2) resign 3) same 4) implemented 5) repeated 6) different

46) Hans Christian Andersen #11000609 **Prediction**

Fans of biographical criticism have a luxurious source in the works of Hans Christian Andersen. Like Lewis Carroll (and, to a lesser extent, Kenneth Grahame), Andersen was near-pathologically uncomfortable in the company of adults. Of course, all three had to work and interact with adults, but all three really related well to children and their simpler worlds. Andersen, for a time, ran a puppet theatre and was incredibly popular with children, and, of course, he wrote an impressive body of fairy tales which have been produced in thousands of editions since the 19th century.

Options : 1) luxurious 2) related 3) body 4) company 5) organisation 6) popular 7) uncommon 8) poem

47) Emotional Intelligence #11000605 **Prediction**

High emotional intelligence can help a manager improve workplace communication skills, employee motivation, and organisational effectiveness. If a manager has high empathy, a key component of emotional intelligence, he or she will be able to listen to the concerns of employees and will be more understanding of their needs, wants, and concerns. This will most likely translate into increased motivation and satisfaction of employees and ultimately will have a positive effect on the effectiveness of the business.

Options : 1) positive 2) disappointed 3) improve 4) empathy 5) listen 6) increased 7) sympathy 8) negative

48) Sheepdogs #11000603 **Prediction**

Considered highly intelligent, extremely energetic, acrobatic and athletic, they frequently compete with great success in sheepdog trials and dog sports. They are often cited as the most intelligent of all domestic dogs. Border Collies continue to be employed in their traditional work of herding livestock throughout the world.

Options : 1) compete 2) cited 3) dumb 4) extremely 5) newly 6) herding

49) Organic Culture #11000600 **Prediction**

A charge often levelled against organic agriculture is that it is more philosophical than scientific. There's some truth to this indictment, if that is what it is, though why organic farmers should feel defensive about it is itself a mystery, a relic, perhaps, of our fetishism of science as the only credible tool with which to approach nature. The philosophy of mimicking natural processes precedes the science of understanding them.

Options : 1) credible 2) with 3) against 4) mimicking 5) defensive 6) comfortable 7) repeating

50) World Shakespeare Congress #11000593 Prediction

Over 800 Shakespeare scholars from almost fifty countries will gather at King's College London next week as the university co-hosts the 10th World Shakespeare Congress to explore and honour the Bard's life and work. Organised by the International Shakespeare Association (ISA), the World Congress is held every five years and 2016 is the first time it will be co-hosted in two locations that were integral to both the personal and working life of William Shakespeare. Delegates will arrive in London on Thursday following the start of the Congress on Sunday in Stratford-upon-Avon. With the main theme of "Creating and Recreating Shakespeare," Congress will look at the continuing global relevance of Shakespeare's work through a varied programme of plenaries, panels, seminars and workshops.

Options : 1) in 2) is 3) Shall 4) With 5) was 6) at 7) of

51) Nature Conservation Amendment Act #11000592 Prediction

The Nature Conservation Amendment Act of 1996 enables the Minister of Environment and Tourism to register a conservancy if it has a representative committee, a legal constitution, which provides for the sustainable management and utilization of game in the conservancy, the ability to manage the funds, an approved method for the equitable distribution of benefits to members of the community and defined boundaries.

Options : 1) typical 2) representative 3) follow 4) manage 5) equitable 6) dishonest

52) Color Preference #11000579 Prediction

Many tests have shown that, in a very broad way, people in most parts of the world have similar color preferences. Blue is the most preferred and popular hue, followed by red, green, purple, yellow and orange. Overlaying this basic order of color preference, however, are the responses of individuals, which of course vary widely and may also be very powerful. Children are likely to have strong preferences for some colors and aversions to others, but sometimes will not admit to them, since outside factors may be influential in determining both color preferences and the way that they are expressed or suppressed. Current fashions in clothes and accessories, gender-stereotyping and peer-group pressure may all play a significant part. Boys in particular may be reluctant to admit to any strong preferences for colors other than those of favorite football teams, because color awareness may be regarded by their peer-group as feminine.

Options : 1) forsee 2) factors 3) however 4) vividly 5) widely 6) other than 7) temprature

53) Selfies #11000573 Prediction

To better understand selfies and how people form their identities online, the researchers combed through 2.5 million selfie posts on Instagram to determine what kinds of identity statements people make by taking and sharing photos. Nearly 52 percent of all selfies fell into the appearance category: pictures of people showing off their make-up, clothes, lips, etc. Pics about looks were two times more popular than the other 14 categories combined. After appearances, social selfies with friends, loved ones, and pets were the most common (14 percent). Then came ethnicity pics (13 percent), travel (7 percent), and health and fitness (5 percent). The researchers noted that the prevalence of ethnicity selfies (selfies about a person's ethnicity, nationality or country of origin) is an indication that people are proud of their backgrounds. They also found that most selfies are solo pictures, rather than taken with a group. Overall, an overwhelming 57 percent of selfies on Instagram were posted by the 18-35-year-old crowd, something the researchers say isn't too surprising considering the demographics of the social media platform. The under-18 age group posted about 30 percent of the selfies. The older crowd (35+) shared them far less frequently (13 percent). Appearance was most popular among all age groups. Lead author Julia Deeb-Swihart says selfies are an identity performance meaning that users carefully craft the way they appear online and that selfies are an extension of that. This evokes William Shakespeare's famous line: "All the world's a stage, and all the men and women merely players."

Options : 1) considering 2) fell off 3) fell into 4) aloof 5) combined 6) rather 7) predicting 8) extension

54) First CT Image #11000569 Prediction

Decades ago, the first CT image of a patient lifted the veil of invisibility that cloaks the interior of the human body, providing scientists a window on our innards unlike any before. CT is frequently the quickest way to get a handle on what's causing a mysterious woe. The technique can give surgeons a heads-up about what they will encounter inside a patient.

Options : 1) exterior 2) interior 3) eye 4) window 5) woe 6) happiness 7) encounter 8) gain

55) Shrimp Farms #11000567 Prediction

However, proper accounting shows that for each hectare government subsidies formed \$8,412 of this figure and there were costs, too: \$1,000 for pollution and \$12,392 for losses to ecosystem services. These comprised damage to the supply of food and medicines that people had taken from the forest, the loss of habitats for fish, and less buffering against storms. And because a given shrimp farm only stays productive for three or four years, there was the additional cost of restoring them afterwards.

Options : 1) movie 2) accounting 3) growth 4) productive 5) damage 6) habitats 7) hidden

56) Journalists #11000549 Prediction

Journalists and their media outlets exist to publish stories. The constitution offers press freedom, but the government has been battling court cases to try to curtail such freedom, especially on matters that touch on national security. Freedom to publish is not the same as the people's right to know, which usually complicates the aspect of journalists' right to publish stories on matters concerning national security.

Options : 1) describing 2) touch 3) face 4) battling 5) curtail 6) concerning

57) Gold Coast Zone #11000506 Prediction

Gold Coast Zone chairman John Newlands said some southern suburbs were shaking off poor reputations and experiencing gentrification as wealthier residents moved in and displaced people from lower-income groups. "I think suburbs such as Miami have become popular with people who previously would not have gone there," he said. "They have come into their own with new restaurants and market opening which has also made them more attractive." Developers have cottoned on to the trend as well, with Sunland launching a \$62 million development, Magnolia Residences, in Palm Beach.

Options : 1) opening 2) exchange 3) understood 4) experiencing 5) cottoned 6) popular

58) Sun Energy #11000503 Prediction

The Sun provides the primary source of energy driving Earth's climate system, but its variations have played very little role in the climate changes observed in recent decades. Direct satellite measurements since the late 1970s show no net increase in the Sun's output, while at the same time global surface temperatures have increased.

Options : 1) only 2) primary 3) increased 4) mark 5) role 6) plunged

59) Insects #11000490 Prediction

Insects walk on water, snakes slither, and fish swim. Animals move with astounding grace, speed, and versatility: how do they do it, and what can we learn from them? How to Walk on Water and Climb up Walls takes readers on a wondrous journey into the world of animal motion. From basement labs at MIT to the rain forests of Panama, David Hu shows how animals have adapted and evolved to traverse their environments, taking advantage of physical laws with results that are startling and ingenious.

Options : 1) talk 2) slither 3) walking 4) traverse 5) motion

60) Modern Wealth #11000486 **Prediction**

Modern wealth has been created mainly through the action of market forces, which now dominate the whole of the industrial world. It is based on the false premise that we all start at an equal point. Of course, nobody starts at the same point. Market forces help a few to become very wealthy at the expense of the many who become poorer. This is taking place all over the world. There is an increasing number of hungry and desperate people living in utter poverty. Yet there are millionaires of all nationalities throughout the developed world. Market forces are inevitably acting to divide our world because they separate one section of society from another. Strangely enough, to create a society based on the free play of market forces, there must be very strict control over the economy to ensure business efficiency. This is the poison of commercialization. It imposes restrictions on the natural needs of society. When the politicians are not meeting the needs of society, the people revolt. When the people's voice is not heard, there will inevitably be a revolution. Part of that revolution is the growing crime rate and the violent street protests which are the result of the imbalance of our society - too great wealth side by side with too great poverty.

Options : 1) expense 2) imbalance 3) rate 4) imposes 5) path 6) finds 7) false

61) John Milton #11000482 **Prediction**

John Milton wrote in a wide range of genres, in several languages, and on an extraordinary range of subjects. His was a more general education than is offered at Cambridge these days, and it continued after his seven years here, equipping him with the tools to write some of the most groundbreaking literature ever seen and to engage as a polemicist on many different social, political, and theological questions.

Options : 1) questions 2) answers 3) groundbreaking 4) children 5) post 6) education 7) such 8) several

62) Birdwatching #11000481 **Prediction**

For birdwatchers in southern New Mexico, September can be highly entertaining. Good numbers of many diverse species are on the move during this time, traveling southward from northern breeding grounds to places they will spend the winter, and there's always a chance that some rare or unusual bird will turn up.

Options : 1) breeding 2) moving 3) chance 4) prompt 5) people 6) species

63) Green Spaces #11000478 **Prediction**

Green spaces contribute significantly to a reduction of soil and aerial temperatures during spells of hot weather, so contributing to human wellbeing. In the garden context, there is, however, little information as to what extent various types of plants differ in their cooling potential and how certain planting combinations may maximize cooling under a scenario of low rainfall and minimal water inputs.

Options : 1) aerial 2) minimal 3) land 4) spells 5) marks 6) maximum 7) lesser

64) Bee Experiment #11000474 **Prediction**

According to a research conducted by Cambridge University, flowers can find their own ways to attract insects to help them pollinate. Flowers will release an irresistible smell. A scientist and her colleagues did an experiment in which they use fake flowers to attract bees and insects. In their experiments, they feed many bumblebees from their origins repeatedly and got the same results.

Options : 1) conducted 2) made 3) repeatedly 4) irresistible 5) quickly 6) pungent

65) Careers #11000473 **Prediction**

In search of lessons to apply in our own careers, we often try to emulate what effective leaders do. Roger Martin says this focus is misplaced, because moves that work in one context may make little sense in another. A more productive, though more difficult, approach is to look at how such leaders think. After extensive interviews with more than 50 of them, the author discovered that most are integrative thinkers – that is, they can hold in their heads two opposing ideas at once and then come up with a new idea that contains elements of each but is superior to both.

Options : 1) think 2) say 3) momentary 4) integrative 5) but 6) will 7) emulate

66) Elections #11000472 **Prediction**

One of the things that we are seeing is that we're seeing more young people run for office, and the more people start running for office, they realize that local government is what makes the most impact, at least here in America. So if you want, for example, some racial reform in your judicial system, vote for your district attorney, vote for your city councilman. If you think that there are disparities in our education system, run for your school board. So that's one. But the other thing to send very clearly to politicians is that when young Americans voted their heart out. Young Latinos, youth in general, outvoted the people before them, but they're voting on making a bet that their life will change because the last four years could not have been rockier.

Options : 1) people 2) reform 3) government 4) rockier 5) elections 6) future 7) councilman

67) Active Learning Classrooms #11000467 **Prediction**

Active Learning Classrooms (ALCs) are student-centered, technology-rich classrooms. They are easily identified with their large circular tables and movable seating designed to improve student engagement in class. Typically, each table is accompanied by a whiteboard and flat-screen monitor to display student work and larger rooms frequently have miniature bulbs and microphones and at each table. In this way, students are able to signal if they have questions or want to speak to the entire room. ALCs provide the hands-on environment that has transformed old classes from passive lectures to very active group design work.

Options : 1) with 2) signal 3) in 4) engagement 5) movement 6) display 7) project 8) stigmatize

68) American Votes #11000466 **Prediction**

Much has been said of the Latino vote in this election, which is something I know a little bit about, having been working obsessively over it for the last 16 years. Latinos are the fastest-growing demographic, with the largest voter registration cap in America. A Latino youth turns 18 every 30 seconds. While the mode for whites in America is 58, the mode for Latinx is 11 years old. You heard that right. And it's these new voters and the youth who are translating America for their immigrant families who are leading the charge for audacious change.

Options : 1) demographic 2) practical 3) translating 4) moving 5) outrageous 6) audacious 7) clearly 8) obsessively

69) Effects of Leadership #11000449 **Prediction**

Based on collaborative research by Arizona's top business schools, this study of leadership and company performance uncovers the effects of leadership driven by profits, cost control and maintaining market share, versus leadership driven more by balancing employee relations and development, customer or client needs, and the welfare of the greater community. Together, Mary Sully de Luque, an assistant professor of management and a research Fellow at Thunderbird School of Global Management, and David Waldman, director of the Center for Responsible Leadership at ASU's School of Global Management and Leadership at the West campus, have found that maintaining a specific focus on profits in decision-making can have negative effects on how a leader is viewed.

Options : 1) decision-making 2) decision-taking 3) want 4) needs 5) negative 6) profits 7) positive

70) The Wool Market #11000447 **Prediction**

The wool market was extremely important to the English medieval economy and wool dominated the English export trade from the late thirteenth century to its decline in the late fifteenth century. Wool was at the forefront of the establishment of England as a European political and economic power and this volume is the first study of the medieval wool market in over 20 years. It investigates in detail the scale and scope of advance contracts for the sale of wool; the majority of these agreements were formed between English monasteries and Italian merchants, and the book focuses on the data contained within them. The pricing structures and market efficiency of the agreements are examined, employing practices from modern finance.

Options : 1) contracts 2) dominated 3) political 4) social 5) employing 6) providing 7) decline 8) adjudicated 9) propelled 10) agreements

71) First Impressions #11000445 **Prediction**

First impressions based on facial appearance predict many important social outcomes. We investigated whether such impressions also influence the communication of scientific findings to lay audiences, a process that shapes public beliefs, opinion, and policy. First, we investigated the traits that engender interest in a scientist's work, and those that create the impression of a "good scientist" who does high-quality research. Apparent competence and morality were positively related to both interest and quality judgments, whereas attractiveness boosted interest but decreased perceived quality. Next, we had members of the public choose real science news stories to read or watch and found that people were more likely to choose items that were paired with "interesting-looking" scientists, especially when selecting video-based communications. Finally, we had people read real science news items and found that the research was judged to be of higher quality when paired with researchers who look like "good scientists." Our findings offer insights into the social psychology of science, and indicate a source of bias in the dissemination of scientific findings to broader society.

Options : 1) shapes 2) motives 3) insights 4) parts 5) when 6) whereas 7) meager 8) engender

72) Digital Media #11000443 **Prediction**

Digital media and the internet have made the sharing of texts, music, and images easier than ever, and the enforcement of copyright restriction harder. This situation has encouraged the growth of IP law and prompted increased industrial concentration on extending and 'policing' IP protection, while also leading to the growth of 'open access', or 'creative commons' movement which challenges such control of knowledge and creativity.

Options : 1) extending 2) moving 3) challenges 4) movements 5) creativity 6) honesty 7) purpose 8) restriction

73) UWS graduates #11000438 **Prediction**

UWS graduates Racha Abboud and Anna Ford, whose story first appeared in GradLife in December 2009, have successfully risen through the ranks to be appointed Associates at leading western Sydney law firm, Coleman Greig Lawyers. The promotion marks the culmination of many years of hard work for these legal eagles who are the first to rise to this level from the firm's Cadet Lawyer program with UWS.

Options : 1) appointed 2) promoted 3) eagles 4) fox 5) amalgamation 6) culmination 7) diligently 8) successfully 9) level

74) Investing #11000426 **Prediction**

To invest, you need to draw up a clear plan, do your own research, build in a margin of safety by always thinking about the valuation, and ultimately, be patient. By all means, include some speculative picks if you wish, but ensure they are only a small part of your portfolio. Looking for an oil explorer whose shares double, treble, and double again is exciting but such firms are very rare. There are a lot more that have a consistent record of paying out the dividends which really make the markets work for you, once they are reinvested.

Options : 1) build in 2) moved in 3) draw up 4) cooped on 5) valuation 6) common 7) rare 8) speculative

75) Following Tips #11000419 **Prediction**

Researchers suggest the following tips as you begin to network, seek common ground, engage with your network regularly, and consistently apply yourself to making your network work or it will wither. It is a skill that you need to practice, not a talent.

Options : 1) apply 2) conform 3) engage 4) operate 5) practice 6) gauge

76) Coffee Culture #11000412 **Prediction**

Coffee is enjoyed by millions of people every day and the 'coffee experience' has become a staple of our modern life and culture. While the current body of research related to the effects of coffee consumption on human health has been contradictory, a study in the June issue of Comprehensive Reviews in Food Science and Food Safety, which is published by the Institute of Food Technologists (IFT), found that the potential benefits of moderate coffee drinking outweigh the risks in adult consumers for the majority of major health outcomes considered.

Options : 1) benefits 2) outcomes 3) advantage 4) result 5) consumption 6) operation 7) language 8) culture

77) Concentration #11000410 **Prediction**

Some students say that they need complete quiet to read and study. Others study best in a crowded, noisy room because the noise actually helps them concentrate. Some students like quiet music playing; others do not. The point is, you should know the level of noise that is optimal for your own studying. However, one general rule for all students is that the television seems to be more of a distraction than music or other background noise, so leave the TV off when you are reading or studying. Also, don't let yourself become distracted by computer games, email, or Internet surfing.

Options : 1) others 2) many 3) few 4) leave 5) come 6) helps 7) Also 8) However

78) Physical Activity #11000406 **Prediction**

Participating regularly in physical activity has been shown to benefit an individual's health and wellbeing. Regular physical activity is important in reducing the risk of chronic diseases, such as heart disease and stroke, obesity, diabetes, and some forms of cancer. The National Physical Activity Guidelines for adults recommend at least 30 minutes of moderate-intensity physical activity, preferably every day of the week, to obtain health benefits.

Options : 1) amicably 2) chronic 3) regular 4) wellbeing 5) activity 6) suggested 7) recommend 8) occasionally 9) obtain 10) preferably

79) Newspaper #11000404 **Prediction**

Many UK newspapers have a strong online presence but falling print circulations and changes to advertising trends have caused the press sector to experience declining revenues. The latest figures show that around two-thirds of local authority areas don't have a daily newspaper.

Options : 1) press 2) local 3) figures 4) declining 5) presence 6) absence 7) international 8) propelling 9) authorities 10) subjugating

80) Fingerprint (V2) #11000398 **Prediction**

Fingerprints can prove that a suspect was actually at the scene of a crime. As long as a human entered a crime scene, there will be traces of DNA. DNA can help the police to identify an individual to crack a case. An institute in London can help reserve DNA and be used to match the samples taken from the crime scenes.

Options : 1) reserve 2) show 3) select 4) identify 5) make 6) prove 7) examples 8) samples

81) Paris #11000392 **Prediction**

Paris is very old -- there has been a settlement there for at least 6,000 years and its shape has been determined in part by the River Seine, and in part by the edicts of France's rulers. But the great boulevards we admire today are relatively new, and were constructed to prevent any more barricades being created by the rebellious population; that work was carried out in the middle 19th century. The earlier Paris had been in part a maze of narrow streets and alleyways. But you can imagine that the work was not only highly expensive, but caused great distress among the half a million or so whose houses were simply razed, and whose neighborhoods disappeared. What is done cannot usually be undone, especially when buildings are torn down.

Options: 1) created 2) obeyed 3) part 4) full 5) up 6) down 7) majorly 8) simply 9) grouped

82) Trackway #11000391 **Prediction**

A fossilized trackway on public lands in Lake County, Oregon, may reveal clues about the ancient family dynamics of Columbian mammoths. Recently excavated by a team from the University of Oregon Museum of Natural and Cultural History, the Bureau of Land Management, and the University of Louisiana, the trackway includes 117 footprints thought to represent a number of adults as well as juvenile and infant mammoths.

Options: 1) individual 2) team 3) children 4) teenagers 5) adults 6) points 7) hint 8) clues

83) Trees #11000390 **Prediction**

Trees, as ever, are or should be at the heart of all discussion on climate change. The changes in carbon dioxide, in temperature, and in patterns of rainfall will each affect them in many ways, and each parameter interacts with all the others, so between them, these three main variables present a bewildering range of possibilities.

Options: 1) discussion 2) observations 3) describing 4) interacts 5) chatting 6) variables 7) options

84) Recommended Energy Intakes #11000384 **Prediction**

Recommended energy intakes are difficult to calculate even among individuals of the same age, sex, weight, height, and the general pattern of activity. Therefore, the energy requirement for healthy people is often expressed as the amount of energy needed to maintain the status quo.

Options: 1) calculate 2) activity 3) evaluate 4) activities 5) maintain

85) Liquidity #11000382 **Prediction**

When people worry about a glut of liquidity, they are thinking of the first of these concepts. If money is too abundant or too cheap, inflationary pressure may build up or bubbles may appear in financial markets - until central banks tighten policy or market opinion suddenly changes. A slackening of economic activity or a drop in asset prices can leave households, businesses, and financial institutions in trouble if their balance sheets are not liquid enough (the second concept) or if they cannot find a buyer for assets.

Options: 1) pressure 2) economic 3) force 4) assets 5) economic

86) Education and Wellbeing #11000381 **Prediction**

Education and well-being have often been associated. The idea that education can promote individual well-being indirectly, by improving earnings and promoting social mobility, is an old one; so are notions of education helping to promote the good society by contributing to economic growth and equality of opportunity.

Options: 1) associated 2) contributing 3) improving 4) enforcing 5) social 6) effected

87) Ice Storm #11000380 **Prediction**

An ice storm is a type of weather . Cold rain falls down into the cold air changing from water into ice . A heavy ice storm left more than a hundred residents' electricity cutoff. Because the ice storm hit down the wire.

Options : 1) Hot 2) Cold 3) vapor 4) weather 5) ice 6) less 7) more

88) Shakespeare's Works #11000375 **Prediction**

Shakespeare produced most of his works between 1589 and 1613. His early plays were mainly comedies and histories, genres he raised to the peak of sophistication and artistry by the end of the 16th century. He then wrote mainly tragedies until about 1608, including Hamlet, King Lear, Othello, and Macbeth, considered some of the finest works in the English language. In his last phase, he wrote tragicomedies, also known as romances, and collaborated with other playwrights.

Options : 1) collaborated 2) writings 3) also 4) works 5) genres 6) achievement 7) connected

89) Examination tips #11000369 **Prediction**

You have about 30 minutes to answer each question. You must take account of how many marks are available for each part when you answer it Even if you think you can write more, don't spend 15 minutes answering a part worth only 5 marks. Leave space at the end of your answer and come back to it if you have time to spare later. And if you can't think of an answer to some part, leave a space and move on to the next part. Don't write about something else if you don't know the correct answer this is just a waste of your valuable time.

Options : 1) time 2) accelerated 3) routine 4) valuable 5) available 6) answering

90) Flexible Work Practice #11000366 **Prediction**

Technology and flexible work practices have had a significant impact on today's busy companies. In terms of productivity, it seems the focus has shifted from managing employees in the workplace to monitoring their total output no matter where they choose to work. Whether this trend will continue depends to some extent on how well it works for everyone concerned.

Options : 1) focus 2) deals 3) way 4) practices 5) selling 6) output 7) extent

91) Multinational Companies Criticism #11000337 **Prediction**

Multinational companies are often criticized for a number of reasons, but we cannot deny their positive impact. Employment opportunities are generated for locals in the overseas country. When multinational companies set up manufacturing plants, there is often an increased availability of products for local consumers, which profits the local economy. Training is also sometimes provided in the use of technology; moreover, the experience and knowledge that the employees gain strengthens their skills and overall employability.

Options : 1) positive 2) gain 3) purchase 4) negative 5) availability 6) benefit

92) Plates #11000299 **Prediction**

In geologic terms, a plate is a large, rigid slab of solid rock. The word tectonics comes from the Greek root "to build." putting these two words together, we get the term plate tectonics, which refers to how the Earth's surface is built of plates. The theory of plate tectonics states that the Earth's outermost layer is fragmented into a dozen or larger and small plates that are moving relative to one another.

Options : 1) Argue 2) foundation 3) relative 4) refers 5) states 6) fragmented 7) root 8) relevantly 9) broken 10) talks

93) The National Gallery of Canada #11000292 **Prediction**

An exhibit that brings together for the first time landscapes painted by French impressionist Pierre-Auguste Renoir comes to the National Gallery of Canada this June. The gallery in Ottawa worked with the National Gallery of London and the Philadelphia Museum of Art to pull together the collection of 60 Renoir paintings from 45 public and private collections.

Options : 1) paintings 2) gets 3) masterpiece 4) muster 5) time 6) pull 7) comes

94) Edible Insects #11000271 **Prediction**

Fancy a locust for lunch? Probably not, if you live in the west, but elsewhere it's a different story. Edible insects termites, stick insects, dragonflies, grasshoppers, and giant water bugs are on the menu for an estimated 80 percent of the world's population. More than 1000 species of insects are served up around the world. For example, Kungu cakes made from midges are a delicacy in parts of Africa. Mexico is an insect-eating or entomophagous - hotspot, where more than 200 insect species are consumed. Demand is so high that 40 species are now under threat, including white agave worms. These caterpillars of the tequila giant-skipper butterfly fetch around \$250 a kilogram. Eating insects make nutritional sense. Some contain more protein than meat or fish. The female gypsy moth, for instance, is about 80 percent protein. Insects can be a good source of vitamins and minerals too: a type of caterpillar (Usta Terpsichore) eaten in Angola is rich in iron, zinc, and thiamine. What do they taste like? Ants have a lemon tang, apparently, whereas giant water bugs taste of mint and fire ant pupae of watermelon. You have probably, inadvertently, already tasted some of these things, as insects are often accidental tourists in other types of food. The US Food and Drug Administration even issues guidelines for the number of insect parts allowed in certain foods. For example, it is acceptable for 225 grams of macaroni to contain up to 225 insect fragments.

Options : 1) resource 2) quality 3) fetch 4) Demand 5) delicacy 6) supply 7) source 8) carry

95) Languages #11000267 **Prediction**

An eccentric mix of English, German and French has entered Japanese usage with grand abandon. A "kariya" woman is a career woman, and a "mansion" is an apartment. This increasing use of katakana, or unique Japanese versions of Western words, and the younger generation's more casual use of the Japanese language have prompted Prime Minister Junichiro Koizumi to worry that these new words may not be understood by a wider audience. As a result, a government panel is proposing to publish a manual on how to speak proper Japanese. Foreign words became katakana Japanese because no existing Japanese words could quite capture a specific meaning or feeling. When the word "cool" traveled east, all of its English connotations did not make the journey. A kuru person in Japan is someone who is calm and never gets upset. On the other hand, someone who is kakkoi is hip, or in translation, "cool." similarly, a hot to a person is one who is easily excitable, perhaps passionate, but not necessarily a popular person or personality of the moment.

Options : 1) similarly 2) apparently 3) however 4) abandon 5) adopt 6) because 7) projected 8) prompted

96) Internet Growth #11000259 **Prediction**

The exponential growth of the Internet was heralded, in the 1990s, as revolutionizing the production and dissemination of information. Some people saw the internet as a means of democratizing access to knowledge. For people concerned with African development, it seemed to offer the possibility of leapfrogging over the technology gap that separates Africa from advanced industrialized countries.

Options : 1) demonstrated 2) separates 3) signifies 4) concerned 5) connected 6) democratizing 7) heralded 8) leapfrogging 9) dissertation 10) dissemination 11) jogging

97) Fingerprints #11000251 Prediction

Fingerprints, referred to as "fingermarks" in forensics, are formed when residue from the ridged skin of the fingers or palms is transferred onto a surface, leaving behind an impression. Fingermarks are often made of sweat and colorless contaminating materials such as soap, moisturizer, and grease. These fingermarks are described as "latent" as they are generally invisible to the naked eye, which means that locating them at a crime scene can be challenging.

Options: 1) transferred 2) contaminating 3) locating 4) reserve 5) determine 6) evidence 7) identify 8) samples

98) Linguistic Effect #11000248 Prediction

An important corollary of this focus on language as the window to legal epistemology is the central role of discourse to law and other sociocultural processes. In particular, the ideas that people hold about how language works combine with linguistic structuring to create powerful, often unconscious effects. In recent years, linguistic anthropologists have made much progress in developing more precisely analytic tools for tracking those effects.

Options: 1) implements 2) linguistic 3) disclosure 4) speech 5) facts 6) discourse 7) tools 8) ideas

99) Lake Turkana #11000246 Prediction

Lake Turkana is a large lake in Kenya, East Africa. This part of Africa was home to some of the first humans. Here, archaeologists have found piles of bones (both human and animal) and collections of stones that humans used as tools. By carefully uncovering and examining these remains, scientists have started to put together the story of our earliest ancestors. In 2001, a 4 million-year-old skeleton was uncovered in the area. Although a link between it and modern-day humans has not been established, the skeleton shows the species was walking upright.

Options: 1) indicating 2) bones 3) part 4) city 5) tools 6) examining 7) remains 8) weapons

100) Under-nutrition #11000244 Prediction

Under-nutrition and related diseases kill between 15 and 18 million people a year, the majority are children. At least 500 million are chronically hungry. The tragic paradox of massive suffering amid global plenty traces in part to widespread poverty, which denies access to food even where it piles high in the village market.

Options: 1) even 2) part 3) minimal 4) none 5) amid 6) relation 7) majority 8) extent

101) Chimpanzee #11000243 Prediction

Chimpanzee posture, gestures, and facial expressions communicate many messages and emotions between various individuals. When greeting a dominant individual following an absence or in response to an aggressive gesture, nervous subordinates may approach with submissive signals _ crouching, presenting the hindquarters, holding a hand out _ accompanied by pant-grunts or squeaks. In response, the dominant individual may make gestures of reassurance, such as touching, kissing, or embracing.

Options: 1) convincing 2) emotions 3) behaviors 4) greeting 5) subordinates 6) reassurance 7) meeting 8) attitudes

102) Siblings/Identical twins #11000228 Prediction

No two siblings are the same, not even identical twins. Parents often puzzle about why their children are so different from one another. They'll say, 'I brought them I up all the same.' They forget that what determines our behavior isn't what happens to us but how we interpret what happens to us, and no two people ever see anything in exactly the same way.

Options: 1) brothers 2) brought 3) had 4) identical twins 5) mind 6) behaviour 7) moves 8) elements 9) determines 10) puzzle 11) interpret

103) Hypothesis #11000226 **Prediction**

The coastal hypothesis suggests an economy based on marine mammal hunting, saltwater fishing, shellfish gathering, and the use of watercraft. Because of the barrier of ice to the east, the Pacific Ocean to the west, and populated areas to the north, may have been a greater impetus for people to move in a southerly direction.

Options: 1) In spite 2) recommends 3) Because 4) impetus 5) suggests 6) speed

104) Systematic Nomenclature #11000224 **Prediction**

The new systematic nomenclature was so cumbersome that many chemists preferred to revert to the older trivial names that were at least shorter. At least, that is the ostensible reason. Actually, the tradition seems to carry more weight than a system with some scientists.

Options: 1) irrational 2) system 3) longevity 4) cumbersome 5) adapt 6) revert to

105) Fiction and Life #11000209 **Prediction**

The precise relationship between fiction and life has been debated extensively. Most modern critics agree that, whatever its apparent factual content or verisimilitude, fiction is finally to be regarded as a structured imitation of life and should not be confused with a literal transcription of life itself. While fiction is a work of the imagination rather than reality, it can also be based closely on real events, sometimes experienced by the author. In a work of fiction, the author is not the same as the narrator, the voice that tells the story.

Authors maintain a distance from their characters. Sometimes that distance is obvious for instance if a male writer tells a story from the point of view of a female character. Other times it is not so obvious, especially if we know something of the author's life and there are clear connections between the story and the author's life. The writer of fiction is free to choose his or her subject matter and is free to invent, select, and arrange fictional elements to achieve his or her purpose. The elements of fiction are the different components that make up a work of fiction. All literature explores a theme or significant truth expressed in various elements such as character, plot, setting, point of view, style, and tone that are essential and specific to each work of fiction. All of these elements bind a literary work into a consistent whole and give it unity. Understanding these elements can help the reader gain insight into life, human motives, and experience. Such insight is one of the principal aims of an effective work of fiction; when readers are able to perceive it, they develop a sense of literary judgment that is capable of enriching their lives. The following sections describe elements that should be considered in the analysis of fiction.

Options: 1) Most 2) achieve 3) analysis 4) the 5) aims 6) will 7) reality 8) transcription 9) able 10) willing 11) goal 12) as 13) arrange 14) Few

106) Investment #11000208 **Prediction**

One city will start to attract the majority of public and/ or private investment. This could be due to natural advantage or political decisions. This in turn will stimulate further investment due to the multiplier effect and significant rural to urban migration. The investment in this city will be at the expense of other cities.

Options: 1) Repel 2) attract 3) get 4) turn 5) return 6) and 7) to 8) in 9) reliability 10) expense 11) degree 12) natural 13) local

107) Chronic Diseases #11000207 **Prediction**

If you have a chronic disease such as heart disease, diabetes, asthma, or back or joint pain, exercise can have important health benefits. However, it's important to talk to your doctor before starting an exercise routine. He or she might have advice on what exercises are safe and any precautions you might need to take while exercising.

Options: 1) chronic 2) main 3) cited 4) drawbacks 5) benefits 6) benefit 7) advised 8) advice 9) waterborne

108) University Science Crisis #11000195 **Prediction**

University science is now in real crisis - particularly the non-telegenic, non-ology bits of it such as chemistry.

Since 1996, 28 universities have stopped offering chemistry degrees, according to the Royal Society of Chemistry. The society predicts that as few as six departments (those at Durham, Cambridge, Imperial, UCL, Bristol, and Oxford) could remain open by 2014. Most recently, Exeter University closed down its chemistry department, blaming it on "market forces", and Bristol took in some of the refugees. The closures have been blamed on a fall in student applications, but money is a factor: chemistry degrees are expensive to provide - compared with English, for example - and some scientists say that the way the government concentrates research funding on a small number of top departments, such as Bristol, exacerbates the problem.

Options: 1) projects 2) focusing 3) prosperous 4) problem 5) motive 6) fall 7) blaming 8) question 9) factor 10) funding 11) Since 12) open 13) concluded 14) rise

109) Sportswomen #11000194 **Prediction**

Sportswomen's records are important and need to be preserved. And if the paper records don't exist, we need to get out and start interviewing people, not to put too fine a point on it, while we still have a chance. After all, if the records aren't kept in some form or another, then the stories are lost too.

Options: 1) focus 2) disappear 3) appear 4) lost 5) point 6) chance 7) exist 8) admit 9) opportunity

110) Ikebana #11000191 **Prediction**

More than simply putting flowers in a container, ikebana is a disciplined art form in which nature and humanity are brought together. Contrary to the idea of a particoloured or multicoloured arrangement of blossoms, ikebana often emphasizes other areas of the plant, such as its stems and leaves, and puts emphasis on shape, line, and form. Though ikebana is an expression of creativity, certain rules govern its form. The artist's intention behind each arrangement is shown through a piece's colour combinations, natural shapes, graceful lines, and the implied meaning of the arrangement.

Options: 1) arrangement 2) expression 3) vase 4) complication 5) disposition 6) plant 7) container 8) belief 9) blossoms 10) flowers 11) humanity 12) idea 13) combinations 14) expertise

111) Kathryn Mewes #11000181 **Prediction**

Kathryn Mewes does not meet bohemian, hippy parents in her line of work. Typically one, or both, of the parents she sees work in the City of London. "Professionals seek professionals," she says. Originally a nanny, Mewes is now a parenting consultant, advising couples privately on changing their child's behavior, as well as doing corporate seminars for working parents. Her clients find they are unprepared for the chaos and unpredictability that having a child can entail. "Parents are getting older; they have been in control of their whole lives and been successful. Suddenly a baby turns up and life turns on its head." Nicknamed the "Three-Day Nanny" because of her pledge to fix behavioral problems in children under the age of 12 within three days, she is filming a new Channel 4 television series demonstrating her techniques. The role of the parenting consultant - distinct from that of a nanny - has developed, she says, as people are used to buying in expertise, such as personal trainers or, in her case, parenting advice.

Options: 1) whole lives 2) play 3) entire life 4) at the mean time 5) because of 6) role 7) identity 8) because 9) line of work 10) place of worship

112) Omniscience #11000177 **Prediction**

Omniscience may be a foible of men, but it is not so of books. Knowledge, as Johnson said, is of two kinds, you may know a thing yourself, and you may know where to find it. Now the amount which you may actually know yourself must, at its best, be limited, but what you may know of the sources of information may, with proper training, become almost boundless. And here come the value and use of reference books – the working of one book in connexion with another – and applying your own intelligence to both. By this means we get as near to that omniscient volume which tells everything as ever we shall get, and although the single volume or work which tells everything does not exist, there is a vast number of reference books in existence, knowledge and proper use of which is essential to every intelligent person. Necessary as I believe reference books to be, they can easily be made to be contributory to idleness, and too mechanical a use should not be made of them.

Options : 1) devoted 2) intellectual 3) expense 4) sort 5) intelligence 6) kinds 7) price 8) contributory 9) originalities 10) origin 11) contributed 12) sources 13) smartness 14) importance 15) value

113) Cuteness in Offspring #11000170 **Prediction**

Cuteness in offspring is a potent protective mechanism that ensures survival for otherwise completely dependent infants. Previous research has linked cuteness to early ethological ideas of a "kindchenschema" (infant schema) where infant facial features serve as "innate releasing mechanisms" for instinctual caregiving behaviours. We propose extending the concept of cuteness beyond visual features to include positive infant sounds and smells. Evidence from behavioural and neuroimaging studies links this extended concept of cuteness to simple "instinctual" behaviours and to caregiving, protection and complex emotions. We review how cuteness supports key parental capacities by igniting fast privileged neural activity followed by slower processing in large brain networks also involved in play, empathy, and perhaps even higher-order moral emotions.

Options : 1) slower 2) proper 3) dependent 4) contain 5) instinctual 6) invalid 7) supports 8) deliberate 9) potent 10) positive

114) Hiring Practices #11000169 **Prediction**

Discrimination against women has been alleged in hiring practices for many occupations, but it is extremely difficult to demonstrate sex-biased hiring. A change in the way symphony orchestras recruiting musicians provides an unusual way to test for sex-biased hiring. To overcome possible biases in hiring, most orchestras revised their audition policies in the 1970s and 1980s. A major change involved the use of blind' auditions with a screen' to conceal the identity of the candidate from the jury. Female musicians in the top five symphony orchestras in the United States were less than 5% of all players in 1970 but are 25% today. We ask whether women were more likely to be advanced and/or hired with the use of blind' auditions. Using data from actual auditions in an individual fixed-effects framework, we find that the screen increases by 50% the probability a woman will be advanced out of certain preliminary rounds. The screen also enhances, by several folds, the likelihood a female contestant will be the winner in the final round. Using data on orchestra personnel, the switch to blind' auditions can explain between 30% and 55% of the increase in the proportion female among new hires and between 25% and 46% of the increase in the percentage female in the orchestras since 1970.

Options : 1) conceal 2) increases 3) limitations 4) suddenly 5) extend 6) advanced 7) borders 8) recruiting 9) in 10) wait 11) blocks 12) revised 13) mind

115) White Paper #11000168 **Prediction**

Let us then suppose the mind to be, as we say, white paper, void of all characters, without any ideas: – How comes it to be furnished ? Whence comes it by that vast store which the busy and boundless fancy of man has painted on it with an almost endless variety? Whence has it all the materials of reason and knowledge? To this, I answer, in one word, from experience .

Options : 1) useless 2) sight 3) revised 4) furnished 5) experience 6) void 7) boundless 8) avoid 9) limited

116) The Allure of the Book #11000167 **Prediction**

The allure of the book has always been negative and positive, for the texts and pictures between the covers have helped many young readers to discover and grasp the world around them in a pleasurable and meaningful way. But the allure has also enabled authors and publishers to prey upon young readers' dispositions and desires and to sell them a menu that turns out to be junk food. The texts and pictures titillate children or reinforce certain formulaic patterns of thinking that reduce the possibility for the child to develop his or her own creative and critical talents.

Options: 1) beneficial 2) find 3) positive 4) read 5) show 6) invent 7) sell 8) present 9) prey 10) discover 11) own

117) Australia and New Zealand #11000163 **Prediction**

Australia and New Zealand have many common links. Both countries were recently settled by Europeans, are predominantly English speaking and in that sense, share a common cultural heritage. Although in close proximity to one another, both countries are geographically isolated and have small populations by world standards. They have similar histories and enjoy close relations on many fronts.

In terms of population characteristics, Australia and New Zealand have much in common. Both countries have minority indigenous populations, and during the latter half of the 20th century have seen a steady stream of migrants from a variety of regions throughout the world. Both countries have experienced similar declines in fertility since the high levels recorded during the baby boom, and alongside this have enjoyed the benefits of continually improving life expectancy. One consequence of these trends is that both countries are faced with an aging population and the associated challenge of providing appropriate care and support for this growing group within the community.

Options: 1) witness 2) characteristics 3) experienced 4) standards 5) history 6) associated 7) limitation 8) shared 9) heritage 10) tradition 11) pavement

118) Volcanoes #11000162 **Prediction**

Volcanoes blast more than 100 million tons of carbon dioxide into the atmosphere every year but the gas is usually harmless. When a volcano erupts, carbon dioxide spreads out into the atmosphere and isn't concentrated in one spot. But sometimes the gas gets trapped underground under enormous pressure. If it escapes to the surface in a dense cloud, it can push out oxygen-rich air and become deadly.

Options: 1) underground 2) harmful 3) focused 4) cloud 5) concentrated 6) underwater 7) dangerous 8) air 9) atmosphere 10) harmless 11) aimed

119) Microorganism #11000161 **Prediction**

Although for centuries preparations derived from living matter were applied to wounds to destroy infection, the fact that a microorganism is capable of destroying one of another species was not established until the latter half of the 19th century. When Pasteur noted the antagonistic effect of other bacteria on the anthrax organism and pointed out that this action might be put to therapeutic use.

Options: 1) infection 2) established 3) built 4) lives 5) able 6) concern 7) entertainment 8) matter 9) capable 10) therapeutic 11) injection

120) Sun and Moon #11000160 **Prediction**

From the time of the very earliest civilizations, man has wondered about the world he lives in, about how it was created, and about how it will end. In these distant times, the sun was seen to make its daily journey across the sky. At night the moon appeared. Every new night the moon waxed or waned a little and on a few nights, it did not appear at all. At night the great dome of the heavens was dotted with tiny specks of light. They became known as the stars. It was thought that every star in the heavens had its own purpose and that the secrets of the universe could be discovered by making a study of them. It was well known that there were wandering stars, they appeared in different nightly positions against their neighbors and they became known as planets. It took centuries; in fact, it took millennia, for man to determine the true nature of these wandering stars and to evolve a model of the world to accommodate them and to predict their positions in the sky.

Options : 1) predict 2) predicts 3) secrets 4) seemed 5) became 6) determine 7) assume 8) journey

121) Bizarre Universe #11000152 **Prediction**

It seems we live in a bizarre Universe. One of the greatest mysteries in the whole of science is the prospect that 75% of the Universe is made up of a mysterious substance known as 'Dark Energy', which causes an acceleration of cosmic expansion. Since a further 21% of the Universe is made up of invisible 'Cold Dark Matter' that can only be detected through its gravitational effects, the ordinary atomic matter making up the rest is apparently only 4% of the total cosmic budget. These discoveries require a shift in our perception as great as that made after Copernicus revelation that the Earth moves around the Sun. This lecture will start by reviewing the chequered history of Dark Energy, not only since Einstein's proposal for a similar entity in 1917 but by tracing the concept back to Newton's ideas. This lecture will summarise the current evidence for Dark Energy and future surveys in which UCL is heavily involved: the "Dark Energy Survey", the Hubble Space Telescope, and the proposed Euclid space mission.

Options : 1) substance 2) material 3) discoveries 4) summarise 5) revelation 6) focus 7) theories 8) detected

122) People Need Exercise #11000139 **Prediction**

One thing is certain. Most people do not get enough exercise in their ordinary routines. All of the advances of modern technology - from electric can openers to power steering - have made life easier, more comfortable, and much less physically demanding. Yet our bodies need activity, especially if they are carrying around too much fat. Satisfying this need requires a definite plan and a commitment.

Options : 1) electric 2) ordinary 3) requiring 4) formal 5) demanding 6) much

123) Health Professionals #11000133 **Prediction**

People who visit health professionals tend to be older than the general population because illness increases with age. However, the proportion of the population who visited complementary health therapists was highest between the ages of 25 and 64 years. The lower rates for people aged 65 years and over contrasted with the rate of visits to other health professionals which increased steadily with increasing age. The reasons for this difference might include lower levels of acceptance of complementary therapies by older people. Alternatively, older people may have different treatment priorities than do younger people because their health on average is worse while their incomes are generally lower.

Options : 1) general 2) ordinary 3) health 4) contrasted 5) controlled 6) proportion 7) doctors 8) majority 9) therapists 10) acceptance

124) Major Stresses #11000131 **Prediction**

Research has suggested that major stresses in our lives are life changes, for example, moving house, marriage, or relationship breakdown. Work-related factors, including unemployment and boredom, are also common causes of stress. Differences in personality may also play a part.

Options : 1) containing 2) consisting 3) causes 4) play 5) account 6) changes 7) including 8) results 9) experience

125) Plagiarism #11000122 **Prediction**

How is plagiarism detected? It is usually easy for lecturers to identify plagiarism within students' work. The University also actively investigates plagiarism in students' assessed work through electronic detection software called Turnitin. This software compares students' work against text on the Internet, in journal articles, and within previously submitted work (from LSBU and other institutions) and highlights any matches it finds.

Options: 1) distinguish 2) realizes 3) finds 4) based on 5) given 6) against 7) submitted 8) compares 9) through

126) Human Brain #11000118 **Prediction**

We now know through the work of neuroscientists that the human brain is wired to mimic other people, and this mimicry involves actual involuntary physiological experience in the observer.

Human beings tend to imitate actions that they see. Physiologically, our brains include mirror neurons, which react to actions that are seen as if we are doing the action ourselves. It is largely an unconscious and automatic experience. When we hear people speak, observe their vocal nuances, watch their posture, gestures, and facial expressions, etc, neural networks in our brains are stimulated by the "shared representations" generating feelings within us that reflect the experience of those we are observing.

Options: 1) display 2) react 3) nonsense 4) imitate 5) feeling 6) moderate 7) nuances 8) experience 9) reflect

127) Scientific Method #11000116 **Prediction**

The logic of the scientific method was set out by John Stuart Mill in 1843 and was named the method of difference. A simple example of what he meant by this is to take two glasses of water which are identical in every respect. Introduce a few drops of ink into one of these glasses. The water changes color! According to Mill's method of a difference, it is safe to assume that the change in the color of the water is due to the introduction of a new factor - the independent variable - in this case, the ink.

Options: 1) eligible 2) independent 3) identical 4) emergence 5) introduction 6) separate

128) Tokyo's Skyscrapers #11000114 **Prediction**

Team Lab's digital mural at the entrance to Tokyo's Skytree, one of the world's monster skyscrapers, is 40 meters long and immensely detailed. But however, massive this form of digital art becomes - and it's a form subject to rampant inflation - Inoko's theories about seeing is based on more modest and often pre-digital sources. An early devotee of comic books and cartoons (no surprises there), then computer games, he recognized when he started to look at traditional Japanese art that all those forms had something in common: something about the way they captured space. In his discipline of physics, Inoko had been taught that photographic lenses, along with the conventions of western art were the logical way of transforming three dimensions into two, conveying the real world on to a flat surface. But Japanese traditions employed "a different spatial logic", as he said in an interview last year with j-collabo.org, which is "uniquely Japanese".

Options: 1) along with 2) But 3) similar 4) So 5) different 6) in common 7) however 8) therefore 9) when

129) Material Cultural Studies #11000107 **Prediction**

The study of objects constitutes a relatively new field of academic enquiry, commonly referred to as material culture studies. Students of material culture seek to understand societies, both past and present, through careful study and observation of the physical or material objects generated by those societies. The source material for study is exceptionally wide, including not just human-made artifacts but also natural objects and even preserved body parts (as you saw in the film 'Encountering a body'). Some specialists in the field of material culture have made bold claims for its pre-eminence. In certain disciplines, it reigns supreme. It plays a critical role in archaeology, for example, especially in circumstances where written evidence is either patchy or non-existent. In such cases, objects are all scholars have to rely on in forming an understanding of ancient peoples. Even where written documents survive the physical remains of literate cultures often help to provide new and interesting insights into how people once lived and thought, as in the case of medieval and post-medieval archaeology. In analyzing the physical remains of societies, both past and present, historians, archaeologists, anthropologists and others have been careful to remind us that objects mean different things to different people.

Options: 1) including 2) power 3) different 4) same 5) scholars 6) especially 7) supreme 8) observation 9) exceptionally

130) The National Portrait Gallery (V2) #11000105 **Prediction**

The National Portrait Gallery's Conservation Department performs one of the Gallery's core functions, the long-term preservation of all Collection items, to make them accessible now and in the future. The Collection dates from the 8th century to the present day and consists of portraits in a variety of media, so the gallery employs Conservators with expertise in a range of disciplines, including Framing, Painting, Paper, Sculpture, and Photography.

Options: 1) expertise 2) experience 3) dates 4) contains 5) rise 6) major 7) consists 8) accessible 9) experts 10) core

131) The Job of a Doctor #11000101 **Prediction**

In the fast-changing world of modern healthcare, the job of a doctor is more and more like the job of a chief executive. The people who run hospitals and physicians' practices don't just need to know medicine. They must also be able to balance budgets, motivate a large and diverse staff, and make difficult marketing and legal decisions.

"The focus in medical school is to train good doctors, but part of being a good doctor is being a good manager," says Fawaz Siddiqi, a neurosurgical resident at the London Health Sciences Centre in Canada. "It's having a core understanding of how to work within the context of an organization." The desire to be a "good manager" is precisely the reason Dr. Siddiqi, who aspires one day to run a hospital, decided to go back to school. This past autumn he enrolled in a health-sector MBA program at the Ivey School of Business at the University of Western Ontario.

Options: 1) medicine 2) tablet 3) cans 4) diverse 5) legal 6) aspires 7) thinks

132) Education #11000095 **Prediction**

Education is generally considered to be a key factor in improving outcomes for Indigenous Australians, with many studies showing that improved health and socioeconomic status are directly linked to educational participation and achievement. There is a range of issues affecting participation in education for Indigenous Australians, including access to educational institutions, financial constraints, and community expectations.

Options: 1) health 2) access 3) way 4) impressing 5) linked 6) affecting

133) Studying Techniques #11000093 **Prediction**

In the process of studying these techniques, I learned something remarkable : that there's far more potential in our minds than we often give them credit for. I'm not just talking about the fact that it's possible to memorize lots of information using memory techniques. I'm talking about a lesson that is more general and in a way much bigger: that it's possible, with training and hard work, to teach oneself to do something that might seem really difficult .

Options : 1) difficult 2) minds 3) data 4) complicated 5) information 6) remarkable 7) easy

134) The University of Maryland #11000088 **Prediction**

The University of Maryland boasts 78 academic programs ranked in the top 25 nationally and 29 academic programs in the top 10 according to U.S. News and World report. By drawing top-notch faculty, attracting the brightest students, and investing in the quality of our academic programs, we are a force to reckon with on a national basis .

Options : 1) venture 2) investing 3) ranked 4) foundation 5) basis

135) The Alpine Newt #11000086 **Prediction**

The Alpine Newt is native to much of central, continental Europe and occurs up the coasts of northeast France through to Holland but it does not appear to have been native to the British Isles. As its name suggests it can be found in montane habitats up to 2,500 meters in altitude but it can also be abundant in lowlands, and it will use a variety of water bodies including both shallow and deep ponds and slow-flowing streams (Griffiths, 1995).

Options : 1) occurs 2) appear 3) takes place 4) suggests 5) variety 6) look

136) Dance #11000082 **Prediction**

Dance has played an important role in many musicals. In some cases , dance numbers are included as an excuse to add to the color and spectacle of the show, but dance is more effective when it forms an integral part of the plot. An early example is Richard Rodgers on Your Toes (1936) in which the story about classical ballet meeting the world of jazz enabled dance to be introduced in a way that enhances , rather than interrupts the drama.

Options : 1) samples 2) useful 3) cases 4) effective 5) enhances

137) Number and Form #11000080 **Prediction**

Number and form are the essence of our world: from the patterns of the stars to the pulses of the market, from the beats of our hearts to catching a ball or tying our shoelaces. Drawing on science, literature, history, and philosophy, and introducing geniuses and novelties from Alcibiades to Gauss, this inspiring book makes the mysteries of math accessible and its rich patterns textures brilliantly clear.

Options : 1) models 2) patterns 3) strikes 4) geniuses 5) beats 6) inspiring

138) Biological Systems (V2) #11000076 **Prediction**

Since biological systems with signs of complex engineering are unlikely to have arisen from accidents or coincidences, their organization must come from natural selection and hence should have functions useful for survival and reproduction in the environments in which humans evolved.

Options : 1) obligation 2) organization 3) complex 4) functions

139) Class Participation #11000073 **Prediction**

Because of the instructional methods, expected class participation, and the nature of the courses vary, no fixed number of absences is applicable to all situations. Each instructor is responsible for making clear to the class at the beginning of the semester his or her policies and procedures in regard to class attendance and the reasons for them.

Options: 1) semester 2) tutor 3) instructor 4) circumstances 5) situations 6) attendance

140) Critical Thinking #11000071 **Prediction**

Critical thinking involves looking at something you may have seen many times and examining it from many different angles and perspectives. It involves going beyond the obvious or beyond "easy" to seek new understanding and rare solutions. It involves looking at common issues with uncommon eyes, known problems with new skepticism, everyday conflicts with probing curiosity, and daily challenges with greater attention to detail.

Options: 1) clear 2) obvious 3) angles 4) resolution 5) solutions 6) curiosity 7) generosity

141) Vocal Cords #11000068 **Prediction**

Talking is not just an activity of the vocal cords; it is a way of connecting with ourselves and others that creates a culture of health and wellbeing. Specifically, speaking with healthcare practitioners about health worries, and more generally opening up to create more and stronger social ties, can have many positive benefits.

Options: 1) wellbeing 2) practitioners 3) others 4) ties 5) chains 6) participation

142) What is Music? #11000067 **Prediction**

What is music? In one sense, this is an easy question. Even the least musical among us can recognize pieces of music when we hear them and name a few canonical examples. We know there are different kinds of music and, even if our knowledge of music is restricted, we know which kinds we like and which kinds we do not.

Options: 1) examples 2) question 3) knowledge 4) confusion 5) information

143) Financial Crisis #11000066 **Prediction**

Since the beginning of the financial crisis, there have been two principal explanations for why so many banks made such disastrous decisions. The first is structural. Regulators did not regulate. Institutions failed to function as they should. Rules and guidelines were either inadequate or ignored. The second explanation is that Wall Street was incompetent, that the traders and investors didn't know enough, that they made extravagant bets without understanding the consequences.

Options: 1) accord 2) description 3) explanations 4) understanding 5) incompetent 6) inadequate

144) Breton Language #11000061 **Prediction**

It is difficult to tell precisely when the Breton language was born. As early as the VIth century the new country was established and known as "Lesser Britain", but for many centuries its language remained close to the one of Great Britain - very close even to the dialect spoken in the South West. The VIIIth century is the milestone where Breton, Cornish, and Welsh are considered as different languages.

Options: 1) believed 2) built 3) established 4) considered 5) remained

145) Daniel Harris #11000057 **Prediction**

Daniel Harris, a scholar of consumption and style, has observed that until photography finally supplanted illustration as the "primary means of advertising clothing" in the 1950s, glamour inherited less in the face of the drawing, which was by necessity schematic and generalized, than in the sketch's attitude, posture, and gestures, especially in the strangely dainty positions of the hands. Glamour once resided so emphatically in the stance of the model that the faces in the illustrations cannot really be said to have expressions at all, but angles or tilts. The chin raised upwards in a haughty look; the eyes lowered in an attitude of introspection; the head cocked at an inquisitive or coquettish angle: or the profile presented in sharp outline, emanating power of the severity like an emperor's bust embossed on a Roman coin.

Options: 1) inherited 2) supplanted 3) expressions 4) adhered 5) statements 6) coin 7) illustrations 8) embossed 9) added 10) made 11) books

146) Iceland Volcanic Events #11000055 **Prediction**

On average, Iceland experiences a major volcanic event once every 5 years. Since the Middle Ages, a third of all the lava that has covered the earth's surface has erupted in Iceland. However, according to a recent geological hypothesis, this estimate does not include submarine eruptions, which are much more extensive than those on the land surface.

Options: 1) experiences 2) interior 3) submarine 4) explodes 5) covered 6) spread

147) Melting Ice #11000054 **Prediction**

At the end of the last ice age, scientists believe that the melting ice disrupted the ocean currents in the North Atlantic and caused a drop in temperature of almost 5 degrees. Even though the rest of the planet was warming up, the North Atlantic region remained in a cold period for almost 1300 years. The same thing happened around 8000 years ago, when the cooling lasted about a hundred years, and it could happen again today.

Options: 1) roughly 2) though 3) caused 4) around 5) could 6) produced

148) Hippocrates #11000053 **Prediction**

Hippocrates allowed observation, rationality, and his own genuine respect for his patients to guide his practice. Using the scientific method, he carefully recorded his patient's symptoms and responses to treatments and used the data gathered to evaluate and prescribe the most successful regimens. His prestige as a great medical practitioner, educator, and author helped spread these ideals of rational medicine throughout the ancient world.

Options: 1) rational 2) responses 3) gathered 4) practitioner 5) lead 6) recorded 7) guide 8) reaction

149) Accounting #11000051 **Prediction**

While accounting focuses on the day-to-day management of financial reports and records across the business world, finance uses this same information to project future growth and to analyze expenditure in order to strategize company finances. By studying this major you get to have a better insight on the market, with the right knowledge and skills acquired you should be able than when you graduate to advise others in making strong investments. This major will help you gain the responsibility of predicting and analyzing the potential for profit and growth, assessing monetary resources, utilizing accounting statistics and reports, and also looking externally for future funding options.

Options: 1) reports 2) analyze 3) knowledge 4) records 5) analyzing 6) information 7) investigate

150) Musical #11000049 **Prediction**

One of the most popular forms of theatre is musical. Combining drama, dance, and music, the musical has been around for over a century, and in that time has kept pace with changing tastes and social conditions, as well as advances in theatre technology. Many modern musicals are known for their spectacular sets, lighting, and other effects.

Options: 1) increases 2) hobbies 3) advances 4) tastes 5) sets 6) century

151) E-learning #11000048 **Prediction**

E-learning is a new way forward. We believe passionately in e-learning. Our innovative approach opens up new opportunities for busy professionals that simply did not previously exist. The chance to combine a prestigious Master's program with a demanding professional and personal life. Our small virtual classrooms facilitate intensive interaction and collaboration among professionals from all over the world.

Options: 1) passionately 2) interaction 3) life 4) existence 5) chance 6) opportunities 7) occasion

152) Event Management #11000047 **Prediction**

Event management is particularly challenging from an operational viewpoint. In many cases, events are staged on sites where everything has been set up over a 24-hour period, with all elements carefully synchronized. In contrast, many events are years in the planning: large convention bids are often won five years before the event is held. For the very competitive bidding process, budgets need to be developed and prices quoted, requiring a good understanding of market, economic, and political trends, as well as consumer choices. This long-term view is the basis of strategic management, which is covered in Part 1 and focuses on the event concept, feasibility of the event, legal compliance, and financial management. Marketing is a critical success factor and another important topic of this first section, many events (sporting, cultural, and arts) involving long-term sponsorship arrangements with key industry players. Relationship building is particularly challenging since there are so many stakeholders involved in events, including government agencies at many levels. Part 1 will look at all these aspects, including strategic risk, before moving on to the second part where operational planning and implementation will be covered in detail.

Options: 1) challenging 2) success 3) achievement 4) competitive 5) opposing 6) arrangements 7) synchronized

153) Hot Jupiter #11000045 **Prediction**

Giant exoplanets, like the so-called 'hot Jupiters' that are similar in characteristics to the solar system's biggest planet and orbit very close to their host stars, are excellent targets for astronomers in their search for extrasolar worlds. The size and proximity of these planets are easy to detect as they create a large decrease in brightness when passing in front of their parent stars.

Options: 1) features 2) astronomers 3) characteristics 4) detect 5) find

154) London's National Portrait Gallery #11000044 **Prediction**

London's National Portrait Gallery is currently celebrating the fifty-year career of photographer Sandra Lousada. The twenty-one portraits on display key figures in literature, film, and fashion from the early 1960s. Subsequent to the acquisition of forty portraits by Lousada, the display at The National Portrait Gallery highlights shots were taken between 1960 and 1964, many of which feature in Lousada's book Public Faces Private Places (2008). Formal commissioned portraits are shown alongside behind-the-scenes photographs taken on film sets and unguarded portraits of sitters captured at home.

Options: 1) career 2) number 3) figures 4) profession 5) photographs 6) Subsequent 7) feature

155) Life in UK #11000037 **Prediction**

Life in the UK 2012 provides a unique overview of well-being in the UK today. The report is the first snapshot of life in the UK to be delivered by the Measuring National Well-being program and will be updated and published annually. Well-being is discussed in terms of the economy, people, and the environment. Information such as the unemployment rate or a number of crimes against the person is presented alongside data on people's thoughts and feelings, for example, satisfaction with our jobs or leisure time and fear of crime. Together, a richer picture of 'how society is doing' is provided.

Options: 1) updated 2) set 3) Life 4) goal 5) leisure 6) range 7) busy 8) number 9) hordes 10) data

156) Pullman #11000036 **Prediction**

Built-in 1880 on 4,000 acres of land outside of the Chicago city limits, Pullman, Illinois, was the first industrial planned community in the United States. George Pullman, of the Pullman Railroad Car Company, built the south residential portion of the company town first, which contained 531 houses, some of which stand today more or less as they did originally.

Options: 1) houses 2) factories 3) soil 4) community 5) land

157) Language #11000035 **Prediction**

Language comes so naturally to us that it is easy to forget what a strange and miraculous gift it is. All over the world members of our species fashion their breath into hisses and hums and squeaks and pops and listen to others do the same. We do this, of course, not only because we like the sounds but because details of the sounds contain information about the intentions of the person making them. We, humans, are fitted with a means of sharing our ideas, in all their unfathomable vastness. When we listen to the speech, we can be led to think thoughts that have never been thought before, and that never would have occurred to us on our own. Behold, the bush burned with fire, and the bush was not consumed. Man is born free, and everywhere he is in chains. Emma Woodhouse, handsome, clever, and rich, with a comfortable home and happy disposition, seemed to unite some of the best blessings of existence. Energy equals mass times the speed of light squared. I have found it impossible to carry the heavy burden of responsibility and to discharge my duties as King without the help and support of the woman I love.

Options: 1) humans 2) occurred 3) species 4) similarity 5) comparing 6) intentions 7) same 8) risen 9) sharing

158) Carl Friedrich Gauss #11000034 **Prediction**

Gauss was a child prodigy. There are many anecdotes concerning his precocity as a child, and he made his first ground-breaking mathematical discoveries while still a teenager. At just three years old, he corrected an error in his father's payroll calculations, and he was looking after his father's accounts on a regular basis by the age of 5. At the age of 7, he is reported to have amazed his teachers by summing the integers from 1 to 100 almost instantly (having quickly spotted that the sum was actually 50 pairs of numbers, with each pair summing to 101, total 5,050). By the age of 12, he was already attending gymnasium and criticizing Euclid's geometry.

Options: 1) reviewed 2) discoveries 3) researchers 4) anecdotes 5) corrected 6) instantly 7) closely

159) Corn People #11000033 **Prediction**

Descendants of the Maya living in Mexico still sometimes refer to themselves as the corn people. The phrase is not intended as a metaphor. Rather, it's meant to acknowledge their abiding dependence on this miraculous grass, the staple of their diet for almost nine thousand years. Forty percent of the calories a Mexican eats in a day comes directly from corn, most of it in the form of tortillas. So when a Mexican says I am maize or corn walking, it is simply a statement of fact: The very substance of the Mexican body is to a considerable extent a manifestation of this plant.

Options: 1) acknowledge 2) stable 3) declaration 4) metaphor 5) manifestation 6) implicit 7) staple 8) stage

160) Moths and Light #11000032 **Prediction**

Why are moths fatally attracted to the light? One solution is that the moths use light to navigate. This explanation, however, doesn't tell us why in some of the moth's species, only males are highly attracted. What's more, if navigation could probably only happen to the species that migrate, a moth is not a migratory species. Yet most of the time such moths are not migrating. Indeed most species do not migrate at all and thus have no need of navigation.

Options: 1) Improvement 2) Each behavior 3) solution 4) more 5) navigate 6) predict 7) Yet 8) however

161) Psychoanalytic and Behaviorist #11000030 **Prediction**

Elements of both the psychoanalytic and behaviorist theories arrange in modern approaches to personality. Advances in neuroscience have begun to bridge the gap between biochemistry and behavior, but there is still a great deal that needs to be explained. Without a consistent understanding of personality, how can we begin to categorize risk-takers? If we cannot, we will be unable to compare their genes with those of others.

Options: 1) categorize 2) set 3) media 4) arrange 5) confront 6) sort 7) compare 8) bridge

162) Films #11000024 **Prediction**

The universality of story. Feature films are narratives - they tell stories. Even films based on true events will fictionalize them in order to produce drama, to telescope time, to avoid being filled up with too many minor characters, or simply to be more entertaining. Even in the current welter of special-effect movies, feature films are usually summarized by their plots - in their first 'treatment' (or outline of the script idea), in the advance publicity, in the TV guide, in reviews, and in conversations. Films may differ from other kinds of narrative-literary fiction or television drama, for instance - in the medium used and the representational conventions. They do, however, share with literary fiction and television drama the basic structure and functions of narrative. Much work has been done by researchers in the field known as 'narratology' on exactly what constitutes the structures and functions of the narrative. Their conclusions are of great use to students of the feature film.

Options: 1) share 2) narratives 3) minor 4) candid 5) people 6) true 7) makeup 8) kinds 9) split 10) conclusions

163) Ideas #11000023 **Prediction**

First, new ideas are the wheels of progress. Without them, stagnation reigns. Whether you're a designer dreaming of another world, an engineer working on a new kind of structure, an executive charged with developing a fresh business concept, an advertiser seeking a breakthrough way to sell your product, a fifth-grade teacher trying to plan a memorable school assembly program, or a volunteer looking for a new way to sell the same old raffle tickets, your ability to generate good ideas is critical to your success.

Options: 1) preparation 2) generate 3) idea 4) marks 5) feet 6) assembly 7) accountant 8) stagnation reigns 9) engineer 10) executive

164) Clones #11000018 **Prediction**

Clones of an Eastern cottonwood (*Populus deltoides*) in the Bronx and other city spots grew to double the biomass of clones planted outside small towns upstate or on Long Island, says Jillian Gregg, now of the Environmental Protection Agency's western-ecology division in Corvallis, Ore. The growth gap comes from ozone damage, she and her New York colleagues report. Ozone chemists have known that concentrations may spike skyscraper high in city air, but during a full 24 hours, rural trees actually get a higher cumulative ozone exposure from urban pollution that blows in and lingers. A series of new experiments now show that this hang-around ozone is the overwhelming factor in tree growth, the researchers say in the July 10 *Nature*. "This study has profound importance in showing us most vividly that rural areas pay the price for urban pollution," says Stephen P. Long of the University of Illinois at Urbana-Champaign. "This work should be a wake-up call," he adds.

Options: 1) planted 2) ozone 3) concentrations 4) urban 5) blows 6) overwhelming 7) rural 8) pay 9) price 10) spend

165) Complementary Therapies #11000010 **Prediction**

Complementary therapies - such as those practiced by naturopaths, chiropractors and acupuncturists - have become increasingly popular in Australia over the last few decades. Interest initially coincided with enthusiasm for alternative lifestyles, while immigration and increased contact and trade with China have also had an influence. The status of complementary therapies is being re-visited in a number of areas: legal regulation; the stances of doctors' associations; their inclusion in medical education; and scientific research into their efficacy.

Options: 1) practiced 2) increase 3) decades 4) field 5) efficacy 6) enthusiasm 7) times 8) ambition 9) theorized 10) influence

166) Fertility #11000009 **Prediction**

Low fertility is a concern for many OECD countries as they face the prospect of population aging. This article makes comparisons between Australia and seven other OECD countries in fertility rates between 1970 and 2004. Changing age patterns of fertility are also compared and show that for most of the countries, women are postponing childbirth and having fewer babies. The associations of women's education levels and rates of employment with fertility are also explored.

Options: 1) patterns 2) sense 3) gaps 4) notions 5) accelerating 6) associations 7) postponing 8) comparisons

167) American People #11000008 **Prediction**

The American People: Creating a Nation and a Society examines U.S. history as revealed through the experiences of all Americans, both ordinary and extraordinary. With a thought-provoking and rich presentation, the authors explore the complex lives of Americans of all national origins and cultural backgrounds, at all levels of society, and in all regions of the country.

Options: 1) materials 2) origins 3) events 4) regions 5) beliefs 6) experiences

168) Marshall McLuhan #11000006 **Prediction**

McLuhan's preeminent theory was his idea that human history could be divided into four eras: the acoustic age, the literary age, the print age, and the electronic age. He outlined the concept in a 1962 book called The Gutenberg Galaxy, which was released just as the television was starting to become popular. He predicted the world was entering the fourth, electronic age, which would be characterized by a community of people brought together by technology. He called it the "global village", and said it would be an age when everyone had access to the same information through technology. The "global village" could be understood to be the internet.

Options: 1) divided 2) outlined 3) predicted 4) access 5) released 6) highlighted 7) will 8) closed 9) submerged 10) described

1) Skilled Trades In Canada #25000226 New Prediction

Skilled trades play a pivotal role in Canada's economy and society. They encompass various professions, including electricians, plumbers, welders, and carpenters, which are essential for infrastructure development, manufacturing, and day-to-day living. The Canadian government actively encourages individuals to pursue careers in skilled trades through initiatives like apprenticeship programs and financial incentives. This is driven by an increasing demand for skilled workers due to retiring baby boomers and evolving industries.

One notable program is the Red Seal, which sets a national standard for trade skills and allows certified individuals to work across provinces with ease. Moreover, immigration policies favor skilled trade workers, making it a viable path for those seeking opportunities in Canada. Pursuing a career in skilled trades not only ensures job security but also offers competitive salaries and growth potential. In short, skilled trades are vital for Canada's development and provide a rewarding career choice for many.

2) New Employee Orientation #25000215 New Prediction

New Employee Orientation is a critical process that helps newcomers integrate into their workplace smoothly and effectively. The primary purpose of this session is to familiarize employees with the organization's mission, values, and work culture, ensuring they align with company goals. During orientation, participants are introduced to key policies and procedures, such as attendance, workplace safety, and performance expectations, which provide clarity about their responsibilities.

Another essential aspect of the session is acquainting employees with available resources, such as IT support, training programs, and wellness initiatives, to enhance their productivity and well-being. Additionally, orientation often includes introductions to team members and managers, encouraging collaboration and fostering a sense of belonging.

Interactive activities, like team-building exercises or Q&A sessions, are commonly incorporated to make the experience engaging and memorable. Overall, New Employee Orientation plays a vital role in setting the foundation for a successful journey within the organization by equipping employees with essential tools and knowledge.

3) Washing Food #25000232 Prediction

Food safety largely hinges on proper cleaning, and it is important to know that not all foods are cleaned the same way. Some foods, like leafy greens, berries, and raw meats, should be kept clean. These items often come into contact with dirt, pesticides, or bacteria during cultivation or processing, so a thorough rinse is necessary. On the other hand, some foods, such as root vegetables like potatoes and beets, can only have their outside parts washed with cold water. Their skins act as a natural barrier, and washing the exterior with a brush is enough to remove surface grime. Then there is pre-washed produce. Many supermarkets sell items like bagged salads and pre-cut melons that have already been cleaned. These are labeled as safe to eat without additional washing, so there is no need to rinse them again. For fruits and vegetables with peels, such as bananas, oranges, and cucumbers, use cold water to wash the outside. Cold water helps prevent the loss of nutrients and keeps the produce fresh. If you buy packaged food, always read the label carefully. It will clearly indicate whether the product needs washing. If it is pre-washed or marked "ready to eat," doing nothing is the best course of action to avoid introducing new contaminants.

4) Father Guidance #25000230 Prediction

Today, I'd like to talk about the relationship between a father and his son, a topic that has been receiving growing attention from psychologists and educators. Many experts now believe this bond plays a crucial role in shaping a child's emotional and social development.

A father is often seen as someone who teaches his son important values, and one of the main lessons he passes on is responsibility. Through daily interactions and guidance, the father helps his son understand what it means to make decisions, face challenges, and take ownership of his actions.

Another key point discussed is safety. A father works hard to make sure his son is safe, especially in the early years. However, safety doesn't mean sheltering the child from everything. Instead, the father allows his son to take risks, explore the world outside, and try new experiences. The difference is that the father always ensures there is a secure place for the son to return to, both physically and emotionally.

Throughout the talk, the idea of safety is mentioned repeatedly, highlighting how fathers balance protection with independence as their sons grow and learn.

5) Railway Pass #25000229 Prediction

The Railpass is a special type of transit card for train travel. A Railpass allows passengers to use many trains across a large network, usually within a country or even across several countries. One of the main benefits of having a Railpass is that it can save you money. In addition to unlimited or flexible train access, the Railpass also offers discounts on other travel-related services, such as bus connections, museums, or local attractions. However, travelers need to plan carefully before using the pass. Since not all trains require reservations, and some may be very busy during holidays, it is a good idea to check the schedule and book ahead when needed. Some Railpasses also have time limits, so knowing the travel dates in advance can help avoid problems. Overall, a Railpass can be a smart and convenient option for people who plan to travel by train often.

6) Threatening with losses #25000227 Prediction

Research in behavioral psychology highlights that people are often more motivated by the fear of losing something than by the possibility of gaining a reward. This idea, known as loss aversion, suggests that the emotional impact of a potential loss is stronger than the satisfaction of a potential gain. For instance, individuals are more likely to take action when told they could lose money, health, or opportunities, rather than when encouraged with possible benefits. This principle is widely applied in areas such as marketing, health campaigns, and education. Statements like "you could lose your progress" tend to drive better results than "you could improve your outcome." The underlying reason is that humans are naturally more sensitive to threats than to rewards, which affects how decisions are made. Framing information in terms of what might be lost, rather than what could be gained, can therefore be a more effective strategy in influencing behavior and encouraging change.

7) Phone Interview #25000225 Prediction

Phone interviews are a common initial step in the recruitment process, offering employers and candidates the chance to assess each other before an in-person meeting. These interviews are convenient and cost-effective, especially for remote or long-distance candidates. A phone interview typically focuses on assessing a candidate's qualifications, experience, and communication skills. Common questions may include inquiries about the candidate's background, strengths, weaknesses, and reasons for interest in the role.

Preparation is key for success in a phone interview. Candidates should research the company, review the job description, and prepare thoughtful answers to potential questions. It's also important to choose a quiet location, ensure a reliable phone connection, and have any relevant documents like a resume or notes on hand.

Since non-verbal cues are absent, clear and concise communication becomes even more critical. A phone interview allows both parties to evaluate fit efficiently, making it a valuable tool in the hiring process.

8) Railway Cards #25000224 Prediction

Railway cards are a convenient option for frequent travelers, offering flexibility and cost savings. These cards often provide benefits such as discounted fares, priority booking, or access to special seating areas, making them particularly useful for commuters and long-distance travelers. Many railway systems offer different types of cards tailored to specific needs, such as student passes, senior citizen discounts, or family travel cards.

One of the key advantages of railway cards is their ability to simplify travel planning. By preloading funds or purchasing subscription-based cards, passengers can reduce the need for individual ticket purchases, saving both time and effort. Additionally, railway cards often come with loyalty programs that reward consistent usage, adding more value for travelers.

Despite their advantages, it is important for users to read the terms and conditions carefully to understand eligibility and usage limitations. Railway cards have become an efficient solution for making train travel more affordable and accessible across various demographics.

9) Park Cleaning #25000223 Prediction

Park cleaning plays a crucial role in maintaining a healthy and welcoming environment for public use. Regular cleaning keeps parks free from litter and debris, helping to protect wildlife and improve the overall appeal of the area. Clean parks encourage activities such as jogging, cycling, and picnicking, making them enjoyable and safe spaces for community members of all ages.

The cleaning process involves tasks such as removing waste, sweeping pathways, and trimming overgrown plants. It also includes inspecting and repairing facilities like benches, playgrounds, and restrooms to ensure they remain functional and safe. Community members can contribute by properly disposing of waste and participating in cleanup initiatives organized within their neighborhoods.

Overall, park cleaning benefits both individuals and the environment, offering cleaner, safer, and more attractive spaces where people can relax and engage in recreational activities.

10) Train Ticket #25000222 **Prediction**

Purchasing a train ticket is a straightforward but essential part of planning any journey by rail. Train tickets provide information such as the departure time, arrival time, train number, and seat allocation, ensuring that passengers have a smooth and organized travel experience. Tickets can be purchased through a variety of channels, including ticket counters at railway stations, official websites, or mobile applications, providing convenience for travelers.

Additionally, modern technology has introduced e-tickets, which can be stored digitally on smartphones, reducing the need for physical copies and enhancing accessibility. However, passengers must always ensure that they verify the travel details on their tickets, such as the date and station, to avoid disruptions during the journey. Some rail services also require passengers to carry valid identification for ticket verification.

In summary, train tickets are not only a proof of purchase but also a vital tool for ensuring a seamless and enjoyable travel experience, particularly in today's fast-paced and digitized world.

11) Preparation for the Academic Year #25000221 **Prediction**

Preparing children for the academic year involves a combination of practical and emotional readiness to ensure a smooth transition back to school. On the practical side, parents and caregivers should help organize school supplies such as books, stationery, and uniforms, and ensure children have a dedicated space for studying at home. Setting up consistent daily routines, including regular sleep schedules and study times, promotes discipline and time management, which are critical for success.

Emotional preparation is equally important. Open conversations about any concerns children might have, such as adjusting to new teachers or coping with challenging subjects, can ease anxiety and build confidence. Encouraging goal-setting for the upcoming year also fosters a positive mindset and enthusiasm for learning.

Additionally, schools often assist by conducting orientation programs or providing information on extracurricular activities. By addressing both the emotional and logistical aspects of readiness, children are better equipped to embrace the academic year with confidence and focus.

12) Recruitment Types #25000220 **Prediction**

Recruitment is a critical process for organizations to identify and hire the best candidates for specific roles. There are two primary types of recruitment: internal and external. Internal recruitment involves selecting candidates from within the organization. This approach is cost-effective, encourages employee loyalty, and allows companies to leverage existing talent. Common methods include promotions, transfers, or employee referrals.

In contrast, external recruitment focuses on attracting candidates from outside the organization. It expands the talent pool and brings fresh perspectives and skills to the team. Methods of external recruitment include job advertisements, recruitment agencies, campus hiring, and online job portals. However, this approach can be more time-consuming and expensive compared to internal recruitment.

Both recruitment types have their advantages and limitations, and organizations often use a combination of the two to meet their specific needs. The ultimate goal is to ensure a fair, efficient, and effective process that aligns with the company's long-term objectives.

13) Computers #25000219 Prediction

Computers have become an integral part of modern life, revolutionizing the way people work, communicate, and access information. They are powerful tools used in almost every field, from education and healthcare to business and entertainment. By automating repetitive tasks and processing large amounts of data efficiently, computers save time and improve productivity. For instance, businesses rely on computers for tasks like data analysis, financial management, and communication through emails and video conferencing.

In education, computers enhance learning by providing access to vast online resources, interactive tools, and virtual classrooms. However, their widespread use also brings challenges, such as dependency, cybersecurity risks, and the digital divide, which limits access for some communities. Despite these challenges, continuous advancements in computer technology, such as artificial intelligence and quantum computing, promise to bring even greater benefits in the future. Overall, computers are indispensable, shaping modern society and driving innovation in countless ways.

14) First Day at school #25000218 Prediction

The first day at school is a significant milestone in a child's life, marking the beginning of their formal education journey. For many students, this experience can be a mix of excitement and nervousness as they encounter new surroundings, teachers, and classmates. Schools often organize special activities or orientation sessions to help students settle in and feel welcome. These sessions introduce them to classroom rules, school facilities, and daily routines, creating a sense of familiarity and comfort.

Parents also play an important role by preparing their children emotionally and practically for this transition, ensuring they feel confident. While some students adapt quickly, others may take time to adjust, and teachers often provide extra support to help them integrate smoothly. The first day at school is not just about academics but also about building social connections and fostering a love for learning. It sets the foundation for a child's growth, both intellectually and emotionally.

15) Labeling fruits and vegetables #25000217 Prediction

Labeling fruits and vegetables is an essential practice in the agricultural and retail industries, playing a critical role in maintaining transparency and meeting consumer demands. Labels provide valuable information such as the product's origin, nutritional content, and whether it is organic or genetically modified. These details help consumers make informed purchasing decisions, particularly as awareness about health and sustainability grows.

Moreover, clear and accurate labeling ensures compliance with food safety regulations, which protect public health and build trust between producers and consumers. It also facilitates traceability, allowing authorities to quickly identify the source of any food-related issues, such as contamination. However, there are challenges involved, including the cost of implementing labeling systems and the potential for misleading claims.

Despite these concerns, labeling fruits and vegetables remains a vital component of the global food supply chain, empowering consumers with knowledge while promoting accountability and safety in the marketplace.

16) Hairdresser #25000214 Prediction

Hairdressers play an important role in society by providing not only grooming services but also creating a space where clients feel comfortable and confident. A skilled hairdresser combines technical expertise with creativity, offering services such as cutting, coloring, and styling hair to meet individual needs. Communication is a key part of the job, as understanding a client's preferences and providing suitable recommendations are essential for customer satisfaction.

The profession requires continuous learning due to evolving trends and techniques. Hairdressers often attend workshops or training sessions to stay updated with the latest styles and tools. While the job can be physically demanding, with long hours spent on their feet, many hairdressers find it rewarding to help people enhance their appearance and boost their self-esteem. Additionally, the growing demand for personalized and high-quality services has made hairdressing a dynamic and essential profession in the beauty industry.

17) Farming in Canada #25000213 Prediction

Farming in Canada is a cornerstone of the country's economy and plays a vital role in global food production. Canada's vast land area and diverse climate allow for the cultivation of a wide range of crops, including wheat, canola, and barley, which are some of its major agricultural exports. The prairie provinces, such as Saskatchewan and Alberta, are especially known for large-scale grain farming.

Despite its success, Canadian farming faces several challenges. Harsh winters and unpredictable weather conditions can disrupt crop cycles, while concerns about soil degradation and sustainability require innovative farming practices. Technological advancements, such as precision agriculture and genetically modified crops, have helped Canadian farmers improve efficiency and adapt to these challenges.

Additionally, labor shortages and market fluctuations continue to impact the agricultural industry. However, with a focus on sustainable practices and global competitiveness, farming in Canada remains a critical sector contributing to both the national economy and international food security.

18) Clean and Safe Produce #25000171 Prediction

It is essential to wash fruits and vegetables thoroughly before consumption to remove dirt, pesticides, and potential contaminants. Spinach and lettuce, in particular, are often recommended to be washed multiple times due to their intricate leaves. This process helps ensure they are clean and safe to eat. Some grocery stores offer special washers designed for fruits and vegetables, providing added convenience for shoppers concerned about food safety. These washers use techniques like gentle agitation or water filtration to cleanse products effectively without damaging their delicate textures or nutrients. This extra step can reassure consumers that their fresh produce is not only visually clean but also free from harmful residues. By making washing a routine part of food preparation, consumers can significantly reduce their exposure to potentially harmful substances, promoting better health and peace of mind. Taking these precautions ensures that fruits and vegetables not only taste better but also contribute to overall well-being.

19) Water #25000145 Prediction

Today I want to talk about water and the law that surrounds drinking water, to talk about its quality, talk about what your rights are to clean water, to also give you a sense of what key threats are to drinking water, what your exposure might be, and what we might do about it, both legally but also personally. Water is a critical component of our environment and our bodies. Your body is close to seventy percent water. You can go for several weeks, two to three on average, without food. You can only go for about four minutes without air. And you can go for maybe four or five days without water before you die. So water is absolutely critical. And one of the key arguments I want to make today is that it's a largely neglected area of environmental law given the rapid increase in our knowledge about.

20) Global Warming #25000122 Prediction

Global warming might seem like a botanical boon. After all, milder temperatures and more carbon dioxide and nitrogen should feed flora. But a ten year study has found that any initial positive effects on plant growth from climate change may soon disappear. The report is in the journal Nature Climate Change. Researchers transplanted vegetation from four grassland ecosystems to lower, warmer elevations. They also modified the precipitation at the transplant sites based on altered rainfall estimates. For the first year, the plants did great, producing more biomass and churning out more oxygen for us. But their productivity went down for the rest of the decade. What happened? Warming did speed up the nitrogen cycle, which should have increased nitrogen's availability as plant fertilizer. But a lot of the nitrogen left the soil through run-off or uptake into the atmosphere. In addition, productive native plants began to lose out to species that thrive at higher temperatures, but are less productive than the natives. Warmer temperatures may spur immediate growth, but in the long term, we can't expect plants to like it hot.

21) The Republic #25000081 Prediction

Why should we read the Republic? I imagine lots of students asked this question to me when they're given it as a set book at the beginning of their university course, but in fact there are many good reasons to read the Republic. And first one I would pick on is just that it is immensely readable. It's not Plato did not write philosophy like a dry text book. He wrote it like a living conversation. The whole of the Republic which is fairly fat book is a living conversation written in short almost soundbite type answers, but nevertheless, developing some very important ideas so my first answer then we should read the Republic just because it is readable. It is readable it was written by a genius and it's worth reading. It's easy to read. It's not difficult. But then there's also obviously the thoughts, the content of the book and he's asking this absolutely fundamental question why should we bother to be good, what's in it for us effectively. It seems when we look at the world, it looks as though injustice pays. It looks as though crime pays or as the good people get trodden down. So, Plato addresses this absolutely fundamental question why should we be good. I'm not going to tell you his answer. Read the book.

22) Modern Food #25000079 Prediction

One of the things that was going on during the Great Depression was the beginning of this sort of modern food technology that rules, you know, the way Americans eat today. That is there are a lot of canned foods were being - coming onto the market at the time. And also, refrigerators were really becoming very, very popular during the Great Depression, both in cities and in rural parts of the country. Thanks to electrification, the Rural Electrification Administration, people could buy appliances. You know, farmers could buy appliances. And that meant frozen foods were becoming big. And, you know, at that time, few people could afford to buy them during the early years of the Great Depression. But, you know, gradually, these things picked up. And so this was, like, the sort of beginning of the era when people were starting to think about supermarkets with rows and rows of freezer cases and rows and rows of canned foods.

23) Globalization #25000075 Prediction

So, I think you all know what I mean by globalization, don't you? This is the idea that we all live in a global village. With instant communications, we can share ideas, and consume cultural artifacts from countries all over the world, just by going into the Internet and all dream up, basically. The world is shrinking. In terms of speeds, it is accelerating, but in terms of distance, it's shrinking. What do I mean by detraditionalization? I mean the disappearance or the erosion, for the better word to use, the erosion of traditional cultures, of conventional ways of doing things, of conventional moralities. More and more young people around the world are rejecting the culture they grow up in, and it's probably a little bit cruel. But some imitating a Hollywood model of society, rather than the one which they inherit from their local tradition background.

24) Emotions #25000074 Prediction

What is the fight or flight response? To really understand the fight or flight response? It helps to think about the role of emotions in our lives. Many of us would prefer to focus on our logical thinking nature and ignore our sometimes trouble with some emotions. But emotions do have a purpose. Our most basic emotions like fear, anger, or disgust. They are actually vital messengers. They evolved as signals to help us meet our basic needs for self preservation and safety, and it would be really dangerous to be indecisive about a threat to our survival. So the brain runs on information from our senses through the most primitive, reactive parts of our brains. First, these areas of the brain control instinctive responses, and they don't do too much thinking this most primitive part of our brain. It communicates with the rest of our brain and our body to create signals we can't ignore easily, powerful emotions and symptoms. The fight or flight response is a physiological response triggered when we feel the strong emotions, such as fear. Fear is the normal emotion to feel in response to a dangerous threat. Fear also has a close relative, and we call this anxiety the fight or flight response evolved to enable us to react with appropriate actions, to run away or to fight, or sometimes even to freeze, to be less visible to a target. So it's important to think of this as a normal response, but one which could be treated too often by things which we perceive as a threat to us.

25) Human Nature #25000058 Prediction

Hi everyone, My name is Jay Chunche, I teach in the division of eco science at Ewha Woman's University. Far too many people often say things like animals do this but we don't. Or this animal does this and that animal does this, but the humans don't do things like that. Those statements have some assumptions like we are not animals. When we say animals do this, animals do that, we often assume they are not animals. If we are not animals, what are we? Are we plants or trees or flowers? No, we are not. Then okay we are not plants? And Are we microorganisms, really tiny microscopic things? No, we are not. Then the natural conclusion must be we are not living things. That's not true. Yes, we are animals and I see animals in us and I see humans in animals. So I'm going to talk about the animal behavior and human nature. In order to understand human nature, we can look into animals eyes and animal behaviors and find something about what made us, who we are.

26) Sound Receptors #25000056 Prediction

You've got sound receptors in your ear, and they are beautiful. We're not going to talk about them at any length, but there's little flappy, these little spiky things going along in your ear and they can translate vibrational energy coming from your ear, hurting your eardrum, being translated into a vibration into the fluid in your ear into a physical motion of these little receptors there into an electrical motion, into an electrical signal that goes into your ear. So, all of that, all of that's pretty impressive stuff. We are not going to talk about the details of it, but I invite some of you who want to learn more about this, particularly MIT students I think to find receptors really quite remarkable kinds of devices.

27) Language and Culture #25000003 Prediction

Language is not just a tool for communication; it's a living, breathing entity that evolves with our culture. As societies grow and change, so too does our language, reflecting our values, beliefs, and experiences. The impact of technology on language is immense. Social media and digital communication have introduced new dialects, symbols, and even languages, like emojis. This evolution, while fascinating, also presents challenges. There's a growing divide between generations and cultures in terms of linguistic understanding. Additionally, the rapid evolution of language raises concerns about the preservation of linguistic heritage. Efforts to document and preserve endangered languages are more crucial than ever, as they hold the key to understanding our collective human history. The future of language evolution is uncertain, but one thing is clear: it will continue to be a mirror reflecting the ever-changing face of human society.

28) Role of Technology #25000002 Prediction

In today's world, technology's impact on education is undeniable. Integrating digital tools into the learning process has revolutionized how we acquire knowledge and skills. For instance, online learning platforms have made education accessible to a wider audience, breaking geographical barriers. People from remote areas can now access courses from top universities, bridging the gap between different regions and communities. Additionally, technology has enabled personalized learning experiences. Educational software and applications can adapt to individual learning styles and paces, catering to the unique needs of each student. This approach fosters a more inclusive and effective learning environment, accommodating diverse learning abilities and preferences. In conclusion, technology's integration into education is not just a trend but a significant evolution in the teaching and learning process, offering accessibility and personalization like never before.

29) Park Cleanup #25000001 Prediction

Hello everyone! well.... thank you so much for coming to help with cleaning the park. um.... I really appreciate you taking your time out of your busy schedules to be here. So.... today's cleanup will be divided into three different tasks, and we will be having three different teams for these tasks. um.... The first task is picking up the trash which is laying around.....so.... this will be headed by our friend Michael, so.... if you want to be a part of that job you can go and join Michael, um.... the one who is standing by the tree and the second task is removing the plants that do not belong here.....so....we have a few pictures of the plants that do not belong here and maybe because they are not supposed to be here or they will harm the environment so this team will be headed by Karen,so....if you want to do that you can join Karen and the last task will be to paint and repaint the tables and chairs in the park and make them look good and this one will be headed by me. so if you like to do this, you can join my team and um.... then we'll start with the cleanup. Okay!

1) Puffin Behavior and Conservation #15000388 **New Prediction**

The puffin is a small seabird known for its colorful beak and unique behaviors. It lives in colonies on rocky cliffs near the ocean. This bird allows other species to share its habitat without much conflict. However, it must be cautious of predators like seagulls that might steal its food. The puffins cooperate with each other to protect their nests from danger. A corporate organization recently started a campaign to keep these birds safe by raising awareness. They introduced a new conception of wildlife protection to the public. This led to increased consumption of eco-friendly products to support the cause.

Script:

null

2) Evolution of American Cars #15000413 **Prediction**

For many years, most vehicles in the U.S. were gas powered, relying on fossil fuels for energy. These cars contributed to air pollution and climate change. The urgency to find cleaner alternatives led to new innovations in the automotive industry. Engineers began designing sleek electric cars that were both fast and stylish. They also developed hydrogen cars, which use a renewable energy source to reduce emissions. These advancements are helping create a more sustainable future.

Script:

null

3) Art Gallery Exhibition #15000393 **Prediction**

At the art gallery, every painting on display captured the attention of visitors. The artist used bold techniques to create dramatic effects. One piece featured a huge portrait of a person's face that filled the entire canvas. The lighting in the artwork created a striking shadow across the image. This made the painting look more realistic and emotional. Many people admired the creativity.

Script:

null

4) Driving License Test Preparation #15000389 **Prediction**

The driving school is always busy during the summer as many students sign up for lessons. They want to get their licenses before school starts. The instructor is responsible for teaching them how to drive safely. They are requiring each student to demonstrate their ability to handle the car properly. This ensures everyone is ready for the road. Passing the test is a big achievement for new drivers.

Script:

null

5) Free Phone #15000380 Prediction

The free phone is the Samsung U740 handheld mobile device, which has MP3, video, text-message and instant-message functions. "Students will earn text messages, talk time, and other rewards, such as free ring tones, music downloads, or event tickets, through their performance in school, "The Education Department said in a news release ." Students will be evaluated on the basis of attendance and behavior, along with three other indicators - such as homework completion, class participation , or course grades - chosen by educators and customized to address academic priorities in their specific schools. Administrators will have access to significant new data on student performance, allowing them to track the short-term indicators that contribute to larger goals of boosting student achievement and graduation rates.

Script:
null

6) Climate Change #15000372 Prediction

In recent years, the phenomenon of climate change has garnered widespread attention. It is widely acknowledged that human activities, particularly the burning of fossil fuels and deforestation , have significantly contributed to this global issue. Scientists around the world are urgently researching sustainable solutions to mitigate the effects of climate change. Among these, renewable energy sources such as solar and wind power are increasingly being viewed as vital components of a more sustainable future. However, transitioning to these cleaner energy sources requires substantial investment and international cooperation.

Script:
null

7) Burial #15000369 Prediction

So between 4,000 and 3,000 BC the Mesopotamian Samarian cultures do not practice any kind of burial. And then, about 3,000, in the early Dynastic Period, these burials start to reappear, and they reappear with a certain amount of conspicuous consumption, and this is the context for the royal burials at Ur. OK, so, the royal cemetery consists of quite a number of pits, so these are the excavation workers who are coming down into the pits. So you get some sense of how really deep and how really difficult it was to construct these chambers .

Script:
null

8) Earth Warning #15000296 Prediction

The Earth is warning. Almost all the Arctic summer ice may have melted by the end of the century, claims the Intergovernmental Panel on Climate Change the IPCC. The upside. Access to an estimated quarter of the world's oil and gas resources and the opening of the fabled Northwest Passage. The downside. The Arctic wilderness is lost as neighboring countries , Denmark and Greenland, Russia, Canada, Norway, and the United States all race to share in the bounty.

Script:
null

9) Belief #15000215 Prediction

Belief is the human capacity to imagine, to be creative, to hope and dream, to infuse the world with meanings, and to cast our aspirations far and wide. Limited neither by personal experience nor material reality. Believing is a commitment, an investment, a devotion to possibilities. Beliefs permeate neurobiologies, bodies and ecologies acting as dynamic agents in evolutionary processes. The human capacity for belief, the specifics of belief, and I, and our diverse belief systems shape, structure and alter our daily lives, our societies, and the world around us.

Script:

null

10) Library Catalog #15000214 Prediction

In this tutorial, we will show you how to find specific journal articles using the library catalog. The university subscribes to over 18,000 journals across a variety of subjects, most of which are available electronically to find a specific journal article using a library catalog. We need to search by the journal name as individual article titles are not listed in the catalog.

Script:

null

11) Life on Mars #15000213 Prediction

The thing that makes it difficult is because even if life had evolved on Mars, the chances of being preserved are very small. If we use Earth as a reference and our planet is teeming with life, yet it rarely preserves evidence of life of the fossil record. And the focus now is on exploring for habitable environments. If you're looking for water, a source of energy, either solar energy or thermal energy or chemical energy, and then organic carbon, assuming life as we know it on Earth based on carbon. So those are sort of the three things that we're looking for in the course of our mission.

Script:

null

12) Green Chemistry #15000212 Prediction

Green chemistry is a concept designed to develop technologies that allow chemistry to be practiced with minimal environmental damage or in an environmentally compatible way. It's meant to cover both chemical processes and chemical products. The center, if you would, was set up about seven or eight years ago, and the idea was to provide a hub of activities that covered fundamental research work, industrial collaboration, and educational developments. We work with schools, on public projects, and networking. We network out to well over 1000 people around the globe.

Script:

null

13) Corporate Culture #15000211 Prediction

For a long time now, it's been a widely accepted and rarely questioned belief that a strong corporate culture goes hand in hand with success. However, a recent study has cast some doubt on this principle. After all, the authors of the report argue for culture. A company's build-up may be strong, but wrong. There is little point in every employee marching to the same tune if they are all marching in the wrong direction.

Script:

null

14) Malaria #15000210 Prediction

Also, malaria is something that is a very complex disease with this complex life cycle. That means that if you're going to eliminate it, you have to be able to target cute parasites and humans. You have to be able to target parasites in the mosquitoes, that mosquito population. And so that requires a lot of resources. It requires really good planning and a health system across all these different levels. And so I think the political capital that you need for that, the educational infrastructure you need for that, the economic resources you need for that are quite a challenge.

Script:

null

15) Water Crisis #15000187 Prediction

Now that story's been scorched, as only part of contingency planning. But it was a symptom of the dramatic turn of events in South Australia, and it flushed out other remarks from water academics and people like Tim Flannery, indicating that things were really much worse than had been foreshadowed, even earlier this year. So is Adelaide, let alone some whole regions of South Australia, in serious bother? Considering that the vast amount of its drinking water comes from the beleaguered Murray, something many of us outside the State may not have quite realized. Is their predicament something we have to face up to as a nation?

Script:

null

16) Cars in America #15000186 Prediction

There are some 250 million cars in America, 250 million cars in the country with just over 300 million people. And most of those vehicles, of course, are gas-powered. This poses a huge challenge given the limited supplies of oil and the growing urgency of the global warming crisis. But there is good news, according to our guests today. And that is we have the know-how and the technology to build sleek, fast automobiles that don't use gasoline. These vehicles of tomorrow are powered by hydrogen, electricity, bio-fuels, and digital technology. And they already exist. So what's stopping us from putting them on the roads? Our guests today will help answer that.

Script:

null

17) Sunflowers by Van Gogh #15000176 Prediction

These two paintings, both called "Sunflowers," are generally accepted as the finest of several depictions of the thick-stemmed, nodding blooms that Van Gogh made in 1888 and 1889 during his time in Arles. The first is now in the collection of the National Gallery in London, and the second is in the Van Gogh Museum in Amsterdam. Van Gogh referred to this work as a repetition of the London painting. But art historians and curators have long been curious to know how different this "repetition" is from the first. Should it be considered a copy, an independent artwork, or something in between? An extensive research project conducted over the past three years by conservation experts at both the National Gallery and the Van Gogh Museum has concluded that the second painting was "not intended as an exact copy of the original example," said Ella Hendriks, a professor of conservation and restoration at the University of Amsterdam, who was the lead researcher on the project.

18) British Library #15000175 Prediction

To begin with, you should be standing on the main floor of the British Library. British Library is situated in the Euston road next to some pipe crustacean press, in the foyer to the left of the information desk. It was a large white staircase. Follow this up towards the gallery at the top of the stairs pause and look to your left for attention. This is Robert Cotton, born in 1570, and died in 1631. Cotton was a member of parliament but he's mainly known as a great antiquarian collector of manuscripts. It is the covenant we have a great depth and the survival of many English manuscripts.

Script:

null

19) Rebuilding #15000171 Prediction

Rebuilding carbon-rich agricultural soils is the only real productive, permanent solution to taking excess carbon dioxide from the atmosphere. She's frustrated that scientists and politicians don't see the same opportunities she sees. This year, Australia will emit just over 600 million tonnes of carbon. We can sequester 685 million tonnes of carbon by increasing soil carbon by half a percent on only 2% of the farms. If we increased it on all of the farms, we could sequester the whole world's emissions of carbon.

Script:

null

20) Online Dating #15000164 Prediction

Bruch and her colleague Mark Newman studied "Who swapped messages with whom", on a popular online dating platform in the month of January 2014. They categorized users by desirability using PageRank, one of the algorithms behind search technology. Essentially, if you receive a dozen messages from desirable users, you must be more desirable than someone who receives the same number of messages from average users. Then they asked: How far "out of their league" do online daters tend to go when pursuing a partner? "I think people are optimistic realists". In other words, they found that both men and women tended to pursue mates just 25 percent more desirable than themselves. "So, they're being optimistic, but they're not..they're..they're also umm..taking into account their own relative position within this overall desirability hierarchy." And the study did have a few more lessons for people on the market: "I think one of the take-home messages from this study is women could probably afford to be more aspirational in their mate pursuit."

null

21) Trading in Financial Markets #15000163 Prediction

Financial markets swung wildly yesterday in frenzied trading market by further selling of equities and fears about an unraveling of the global carry trade. At the same time trading in the European credit markets in London was exceptionally heavy as traders frantically reassessed their appetite for risk-prompting wild swings in the prices of the key derivatives. It was the third day of frenetic activity in the European credit markets, suggesting that equity market swings were prompting a wider repositioning of investors in a host of asset classes.

Script:

null

22) Ocean Currents #15000160 Prediction

For many years, the favorite horror story about abrupt climate change was that a shift in ocean currents could radically cool Europe's climate. These currents, called the overturning circulation, bring warm water and warm temperatures north from the equator to Europe. Susan Lozier, an oceanographer at Duke University, says scientists have long worried that this ocean circulation could be disrupted.

Script:
null

23) William Shakespeare #15000158 Prediction

For all his fame and celebration, William Shakespeare remains a mysterious figure with regards to personal history. There are just two primary sources for information on the Bard: his works, and various legal and church documents that have survived from Elizabethan times. Naturally, there are many gaps in this body of information, which tells us little about Shakespeare the man.

Script:
null

24) Laurence Stephen Lowry #15000157 Prediction

Laurence Stephen Lowry RBS RA was an English artist. Many of his drawings and paintings depict Pend Lebury, Lancashire, where he lived and worked for more than 40 years, and also Salford and its surrounding areas. Lowry is famous for painting scenes of life in the industrial districts of North West England in the mid-20th century. He developed a distinctive style of painting and is best known for his urban landscapes peopled with human figures often referred to as matchstick man. He painted mysterious unpopulated landscapes, brooding portraits and the unpublished "marionette" works, which were only found after his death.

Script:
null

25) Central Patterns Generator #15000156 Prediction

In animals, a movement is coordinated by a cluster of neurons in the spinal cord called the Central Patterns Generator (CPG). This produces signals that drive muscles to contract rhythmically in a way that produces running or walking, depending on the pattern of pulses. A simple signal from the brain instructs the CPG to switch between different modes, such as going from a standstill to walking.

Script:
null

26) US High School #15000154 Prediction

A majority of U.S. high school students say they get bored in class every day, and more than one out of five has considered dropping out, according to a survey released on Wednesday. The survey of 81,000 students in twenty-six states found two-thirds of high school students complain of boredom, usually because the subject matter was irrelevant or their teachers didn't seem to care about them.

Script:
null

27) Integrated Ticket #15000152 Prediction

Well in 2004 we integrated ticketing in South East Queensland, so we have introduced a paper ticket that allowed you to travel across all the three modes in South East Queensland, so bus, train and ferry and the second stage of integrated ticketing is the introduction of a Smart Card, and the Smart Card will enable people to store a value so to put a value on the card, and then to use the card for traveling around the system.

Script:
null

28) Neo-Latin #15000151 Prediction

Those of you who've never heard the term neo-Latin may be forgiven for thinking it's a new South American dance craze. If you're puzzled when I tell you it has something to do with the language of Romans, take heart, over the years many classes who have confessed they are not really sure what it is either. Some have assumed that they are so-called 'Late-Latin', written at the end of the Roman Empire. Others have supposed it must have something to do with the middle ages. Or perhaps it's that pseudo-Latin which my five and seven-year-old boys seem to have gleaned from the Harry Potter books, useful for spells and curses that they zip one another with makeshift paper ash ones. No, in fact, neo-Latin is more or less the same as the Latin that was written in the ancient world, classical Latin. So, what's so new about it?

Script:
null

29) Traffic Jams #15000150 Prediction

For the first time, Japanese researchers have conducted a real-life experiment that shows how some traffic jams appear for no apparent reason. They placed the 22 vehicles on a single track and asked the drivers to cruise around at a constant speed of 30 kilometers an hour. At first, traffic moves smoothly, but soon, the distance between cars started to vary and vehicles clumped together at one point on the track, but the jams spread backward around the track, like a shockwave at a rate of about 20 kilometers an hour. Real-life jams move backward at about the same speed.

Script:
null

30) Patriotism #15000148 Prediction

The effect of the first difference is, on the one hand, to refine and enlarge the public views, bypassing them through the medium of a chosen body of citizens, whose wisdom may best discern the true interest of their country, and whose patriotism and love of justice will be least likely to sacrifice it to temporary or partial considerations.

Script:
null

31) The Ocean #15000146 Prediction

The ocean has been getting bluer, according to a study published in the journal Nature. But that's not really good news for the planet It means that the plants that give the ocean its green tint aren't doing well. Scientists say that's because the ocean has been getting warmer.

Script:
null

32) Beautiful Buildings #15000145 **Prediction**

Along the way, we have built unashamedly beautiful buildings, two of which have won and been runner-up in the prestigious United Nations World Habitat Award: the first time an Australian building has received that international honor. We rely on older concepts of Australian architecture that are heavily influenced by the bush. All residents have private verandas which allows them to socialize outdoors and also creates some "defensible space" between their bedrooms and public areas. We use a lot of natural or soft materials and build beautifully landscaped gardens.

Script:
null

33) Nanotechnology #15000143 **Prediction**

What is nanotechnology? Well, a report that was put together by a combination of the Royal Society and the Royal Academy of Engineering that came out last summer, identified two topics. Nano-science is the study of the phenomenon and the manipulation of materials at atomic, molecular, and macromolecular scales, where properties differ significantly from those on a larger scale. Nanotechnologies are the design characterization, production, and application of structures, devices, and systems by controlling shape and size at the nanometer scale. I'll talk a little bit more in a moment about what a nanometer is, but loosely speaking people think of nanotechnologies as being sort of a hundred nanometers or less.

Script:
null

34) Earth-Like Planets #15000069 **Prediction**

Scientists are looking for Earth-like planets around other stars. But one way to limit the search can be to figure out where an Earth-like planet cannot exist and eliminate those types of systems. In a new study, astronomers turned their attention to so-called hot Jupiters. These are Jupiter sized planets that have an orbit of only about three days. The scientists looked at 63 hot Jupiters to see if they could find evidence for any nearby Earth-like planets. They found none. But it could be that the companion planets are too small in size or mass or just aren't detectable with the current techniques. So the researchers then turned to hot Neptunes, and warm Jupiters these are Jupiters with slightly longer orbits. They found only 2 potential nearby planets among 222 hot Neptunes. And of the 31 warm Jupiters, five showed evidence of a companion. The findings are in the Proceedings of the National Academy of Sciences. The current theory is that hot Jupiters formed and then migrated in towards their stars. The researchers say that the migration might have "disrupted the formation of Earth-like planets. Good thing our Jupiter kept its cool.

Script:
null

35) Having Dogs #15000060 Prediction

Dogs are not just man's best friend. Previous studies have shown that kids with dogs are less likely to develop asthma. Now a new study may show how if results from mice apply to us. The work was presented at a meeting of the American Society for Microbiology. The study tests what's called the hygiene hypothesis. The idea is that extreme cleanliness may actually promote disease later on. Researchers collected dust from homes that had a dog. They fed that house dust to mice. They then infected the mice with a common childhood infection called respiratory syncytial virus or RSV. Mice who ate the dog dust were protected against RSV infection symptoms, like inflamed, mucus coated airways, suggesting exposure helped them stave off the virus. Those mice also had more diverse communities of gut bacteria than control mice did. The researchers say our pet's microbes may colonize our gut too, and help the immune system learn to respond to infections. That's important because when kids develop severe RSV their risk of asthma goes up. So next time buster sheds all over the couch, think of it as a bonus dose of probiotics.

- 54) The director of the gallery was grateful for the anonymous donation. #20001403 Prediction
- 55) The other book isnt thorough but its more insightful. #20001397 Prediction
- 56) The results of the study underscored the discoveries from early detections. #20001384 Prediction
- 57) The earths atmosphere is primarily composed of oxygen and nitrogen gases. #20001291 Prediction
- 58) The rising temperature is changing the wildlife population. #20001271 Prediction
- 59) Education and training provide important skills for the labor force. #20001262 Prediction
- 60) Novelists write things that they know about. #20001204 Prediction
- 61) The college operates a system of continuous assessment. #20001178 Prediction
- 62) To gain access to the facilities student cards must be shown. #20001167 Prediction
- 63) The digital camera has some advantages over traditional film. #20001155 Prediction
- 64) Graduates from this course generally find jobs in the insurance industry. #20001154 Prediction
- 65) Much of this research is carried out in the laboratory. #20001150 Prediction
- 66) At university students can make friends for life. #20001141 Prediction
- 67) The study center in the library has all the latest technology. #20001125 Prediction
- 68) In my opinion the car should be repaired soon. #20001102 Prediction
- 69) There is a lot of traffic in the morning. #20001096 Prediction
- 70) A world renowned expert on economics and marketing will give a lecture. #20001089 Prediction
- 71) The weather used to be lovely at this time of the year. #20001083 Prediction
- 72) A good architectural structure should be usable durable and beautiful. #20001081 Prediction
- 73) Calculators are not allowed during the examination. #20001079 Prediction
- 74) A pie chart provides a useful means of data comparison. #20001078 Prediction
- 75) You must call your doctor to make an appointment. #20001072 Prediction
- 76) Please close the door behind you when you leave the room. #20001068 Prediction
- 77) Before preparing food please make sure to wash your hands. #20001061 Prediction
- 78) We should have a meeting to discuss and report. #20001060 Prediction
- 79) Air pollution is a serious problem all over the world. #20001059 Prediction
- 80) The teacher explained the homework to the class. #20001053 Prediction

- 81) Please move us to the meeting room for the next hour. #20001049 Prediction
- 82) The students will meet their new teachers after the summer vacation. #20001048 Prediction
- 83) Continuing students will be receiving the necessary application forms. #20001047 Prediction
- 84) Please turn off the light to save energy. #20001043 Prediction
- 85) You can keep your bags in the backroom. #20001041 Prediction
- 86) Blue whales are the largest animals to have ever lived. #20001038 Prediction
- 87) The food crops require a large quantity of water and fertilizer. #20001037 Prediction
- 88) The restrooms are down the hall to the right. #20001035 Prediction
- 89) Remember the prestigious election of student membership has strict eligibility criteria. #20001030 Prediction
- 90) Human beings compete with other species for resources and space. #20001023 Prediction
- 91) Communication skills have become more important in recent years. #20001020 Prediction
- 92) Food containing overabundant calories supplies little or no nutritional value. #20001011 Prediction
- 93) New media journalism is an interesting field of study. #20000991 Prediction
- 94) New media is to find new areas to study. #20000969 Prediction
- 95) At that time few people moved from towns to villages. #20000962 Prediction
- 96) Rail transport is becoming more and more popular. #20000958 Prediction
- 97) The employment demand in engineering is increasing rapidly. #20000922 Prediction
- 98) Many diseases on the list have been eradicated. #20000845 Prediction
- 99) Academic libraries across the world are steadily incorporating social media. #20000844 Prediction
- 100) Understanding visual media has never been more challenging. #20000838 Prediction
- 101) The rising sea temperature is a sign of climate change. #20000808 Prediction
- 102) Relying on natural ability will not get you far in science. #20000799 Prediction
- 103) Linguistics is the scientific study and analysis of language. #20000798 Prediction
- 104) All dissertations must be accompanied by a submission form. #20000780 Prediction
- 105) All of the assignments should be submitted in person to the faculty office. #20000776 Prediction
- 106) All the educational reforms have been inadequately implemented. #20000771 Prediction
- 107) An archaeologists new discovery stands out in previously overlooked foundations. #20000764 Prediction

- 108) His appointment with the Minister of Culture seems like a demotion. #20000752 Prediction
- 109) Employment figures are expected to be improved in the next few years. #20000743 Prediction

- 138) The business policy seminar includes an internship with a local firm. #20000505 Prediction
- 139) The cafeteria features sandwiches salads soup fish and chicken. #20000504 Prediction
- 140) The commissioner will portion the funds among all the sovereignties. #20000494 Prediction
- 141) The dance department stages elaborated performances each semester. #20000490 Prediction
- 142) The elective course provides engineering students with construction concepts and practice. #20000479 Prediction
- 143) Sugar is a compound that consists of carbon oxygen and hydrogen. #20000478 Prediction
- 144) The faculty staff is very approachable helpful and extremely friendly. #20000471 Prediction
- 145) The massive accumulation of data was converted to a communicable argument. #20000444 Prediction
- 146) The most popular courses still have a few places left. #20000438 Prediction
- 147) New media has transcended traditional national boundaries. #20000432 Prediction
- 148) The new paper challenged many previously accepted theories. #20000431 Prediction
- 149) Assignments should be submitted to the department office before the deadline. #20000387 Prediction
- 150) New materials and techniques are changing the way of architecture. #20000373 Prediction
- 151) There are some doubts about whether these events actually occurred. #20000372 Prediction
- 152) There is clearly a need for further research in this field. #20000368 Prediction
- 153) Traffic is the main cause of air pollution in many cities. #20000337 Prediction
- 154) We are able to work in a team. #20000325 Prediction
- 155) We can work together to achieve higher educational standards. #20000323 Prediction
- 156) We cant consider any increase in our price at this stage. #20000322 Prediction
- 157) When parents talk to children the tense is simplified. #20000308 Prediction
- 158) Distance learning allows you to develop a career around your commitments. #20000287 Prediction
- 159) Please click on the logo above to enter the site. #20000257 Prediction
- 160) One of the election promises is to decrease the income tax. #20000243 Prediction
- 161) Dealing with the growing population is a challenge for many governments. #20000238 Prediction

- 162) Those who are considering a career in marketing should attend the talk. #20000229 Prediction
- 163) The visiting guest used to be the lecturer of this department. #20000224 Prediction
- 164) Farming methods around the world have greatly developed recently. #20000222 Prediction
- 165) Mature students usually adapt to university life extremely well. #20000220 Prediction
- 166) The industrial revolution in Europe was driven by steam technology. #20000219 Prediction
- 167) Our courses help improve critical thinking and independent learning skills. #20000195 Prediction
- 168) The university should invest in technology methods designed to support learning. #20000184 Prediction
- 169) An architect requires problem solving skills and an eye for design. #20000173 Prediction
- 170) Global connections increased in academic communities thanks to social media. #20000172 Prediction
- 171) Students who are successful have a good strategy for learning. #20000168 Prediction
- 172) Agricultural development is vital for poor rural areas. #20000165 Prediction
- 173) You need to put these books on the table over there. #20000164 Prediction
- 174) The news is not received until the following week. #20000161 Prediction
- 175) Muscle cells bring parts of the body closer together. #20000160 Prediction
- 176) A series of observations were carried out in the classroom. #20000159 Prediction
- 177) You will study two core and three optional modules. #20000156 Prediction
- 178) A series of lectures which were shown to us in economics have been recorded. #20000152 Prediction
- 179) Banks charge interest on the money they lend to customers. #20000141 Prediction
- 180) The student shop has a range of stationery. #20000140 Prediction
- 181) This essay will argue technology does more good than harm. #20000132 Prediction
- 182) We hold the visiting hours throughout the year for students. #20000127 Prediction
- 183) Many vocational courses in the institution are funded by private enterprises. #20000125 Prediction
- 184) Graphs and charts allowed data more easily to be understood. #20000124 Prediction
- 185) A strong liner is used to measure distance and baseline. #20000123 Prediction
- 186) Courses are assessed by group work and individual assignments. #20000121 Prediction
- 187) The library will be closed for staff training tomorrow morning. #20000120 Prediction
- 188) Scientists recognized the different ice types according to the water molecule content. #20000119 Prediction

- 189) You will learn how to rationally assess your arguments. #20000115 Prediction
- 190) Social media is criticized for causing internet addiction. #20000111 Prediction
- 191) It takes a long time to walk to university. #20000109 Prediction
- 192) Essays and assignments are spread out across the academic year. #20000108 Prediction
- 193) The area has a number of underwater habitats in species. #20000106 Prediction
- 194) Measures must be taken to prevent the unemployment rate from increasing. #20000105 Prediction
- 195) Your statistical information depends on your raw data. #20000103 Prediction
- 196) The momentum is defined as the combination of mass and velocity. #20000102 Prediction
- 197) The researchers are disappointed that their materials are proved to be inconclusive. #20000101 Prediction
- 198) Requests for late submissions will not be accepted under any circumstances. #20000100 Prediction
- 199) Students should leave their bags on the table by the door. #20000099 Prediction
- 200) Slides and handouts can be downloaded after the lecture. #20000098 Prediction
- 201) Sugar is a compound including carbon hydrogen and oxygen items. #20000095 Prediction
- 202) The north campus car park could be closed on Sunday. #20000094 Prediction
- 203) Firm conclusions can be established through rigorous experiments. #20000089 Prediction
- 204) The coffee machine on the third floor is not working today. #20000086 Prediction
- 205) All medical students must clean their hands before entering the room. #20000083 Prediction
- 206) Your ideas are discussed depending on your seminar or tutorial. #20000082 Prediction
- 207) The bus for London will leave 10 minutes later than planned. #20000080 Prediction
- 208) The printers automatically print both sides of each page. #20000079 Prediction
- 209) Sound waves are unable to travel through the vacuum. #20000077 Prediction
- 210) The horizontal line on the graph indicates that there is no change. #20000074 Prediction
- 211) There is a wide perception that engineering is for boys. #20000071 Prediction
- 212) Archaeologists discovered tools and other artifacts near the tombs. #20000068 Prediction
- 213) Speak to your tutor if you need further assistance. #20000067 Prediction
- 214) The professor took a year off to work on her book. #20000065 Prediction
- 215) Key business partners are often engaged with expense accounts. #20000040 Prediction

- 216) Check the website if you are looking for discount textbooks. #20000039 Prediction
- 217) The unemployment rate has fallen to its lowest level in years. #20000032 Prediction
- 218) People provide the reports to support your idea in these arguments. #20000031 Prediction
- 219) Every student has a regular meeting with his or her personal tutor. #20000029 Prediction
- 220) The shipwreck of this year ruined some artifacts which were interested in historians. #20000026 Prediction
- 221) Gravity is the force that attracts two bodies from one another. #20000021 Prediction
- 222) Criminal charges will be brought against all of the men. #20000017 Prediction
- 223) Plants are able to continue growing throughout their lives. #20000013 Prediction
- 224) Castles were designed to intimidate both local people and the enemies. #20000009 Prediction
- 225) You need to hand in the essay next semester. #20000007 Prediction
- 226) A celebrated theory is still the source of great controversy. #20000003 Prediction
